CERTIFICATION

All engineering and geologic information, conclusions, and recommendations in this document were prepared under the supervision of and reviewed by an Environmental Management Strategies, Inc. Professional Geologist in the State of California. Further and to the best of our professional knowledge and belief, the work was performed by professionals who meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and these professionals have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. Our investigation conforms to the U.S. Environmental Protection Agency's (EPA) Standards and Practices for All Appropriate Inquiries (AAI, 40 CFR Part 312) as well as ASTM International's (ASTM) Standard E 1527-21 titled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process".

June 12, 2023

Anthony F. Severini
President
Professional Geologist
No. 3852

Date

1 Executive Summary

Environmental Management Strategies, Inc. (EMS) is pleased to present this Phase I Environmental Site Assessment (Phase I ESA) for the property located at 15621, 15641 and 15661 Red Hill Avenue in Tustin, California 92780 (the “subject property”, see Figures 1 and 2). Centurion Plaza, LLC (Centurion) retained EMS on April 24, 2023, to perform the Phase I ESA in support of Centurion’s redevelopment/renovation of the subject property. Our investigation conforms to the U.S. Environmental Protection Agency’s (EPA) Standards and Practices for All Appropriate Inquiries (AAI, 40 CFR Part 312) as well as ASTM International’s (ASTM) Standard E 1527-21 titled “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”.

1.1 Background

The subject property currently consists of an L-shaped on 6.17 acres of land with three two-story commercial buildings and associated two-story parking structure, ground level asphalt parking and landscaping (see Figure 2). According to information provided to EMS by Centurion, the property will be developed with two new industrial buildings on the southern portion of the property approximately 49,000 and 93,000 square feet in size.

1.2 Scope of Work

EMS performed the following scope of work in support of developing this Phase I ESA:

- EMS reviewed previous reports documenting environmental conditions at the subject property.
- EMS performed a detailed investigation into the historical use of the subject property. Our historical investigation entailed the review of reasonably ascertainable documents from standard sources from the late 1800’s to the present.
- EMS conducted a review of reasonably ascertainable regulatory agency information regarding hazardous material use, disposal, and contaminated property information for the subject property and surrounding area. This review included a search for environmental liens as well as activity and use limitations (AULs) on the subject property.
- EMS contacted the following public agencies and utilities for additional information for the site: the EPA; the State of California Department of Toxic Substances Control (DTSC); the California Geologic Energy Management Division (CalGEM); the State of California Water Resources Control Board (SWRCB); the Santa Ana Regional Water Quality Control Board (RWQCB); the South Coast Air Quality Management District (AQMD); and, Orange County Health Care Agency.
- EMS was supplied with an ASTM E 1527-21 User Questionnaire completed by Mr. Mike Moshayedi, Manager with Centurion Plaza.
- EMS performed an inspection of the subject property on May 5, 2023.

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear

Suite 125

Irvine, CA 92618

Tel 949.679.9500

1.3 Results of Investigation

EMS performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 for the subject property located at 15621, 15641 and 15661 Red Hill Avenue in Tustin, California 92780. Any exception to, or deletions from, this practice are described in Section 5 of this report. EMS' Phase I ESA findings regarding *Recognized Environmental Conditions*, *Historical Recognized Environmental Conditions*, *Controlled Recognized Environmental Conditions* or *De Minimis Conditions* in connection with the subject property are summarized below:

Recognized Environmental Conditions:

- EMS retained Environmental Data Resources, Inc. (EDR) to perform a search of reasonably ascertainable information from databases for facilities with environmental records within the subject property vicinity. The information sources utilized by EDR included publicly available databases compiled by federal, state, tribal and local governmental agencies and proprietary databases available through EDR. The CA HIST UST database, which is a list of historical UST sites, was provided to EMS by EDR. This database listed a 12,000-gallon diesel underground storage tank owned by Dijavex, Inc at the adjacent address of 15551 Red Hill Avenue. This listing also included a link to a document titled State Water Resources Control Board Hazardous Substance Storage Container Information for Orange County. This document stated that a carbon steel, unlined, tar wrapped tank containing diesel was present at the adjacent property to the northeast. This document also states that the tank was installed in 1977 and had underground piping that used suction. Based on its proximity to the subject property and lack of available environmental records, this listing appears to be a *Recognized Environmental Condition*.
- The Facility and Manifest Data (HAZNET) database is created from information extracted from the copies of hazardous waste manifests received each year by the DTSC. According to this database that was supplied to EMS by EDR, Tustin Body Works and Fix Auto – Tustin disposed of unspecified solvent mixture, unspecified oil containing waste, other organic solids, aqueous solution with 10% or more total organic residues, waste oil and mixed oil. The database also listed Sterigenics US, LLC., as disposing of unspecified oil-containing waste, aqueous solution with <10% total organic residues, off-specification, aged, or surplus inorganics and other inorganic solid waste. The three adjacent sites for Tustin Body Works, Fix Auto – Tustin and Sterigenics appear to pose a *Recognized Environmental Condition* based on their proximity to the subject property and the disposal of hazardous wastes.

Historical Recognized Environmental Conditions (HREC):

- EMS did not identify any *Historical Recognized Environmental Conditions* associated with the subject property.

Controlled Recognized Environmental Conditions:

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear  Suite 125
Irvine, CA 92618 Tel 949.679.9500

- EMS did not identify any *Controlled Recognized Environmental Conditions* associated with the subject property.

Although indoor air quality is specifically listed as a non-scope consideration under Section 13.1.5.7 of ASTM E 1527-21, *Environmental Professionals* cannot eliminate migration of vapors from the ASTM E 1527-21 Phase I ESA scope of work as this would result in the Phase I ESA being non-AAI compliant. ASTM has released ASTM E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The Guidance is directed at identifying the likelihood for migrating vapors to encroach onto a target property creating a vapor encroachment condition (VEC). The potential findings of the ASTM E 2600-10 screening are the following:

- A VEC exists; or,
- A VEC does not exist.

ASTM E 2600-10 is a two Tier process. Tier 1 focuses on known or suspected contaminated properties identified during the Phase I ESA within an Area of Concern (AOC) about the target property. For volatile and semi-volatile organic compounds (VOCs and SVOCs), such as dry-cleaning chemicals and industrial solvents, the AOC is defined as 1/3 mile. For petroleum hydrocarbon chemicals such as gasoline the AOC is defined as 1/10 mile. The AOC can be shortened in the down- and cross-gradient directions if the groundwater flow direction is known. Dijavex, Inc., Tustin Body Works, Fix Auto – Tustin and Sterigenics US, LLC. were listed upgradient and within 1/10 mile from the subject property.

Tier 2 focuses on the contaminated plumes from the contaminated properties identified within the AOC and their proximity (critical distance) to the target property. The critical distance is 100 feet for VOCs and 30 feet for petroleum hydrocarbons. Based on the potentially upgradient location and lack of environmental reports for the adjacent properties of Dijavex, Inc., Tustin Body Works, Fix Auto – Tustin and Sterigenics US, LLC, a VEC does exist for the subject property.

Although not considered *Recognized Environmental Conditions* as defined by the EPA AAI rule and ASTM E 1527-21, EMS also noted the following potential environmental concerns and issues:

- Asbestos Containing Material (ACM) may be present in building materials such as floor tile, ceiling tile, wallboard, grout, etc. An ACM survey on buildings prior to remodeling by a certified asbestos contractor is recommended.

In summary, EMS identified *Recognized Environmental Conditions* and a *Vapor Encroachment Condition* that require further investigation. A Phase II Environmental Site Assessment (ESA) is recommended to determine if the adjacent properties listed above have impacted the soil vapor beneath the subject property. A Phase II ESA would require the installation of soil vapor probes and the collection and analysis of soil vapor samples along the Site's property boundary close to Dijavex, Inc. Tustin Body Works, Fix Auto – Tustin and Sterigenics US, LLC.

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Suite 125

Irvine, CA 92618

Tel 949.679.9500

2 Introduction

Environmental Management Strategies, Inc. (EMS) is pleased to present this Phase I Environmental Site Assessment (Phase I ESA) for the property located at 15621, 15641 and 15661 Red Hill Avenue in Tustin, California 92780 (the “Subject Property”, see Figures 1 and 2). Centurion Plaza, LLC (Centurion) retained EMS on April 24, 2023, to perform the Phase I ESA in support of Centurion’s redevelopment/renovation of the subject property.

2.1 Purpose

The purpose of this Phase I ESA is to identify *Recognized Environmental Conditions* as defined by the U.S. Environmental Protection Agency’s (EPA) Standards and Practices for All Appropriate Inquiries (AAI, 40 CFR Part 312) as well as the American Society for Testing and Materials (ASTM) Standard E 1527-21 titled “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”. The ASTM standard defines *Recognized Environmental Condition* as follows: “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment;(2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.” “A *de minimis condition* is not a *recognized environmental condition*.”

The EPA’s AAI and ASTM E 1527-21 practices are intended to permit the *User*, Centurion, to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (also known as “*landowner liability protections*,” or “*LLPs*”) that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial and customary standards and practices as defined at 42 U.S.C. § 9601(35)(B).”

In addition to *Recognized Environmental Conditions*, this Phase I ESA also reports on *Historical Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, De Minimis* conditions and other potential environmental concerns and issues (also known as *Business Environmental Risks*) such as Vapor Encroachment Conditions (VECs), asbestos-containing materials (ACM), polychlorinated biphenyl (PCB) containing electrical equipment, lead-based paint, radon, etc.

2.1.1 Special Terms and Conditions

Our investigation conforms to the EPA’s AAI rule and ASTM E 1527-21. This report was prepared by EMS solely for the use and benefit of Centurion, together with its affiliates, participants, successors and assigns. No other parties shall have any right to rely on this document. The use of this report is expressly controlled by the terms and conditions in the contract between Centurion and EMS.

2.1.2 Methodology

Mr. Anthony F. Severini and Mr. Ashley Flores of EMS performed the Phase I ESA. Mr. Severini is a State of California registered Professional Geologists with over thirty years of relevant, full-

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear Suite 125
Irvine, CA 92618  Tel 949.679.9500

time experience performing Phase I ESAs within several states throughout the United States. Mr. Flores holds a Bachelor of Science degree in Environmental Science and has over ten years of relevant, full-time experience performing Phase I ESAs.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Severini's and Mr. Flores' detailed qualifications are presented in Appendix A. EMS performed the following scope of work in support of developing this Phase I ESA:

- EMS performed a detailed investigation into the historical use of the subject property. Our historical investigation entailed the review of reasonably ascertainable documents from standard sources from the late 1800's to the present.
- EMS conducted a review of reasonably ascertainable regulatory agency information regarding hazardous material use, disposal, and contaminated property information for the subject property and surrounding area. This review included a search for environmental liens as well as activity and use limitations (AULs) on the subject property.
- EMS contacted the following public agencies and utilities for additional information for the site: the EPA; the State of California Department of Toxic Substances Control (DTSC); the California Geologic Energy Management Division (CalGEM); the State of California Water Resources Control Board (SWRCB); the Santa Ana Regional Water Quality Control Board (RWQCB); the South Coast Air Quality Management District (AQMD); and, Orange County Health Care Agency.
- EMS was supplied with an ASTM E 1527-21 User Questionnaire completed by Mr. Mike Moshayedi, Manager with Centurion Plaza.
- EMS performed an inspection of the subject property on May 5, 2023.

2.2 Site Description

The subject property is an L-shaped 6.17-acre piece of commercial land with three two-story buildings, an associated two-story parking structure, ground level asphalt parking and landscaping. According to information provided to EMS by Centurion, the property will be developed into two new industrial buildings on the southern portion of the property, approximately 49,000 and 93,000 square feet in size.

2.2.1 Site Location

The subject property is located at the southern corner of Red Hill Avenue and Bell Avenue at the addresses of 15621, 15641 and 15661 Red Hill Avenue, Tustin, California 92780. The subject property is located on an L-shaped, 6.17-acre size parcel, identified by parcel number 430-233-19.

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear Suite 125
Irvine, CA 92618  Tel 949.679.9500

2.2.2 Site and Vicinity Characteristics

The Site is in a commercial/industrial area within the City of Tustin. The subject property is bordered to the southwest and north by a combination of commercial and auto body shops. The areas to the south and southeast are part of the former Marine Corps Air Station (MCAS) and are currently empty.

2.2.3 Description of Structures, Roads and other Improvements

The subject property is an L-shaped 6.17-acre piece of commercial land with three two-story buildings, an associated two-story parking structure, ground level asphalt parking and landscaping. The office buildings and parking structure appeared to have been constructed in the mid-1980s with each building containing an elevator and surrounded by an asphalt parking lot and landscaping.

2.2.4 Information Reported by Property Engineers

Subject property information was provided by Ms. Juliet Hover, Senior Property Manager with RiverRock Real Estate Group. Pertinent information provided during the subject property visit is included in Section 4.

2.2.5 Current Uses of the Property

The subject property currently consists of three two-story commercial buildings and associated two-story parking structure, ground level asphalt parking and landscaping.

2.2.6 Past Uses of the Property

According to information reviewed by EMS the Subject property was previously vacant undeveloped land possibly utilized for agricultural purposes prior to the construction of the three buildings and parking structure on the property in the mid-1980s.

2.2.7 Past and Current Uses of Adjoining Properties

Based on information reviewed by EMS, the subject property vicinity was previously vacant undeveloped land possibly utilized for agricultural purposes prior to the construction of the former MCAS to the southeast sometime in the 1940s.

3 Records Review

EMS conducted a review of reasonably ascertainable and practically reviewable public information for the subject property and surrounding area. The information was supplied to EMS both by an outside contractor specializing in compiling such information and by direct contacts made by EMS.

3.1 Standard Environmental Records Sources: Federal, State, Tribal and Local

EMS retained Environmental Data Resources, Inc. (EDR) to perform a search of reasonably ascertainable information from databases for facilities with environmental records within the subject properties vicinity. The information sources utilized by EDR included publicly available databases compiled by federal, state, tribal and local governmental agencies and proprietary databases available through EDR. The EDR report was designed to assist parties seeking to meet the search requirements of the EPA's AAI rule and ASTM E 1527-21. The databases searched

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear

Suite 125

Irvine, CA 92618

Tel 949.679.9500

provide information on facilities with records including, but not limited to, the following potential environmental concerns: Resource Conservation and Recovery Act Small and Large Quantity Hazardous Waste Generators (RCRA-SQGs and RCRA-LQGs); the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS); registered above-ground storage tanks (ASTs); registered underground storage tanks (USTs); historical USTs (HIST USTs); leaking USTs (LUSTs); non-tank spills of hazardous materials; active and inactive landfills; and facilities engaged in the investigation and cleanup of known releases of hazardous materials. In general, the EPA's AAI rule and ASTM E 1527-21 require a larger search radius for databases with information of greater environmental concern (such as LUSTs, landfills and hazardous substance release facilities) than databases with information of lesser environmental concern (such as registered ASTs, USTs, RCRA-SQGs and RCRA-LQGs).

