The project will remove and improve some existing hardscape to construct two dog park areas with artificial turf, a drinking fountain, a dog wash station, approximately two dog kennels, approximately four benches, and a shade structure. Drainage for the wash station will be connected to the existing sewer pipe. The existing path will be upgraded, and other areas will be improved with decomposed granite, concrete, asphalt, drainage rock, gravel, and fencing. Excavation to an anticipated depth of up to 1.5 feet will be needed for the improvements. Tree and vegetation trimming may be necessary. Construction best management practices will be implemented for air, water, and noise control such as storm drain inlet protection, dust control, and working during daytime hours.
