## **Summary Form for Electronic Document Submittal**

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Sunset reservoir Project	
Lead Agency: City of Redlands	
Contact Name: Veronica Medina	
Email: vmedina@cityofredlands.org	Phone Number: 1-909-798-7584 x 6
Project Location: Redlands, California	San Bernardino County
City	County

Project Description (Proposed actions, location, and/or consequences).

The City of Redlands Municipal Utilities and Engineering Department proposes the construction of two new above ground factory-coated bolt carbon steel tank with an approximately 14 MG total capacity on City property, adjacent to the existing reservoir. The Proposed Project will develop on parcels 0300-451-25 and 0300-451-14, which will cover approximately 46% of the total City-owned parcels. One driveway will connect the existing water tank and Helen Court. The driveway will be constructed utilizing asphalt/gravel. Two parking spaces will be installed for maintenance purposes. The site will remain unmanned. The existing water tank will continue to function while the new reservoir tanks are constructed and will cease operations once the new reservoir tanks are in operation. Construction of the Proposed Project will require multiple workers using equipment such as loaders, pick-up trucks, backhoe, water truck for dust suppression, crane, asphalt paver, and excavators. Project materials will be staged within the existing vacant parcels currently managed by the City.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

## Biological Resources:

MM-1: A special-status plant species survey shall be conducted no more than XX weeks prior to construction at the location of the proposed water tanks.

MM-2: A preconstruction nesting bird survey shall be conducted prior to initiation of ground disturbing activities.

## Cultural Resources:

MM CUL-1: The City shall retain the services of a Qualified Archaeologist on-call throughout the Project.

MM CUL-2: Work activities shall be ceased in the event of the discovery of cultural resource.

MM CUL-3: If cultural resources are encountered during the Project, the Qualified Archaeologist shall prepare a report summarizing any and all prehistoric or historic archaeological finds.

## Geology and Soils:

MM PAL-1: Prior to issuance of a grading permit, the City shall be required to obtain the services of a Qualified Project Paleontologist to remain on call.

MM PAL-2: Project Paleontologist shall prepare a final paleontological mitigation report at the completion of all ground-disturbing activities.