The EPA's AAI rule and ASTM E 1527-21 require the Phase I ESA to include searches for environmental cleanup liens as well as AULs including institutional and engineering controls, recorded under federal, state, tribal, or local laws. The AAI rule and ASTM E 1527-21 allows that either the prospective property owner or the environmental professional may conduct these searches.

EDR's regulatory agency database search included searches for liens and AULs from the following four EPA databases: Federal Superfund Liens (NPL LIENS); CERCLA Lien Information (LIEN2); Engineering Controls Sites (US ENG CONTROLS); and properties with Institutional Controls (US INST CONTROLS). EDR's regulatory agency database search also included a search of the DTSC's Deed Restriction Listing (DEED) and Lien Holder (LIENS) databases. Specific information regarding the databases searched, corresponding search radii, and search results are presented in EDR's report entitled, *EDR Radius MapTM with GeoCheck[®]*, included in Appendix B.

EMS also retained EDR to perform an environmental lien search for the subject property. A search was conducted for parcel number 430-233-19. The search included a search for environmental liens and other activity and use limitations (AULs). If a site has an environmental lien and/or AUL that would indicate that residual levels of hazardous substances and/or petroleum products might be present, and that unrestricted use of the site may not be acceptable. The results of this lien search are presented in EDR's report entitled, *EDR Environmental LienSearchTM Report*, included in Appendix C. The *EDR Property Tax Map Report* is included in Appendix D.

The subject property was not identified on the NPL LIENS, LIEN2, US ENG CONTROLS, US INST CONTROLS, DEEDS or LIENS databases. The deed for parcel number 430-233-19 is vested in Centurion Plaza, LLC and was received from US Bank National Association, Successor-In-Interest to Wells Fargo Bank, N.A. Successor-In-Interest to Bank of America, National Association, as Trustee Under the Pooling, and Servicing Agreement Dated June 1, 2006 for the Registered Holder of Banc of America Commercial Mortgage Inc., Commercial Mortgage Pass-Through Certificates Series 2006-2 in April 2012. No environmental liens or other AULS were found for the parcel number listed.

The subject property address of 15661 Red Hill Avenue was listed under the name St. Albans HOA/The Management Trust (see **Appendix B**). The subject property was listed on the following databases: Resources Conservations and Recovery Act Non-Generators/No Longer Regulated

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear  Suite 125
Irvine, CA 92618 Tel 949.679.9500

(RCRA NonGen/NLR), Facility and Manifest Data (HAZNET), and Hazardous Waste Tracking System (HWTS). Based on the nature of the information provided by EDR, EMS does not believe the listings mentioned above are an environmental concern to the subject property. The following are the database listings EMS believes may be a potential environmental concern.

Listings for the subject property under the HAZNET and HWTS databases appear to be related to the generation, hauling and disposal of hazardous wastes, such as waste oil, mixed oil, and unspecified solvent mixtures. These listings appear to be related to the removal and disposal of asbestos at the subject property. No additional information regarding the generation, hauling and disposal of hazardous wastes was provided in the RCRA NonGen/NLR database listing. It does not appear the hazardous waste listings represent an environmental concern to the subject property.

Numerous additional environmental records were identified for facilities in the surrounding area. Due to the distance and direction from the subject property, and the nature of the information present in the EDR report, most of these records do not appear to represent a potential environmental concern. A detailed review and summary of all the records identified by EDR for these facilities is not within the scope of this investigation. The following nearby facilities discussed below were investigated to see whether they may represent a potential environmental concern to the subject property.

The Superfund Enterprise Management System Archive (SEMS-ARCHIVE) database tracks sites that have no further interest under the Federal Superfund Program based on available information. Archived status indicates that to the Environmental Protection Agency's (EPA's) knowledge, assessment at a site has been completed and that the EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL). The listings for McKesson Chem Co, Universal Circuits I and Gemini Ind Inc. do not appear to pose an environmental concern, based on their distance and location to the subject property.

EDR identified eight (8) facilities on the RCRA Large Quantity Generators List (RCRA-LQG) and sixteen (16) on the RCRA Small Quantity Generators (RCRA-SQG) list within 0.25 miles from the subject property. The RCRA-LQG and RCRA-SQG include information on facilities that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. No additional information is provided in these databases regarding these facilities.

The CA RESPONSE database identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. Four (4) CA RESPONSE facilities were identified within one mile of the subject property. Based on their locations and distance to the subject property, these facilities do not appear to pose an environmental concern.

The ENVIROSTOR database listed 28 facilities within approximately one (1) mile of the subject property. The Department of Toxic Substance Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) EnviroStor database, identifies sites that have known contamination or facilities for which there may be reasons to investigate further. Of the 20 facilities just three (3) are within 0.25 miles and potentially adjacent to the subject property. These three listings appear to be connected to the former US Marine Corp Air Station (MCAS) across Red Hill Avenue. The facilities are listed as Tustin Air Fac. School Site - Parcel #1, Tustin Marine Corps Air Station and

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear  Suite 125
Irvine, CA 92618 Tel 949.679.9500

Tustin Legacy Community Partners, LLC (Former). Additional information regarding the MCAS is provided in section 3.1.4.

EDR identified 15 Leaking Underground Storage Tank (LUST) facilities within 0.5 miles from the subject property. The LUST database is the Regional Water Quality Control Boards (RWQCB) data management system for facilities that impact, or have the potential to impact, water quality, with emphasis on groundwater. Of the 15 listings on the LUST database, two (2) appeared to be upgradient and within 0.25 miles of the subject property. The two (2) facilities were reported in the EDR report as having a status of “Completed – Case Closed”. Based on the location and distance of these listings to the subject property, they do not appear to pose an environmental concern.

The Cleanup Program Sites – Spill, Leaks, Investigations and Cleanup (CA CPS-SLIC) is a database that lists facilities that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. Eight (8) CA CPS-SLIC facilities were listed within approximately 0.5 miles of the subject property. Only one (1) of the listings is within 0.25 miles of the subject property and potentially upgradient. The listing is for the MCAS at the address of 15500 South Red Hill Avenue. The EDR report lists the MCAS as having a facility status of “Completed – Case Closed”. Listings for facilities previously located on the former Marine Corp Air Base are further discussed in section 3.1.4.

The EDR report also had several records pertaining to USTs and ASTs near the subject property. The CA Underground Storage Tank (UST) database lists twelve (12) facilities with registered USTs within 0.25 miles of the subject property. Nine (9) of the listings were either upgradient or adjacent to the subject property and six (6) of the 9 appeared to be related to the former MCAS. The listings for the USTs on the former MCAS are further discussed in section 3.1.4. One of the remaining listings for Weber Plywood has a current status of “Completed – Case Closed” and Coors Dist Co does not have any additional information listed. The CA Statewide Environmental Evaluation and Planning System (SWEEPS) is a UST listing database that is no longer updated or maintained. The SWEEPS database listed two (2) facilities within 0.25 miles of the subject property. The CA HIST UST database which is a list of historical UST sites listed four (4) facilities within 0.25 miles of the subject property. The Facility Inventory Database (FID UST) lists two facilities within 0.25 miles of the subject property. The Facility Inventory Database (FID) UST contains active and inactive underground storage tank locations. The CERS TANKS list contains facilities that fall under the California Environmental Protection Agency (CalEPA) Aboveground Petroleum Storage and Underground Storage Tank regulatory program. Eight (8) listings related to the former MCAS operations were listed on the CERS TANKS database within 0.25 miles of the subject property. The CA HIST UST database listed a 12,000 gallon diesel underground storage tank owned by Dijavex, Inc at the adjacent address of 15551 Red Hill Avenue. Based on its proximity to the subject property and lack of available environmental records, this listing appears to be a *Recognized Environmental Condition*. The listings for the remaining sites do not appear to pose an environmental concern to the subject property due to their location, distance and LUST status with the exception of the former MCAS facility which is further discussed in section 3.1.4.

The CERS HAZ WASTE database is a list of sites from CalEPA which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear  Suite 125
Irvine, CA 92618 Tel 949.679.9500

Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs. This database listed nine (9) sites within approximately 0.25 miles from the subject property. Of the 9 sites, four (4) were potentially upgradient of the subject property. According to the HAZNET report provided to EDR, Tustin Body Works and Fix Auto – Tustin disposed of the following: unspecified solvent mixture, unspecified oil containing waste, other organic solids, aqueous solution with 10% or more total organic residues, waste oil and mixed oil; Sterigenics US LLC disposed of: unspecified oil-containing waste, aqueous solution with <10% total organic residues, off-specification, aged, or surplus inorganics, other inorganic solid waste Organics; and, Weber Plywood disposed of: unspecified oil-containing waste. The three adjacent sites for Tustin Body Works, Fix Auto – Tustin and Sterigenics appear to pose a *Recognized Environmental Condition* based on their proximity to the subject property and the disposal of hazardous wastes. The remaining facility of Weber Plywood does not appear to pose an environmental concern due to its distance from the subject property.

Recorded land use restrictions are listed on the CA DEED database. The CA DEED database listed two (2) sites within 0.5 miles of the subject property. Both of these listings were for the former MCAS and are further discussed in section 3.1.4.

The PFAS ECHO database lists regulated entities that may be using Per- and Polyfluorinated Substances (PFAS). The PFAS ECHOS database listed seven (7) sites within approximately 0.25 miles of the subject property. The 7 sites appear to be either downgradient or cross gradient of the subject property and therefore do not appear to pose an environmental concern to the subject property.

The EDR report did not identify any “orphan” facilities that, due to poor or inadequate address information, could not be accurately mapped.

The results of EMS’ review of Standard Environmental Records Sources revealed evidence of *Recognized Environmental Conditions* based on the disposal of hazardous wastes on the adjacent properties of 1361 Bell Avenue, 15622 Mosher Avenue and 1401 Morgan Circle and the lack of any environmental records or investigation into an underground storage tank on the adjacent property of 15551 Red Hill Avenue.

3.1.1 Physical Setting Sources

The EDR Radius Map™ Report provides a physical setting source addendum (Geocheck®). The Subject property is located at an elevation of approximately 70-feet above mean sea level (msl). Local topography decreases in elevation to the south. The subject property is not located near any special flood hazard area or national wetland. The EDR report searched for site-specific hydrogeologic data within a 1.25-mile radius from the subject property. One site with hydrogeologic data was listed approximately ½ - 1-mile to the west-northwest of the subject property as Universal Circuits, Inc., with a measured depth to water of 15 feet in the semi-perched “pressure area”. EDR has also developed a groundwater information system, known as Aquiflow, which maintains groundwater depth and flow direction data from reports submitted by environmental professionals to regulatory agencies. There were 14 Aquiflow sites reported within a 1-mile radius of the subject property. The nearest Aquiflow site listed approximately ¼ – ½ miles to the north, reported the general direction of groundwater flow to the south-southwest and west. The EDR report also searched for public water systems and water wells known to the United States

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear Suite 125
Irvine, CA 92618 Tel 949.679.9500

Geological Survey (USGS) and water wells known to the State of California. Four Federal USGS water wells were identified within one mile of the subject property. No Federal FRDS Public Water Supply System wells were identified within 1-mile of the subject property. The State Database Well Information listed numerous wells within 1-mile of the subject property. The EDR report did not identify any earthquake fault lines within 1-mile of the subject property.

Based on the proximity of the former Steelcase Incorporated (Steelcase) facility located at 1123 Warner Avenue in Tustin, EMS is using the information from the ERM report titled Groundwater Extraction and Treatment Shut Down Work Plan to estimate the groundwater flow direction at the subject property. Based on that report the groundwater direction appears to be to the south.

The results of EMS' review of Physical Setting Sources did not reveal any evidence of *Recognized Environmental Conditions* in connection with the subject property.

3.1.2 Historical Use Information

EMS conducted a review of reasonably ascertainable historical information from standard sources to determine the past land use of the subject property and surrounding area including the following: Sanborn® fire insurance maps; historical topographic maps; historical aerial photographs; historical city directories; and, historical building permits. The following paragraphs summarize our findings.

3.1.2.1 Sanborn® Fire Insurance Map Review

EMS retained EDR to perform a search for historical Sanborn® fire insurance maps for the subject property and properties within its vicinity. Sanborn® maps were not available for the subject property or properties within its vicinity. EDR's *Certified Sanborn® Map Report* is included in Appendix E.

3.1.2.2 Historical USGS Topographic Map Review

EMS retained EDR to provide historical topographic maps prepared by the USGS for the subject property vicinity. Historical topographic maps were available for the years 1896, 1901, 1902, 1932, 1935, 1942, 1948, 1950, 1965, 1972, 1974, 1981, 2012, 2015 and 2018. The *EDR Historical Topographic Map Report* is included in Appendix F.

No specific land use is identified for the subject property or immediately adjacent properties, but roads and the Atchison Topeka and Santa Fe rail line are visible in the vicinity of the subject property in the 1896 and 1902 topographic maps. The 1932 and 1935 topographic maps are the first time Red Hill Avenue is listed along the southeastern portion of the subject property and what will eventually become Bell Avenue is visible along the southwestern portion of the subject property. Development in the surrounding area continues to increase in the 1942 historical topographic map. Significant development on the adjacent property to the southeast is visible in the 1948 and 1950 historical topographic maps and is listed as a Naval Reservation. By the time of the 1965 historical topographic map the Naval Reservation is now listed as the Marine Corps Air Facility and additional development has occurred on the property. Development on adjacent properties including a building on the property to the northwest and additional buildings and hangers on the Marine Corps Air Facility to the southeast are visible on the 1972 historical topographic map. The remaining historical topographic maps show increasing development in the surrounding properties, but never show any buildings on the subject property.

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear Suite 125
Irvine, CA 92618 Tel 949.679.9500

3.1.2.3 Aerial Photograph Review

EMS reviewed historical aerial photographs obtained from EDR for the years, 1938, 1946, 1952, 1963, 1972, 1977, 1985, 1989, 1994, 2002, 2005, 2009, 2012, 2016 and 2020. The *EDR Aerial Photo Decade Package* report is included in Appendix G.

The subject and adjacent properties appear to be vacant undeveloped land possibly used for agriculture purposes in the 1938 aerial photograph. Construction on the former MCAS located adjacent and the east of the subject property is first visible in the 1946 aerial photograph. A number of buildings and what appear to be two large aboveground storage tanks are visible across Red Hill Avenue to the east. Development on the former MCAS continues through the 1963 aerial photograph with the construction of additional buildings. The 1972 aerial photograph is the first time a structure is visible on the adjacent property to the north. Continued development in the surrounding area is visible in the 1977 aerial photograph. The three buildings and parking structure currently on the subject property are first visible on the 1985 aerial photograph. This aerial photograph is also the first time the buildings on the surrounding adjacent properties on the western side of Red Hill Avenue are visible. There are no significant changes to the subject or adjacent properties in the 1989 aerial photograph. The 1994 aerial photograph does not have any major changes to the subject or adjacent properties with the exception of the former MCAS which appears to have removed the two aboveground storage tanks and constructed two rectangular buildings in the same area. There are no significant changes to the subject or adjacent properties in the 2002 aerial photograph. The 2005 aerial photograph does not show any significant changes to the subject property; however, in the location where the former aboveground storage tanks on the MCAS site were located, there is now a new building constructed on this portion of the property. There are no significant changes to the subject or adjacent properties in the 2009 aerial photograph. The aerial photograph for 2012 is the first time demolition of buildings on the former MCAS are visible with completion becoming apparent in the 2016 aerial photograph. There are no significant changes to the subject or adjacent properties in the 2020 aerial photograph.

