Present Land Use/Zoning/General Plan Designation: The project site is located within the Goetz Road right-of-way (ROW) which does not have a General Plan or zoning designation.

Project Description: The proposed project would construct a new 15-inch diameter trunk sewer within the right-of-way of Goetz Road, from Avenida Roble to Rock Canyon Drive. The endpoint for the existing trunk sewer in Goetz Road is the manhole located at the intersection of Goetz Road and Rock Canyon Drive. The proposed project would extend the trunk sewer, south to north, starting from the intersection of Goetz Road and Rock Canyon Drive to the intersection of Avenida Roble and Goetz Road, approximately 2,911 linear feet. The proposed project would also construct a new 8-inch sewer pipeline for collection of sewer laterals from properties fronting Goetz Road. The proposed 8-inch sewer would parallel the proposed 15-inch trunk sewer from approximately Canyon Heights Drive northerly for approximately 852 feet. To provide the necessary separation between the water and sewer systems, and for constructability purposes, the project would relocate the existing 8-inch waterline within Goetz Road five feet west of its current alignment starting just north of Canyon Heights Drive, and continuing northerly for approximately 1,000 feet.

Reviewing Agencies Checklist