3.1.2.4 City Directory Abstract

EMS retained EDR to provide a historical city directory search for the subject property and nearby properties. The city directories identify individuals and businesses by street address. EDR obtained information from sources including city and telephone directories dating from 1962 to 2020. The *EDR City Directory Abstract* is included in Appendix H.

The subject property addresses of 15621, 15641 and 15661 Red Hill Avenue, Tustin, California 92780 were listed on the Cole Information Services and EDR Digital Archive city directories. The first listings for the subject property appear in the 1992 Cole Information city directory and list several tenants including National Semiconductor Corp (NSC) and Toshiba Electric Comp (TEC) at the subject property. NSC again appears at the address of 15641 Red Hill Avenue in the 1995 Cole Information city directory, but TEC does not appear at the address of 15621 Red Hill Avenue. EMS was unable to find any documentation that NSC or TEC manufactured any products at the subject property. The 2000, 2005, 2010, 2014 and 2020 city directories appear to show several commercial businesses at the subject property over the years that do not appear to pose an environmental concern to the subject property. Coastal Chemicals was listed at 1201 Bell Avenue in the 1976 and 1982 Haines Criss-Cross Directory but based on its distance and location relative to the subject property does not appear to pose an environmental concern. The remaining surrounding properties appeared to have been primarily occupied by commercial tenants except

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear  Suite 125
Irvine, CA 92618 Tel 949.679.9500

for MCAS which is further discussed in section 3.1.4.

3.1.2.5 Building Permit Report

EMS retained EDR to provide a building permit report for the subject property and adjacent properties. Permits for the subject property addresses of 15621, 15641 and 15661 Red Hill Avenue consisted of electrical, signage, tenant improvement, plumbing and mechanical. Permits for adjacent properties also included building, tenant improvement, mechanical, electrical, and plumbing permits. A permit for a spray booth and a car wash were noted for the address of 1402 Morgan Circle in 2002. Based on its location and distance to the subject property, it does not appear the spray booth poses an environmental concern. The *EDR Building Permit Report* is included in Appendix I.

3.1.3 Previous Environmental Reports

EMS did not discover or receive environmental reports for the 15621, 15641 and 15661 Red Hill Avenue, Tustin, Ca 92780 addresses.

Based on its proximity to the subject property the ERM report titled *Groundwater Extraction and Treatment Shut Down Work Plan* for the former Steelcase Incorporated (Steelcase) facility located at 1123 Warner Avenue in Tustin, is being used to estimate the groundwater flow direction at the subject property. Based on that report the groundwater direction appears to be to the south.

EMS' review of additional record sources did not identify any *Recognized Environmental Conditions* in connection with the subject property.

3.1.4 Additional Record Sources

EMS searched the following regulatory agency websites for any additional information for the subject property addresses of 15621, 15641 and 15661 Red Hill Avenue, Tustin, Ca 92780: EPA's Envirofacts; DTSC's EnviroStor; SWRCB's GeoTracker; the AQMD's FIND websites; and the CalGEM well finder website. The subject property was only listed on the Envirofacts website and did not appear on any of the other regulatory agency websites.

The Envirofacts website listed XP Power at the address of 15641 Red Hill Avenue under the Resource Conservation and Recovery Act Information System (RCRA INFO). This listing does not provide any details regarding the generation and/or handling of hazardous materials at the subject property.

EMS reviewed the *Findings of Suitability to Transfer (FOST) Parcels 3, 21, 38, 39 and Portions of 40 Marine Corps Air Station Tustin, California* available on the EnviroStor website. What is described as Parcel 3 in this FOST appears to be the same piece of land where two large aboveground storage tanks (ASTs) are visible in historical aerial photographs dating from approximately 1946 to 1989. The ASTs are not mentioned in the FOST. According to the FOST one former UST was located on this parcel and received a No Further Action (NFA) letter from the Regional Water Quality Control Board (RWQCB) Santa Ana Region. The FOST also states: "closure sampling results did not identify any evidence of a release at the site." Based on the status of this parcel and its location down and cross gradient of the subject property, it does not appear to pose an environmental concern.

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear

Suite 125

Irvine, CA 92618

Tel 949.679.9500

The Envirofacts website listed a number of facilities in the vicinity of the subject property. Two of these facilities appear to be located upgradient of the subject property and they are Tustin Body works located at 1361 Bell Avenue and Travis American Group, LLP, located at 15651 Mosher Avenue. No details of hazardous waste generation, handling or disposal are available on the Envirofacts website.

The FIND website listed an inactive permit for an emergency electric diesel generator at the adjacent property of 15771 Red Hill Avenue. This site appears to be downgradient of the subject property and does not appear to pose an environmental concern.

The Geotracker website had numerous reports for the former MCAS facility adjacent to the subject property across Red Hill Avenue. A review of all these reports is outside the scope of this assessment; however, a review of the FOST and its location cross-gradient of the subject property, it does not appear the former MCAS poses an environmental concern to the subject property.

EMS' review of additional record sources did not identify any *Recognized Environmental Conditions* in connection with the subject property.

3.2 ASTM E 1527-21 User Questionnaire

Mr. Mike Moshayedi, Manager with Centurion Plaza provided EMS with an ASTM E 1527-21 User Questionnaire for the subject property dated May 23, 2023. Mr. Moshayedi was not aware of any environmental liens or activity and land use limitations against the subject property. Mr. Moshayedi did not have any specialized knowledge or experience related to the subject property or nearby properties. Mr. Moshayedi noted the purchase price for the subject property reasonably reflected the fair market value of the property. Mr. Moshayedi was not aware of any commonly known or reasonably ascertainable information about the subject property that would help the environmental professional. Mr. Moshayedi did not have any knowledge of any obvious indicators that would point to the presence or likely presence of release on the subject property. A copy of the completed ASTM E 1527-21 User Questionnaire is included in Appendix J.

4 Information from Site Reconnaissance and Interviews

Mr. Ashley Flores of EMS visited the site on May 5, 2023, to conduct the site reconnaissance. Mr. Flores was escorted on the subject property by Ms. Juliet Hover, Senior Property Manager with RiverRock Real Estate Group. The subject property currently consists of three two-story commercial buildings and associated two-story parking structure, ground level asphalt parking and landscaping. According to Ms. Hover the plan for the property is for the buildings and parking structure to be demolished and replaced by two new buildings and because of this leases have not been extended leaving a large number of the suites in each building empty.

Upon arrival to the subject property Mr. Flores was granted access to one of the empty suites in building 15661 Red Hill Avenue (see **Photograph 1**). This suite was being used for the storage of clothes and furniture (see **Photograph 2**). One of the rooms in suite 100 that appeared to previously be used for computer networking was also being used to store cleaning and maintenance chemicals (see **Photograph 3**). No spills or staining were noted of cleaning or maintenance chemicals in the suite. The three buildings on the property contain hydraulic powered elevators. The elevator room in this building appeared to be clean with no obvious leaks of hydraulic fluid

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear

Suite 125

Irvine, CA 92618

Tel 949.679.9500

around the equipment (see **Photograph 4**). The remaining suites on the first floor also consisted of office space. The second floor contained a small maintenance room with small quantities of cleaning chemicals and a sink. There was no staining in the sink to indicate that it was used to dispose of any harsh chemicals that could damage it (see **Photograph 5**). The remaining rooms on the second floor consisted of office space. This building also contained a conference room, locker room with showers and gym that were accessed from the exterior of the building. Five (5) gallon buckets of paints and some maintenance chemicals were noted in the locker room. Drains inside the entire building were in good condition with no evidence of chemical disposal.

Building 15641 Red Hill Avenue also consisted of empty office space, an electrical room, a maintenance room, and elevator room. The unoccupied office space in this building was primarily empty except for one room that was being used to store clothing and furniture left behind by a previous tenant (see **Photograph 6**). The maintenance rooms in this building were also used to store cleaning and maintenance chemicals. An electrical room with small transformers located on the second floor doubled as a maintenance room in the building (see **Photograph 7**). There were no obvious stains on the floor from the maintenance chemicals stored in this room. The elevator equipment room in this building was also accessed and no obvious staining was visible on the floor from the hydraulic elevator equipment (see **Photograph 8**). Drains inside the entire building were in good condition with no evidence of chemical disposal.

The third building on the property at the address of 15621 Red Hill Avenue has been vacant since January 2023. This building contained two maintenance rooms and an elevator room. The maintenance rooms contained maintenance and cleaning chemicals along with drains for disposing of mop bucket water (see **Photograph 9**). There was also no obvious leaking or staining of the ground in the elevator equipment room from the hydraulic elevator equipment (see **Photograph 10**). Drains inside the entire building were in good condition with no evidence of chemical disposal. A diesel backup generator was also noted along the northwestern side of the building. This backup generator was located within a gated secondary containment structure (see **Photograph 11**). The ground around the generator was wet from light rain that had fallen in the morning, but the generator did not appear to be leaking and no obvious diesel stains were visible on the ground inside the containment structure (see **Photograph 12**).

The parking structure located in the northern portion of the subject property has three levels of parking with access ramps to the upper levels located on the southern perimeter of the structure. The structure was still being used to park vehicles by some of the tenants still leasing office space on the property. Two trash enclosures were noted near the northeastern and southwestern corners of the parking structure. Currently the only one that appears to be in use is the one near the southwestern corner of the parking structure (see **Photograph 13**). The trash enclosures were relatively clean with three tires and a wooden bed frame inside the northeastern enclosure (see **Photograph 14**). Five Southern California Edison (SCE) transformers were noted on the subject property (see **Photograph 15**).

EMS' Site Reconnaissance did not identify any *Recognized Environmental Conditions* in connection with the subject property.

4.1 Interviews

An ASTM E 1527-21 User Questionnaire User Questionnaire was completed by Mr. Mike

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear

Suite 125

Irvine, CA 92618

Tel 949.679.9500

Moshayedi, Manager with Centurion Plaza and his answers are provided in section 3.2. Ms. Juliet Hover, Senior Property Manager with RiverRock Real Estate Group was interviewed during the site reconnaissance of the subject property and her responses are discussed in section 4.

4.2 Hazardous Substances in Connection with Identified Uses

No hazardous substances apart from some potential diesel left inside the generator and maintenance and cleaning chemicals were identified at the subject property.

4.3 Other Hazardous Substances and Unidentified Substance Containers

Unidentified hazardous substances were not identified at the subject property.

4.4 Storage Tanks

One diesel generator was noted on the northeastern side of the subject property inside secondary containment. This diesel generator is further discussed in section 4.

4.5 Indications of Polychlorinated Biphenyls (PCBs)

Five transformers were noted on the property; however, they all appeared to be the property of Southern California Edison (SCE) and any PCBs contained within the transformers would be handled by SCE.

4.6 Indications of Solid Waste Disposal

During the site reconnaissance two trash enclosures were noted near the northeastern and southwestern corners of the parking structure. Currently the enclosure near the southwestern corner of the parking structure appears to be the only one in use. Both trash enclosures were relatively clean except for three tires and a wooden bed frame inside the enclosure near the northeastern portion of the parking structure. These enclosures are further discussed in section 4.

4.7 Physical Setting Analysis, if Migrating Substances are an Issue

A review of hazardous waste disposal records provided by EDR showed the potential for off-site sources of groundwater contamination from the Tustin Body Works, Fix Auto – Tustin and Sterigenics properties located at the addresses of 1361 Bell Avenue, 15622 Mosher Avenue and 1401 Morgan Circle, respectively. The Hist UST database also identified a 12,000-gallon diesel underground storage tank located on the adjacent property of Divajex Inc. at the address of 15551 Red Hill Avenue.

4.8 Indications of Asbestos Containing Material (ACM)

The current buildings appear to have been constructed in the mid-1980s and due to their age, they may contain potential asbestos-containing materials in building materials. EMS recommends that prior to demolition or renovation, the building materials be tested for asbestos-containing materials.

4.9 Radon Accumulation Potential

The National Radon Database has been developed by the EPA and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The EPA has established the following three zone classifications for radon:

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear

Suite 125

Irvine, CA 92618

Tel 949.679.9500

Zone 1 indoor average level > 4 picocuries per liter (pCi/L),
Zone 2 indoor average level \geq 2 pCi/L and \leq 4 pCi/L,
Zone 3 indoor average level < 2 pCi/L,

The EDR *Geocheck*[®] report contains radon information for Orange County (Appendix B). The EPA Radon Zone for Orange County is Zone 3 (indoor average level \geq 2 pCi/L and \leq 4 pCi/L). The EPA recommended guideline for radon is 4.0 pCi/L. Federal radon information for Orange County also indicates that of 30 sites tested, 100% of first floor living areas were below 4 pCi/L. Data was not reported for second floor living areas and basements.

The EDR report also contains data from a California State database for radon. This database indicates that of the 42 sites tested for radon within the 92780 Zip Code, one (1) site had radon levels greater than 4.0 pCi/L. Based on this information there does not appear to be any significant concerns with respect to radon at the subject property.

4.10 Indications of Lead Based Paint

The buildings on the property were constructed in the mid-1980s; therefore, it is unlikely lead-based paint is present on painted surfaces.

5 Data Gaps

EMS was unable to interview the former owner of the property or a representative from one of the state or local agency officials. EMS feels the lack of these interviews does not significantly alter EMS' ability to identify *Recognized Environmental Conditions* at the subject property based on the documents received from the state and local agencies.

6 Findings and Opinions

EMS performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-21 for the subject property located at 15621, 15641 and 15661 Red Hill Avenue in Tustin, California 92780. Any exception to, or deletions from, this practice are described in Section 5 of this report. EMS' Phase I ESA findings regarding *Recognized Environmental Conditions*, *Historical Recognized Environmental Conditions*, *Controlled Recognized Environmental Conditions* or *De Minimis Conditions* in connection with the subject property are summarized below:

Recognized Environmental Conditions:

- EMS retained Environmental Data Resources, Inc. (EDR) to perform a search of reasonably ascertainable information from databases for facilities with environmental records within the subject property vicinity. The information sources utilized by EDR included publicly available databases compiled by federal, state, tribal and local governmental agencies and proprietary databases available through EDR. The CA HIST UST database, which is a list of historical UST sites, was provided to EMS by EDR. This database listed a 12,000-gallon diesel underground storage tank owned by Dijavex, Inc at the adjacent address of 15551 Red Hill Avenue. This listing also included a link to a document titled State Water Resources Control Board Hazardous Substance Storage Container Information for Orange County. This document stated that a carbon steel, unlined, tar wrapped tank containing diesel was present at the adjacent property to the northeast. This document also states that the tank was installed in 1977 and had underground piping that used suction. Based on its proximity to the subject property and lack of available environmental records, this listing appears to be a *Recognized Environmental Condition*.
- The Facility and Manifest Data (HAZNET) database is created from information extracted from the copies of hazardous waste manifests received each year by the DTSC. According to this database that was supplied to EMS by EDR, Tustin Body Works and Fix Auto – Tustin disposed of unspecified solvent mixture, unspecified oil containing waste, other organic solids, aqueous solution with 10% or more total organic residues, waste oil and mixed oil. The database also listed Sterigenics US, LLC., as disposing of unspecified oil-containing waste, aqueous solution with <10% total organic residues, off-specification, aged, or surplus inorganics and other inorganic solid waste. The three adjacent sites for Tustin Body Works, Fix Auto – Tustin and Sterigenics appear to pose a *Recognized Environmental Condition* based on their proximity to the subject property and the disposal of hazardous wastes.

Historical Recognized Environmental Conditions (HREC):

- EMS did not identify any *Historical Recognized Environmental Conditions* associated with the subject property.

Controlled Recognized Environmental Conditions:

ENVIRONMENTAL MANAGEMENT STRATEGIES, INC.

Financially Based, Environmental Solutions

8 Goodyear  Suite 125

Irvine, CA 92618 Tel 949.679.9500

- EMS did not identify any *Controlled Recognized Environmental Conditions* associated with the subject property.

Although indoor air quality is specifically listed as a non-scope consideration under Section 13.1.5.7 of ASTM E 1527-21, *Environmental Professionals* cannot eliminate migration of vapors from the ASTM E 1527-21 Phase I ESA scope of work as this would result in the Phase I ESA being non-AAI compliant. ASTM has released ASTM E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The Guidance is directed at identifying the likelihood for migrating vapors to encroach onto a target property creating a vapor encroachment condition (VEC). The potential findings of the ASTM E 2600-10 screening are the following:

- A VEC exists; or,
- A VEC does not exist.

ASTM E 2600-10 is a two Tier process. Tier 1 focuses on known or suspected contaminated properties identified during the Phase I ESA within an Area of Concern (AOC) about the target property. For volatile and semi-volatile organic compounds (VOCs and SVOCs), such as dry-cleaning chemicals and industrial solvents, the AOC is defined as 1/3 mile. For petroleum hydrocarbon chemicals such as gasoline the AOC is defined as 1/10 mile. The AOC can be shortened in the down- and cross-gradient directions if the groundwater flow direction is known. Dijavex, Inc., Tustin Body Works, Fix Auto – Tustin and Sterigenics US, LLC. were listed upgradient and within 1/10 mile from the subject property.

Tier 2 focuses on the contaminated plumes from the contaminated properties identified within the AOC and their proximity (critical distance) to the target property. The critical distance is 100 feet for VOCs and 30 feet for petroleum hydrocarbons. Based on the potentially upgradient location and lack of environmental reports for the adjacent properties of Dijavex, Inc., Tustin Body Works, Fix Auto – Tustin and Sterigenics US, LLC, a VEC does exist for the subject property.

Although not considered *Recognized Environmental Conditions* as defined by the EPA AAI rule and ASTM E 1527-21, EMS also noted the following potential environmental concerns and issues:

- Asbestos Containing Material (ACM) may be present in building materials such as floor tile, ceiling tile, wallboard, grout, etc. An ACM survey on buildings prior to remodeling by a certified asbestos contractor is recommended.

6.1 Conclusions

In summary, EMS identified *Recognized Environmental Conditions* and a *Vapor Encroachment Condition* that require further investigation. A Phase II Environmental Site Assessment (ESA) is recommended to determine if the adjacent properties listed above have impacted the soil vapor beneath the subject property. A Phase II ESA would require the installation of soil vapor probes and the collection and analysis of soil vapor samples along the Site's property boundary closets to Dijavex, Inc. Tustin Body Works, Fix Auto – Tustin and Sterigenics US, LLC.

APPENDIX A

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Anthony F. Severini, P.G.

Position in the Firm

Mr. Severini is the President and Owner of Environmental Management Strategies, Inc., headquartered in Irvine, California. Mr. Severini specializes in the fields of damage assessment and cost recovery of environmental remediation, PRP cost assessment and allocation, environmental contractor dispute resolution, the transfer sale and/or divestiture of environmentally impaired property, regulatory dispute resolution, environmental insurance claims and protection, and strategic environmental planning.

Mr. Severini is a licensed Geologist in eight states including California. His 30 years of experience is based upon environmental work performed on over 2000 sites spanning 44 states in the US. Mr. Severini, who is considered one of the top hydrogeologists in Southern California, brings an understanding of complex environmental issues along with business acumen of key financial impacts of environmental damage to assist law firms, industry, insurance companies, lenders and property owners in environmental litigation and cost allocation of environmental pollution.

Professional Experience

Mr. Severini provides expert witness testimony for environmental litigation on sites involving soil and ground-water contamination, environmental stigma, cost allocation, NCP applicability and financial damage assessment. He has both testified and provided expert opinions on numerous court cases involving CERCLA claims, toxic torts, and PRP cost allocation. Additionally, he has provided testimony under direct and cross examination and has provided thousands of pages of deposition testimony. Because of his strong environmental background, numerous cases have been settled immediately after Mr. Severini's delivery of an expert report.

Mr. Severini has directed or overseen environmental investigations on sites involving manufacturing, aerospace, chemical storage, manufactured gas plant, automotive assembly, petroleum storage, petroleum refining, landfill / disposal, multiple PRP groundwater plumes, site demolition, and facility decommissioning.

Mr. Severini's areas of environmental technical skills include hydrogeology, geology, geochemistry, property conveyance, ground-water monitoring systems, site assessments, site remediation, environmental audits, vacuum extraction, ground-water remediation, biodegradation, and regulatory negotiation. Mr. Severini is one of the nation's leading consultants on environmental investigations related to due diligence and property transfer, purchasing, and financing, having managed and directed investigations on more than 2000 properties totaling more than \$35 billion in real estate value.

Mr. Severini's experience includes assessing aquifer properties, quantifying ground-water flow, determining the extent of ground-water contamination, and ground-water and contaminant

Fax 949.679.9501

www.goemsinc.com

modeling in saturated and unsaturated soils. Mr. Severini has experience in interpreting hydrogeologic and geochemical data; estimating hydrogeologic properties of aquifers; and determining ground-water flow paths and travel time. He has worked on ground-water models including data synthesis, developing and calibrating two- and three-dimensional finite-element and finite-difference flow models, sensitivity analysis of input parameters, predictive modeling of contaminant transport, and performance modeling of proposed containment systems. He is also a professional in "forensic-type" analyses for determining unknown sources for contaminant plumes and has received corporate quality awards for excellence in hydrology.

Summary of Related Project Experience

The following is a brief description of a sampling of Mr. Severini's experience on environmentally impaired sites.

- Mr. Severini was the former National Environmental Practice Leader for KPMG's Forensic and Litigation Services Practice. In this capacity, Mr. Severini directed a team of insurance, real estate and engineering professionals in the development of exit strategies for clients with environmentally impaired properties. These exit strategies included the procurement of environmental insurance products, the cleanup of potentially hazardous chemical constituents in the soil and ground water, and the assessment of real estate value based on impaired and unimpaired conditions.
- Consulted on the procurement of remediation cost cap insurance and third party liability insurance products for a \$150 M commercial development in Irvine, California. The site was impaired by two off-site sources of ground-water contamination and the owner wanted to sell an equity interest to an institutional investor. Our staff developed all the necessary environmental due diligence information, coordinated the transfer of data between the insurance broker and insurance carrier, and reviewed sample policies and draft policies during the procurement phase.
- Directed the analysis of potential exit strategies for a \$22 M commercial development in Milpitas, California. The site was impaired by on-site and off-site sources of ground-water contamination. Three exit strategies were selected which included a combination of on-site remediation and insurance products in lieu of indemnifications. The property is currently in remediation stages and will be placed on the market for sale once insurance products are procured.
- Directed the remediation of 240 acres of a former oil production area in Huntington Beach, California. Over 100,000 cubic yards of soil contaminated with petroleum products, arsenic, metals and reduced sulfur compounds were remediated for development of the site for residential housing. Directed the recycling, treatment and disposal of contaminated soil from leaking oil field production wells, methane and odor measurements and abatement, oil storage tanks, oil field sumps, refining facilities and buried pipelines. Assisted with regulatory compliance and permitting. Assisted in the

Fax 949.679.9501

www.goemsinc.com

development plans for the reuse of the former oil production facility as a future residential housing development, area parks and a golf course.

- Directed site characterization studies on four separate refineries in the greater Los Angeles area. Bulk storage terminals, aboveground and underground storage tanks, pumping/transfer stations, marine terminals, and spill areas were investigated with soil borings and monitoring wells. Soil and ground-water contamination, and free-phased floating product were identified.
- Directed a RCRA corrective action remediation of a metal foundry in Paramount, California. The site was identified as a potential school site for the Paramount school district. Tasks included characterization of the vertical and lateral extent of contamination, removal of underground storage tanks, disposal of soil contaminated with metals and solvents, remediation of 4,000 cubic yards of contaminated soil by enhanced biodegradation, free-phase product recovery, ground-water monitoring and remediation.
- For a former oil recycling facility in Santa Fe Springs, California, managed the ground-water and soil characterization studies, negotiated a formal process for removing the site from the Superfund list with regulatory agencies, designed soil and ground-water cleanup measures, managed the removal of aboveground and underground storage tanks, and prepared documents in support of construction financing.
- One of Mr. Severini's specialties is the computer simulation of ground-water aquifers and contaminant plume migration, having completed nearly 30 separate investigations in his career.
- Using optimization modeling, determined the optimal pumping scheme for water supply wells in the Cheyenne, Wyoming municipal water well fields. Analyzed existing aquifer conditions, simulated seasonal performances of the well fields with computer models, and developed pumping strategies that minimized well field drawdown and produced abundant water supply for the city of Cheyenne during normal and below normal precipitation periods.
- Evaluated the effectiveness of recharge strategies for the West Coast Basin ground-water aquifer for the Los Angeles County Flood Control District. Evaluated the effectiveness of recharge basins, evapotranspiration losses, salt-water intrusion barriers, ground-water injection and recharge requirements to meet peak ground-water demand periods during drought years.
- Designed the ground-water extraction system for a mining facility in Denver, Colorado to control ground-water contaminant migration from a mine tailings pond using state-of-the-art computer simulation techniques.

- Managed the cost accounting for economic damages caused by regional ground-water contamination for a major aerospace corporation in southern California. Performed and directed the financial analyses of financial statements, databases, invoices, contracts and purchase orders for the development, installation, and operation of a water treatment purification plant. Assisted in the development of financial summary documents to support the submittal of claim packages to insurance carriers.
- Managed ground-water projects for the Department of Energy's program to determine safe geologic media for the deep burial of high-level radioactive waste in the mid-Atlantic and Gulf Coast states. Calculated ground-water flow velocities in deep formations, simulated the performance of the deep repositories with finite-difference and finite-element models in three dimensions, and performed stochastic probability analyses to determine the effects of data error on repository performance. Analyzed the ability to characterize hydrologic properties in deep, fractured crystalline rocks and salt domes through small and large diameter boreholes.
- Directed the investigations of sites contaminated with MTBE in Santa Monica, Irvine and Los Angeles, California. Each site involved the characterization of ground-water plumes, the extent of MTBE plume migration, and the overlap of other plumes with MTBE. Forensic types of analyses were performed using numerical modeling simulations to evaluate the locations of possible sources and the time-rate-of-travel of MTBE. Results indicated the possible times when spillage of MTBE occurred at each of the sources, the volume of ground water contaminated by each source and provided a basis for cost allocation between PRPs for total remediation costs.
- Developed the design for a vapor extraction remediation system for Caltrans in support of freeway expansion in Livingston, California. System was designed to remove free petroleum products from the water table and shallow soils. Project awarded and designed while Mr. Severini was with a former employer. The system designed by Mr. Severini was placed into operation and site closure was achieved.
- Provided senior oversight of hydrogeologic investigations on manufactured gas plant sites in New York and California. Investigations included review of historic operations, locations of potential source areas of contamination, and identification of MGP constituents in soil and ground water.
- Directed the sampling of soils to determine the deposition of air-borne contaminants at residences in the City of Glen Avon in support of the PRP defense committee at the Stringfellow Superfund site in southern California. Provided testimony as to the techniques for sampling, constituents discovered and their likely source.
- Directed the remediation of a large TCE/PCE ground-water plume at a former aerospace facility in Irvine, California. Tasks included delineating the extent of the plume, installing a pump and treat extraction well system, removal of an underground storage

tank, NPDES permitting, treatment of contaminated effluent by ultraviolet/peroxide purification and carbon adsorption, and treatment of 2,000 yards of contaminated soil by chemical oxidation. Developed a cost allocation model for the settlement of CERCLA claims between existing and previous landowners.

- Managed the cleanup of a gasoline leak from an underground storage tank in Fullerton, California. Permitted, designed, and operated a vapor extraction system using carbon adsorption to achieve eventual cleanup of the contaminated soil.
- Evaluated the effectiveness of ground-water extraction systems at the Rocky Mountain Arsenal in Denver, Colorado. Simulated the recovery of contaminated ground water using a two-dimensional finite-difference computer model and predicted the shape and concentration of the plume over the next 25 years of use. The simulations were used to upgrade the existing extraction system to increase the effectiveness of all control measures.

Former Positions

Prior to forming Environmental Management Strategies, Inc., Mr. Severini was the National Environmental Practice Leader for KPMG LLP where he was the lead consultant on all environmental litigation engagements.

Prior to joining KPMG, Mr. Severini managed the California operations of Blasland, Bouck & Lee, Inc., an environmental engineering, design and remediation firm, where he was Vice President and General Manager of BBL's Irvine, California office.

Prior to joining BBL, Mr. Severini managed the California operations of TRC Companies, an environmental engineering firm, where he was Vice President and Manager of Hazardous Waste Services for TRC's offices in Irvine, Fresno and San Francisco.

ASHLEY FLORES

POSITION IN THE FIRM

Mr. Flores has a Bachelor of Science degree in Environmental Science from the University of California Riverside and has been in the environmental consulting industry since 2005. Mr. Flores has joined our team at EMS as a Staff Scientist in 2008. While at EMS Mr. Flores has participated in Potentially Responsible Party (PRP) identification environmental cost allocation, forensic environmental analysis, environmental due diligence, and environmental litigation support.

PROFESSIONAL EXPERIENCE

As a Staff Scientist with EMS, Mr. Flores has conducted Phase I Environmental Site Assessments (Phase I ESAs) and Phase II subsurface investigations. Mr. Flores has also conducted site remediation activities including remedial excavation confirmation sampling and routine soil vapor extraction system operation and maintenance. Mr. Flores site investigation and remediation experience has included work performed at vacant, residential, commercial, and industrial properties. Contaminants of concern included petroleum hydrocarbons, industrial solvents and emergent chemicals. Mr. Flores has experience with traditional hollow-stem auger, direct push and sonic drilling techniques for soil boring and groundwater monitoring well installation. Mr. Flores has also directed soil gas surveys. Mr. Flores has written reports, in whole or in part, documenting Phase I, Phase II and remediation activities.

As a Staff Scientist with EMS, Mr. Flores has conducted sampling of suspected asbestos containing material in commercial and residential structures. Mr. Flores participates in an on-going mold-abatement project for a food distribution warehouse located in Rancho Cucamonga, California.

As an Operations Manager, Mr. Flores managed, organized, and scheduled excavation and housing renovation projects in New Orleans, Louisiana for a crew of 20 employees.

As an Environmental Technician/Scientist Mr. Flores has prepared storm water pollution prevention plans for companies who are required to sample their storm water discharge. Mr. Flores has also prepared toxic chemical release inventory reports and countermeasure plans for spill prevention of hazardous materials or chemicals, also has experience in biohazard cleanup of vehicles and has also taught training sessions for first aid, CPR, and blood borne pathogen exposure.

REPRESENTATIVE SITE EXPERIENCE

- Conducted Due Diligence site assessment activities for numerous residential, commercial and industrial properties located in California. The Due Diligence site assessment activities consisted of the completion of Phase I and Phase II ESAs as well as conducting

<http://www.goeminc.com>

and evaluating the results of asbestos, lead based paint, lead in drinking water and radon gas surveys.

- Participates in on-going litigation support projects including PRP identification, detailed evaluation of historic activities, detailed hydrogeological and contaminant distribution evaluations, and cost allocation projects located in Orange and Los Angeles Counties, California.
- Coordinated meetings for mold abatement activities conducted at a 165,000 square foot distribution warehouse in Rancho Cucamonga, California. Meetings were held during the week on a daily basis to ensure the abatement contractor personnel did not interfere with normal warehouse operations. Communication between the warehouse personnel and the abatement contractor personnel allowed the abatement activities to be completed in a timely manner and ahead of schedule. Programmed and oversaw the installation of temperature and humidity data loggers to monitor building conditions.
- Conducted asbestos sampling for the remodeling of office suites at an office complex in the city of Pasadena. Due to the age of the buildings asbestos containing material was suspected to be contained within the building materials of the buildings. Asbestos samples were taken from a number of different medium including drywall, joint compound, carpet glue, etc. in each of the office suites ready for remodeling. The suites sampled did not contain asbestos allowing the suites to be remodeled without any additional expenses for asbestos removal and disposal.
- Performed remedial excavation confirmation soil sampling for a former copier refurbishing facility located in Irvine, California. Activities included screening soil for segregation according to South Coast Air Quality Management District Rule 1166, soil confirmation sampling and determination of final excavation limits.
- Conducted groundwater monitoring on a quarterly basis at a former oil field services bulk plant in northern California. The location previously contained a maintenance shop including underground storage tanks, steam cleaning, sumps, clarifiers, and associated drain lines. Currently conducting quarterly groundwater monitoring at an active plating facility and former aerospace manufacturing facility, both located in southern California. Groundwater underlying the plating facility is impacted with hexavalent chromium, while the aerospace facility is impacted with chlorinated solvents.

FORMER POSITIONS

2008 – Present Scientist, Environmental Management Strategies, Inc., Irvine, California.
2005 – 2008 Operation Manager, BPD Inc., Fontana, California
2003 – 2005 Environmental Technician/Scientist, Jorgenson Environmental, Rancho Cucamonga, California.
2003 Part-time Environmental Technician, Regulation Compliance Inc., Riverside, California.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2023 has revealed that there

EXECUTIVE SUMMARY

are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1

EXECUTIVE SUMMARY

RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 16 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 01/23/2023 has revealed that there is 1 CA VCP site within approximately 0.5 miles of the target property.

Envirostor ID: DOD100397200

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there are 7 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the CA Cortese list, as provided by EDR, and dated 12/14/2022 has revealed that there are 8 CA Cortese sites within approximately 0.5 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there is 1

Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities form - Owner/Operator Identification form - Hazardous Material Chemical Inventory forms - Facility Site Map - Business [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: In future submittals, please note that only pure materials must have a CAS Number listed in the Chemical Identification and Physical Properties section (do not include the CAS # in this section if the chemical is a Waste). The Mixture Components section does not need to be filled out for pure materials, only for mixtures or wastes containing at least 1% by weight of hazardous components. Please obtain the date and signature to finalize the certification. In future submittals, please consider using this standardized consolidated contingency plan:

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-07-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation

Weather: sunny and warm. Contact was unable to produce the SWPPP. Most plywood and lumber is stored under cover or in the warehouse. No visible problems observed with roof covers. Several loads of plywood and lumber are stored uncovered; has a stockpile of tarps on hand in boxes on site. Maintenance area is generally covered. Overall yard condition is near and orderly. Contact reports that contract vehicle washing occurs and that wastewater is collected for disposal.

RESPONSE:

Name: TUSTIN MARINE CORPS AIR STATION
 Address: NEWPORT FREEWAY AT EDINGER AVENUE
 City,State,Zip: TUSTIN, CA 92710
 Facility ID: 30970002
 Site Type: State Response
 Site Type Detail: Closed Base
 Acres: 1600
 National Priorities List: NO
 Cleanup Oversight Agencies: SMBRP, RWQCB 8 - Santa Ana, US EPA
 Lead Agency Description: DTSC - Site Cleanup Program
 Project Manager: Michelle Micucci
 Supervisor: Eileen Mananian
 Division Branch: Cleanup Cypress
 Site Code: 401384
 Site Mgmt. Req.: NONE SPECIFIED
 Assembly: 68
 Senate: 37
 Special Program Status: Navy
 Status: Active
 Status Date: 06/01/1986
 Restricted Use: YES
 Funding: BRAC 91
 Latitude: 33.71638
 Longitude: -117.8308
 APN: NONE SPECIFIED
 Past Use: UNKNOWN, FUEL - VEHICLE STORAGE/ REFUELING, VEHICLE MAINTENANCE, AIRFIELD OPERATIONS, AIRFIELD OPERATIONS, FUEL - VEHICLE STORAGE/ REFUELING, AIRCRAFT MAINTENANCE, AIRFIELD OPERATIONS, DEGREASING FACILITY, FUEL - AIRCRAFT STORAGE/ REFUELING, FUEL - VEHICL

Potential COC : Arsenic TPH-JET FUEL Trichloroethylene (TCE Lead Polychlorinated biphenyls (PCBs TPH-diesel TPH-gas Methyl tertbutyl ether (MTBE Polynuclear aromatic hydrocarbons (PAHs 1,1,2,2-Tetrachloroethane Vanadium and compounds 30

Confirmed COC: Arsenic TPH-diesel TPH-gas Lead Polychlorinated biphenyls (PCBs Polynuclear aromatic hydrocarbons (PAHs Methyl tertbutyl ether (MTBE TPH-JET FUEL Trichloroethylene (TCE 30025-NO 1,2,3-Trichloropropane 1,1-Dichloroethane

Completed Area Name: OU-3
Completed Sub Area Name: 1
Completed Document Type: Feasibility Study Report
Completed Date: 03/24/1999
Comments: Investigation of various AOC located throughout the base by reviewing various reports and identifying if a hazardous release occurred or not. If this could not be identified by researching the historical data, samples were collected and evaluated. All AOC that were found to be hazardous will be treated under the remedial action process or the removal action process. This PEA was prepared to also satisfy RCRA Facility Assessment (RFA) requirements.

Completed Date: 03/22/2000
Comments: PEA - MDA-06, AME-05, MAE-06, MWA-01, UST-530B, TOW-X1 & TOW-X8:
Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Remediation actions were taken at these sites as follows; 1) At Site MDA-06, 1,247 tons of impacted soil were removed, of which 901 tons were impacted with Total Petroleum Hydrocarbons (TPH) and trace pesticides and was transported for McKittrick Waste Management for disposal. The remaining 346 tons were impacted with lead and pesticides and was transported to Chemical Waste Management's Class I treatment, storage and disposal facility. 2) MAE-05 was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source

water. A rinsate sample was taken, and was found to contain endrin aldehyde, methylene chloride and bromodichloro- methane with endrin aldehyde above action levels. The site was decontaminated again and endrin aldehyde dropped to acceptable levels. Two drums of paint chips were collected and shipped as non-RCRA hazardous waste to Chemical Waste Management's Facility, and 3,000 gallons of decontamination water were collected in a Baker tank and treated on site at the carbon adsorption treatment unit and properly discharged. 3) MAE-06 was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample that contained calcium, magnesium, sodium and zinc was collected; these metals do not pose a risk on human health or the environment. 4) MWA-01 was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample containing below action levels of trihalomethanes, bromodichloromethane, chloroform, and dibromochloromethane was collected. Rinsate water from the site was treated at the onsite carbon adsorption treatment unit and discharged. 5) At UST-530B, approximately 926 tons of TPH impacted soil were removed and treated at the on-site Thermal Desorption Unit and 65,000 gallons of ground water were removed and treated at the onsite carbon adsorption treatment unit and properly discharged. 7) At TOW-X1, the oil/water separator was removed, and approximately 78 tons of polychlorinated biphenyl (PCB)/pesticide impacted soil were removed and transported to proper treatment and recycling facility. TOW-X8; The oil/water separator was removed and after collection of soil samples it was noted that all samples showed contamination below action levels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 08/31/2004
Comments: RIFS - OU4: The shallow groundwater investigation was performed at sites where at least one VOC had been previously reported at concentrations exceeding its maximum contaminant level (MCL). Discrete groundwater samples were collected at 121 locations using HydroPunch sampling techniques and were analyzed for VOCs. Data obtained from the shallow groundwater investigation were used to revise risk assessments for some OU-4 sites and IRP-5N, IRP-5S(b), IRP-8, IRP-11, IRP-16, MMS-04 Areas A and C were recommended for NFA. DTSC concurs with this recommendation. RIFS - OU4: The shallow groundwater investigation was performed at sites where at least one VOC had been previously reported at concentrations exceeding its maximum contaminant level (MCL). Discrete groundwater samples were collected at 121 locations using HydroPunch sampling techniques and were analyzed for VOCs. Data obtained from the shallow groundwater investigation were used to revise risk assessments for some OU-4 sites and IRP-5N, IRP-5S(b), IRP-8, IRP-11, IRP-16, MMS-04 Areas A and C were recommended for NFA. DTSC concurs with this recommendation. RIFS - OU4: The shallow groundwater investigation was performed at sites where at least one VOC had been previously reported at concentrations exceeding its maximum contaminant level (MCL). Discrete groundwater samples were collected at 121 locations using HydroPunch sampling techniques and were analyzed for VOCs. Completed Area Name: FOST4
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 12/04/2002
Comments: FOST - FOST4: DTSC reviewed and commented on the FOST for a portion of Parcel 24. DTSC was unable to concur on the suitability of Parcel 24 for transfer because the portion of Parcel 24, that is the the subject of this FOST, includes buildings where potential releases of lead from lead-based paint were not evaluated. Additionally, MCAS Tustin is a permitted Hazardous Waste Facility under California law and DTSC cannot concur with a FOST until the necessary permit modification is complete.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: REV
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 01/09/2003
Comments: PPP - REV: The CRP describes a comprehensive community relations program being conducted in conjunction with the Installation Restoration Program (IRP) investigation and environmental cleanup activities at the Former MCAS Tustin. The purpose of the CRP is twofold: to identify concerns the community may have regarding cleanup efforts and to determine the best methods for conducting and enhancing communication between the Navy and the local community.

Comments: Not reported

Completed Area Name: OU-1A
Completed Sub Area Name: 13S
Completed Document Type: *Action Memorandum (if <\$1M)
Completed Date: 10/22/2001
Comments: RAW - TCRA1A: An Action Memorandum/Removal Action Work Plan (AM/ RAW) was prepared to document for the administrative record the Department of Navy's decision to undertake a time-critical removal action (TCRA) to initiate groundwater extraction to hydraulically contain groundwater contaminated with volatile organic compounds (VOCs), principally 1,2,3-TCP. The TCRA will eliminate further downgradient migration of contaminated ground- water and prevent vertical migration to the underlying regional aquifer. The extracted groundwater will be treated using granular activated carbon (GAC) and discharged to Peters Canyon Channel through a storm drain or injected back to the aquifer. Discharge to Peters Canyon Channel will comply with the substantive provisions of Regional Water Quality Control Board (RWQCB), Santa Ana Region, Order Number 96-18, General National Pollution Discharge Elimination System (NPDES) Permit Number CAG918001. Discharge will also comply with supplementary RWQCB requirements (e.g. discharge limits for 1,2,3-TCP) that are not included in the General Permit. DTSC approved the AM/RAW on August 17, 2001.

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/27/1992
Comments: Conditional approval of Navy's SI Report was granted. Navy performed SI sampling of 9 sites that were recommended for further study in their Initial Assessment Study (IAS). The following sites were recommended for RI in the report: Site 3 - Paint Stripper, Site 5 - Drainage No.1, Site 7 - Rapid Refuel Sta Site 12 - Drum Stg. area No.2, & Site 13 - Drum Stg. area No.3. Site 9 - Hangar No. 1 is recommended for removal & confirmation sampling. Site 15 - Blimp Hangar Disposal does not exist. Although Sites 2 & 8 were recommended NFA, DTSC disagreed because the area had been graded and samples were not taken deep enough to test the original ground.

Comments: Completeed

Completed Area Name: FOSL3
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Lease
Completed Date: 04/26/2002
Comments: FOSL - FOSL3: DTSC reviewed and commented on the FOSL 3. DTSC concurs with the Navy that the property could be leased in a manner that is protective of human health and the environment with the specified restrictions, conditions and notifications set forth in the FOSL.

Completed Area Name: FOST3
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 04/22/2002
Comments: FOST - FOST3: DTSC reviewed and commented on the FOST 3 for Parcels 23,29,34,35,36 and portions of 1,16,17,24,27,28,40, and 41 and found parcel 36 and portions of 24 and 41 to be environmentally suitable for transfer for their intended use. ' DTSC is unable to concur with the suitability of Parcels 1 and 17 for transfer. The 1998 MCAS Tustin Specific Plan/Reuse Plan Errata identifies Parcels 1 and 17 as educational/recreational use. As a result, it is possible that the reuse of these parcels could include school sites, meaning kindergarden through grade 12 (elementary, middle and high schools). Additional detail is not provided for Parcel 1 and the Base Realignment and Closure (BRAC) Business Plan 2002 (in review) designates the land use of Parcel 17 as a High School. Pursuant to the California Education Code, section 17210 et seq; a separate and comprehensive environmental review is required for sites where stat funds will be used for property acquisition or school construction. This review process includes an evaluation of whether hazardous materials on the property have been or could be released that would endanger students. Because this separate environmental review has not been conducted for Parcels 1 and 17, DTSC cannot determine if these parcels are suitable for the intended use. ' DTSC was unable to concur with the suitability of Parcels 23, 29, 34, 35, and portions of Parcels 1, 16, 27, 28, and 40 for transfer. These parcels include buildings/structures where potential releases of lead from lead-based paint (LBP) were not evaluated or where sufficient information was not provided for DTSC to determine if LBP is a potential issue. DTSC considers the presence of exterior LBP that has been released to the soil to pose a potential release to the environment pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986.

Completed Area Name: Transfer Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Lease
Completed Date: 02/27/2002
Comments: DTSC reviewed and commented on the FOSL for Southern Parcels CO Areas 1,2,3 and 4. DTSC concurs with the Navy that the Southern Parcels CO Areas property is suitable for lease for the purposed intended (commercial/business) subject to the conditions, notifications, and

restrictions set forth in the FOSL.

Completed Area Name: FOST2
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 09/19/2001
Comments: FOST - FOST2: DTSC reviewed and commented on the FOST for Southern Parcels 4 - 8, 10 - 12, 14, 42 and Parcels 25, 26, 30 -33, 37 and Portions of 40 and 41 and found Parcels 3 - 8, 10 - 12, 14, 42 and Parcels 25, 26, 30, 32, 33, 37 and Portions 41 to be environmentally suitable for transfer for their intended use. ' DTSC was unable to concur on the suitability of Parcel 31 for transfer. The MCAS Tustin Specific Plan/Reuse Plan Errata (City of Tustin 1998) identifies this parcel as future elementary school site. Pursuant to the California Education Code, section 17210 et seq., a separate and comprehensive environmental review is required for sites where state funds will be used for property acquisition or school construction. The Education Code requires that DTSC make a determination as to the suitability of the property for school use based on this review. The review process includes an evaluation of whether hazardous material on the property have been or could be released that would endanger school students. Because this separate environmental review has not been conducted for Parcel 31 DTSC was unable to determine if these parcel was suitable for use as elementary school sites and, therefore, we did not concur with the Finding of Suitability for this parcel. ' In addition, DTSC was unable to concur with the suitability of Parcel 4 and portions of Parcel 40 for transfer. These parcels may have lead based paint (LBP) that has been released to the soil. DTSC maintains that lead in soil from LBP is a Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) release to the environment. Building 176 (Parcel No. 4), Buildings 180, 181, 182 (Parcel No. 40), and Structure 237 (Parcel No. 4) were all constructed prior to 1978, the year when lead based paint products were discontinued. Navy did not conduct soil sampling to determine whether soils surrounding these buildings contain concentrations of lead from LBP which may pose a threat to human health and the environment. Until such sampling is performed, DTSC cannot determine whether, pursuant to CERCLA 120(a)(3), all actions have been taken at these two parcels to remedy potential releases of lead to the environment from LBP.

Completed Area Name: FOST1
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 09/27/2001
Comments: FOST - FOST1: DTSC reviewed and commented on the FOST for Parcels 3, 21, 38, 39, and Portions of 40 and found Parcels 3, 38 and portions of 40 to be environmentally suitable for transfer for their intended use as transitional/emergency housing, community park/road and transportation/circulation facilities, respectively. ' DTSC was unable to concur on the suitability of Parcels 21 and 39 for transfer. The MCAS Tustin Specific Plan/Reuse Plan Errata (City of Tustin 1998) identifies these parcels as future elementary school sites. Pursuant to the California Education Code, section 17210 et seq., a separate and comprehensive environmental review is required for sites where state funds will be used for property acquisition or school construction. The Education Code requires that DTSC make a determination as to the suitability of the property for school use

MAP FINDINGS

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

based on this review. The review process includes an evaluation of whether hazardous materials on the property have been or could be released that would endanger school students. Because this separate environmental review has not been conducted for Parcels 21 and 39, DTSC was unable to determine if these parcels were suitable for use as elementary school sites and, therefore, we did not concur with the finding of Suitability for these two parcels.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: ASAOC
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 06/04/2002
 Comments: Not reported

Completed Area Name: OU-4
 Completed Sub Area Name: AS
 Completed Document Type: Remedial Action Plan
 Completed Date: 06/25/2004
 Comments: RAP - ASAOC: The Final Action Memorandum (AM)/Remedial Action Plan (RAP) addresses a non-time critical removal action for removal of soil contaminated with arsenic at the Arsenic Area of Concern. The contaminated soil will be disposed at permitted off-site facility. The Removal Action for this site is deemed consistent with Division 20, Chapter 6.8, California Health and Safety Code. This removal action will reduce the human risk associated with arsenic contaminated soil.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: S16AB
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 02/07/2003
 Comments: PEA - ST16A&ST16B: The Site Inspection (SI) report summarizes the results of previous investigations conducted at ST 16A and 16B. The Navy found polycyclic aromatic hydrocarbons (PAH) in soils in earlier investigations at these two sites. They completed a removal action of contaminated soils in 1997. Post-removal soil sampling found some additional contamination with PAH. The subject report documents the Department of the Navy's (DON's) risk screening evaluation at the site and based on the risk estimates recommends a No Further Action (NFA) site closure for ST16A and ST16B. DTSC did not concur with the NFA recommendation.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: MOOR5
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 11/21/2002
 Comments: PEA - MOOR Pad 4 and 5 (MOOR5): The preliminary Assessment was performed to evaluate the distribution of polycyclic aromatic hydrocarbons at the Mooring pads, Twenty Seven direct-push soil samples were collected from depths ranging from 6 inches to 18 inches below ground surface at Mooring Pad 4. Five samples were collected at the degraded locations at the Mooring Pad 5. The results of the screening risk assessment indicate that concentrations at the Mooring Pad 4 and 5 are within the risk management decision range and pose acceptable risk levels and recommended no further action. DTSC concurs with the recommendation.

Completed Document Type: Remedial Action Plan
Completed Date: 12/20/2001
Comments: The ROD/RAP was issued on May 17, 2000 and signed by DTSC on December 18, 2001. The ROD/RAP documents the final selected remedial action for the Moffett Trenches and crash Crew Burn Pits site. The major components of the selected remedial action for OU-3 are institutional controls, groundwater and surface-water monitoring, landfill gas monitoring, inspection and maintenance of the containment wall and cover, maintenance of the French drain system and associated sumps, maintenance of monitoring wells and security features, and periodic reviews. In addition, the land use controls include use restrictions, notification procedures, inspections of physical structures, contingency plans, and five-year reviews.

Completed Document Type: Removal Action Completion Report
Completed Date: 09/09/2005
Comments: The soil removal action achieved the objective of excavating VOC-contaminated soil in the vadose zone above the cleanup level. The confirmation soil samples indicated that the lateral extent of VOC-contaminated soil above the cleanup goal was removed. The removal of contaminated soil made it possible for the builder to install the utilities at this site.

Completed Area Name: OU-1A
Completed Sub Area Name: 13S
Completed Document Type: Remedial Action Plan
Completed Date: 12/02/2004
Comments: The OU-1A ROD/RAP presents the selected remedial action consisting of excavating soil contaminated with volatile organic compound (VOC) from a hot spot area, disposing this soil at a permitted facility, and extracting and treating VOC-contaminated groundwater using a granular activated carbon (GAC) system from a hot spot area and containment wells at site IRP 13S. Hot spot areas are classified by the highest concentrations of VOC chemicals. The remediation of soil and groundwater contamination area that are characterized by the highest concentrations of VOC chemicals. The remediation of soil and groundwater hot spots will expedite the cleanup of groundwater.

Completed Date: 03/21/2002
Comments: RIFS - OU1B: IRP Sites 3 and 12. The Feasibility Study (FS) develops and evaluates potential remedial alternatives to mitigate risks to human health from groundwater, contaminated with volatile organic compounds, principally trichloroethene (TCE), and related organic solvents originated at Sites 3 and 12. This FS involved screening technologies and associated process options according to effectiveness, implementability, and cost. The retained options were assembled into remedial alternatives and then evaluated against regulatory criteria.

Completed Sub Area Name: Not reported
Completed Document Type: Environmental Baseline Survey
Completed Date: 06/19/2001
Comments: BWEBS - BW: Department of Defense and Department of the Navy policy and guidance documents, along with currently available information generated from on-site investigations, visual inspections, personnel interviews, regulatory records searches, aerial photograph reviews, reviews of data for adjacent properties, and chain-of-title searches, are the basis for this report. This Basewide EBS Report supplements the April 1994 MCAS Tustin EBS for the Community Environmental Response Facilitation Act of 1992 Report and the April 1997 MCAS Tustin EBS for Parcels 6, 8B, 8C, 11A, 33, 38, 39, 41A, and 41B. ' CEQA - OU3: DTSC completed a Special Initial Study to evaluate the potential for adverse environmental impact for the Proposed remedial action identified in the Record of Decision/Remedial Action Plan (ROD/RAP). The remedial action includes application of institutional controls, inspection and maintenance of the concrete containment wall and surface cover, monitoring of ground water and surface water, monitoring of landfill gas, maintenance of the french drain system and associated sumps, periodic reviews of monitoring results, and preparation of a contingency plan. Based on the Special Initial Study, a Negative Declaration was prepared pursuant to the provisions of CEQA. The draft Negative Declaration was circulated for a 30-day public review and comment period. DTSC has found, on the basis of the Special Initial Study and comments received on the Negative Declaration, that there is no substantial evidence that the project will have a significant effect on the environment. ' PEA - PCL35 and PCL 21: The Department of Navy has a lead-in-soil sampling program. Its objective, at MCAF Tustin is to evaluate potential lead-based paint hazards in the soil adjacent to the housing units within the housing areas constructed prior to 1978. Lead-based paint on the exterior of the houses could potentially flakeoff of the housing units and impact soil in the yard and also in areas adjacent to the perimeter of the house. A work plan was developed for the evaluation of potential lead-based paint hazards in soil at the former housing areas, one of which is Moffett Meadows (PCL 35) and Tustin Villas (PCL21). The intent of the soil sampling at the housing areas was to determine whether further evaluation was necessary prior to transferring the property for future use. Base on the sampling results, it was determined that no further action was required for lead-based paint in soil at Moffett Meadows or at Tustin Villas.

Completed Date: 05/17/2001
Comments: PEA - MWA15: Analytical results for hand-auger, pothole, and excavation confirmation soil samples from Site MWA-15 were below the target cleanup levels or laboratory reporting limits. These results indicate that soil at this site has not been impacted. Therefore, no further action is required for this site. ' PEA - UST89: Analytical results for the confirmation soil sample collected from the bottom floor of the excavation were below the target cleanup level or laboratory reporting limits, indicating that soil at the site has not been impacted. Therefore, no further action is required for this site. ' PEA - MAE7: This is a miscellaneous air emission area, consists of two separate areas: Building 273(Test Cell) and Building 231 (Engine Test Area). The activities of PEA included facility decontamination, collection and analysis of rinse water samples, and subsurface soil sampling using a hand auger. Analytical results for the rinse water samples and soil samples and soil samples were below source water (i.e., fire hydrant water) concentrations with the following exceptions: aluminum, barium, iron, molybdenum, selenium, and vanadium, which were below the tap water PRGs; and calcium, magnesium, and potassium, which are common metals for which no PRGs have been established. Soil sample results were below target cleanup levels and laboratory reporting limits, indicating that soils at the site were not impacted. The results of the risk screening assessment indicate that concentrations at Site MAE-07 pose acceptable risk levels. Therefore, no further action is required.

Completed Area Name: OU-1A
Completed Sub Area Name: 13S
Completed Document Type: Feasibility Study Report
Completed Date: 09/05/2003
Comments: RIFS - OU1A: The Feasibility Study develops and evaluates potential remedial alternatives to mitigate risks to human health from groundwater, contaminated with volatile organic compounds originated at IRP Site 13S. This FS involved screening technologies and associated process options according to effectiveness, implementability, and cost. The retained options were assembled into remedial alternatives and then evaluated against regulatory criteria.

EPA ID Number

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

results, DSD-07 does not appear to be the source of trichloroethylene (TCE) contamination in the area. This is based on the low levels of TCE found in shallow soils directly below the storm drain line to 6 feet below ground surface. The site data do not indicate a release occurred directly from DSD-07. Based on the information Navy requested No Further Action (NFA) for the site. DTSC did concur with the NFA recommendation.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: MAW7
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/06/2001
Comments: PEA - MAW7 : Sites MAW-7, MAW-8 and MAW-16 each abandoned well was closed according to Orange County Health Care Agency guidelines. Samples were collected from the groundwater that was displaced during backfilling of wells MAW-7 & MAW-16 with grout. The samples were analyzed for disposal characterization purposes. A minimal amount of water was produced during the grouting of MAW-8 and, therefore, a sample was not collected. Analytical results for the groundwater samples were below either target cleanup levels or laboratory reporting limits. Because soil samples were not collected from Sites MAW-7, MAW-8 and MAW-16, a risk screening assessment was not required. Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: ST35
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/22/2001
Comments: PEA : Facility decontamination and subsurface sampling was conducted at eight sites. Excavation of impacted soil was performed at Sites ST-36, ST-51, and ST-88. The contaminated soil was treated in a thermal desorption unit (TDU) located on site. In the no-landscaped excavated areas, non-impacted over-burden and treated soil was used as backfill material. The excavation was compacted to greater than 90 percent relative compaction to surface grade. In the landscaped excavation areas or areas scheduled for demolition, no compaction testing was performed. ' ST-35, ST-89, ST-90 and ST-91 - Analytical results for rinse water and soil boring samples support no further action. ' ST-36 and ST-51 - Analytical results for soil boring and confirmation soil samples support no further action ' ST-72A - Results of the screening risk assessment indicate that the concentrations at ST-72A pose acceptable risk levels and support no further action. ' ST-88 - The analytical results for the rinse water samples and the deeper soil sample results support no further action. However, the shallow hot spot areas with elevated concentrations of arsenic (as identified at ST-86, ST-88, and MAE-03) will be addressed as a separate arsenic AOC report.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: ST18B
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/01/2001
Comments: PEA - SITE 18B: In 1995, a Resource Conservation and Recovery Act (RCRA) Facility Assessment was completed for MCAF Tustin. Site 18B was identified as a potentially contaminated site. Hand auger samples were collected and contaminated soil was excavated. The results of the screening risk assessment showed acceptable levels and support no

S101272797

further action.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: MWA10
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/30/2001
Comments: PEA - MWA10: The contaminated soil was treated in a thermal desorption unit (TDU) located on site. In the non-landscaped excavated areas, non-impacted overburden and treated soil was used as backfill material. The excavation was compacted to greater than 90 percent relative compaction to surface grade. In the landscaped excavation areas, no compaction testing was performed. Analytical results for the rinse water samples, soil samples, and excavation samples collected at the site was below source water concentrations (collected from local fire hydrants), target cleanup levels, or laboratory reporting limits. These results indicate that impacted soil at the site was removed. In addition, the results of the screening risk assessment support no further action.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: LPL
Completed Document Type: Finding of Suitability to Lease
Completed Date: 06/26/2000
Comments: PEA - ST-5A, ST-12, ST-22, ST-37B, ST-39, ST-42, ST-45: 1.) ST-5A and ST-12: The concrete pads were decontaminated and samples collected from the rinse water were below action levels. Soilsamples were taken and results were also below action levels. 2.) ST-22: Soil samples were collected and results were below action levels. 3.) ST-37B: Results from soil samples triggered an excavation (approximately 129 tons) of TPH-impacted soil. The soil was treated at an on-site thermal desorption unit (TDU). confirmation sampling indicated that all TPH-impacted soil had been removed. 4.) ST-39 and ST-45: Results from soil samples triggered an excavation(approximately 22.3 tons and 27 tons) from ST-39 and ST-45 respectively of PAH-impacted soil. The soil was treated at an on-site thermal desorption unit (TDU). confirmation sampling indicated that all PAH-impacted soil had been removed. 5.) ST-42: The concrete building was decontaminated and samples collected from the rinse water were below action levels. Soil samples were taken and results were also below action levels. ' PEA - ST-13A, ST-13B, ST-18A, ST-26A, ST-34A, ST-46, ST-55, ST-60A, and ST-80: Facility decontamination was conducted at Sites ST-13A, ST-18A, ST-26A, ST-34A, ST-46, ST-55 and ST-56. A rinse water sample was taken and analyzed for each of the above sites. Soil sampling was also conducted for each of these sites. Based on the results of the screening risk assessment, the concentrations at sites ST-13A ST-13B, ST-18A, ST-26A, ST-34A and ST-56 pose acceptable risk levels. ' Soil sample results for ST-46 and ST-55 indicated that excavation was required. All confirmation sample results for ST-46 and ST- 55 were below target cleanup levels and the results of the screening risk assessment indicate that concentrations at these two sites pose acceptable risk levels. ' Decontamination activities at ST-60A and ST-80 were not necessary because the sites were located on asphalt. The analytical results for soil samples from ST-60A and ST-80 were below target cleanup levels. The results of the screening risk assessment indicate that concentrations at ST-60A and ST-80 pose acceptable risk levels.

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

Completed Area Name: OU-2
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 12/12/2000
Comments: RAP - OU2: No action is the selected remedy for the three IRP sites and nine AOCs. In selecting the no action remedy for these sites/AOCs, it was determined that the existing condition of the sites/AOCs is protective of human health and the environment. CEQA - OU2: A Notice of Exemption (NOE) for the OU-2 No Action Remedial Action Plan (RAP) was filed with the State Clearinghouse on September 28, 2000. DTSC found the project the project to be exempt under Title 14 California Code of Regulations (CCR), Section 15061(b)(3) based on the following: DTSC in conjunction with the RWQCB, U.S. EPA and DON, determined that no further remedial action is necessary to ensure the protection of human health and the environment at sites IRP-2, IRP-13E and AOCs AD-04, AS-06, AS-08, AST-02, AST-04, MDA-04, MDA-07, MMS-01, and MWA-03. This determination was based upon extensive field investigations, laboratory analyses, and a through assessment of potential human health risk assessments at each specific location. The results of the human health risk assessment at these sites/AOCs do not present an unacceptable risk to human health or the environment. Therefore, since DTSC has determined that there is no possibility that the project may have a significant effect on the environment, the activity is not subject to CEQA.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: ST-7
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 03/03/2000
Comments: PEA - ST-7, ST-8, ST-21C, ST-21D, ST-21E, ST-21F, ST-79, and ST- 82: Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Investigation and cleanup work was conducted under the RCRA Stabilization as required by the RCRA Permit. The Regional Water quality Control Board provided oversight of cleanup of petroleum contamination. DTSC's Office of Military Facilities provided oversight of removal and remediation of hazardous material contamination and reviewed the final closure reports for the above sites in accordance with the RCRA and Comprehensive Environmental Recovery Compensation and Liability Act (CERCLA) quidelines, and pursuant to the Federal Facilities Site Remediation Agreement (FFSRA), signed on 8/18/1999. Remedial actions were taken at these sites as follows: 1) At Sites ST-7, ST-21D and ST-82 the concrete slab was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample was taken and tested for metal and chlorinated solvents. In addition, soil samples were taken and analyzed for the same chemicals. Levels found where below action level. However rinse water was still collectedand treated in the onsite thermal desorption unit (TDU) before being discharged into the sanitary sewer. 2) At Site ST-8, soil samples where taken and analyzed for TPH-extractable, Solvents, PCBs, and metals. All samples were below PRGs. 3) At ST-21C, soil and groundwater samples where taken and screened for solvents, metals and petroleum. Methyl-Tertiary- Butyl-Ether MTBE was detected in the soil above action level. Impacted soil was removed and treated on site at the local TDU, confirmation samples were taken. 4) At ST-21E, soil samples were taken and analyzed for

S101272797

solvents, metals, PCBs, and petroleum. One sample indicated a high hit of benzo(a)pyrene. Impacted soil was removed and treated on site at the local TDU, confirmation samples were taken. 5) At ST-2F the concrete slab was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample was taken and tested for metals, chlorinated solvents and PCBs. In addition, soil samples were taken and analyzed for the same chemicals. Levels found were below action level. However rinse water was still collected and treated in the onsite thermal desorption unit before being discharged into the sanitary sewer. 6) At ST-79, soil samples were taken and analyzed for TPH-extractable, chlorinated solvents, pesticides, PCBs, and metals. One sample detected contained Aroclor-1260, and dieldrin above action level. Impacted soil was removed and is being stockpiled and will be transported off site for storage.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: MWA-5
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 03/15/2000
Comments: PEA - MWA-05, TOW-06, UST-508, MWA-12, TOW-11, UST-251, MWA-13, TOW-12, UST-252: Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Remediation actions were taken at these sites as follows; 1) At Site MWA-05, a total of 25 samples were collected and tested for TPH-extractable. TOW-06 and UST-508 were excavated confirmation samples were taken. Sample results were below action levels. 2) At MWA-12, the concrete pad was decontaminated and final rinsate samples showed no detection of contamination. Rinsate water was collected and treated on site before being discharged into the channel under the NPDES permit. In addition, soil samples were taken at MWA-12, TOW-11, UST-251 after the removal of the oil/water separator and the assigned Storage tank (UST-251). Samples collected triggered an excavation of 156 tons of TPH impacted soil at UST-251 site. Deeper confirmation samples indicated the removal of the impacted soil which was treated at the onsite Thermal Desorption Unit (TDU). 3) For MWA-13 the concrete pad was decontaminated and rinsate samples were taken. Rinsate samples indicated no contamination present, however rinsate water was collected and treated locally before being discharged into Peter Canyon Channel. For TOW-12 and UST-252, The oil/water and the tank were removed. Soil samples taken at both sites triggered an excavation of TPH impacted soil at UST-252. 82 tons of soil were removed and treated at the local TDU.

Completed Area Name: IRP-9
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/26/2000
Comments: IRP 9A: Between July 1997 and September 1997, approximately 676 tons of PAH-contaminated soil and 25 tons of total petroleum hydrocarbon (TPH)-contaminated soil was excavated and treated from IRP-9A Subareas 1 and 2 combined. The contaminated soil was transported to the on-site thermal desorption unit (TDU), treated, and transported back to IRP-9A for use as backfill in the excavation. The removal action at IRP 9A Subarea 2 encompassed the boundaries of two STs: ST-40A and ST-40B. The remaining STs were outside the excavation

limits of the removal action. ' IRP 9B: Between October 1998 and January 1999, approximately 3788 tons of PAH-contaminated soil from IRP 9B Subarea 1 and 3049 tons of PAH-contaminated soil from IRP 9B Subarea 3 were excavated and treated. The contaminated soil was transported to the on-site thermal desorption unit (TDU), treated, and transported back to IRP-9B for use as backfill in the excavation. The removal action at IRP 9B Subarea 1 encompassed the boundaries of two STs: ST-47A and ST-47B. ' Based on the post-removal action human health risk assessment, it was determined that exposure to the remaining soil and residual PAH concentrations at IRP 9A and IRP 9B would result in a human health risk well within the acceptable range for resident children and industrial workers, and at the NCP point of departure for resident adults, as defined by the EPA for unrestricted residential or industrial use.

Completed Document Type: * Community Environmental Response Facilitation Act
Completed Date: 03/12/1998
Comments: CERFA - TUST2: Subsequent to the April 14, 1994 CERFA concurrence, an additional environmental investigation and evaluation of the MCAS Tustin found additional areas within the base that meets the CERFA uncontaminated criteria in accordance with the amendment to Section 120(h)(4) of CERCLA. These areas included the agricultural land which were evaluated under a pesticide investigation in 1996. The investigation found these areas to contain pesticides at concentrations within or below the statistical range for land of similar use at MCAS Tustin and the levels are not a threat to human health or the environment. Additional areas were also identified based on the Base wide groundwater investigation of 1994. These areas were found to be property upon which no hazardous substances and no petroleum products or their derivatives were known to have been released or disposed of, including no migration of these substances from adjacent areas. These properties are eligible for CERFA concurrence.

Completed Area Name: OU-1A
Completed Sub Area Name: 13S
Completed Document Type: * CEQA
Completed Date: 11/18/2004
Comments: OU-1A consists of a vehicle maintenance facility and wash pad known as IRP Site 13S. The site includes Buildings 16 and 50, formerly used for vehicle maintenance, and a former wash pad. The buildings and wash pad occupy an area of approximately 3,400 square yards in the northwestern corner of former MCAS Tustin. The lateral extent of the associated 1,2,3-trichloropropane (1,2,3-TCP) groundwater plume is approximately 27 acres. VOCs are the contaminants of concern at IRP-13S. The Navy proposes to remediate soil and groundwater contaminated by hazardous substances at Operable Unit (OU) 1A, Site 13S, which are located on the former Marine Corps Air Station (MCAS) Tustin. DTSC has prepared a revised initial study pursuant to the requirements of the California Environmental Quality Act(CEQA, Section 21000 et.seq., California Public Resources Code) and implementing Guideline (Section 15000 et seq., Title 14, California Code of Regulations). Based upon this analysis, DTSC has determined that the proposed project will not have a significant effect upon the environment and a Negative Declaration was prepared. DTSC approved the CEQA Notice of Determination on November 18, 2004.

Completed Area Name: OU-1B
Completed Sub Area Name: Not reported
Completed Document Type: * CEQA
Completed Date: 11/18/2004
Comments: OU-1B consists of a paint stripper disposal area known as IRP-3 that occupies approximately 1.4 acres. The site includes seven buildings, several of which were used for chemical storage, painting, and paint stripping operations from 1967 to 1999 when military activities were discontinued. Solvents, paint strippers, battery acids, and water used for washing inactive oil/water separators were reportedly poured directly onto the ground outside some of the buildings. In addition, OU-1B consists of a drum storage area known as IRP-12 occupies a total area of about 3.5 acres. The site was used by the Marine Corps primarily for materials storage and warehouse functions from the mid-1960s to 1975. Solvents, motor oil, and hydraulic fluids were stored in this area. The Navy proposes to remediate soil and

groundwater contaminated by hazardous substances at Operable Unit (OU) 1B, Sites 3 and 12, which are located on the former Marine Corps Air Station (MCAS) Tustin. DTSC has prepared a revised initial study pursuant to the requirements of the California Environmental Quality Act (CEQA, Section 21000 et seq., California Public Resources Code) and implementing Guideline (Section 15000 et seq., Title 14, California Code of Regulations). Based upon this analysis, DTSC has determined that the proposed project will not have a significant effect upon the environment and a Negative Declaration was prepared. DTSC approved the CEQA Notice of Determination on November 18, 2004.

Completed Area Name: OU-1A
Completed Sub Area Name: 13S
Completed Document Type: * CEQA
Completed Date: 08/17/2001
Comments: CEQA - RA1A: An Initial Study and a Negative Declaration were prepared by Department of Toxic Substances Control (DTSC) for a time-critical removal action (TCRA) for IRP site 13S. The TCRA consists of groundwater extraction to hydraulically contain groundwater contaminated with volatile organic compounds (VOCs), principally 1,2,3-TCP. TCRA will eliminate further downgradient migration of contaminated groundwater and prevent vertical migration to the underlying regional aquifer. The extracted groundwater will be treated using granular activated carbon (GAC) and discharged to Peters Canyon Channel through a storm drain or injected back to the aquifer. Discharge to Peters Canyon Channel will comply with the substantive provisions of Regional Water Quality Control Board (RWQCB), Santa Ana Region, Order Number 96-18, General National Pollution Discharge Elimination System (NPDES) Permit Number CAG918001. Discharge will also comply with supplementary RWQCB requirements (e.g. discharge limits for 1,2,3-TCP) that are not included in the General Permit. DTSC has found, on the basis of Initial Study and comments received on the Negative Declaration, that there is no substantial evidence that this project will a significant effect on the environment. The Notice of Determination was forwarded to the Office of Environmental Analysis, Regulations and Audits 17, 2001 for filing.

Completed Document Type: Federal Facility SR Agreement
Completed Date: 08/18/1999
Comments: ORDER(FFSRA) - BASEWIDE: DTSC entered into an enforceable agreement with the United States Navy for the Marine Corps Air Station located in Tustin, California on August 18, 1999. Elsie L. Muncell, the Deputy Assistant Secretary of the Navy (Environment & Safety) and John Scandura, Chief of the Southren California Branch of the Military Facilities, signed the Federal Facilities Site Remediation Agreement(FFSRA). The purpose of the agreement was to ensure that the Navy's corrective action obligations required by the Resource Conservation and Recovery Act (RCRA) permit, are complied with environmental impacts associated with past military activities at the facility are investigated and that the appropriate corrective, removal and/or remedial actions are taken as necessary. The FFSRA provides for DTSC review and approval of a Site Management Plan (SMP), document submittals, and quarterly progress report in accordance with specified deadlines.

Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 07/20/2006
Comments: A land use covenant was recorded on July 20, 2006 that restricts residential, industrial and other use, since it was a former landfill. The Moffett Trenches and Crash Crew Burn Pit was designated as OU-3 and is also known as Installation Restoration Program Site 1. OU-3 is generally bounded to the northeast by the southern edge of Edinger Avenue, to the northwest by the western edge of the access road on the northwest edge of the Jamboree Road roadbed fill

(approximately 20 feet west of the landfill gas probes), to the southwest by the toe of the northern concrete support structure for the Jamboree Road overpass above Moffett Drive, and to the southeast by the western edge of the Peters Canyon Channel bottom where it meets the containment remedy wall or western channel bank. The OU-3 Record of Decision/Remedial Action Plan (ROD/RAP) was approved on December 20, 2001 and selected a surface cover, containment wall along Peters Canyon Channel; landfill gas, groundwater and surface water monitoring program; land use restrictions; and a contingency plan as the remedial action for OU-3. The ROD/RAP provided that the Covenant must provide for access for Department, the Regional Water Quality Control Board, and other regulatory agencies that have jurisdiction, including any contractor or representative acting at the direction of any such aforementioned entity. The areas of applicability of the restrictions set forth in this Covenant are referred to as the Property and are more particularly described and depicted in Exhibit A and B, respectively.

Comments: Investigation of various AOC located throughout the base by reviewing various reports and identifying if a hazardous release occurred or not. If this could not be identified by researching the historical data, samples were collected and evaluated. All AOC that were found to be hazardous will be treated under the remedial action process or the removal action process. This PEA was prepared to also satisfy RCRA Facility Assessment (RFA) requirements.

Completed Area Name: Completed Sub Area Name: Completed Document Type: Completed Date: Comments:	Sites With No Operable Unit MDA-6 Preliminary Endangerment Assessment Report 03/22/2000 PEA - MDA-06, AME-05, MAE-06, MWA-01, UST-530B, TOW-X1 & TOW-X8: Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Remediation actions were taken at these sites as follows; 1) At Site MDA-06, 1,247 tons of impacted soil were removed, of which 901 tons were impacted with Total Petroleum Hydrocarbons (TPH) and trace pesticides and was transported for McKittrick Waste Management for disposal. The remaining 346 tons were impacted with lead and pesticides and was transported to Chemical Waste Management's Class I treatment, storage and disposal facility. 2) MAE-05 was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample was taken, and was found to contain endrin aldehyde, methylene chloride and bromodichloro- methane with endrin aldehyde above action levels. The site was decontaminated again and endrin aldehyde dropped to acceptable levels. Two drums of paint chips were collected and shipped as non-RCRA hazardous waste to Chemical Waste Management's Facility, and 3,000 gallons of decontamination water were collected in a Baker tank and treated on site at the carbon adsorption treatment unit and properly discharged. 3) MAE-06 was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample that contained calcium , magnesium, sodium and zine was collected; these metals do not pose a risk on human health or the environment. 4) MWA-01 was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample containing below action levels of trihalomethanes, bromodichloro- methane, chloroform, and dibromochloromethane was collected. Rinsate water from the site was treated at the onsite carbon adsorption treatment unit and discharged. 5) At UST-530B, approximately 926 tons of TPH impacted soil were removed and treated at the on-site Thermal Disorption Unit and 65,000 gallons of ground water were removed and treated at the onsite carbon adsorption treatment unit and properly discharged. 7) At TOW-X1, the oil/water separator was removed, and approximately 78 tons of polychlorinated biphenyl (PCB)/pesticide

Completed Document Type: Feasibility Study Report
Completed Date: 08/31/2004
Comments: RIFS - OU4: The shallow groundwater investigation was performed at sites where at least one VOC had been previously reported at concentrations exceeding its maximum contaminant level (MCL). Discrete groundwater samples were collected at 121 locations using HydroPunch sampling techniques and were analyzed for VOCs. Data obtained from the shallow groundwater investigation were used to revise risk assessments for some OU-4 sites and IRP-5N, IRP-5S(b), IRP-8, IRP-11, IRP-16, MMS-04 Areas A and C were recommended for NFA. DTSC concurs with this recommendation. RIFS - OU4: The shallow groundwater investigation was performed at sites where at least one VOC had been previously reported at concentrations exceeding its maximum contaminant level (MCL). Discrete groundwater samples were collected at 121 locations using HydroPunch sampling techniques and were analyzed for VOCs. Data obtained from the shallow groundwater investigation were used to revise risk assessments for some OU-4 sites and IRP-5N, IRP-5S(b), IRP-8, IRP-11, IRP-16, MMS-04 Areas A and C were recommended for NFA. DTSC concurs with this recommendation. RIFS - OU4: The shallow groundwater investigation was performed at sites where at least one VOC had been previously reported at concentrations exceeding its maximum contaminant level (MCL). Completed Document Type: Finding of Suitability to Transfer
Completed Date: 12/04/2002
Comments: FOST - FOST4: DTSC reviewed and commented on the FOST for a portion of Parcel 24. DTSC was unable to concur on the suitability of Parcel 24 for transfer because the portion of Parcel 24, that is the subject of this FOST, includes buildings where potential releases of lead from lead-based paint were not evaluated. Additionally, MCAS Tustin is a permitted Hazardous Waste Facility under California law and DTSC cannot concur with a FOST until the necessary permit modification is complete.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: REV
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 01/09/2003
Comments: PPP - REV: The CRP describes a comprehensive community relations program being conducted in conjunction with the Installation Restoration Program (IRP) investigation and environmental cleanup activities at the Former MCAS Tustin. The purpose of the CRP is twofold: to identify concerns the community may have regarding cleanup efforts and to determine the best methods for conducting and enhancing communication between the Navy and the local community.

Comments: RAW - TCRA1A: An Action Memorandum/Removal Action Work Plan (AM/ RAW) was prepared to document for the administrative record the Department of Navy's decision to undertake a time-critical removal action (TCRA) to initiate groundwater extraction to hydraulically contain groundwater contaminated with volatile organic compounds (VOCs), principally 1,2,3-TCP. The TCRA will eliminate further downgradient migration of contaminated groundwater and prevent vertical migration to the underlying regional aquifer. The extracted groundwater will be treated using granular activated carbon (GAC) and discharged to Peters Canyon Channel through a storm drain or injected back to the aquifer. Discharge to Peters Canyon Channel will comply with the substantive provisions of Regional Water Quality Control Board (RWQCB), Santa Ana Region, Order Number 96-18, General National Pollution Discharge Elimination System (NPDES) Permit Number CAG918001. Discharge will also comply with supplementary RWQCB requirements (e.g. discharge limits for 1,2,3-TCP) that are not included in the General Permit. DTSC approved the AM/RAW on August 17, 2001.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/27/1992
Comments: Conditional approval of Navy's SI Report was granted. Navy performed SI sampling of 9 sites that were recommended for further study in their Initial Assessment Study (IAS). The following sites were recommended for RI in the report: Site 3 - Paint Stripper, Site 5 - Drainage No.1, Site 7 - Rapid Refuel Sta Site 12 - Drum Stg. area No.2, & Site 13 - Drum Stg. area No.3. Site 9 - Hangar No. 1 is recommended for removal & confirmation sampling. Site 15 - Blimp Hangar Disposal does not exist. Although Sites 2 & 8 were recommended NFA, DTSC disagreed because the area had been graded and samples were not taken deep enough to test the original ground.

Completed Area Name: FOSL3
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Lease
Completed Date: 04/26/2002
Comments: FOSL - FOSL3: DTSC reviewed and commented on the FOSL 3. DTSC concurs with the Navy that the property could be leased in a manner that is protective of human health and the environment with the specified restrictions, conditions and notifications set forth in the FOSL.

Completed Area Name: FOST3
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 04/22/2002
Comments: FOST - FOST3: DTSC reviewed and commented on the FOST 3 for Parcels 23,29,34,35,36 and portions of 1,16,17,24,27,28,40, and 41 and found parcel 36 and portions of 24 and 41 to be environmentally suitable for transfer for their intended use. ' DTSC is unable to concur with the suitability of Parcels 1 and 17 for transfer. The 1998 MCAS

MAP FINDINGS

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

Tustin Specific Plan/Reuse Plan Errata identifies Parcels 1 and 17 as educational/recreational use. As a result, it is possible that the reuse of these parcels could include school sites, meaning kindergarden through grade 12 (elementary, middle and high schools). Additional detail is not provided for Parcel 1 and the Base Realignment and Closure (BRAC) Business Plan 2002 (in review) designates the land use of Parcel 17 as a High School. Pursuant to the California Education Code, section 17210 et seq; a separate and comprehensive environmental review is required for sites where state funds will be used for property acquisition or school construction. This review process includes an evaluation of whether hazardous materials on the property have been or could be released that would endanger students. Because this separate environmental review has not been conducted for Parcels 1 and 17, DTSC cannot determine if these parcels are suitable for the intended use. DTSC was unable to concur with the suitability of Parcels 23, 29, 34, 35, and portions of Parcels 1, 16, 27, 28, and 40 for transfer. These parcels include buildings/structures where potential releases of lead from lead-based paint (LBP) were not evaluated or where sufficient information was not provided for DTSC to determine if LBP is a potential issue. DTSC considers the presence of exterior LBP that has been released to the soil to pose a potential release to the environment pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986.

Completed Area Name: Transfer Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Lease
Completed Date: 02/27/2002
Comments: DTSC reviewed and commented on the FOSL for Southern Parcels CO Areas 1,2,3 and 4. DTSC concurs with the Navy that the Southern Parcels CO Areas property is suitable for lease for the purposed intended (commercial/business) subject to the conditions, notifications, and restrictions set forth in the FOSL.

Completed Area Name: FOST2
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 09/19/2001
Comments: FOST - FOST2: DTSC reviewed and commented on the FOST for Southern Parcels 4 - 8, 10 - 12, 14, 42 and Parcels 25, 26, 30 -33, 37 and Portions of 40 and 41 and found Parcels 3 - 8, 10 - 12, 14, 42 and Parcels 25, 26, 30, 32, 33, 37 and Portions 41 to be environmentally suitable for transfer for their intended use. DTSC was unable to concur on the suitability of Parcel 31 for transfer. The MCAS Tustin Specific Plan/Reuse Plan Errata (City of Tustin 1998) identifies this parcel as future elementary school site. Pursuant to the California Education Code, section 17210 et seq., a separate and comprehensive environmental review is required for sites where state funds will be used for property acquisition or school construction. The Education Code requires that DTSC make a determination as to the suitability of the property for school use based on this review. The review process includes an evaluation of whether hazardous material on the property have been or could be released that would endanger school students. Because this separate environmental review has not been conducted for Parcel 31 DTSC was unable to determine if these parcel was suitable

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

for use as elementary school sites and, therefore, we did not concur with the Finding of Suitability for this parcel. ' In addition, DTSC was unable to concur with the suitability of Parcel 4 and portions of Parcel 40 for transfer. These parcels may have lead based paint (LBP) that has been released to the soil. DTSC maintains that lead in soil from LBP is a Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) release to the environment. Building 176 (Parcel No. 4), Buildings 180, 181, 182 (Parcel No. 40), and Structure 237 (Parcel No. 4) were all constructed prior to 1978, the year when lead based paint products were discontinued. Navy did not conduct soil sampling to determine whether soils surrounding these buildings contain concentrations of lead from LBP which may pose a threat to human health and the environment. Until such sampling is performed, DTSC cannot determine whether, pursuant to CERCLA 120(a)(3), all actions have been taken at these two parcels to remedy potential releases of lead to the environment from LBP.

Completed Area Name: FOST1
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 09/27/2001
Comments: FOST - FOST1: DTSC reviewed and commented on the FOST for Parcels 3, 21, 38, 39, and Portions of 40 and found Parcels 3, 38 and portions of 40 to be environmentally suitable for transfer for their intended use as transitional/emergency housing, community park/road and transportation/circulation facilities, respectively. ' DTSC was unable to concur on the suitability of Parcels 21 and 39 for transfer. The MCAS Tustin Specific Plan/Reuse Plan Errata (City of Tustin 1998) identifies these parcels as future elementary school sites. Pursuant to the California Education Code, section 17210 et seq., a separate and comprehensive environmental review is required for sites where state funds will be used for property acquisition or school construction. The Education Code requires that DTSC make a determination as to the suitability of the property for school use based on this review. The review process includes an evaluation of whether hazardous materials on the property have been or could be released that would endanger school students. Because this separate environmental review has not been conducted for Parcels 21 and 39, DTSC was unable to determine if these parcels were suitable for use as elementary school sites and, therefore, we did not concur with the finding of Suitability for these two parcels.

20, Chapter 6.8, California Health and Safety Code. This removal action will reduce the human risk associated with arsenic contaminated soil.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: S16AB
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 02/07/2003
 Comments: PEA - ST16A&ST16B: The Site Inspection (SI) report summarizes the results of previous investigations conducted at ST 16A and 16B. The Navy found polycyclic aromatic hydrocarbons (PAH) in soils in earlier investigations at these two sites. They completed a removal action of contaminated soils in 1997. Post-removal soil sampling sound some additional contamination with PAH. The subject report documents the Department of the Navy's (DON's) risk screening evaluation at the site and based on the risk estimates recommends a No Further Action (NFA) site closure for ST16A and ST16B. DTSC did not concur with the NFA recommendation.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: MOOR5
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 11/21/2002
 Comments: PEA - MOOR Pad 4 and 5 (MOOR5): The preliminary Assessment was performed to evaluate the distribution of polycyclic aromatic hydrocarbons at the Mooring pads, Twenty Seven direct-push soil samples were collected from depths ranging from 6 inches to 18 inches below ground surface at Mooring Pad 4. Five samples were collected at the degraded locations at the Mooring Pad 5. The results of the screening risk assessment indicate that concentrations at the Mooring Pad 4 and 5 are with in the risk management decision reange and pose acceptable risk levels and recommended no further action. DTSC concurs with the recommendation.

Completed Area Name: OU-3
Completed Sub Area Name: 1
Completed Document Type: Remedial Action Plan
Completed Date: 12/20/2001
Comments: The ROD/RAP was issued on May 17, 2000 and signed by DTSC on December 18, 2001. The ROD/RAP documents the final selected remedial action for the Moffett Trenches and crash Crew Burn Pits site. The major components of the selected remedial action for OU-3 are institutional controls, groundwater and surface-water monitoring, landfill gas monitoring, inspection and maintenance of the containment wall and cover, maintenance of the French drain system and associated sumps, maintenance of monitoring wells and security features, and periodic reviews. In addition, the land use controls include use restrictions, notification procedures, inspections of physical structures, contingency plans, and five-year reviews.

Completed Date: 09/09/2005
Comments: The soil removal action achieved the objective of excavating VOC-contaminated soil in the vadose zone above the cleanup level. The confirmation soil samples indicated that the lateral extent of VOC-contaminated soil above the cleanup goal was removed. The removal of contaminated soil made it possible for the builder to install the utilities at this site.

Completed Sub Area Name: 13S
Completed Document Type: Remedial Action Plan
Completed Date: 12/02/2004
Comments: The OU-1A ROD/RAP presents the selected remedial action consisting of excavating soil contaminated with volatile organic compound (VOC) from a hot spot area, disposing this soil at a permitted facility, and extracting and treating VOC-contaminated groundwater using a granular activated carbon (GAC) system from a hot spot area and containment wells at site IRP 13S. Hot spot areas are classified as soil and groundwater contamination area that are characterized by the highest concentrations of VOC chemicals. The remediation of soil and groundwater hot spots will expedite the cleanup of groundwater.

Completed Document Type: Feasibility Study Report
Completed Date: 03/21/2002
Comments: RIFS - OU1B: IRP Sites 3 and 12. The Feasibility Study (FS) develops and evaluates potential remedial alternatives to mitigate risks to human health from groundwater, contaminated with volatile organic compounds, principally trichloroethene (TCE), and related organic solvents originated at Sites 3 and 12. This FS involved screening technologies and associated process options according to effectiveness, implementability, and cost. The retained options were assembled into remedial alternatives and then evaluated against regulatory criteria.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Baseline Survey
Completed Date: 06/19/2001
Comments: BWEBS - BW: Department of Defense and Department of the Navy policy and guidance documents, along with currently available information generated from on-site investigations, visual inspections, personnel interviews, regulatory records searches, aerial photograph reviews, reviews of data for adjacent properties, and chain-of-title searches, are the basis for this report. This Basewide EBS Report supplements the April 1994 MCAS Tustin EBS for the Community Environmental Response Facilitation Act of 1992 Report and the April 1997 MCAS Tustin EBS for Parcels 6, 8B, 8C, 11A, 33, 38, 39, 41A, and 41B. ' CEQA - OU3: DTSC completed a Special Initial Study to evaluate the potential for adverse environmental impact for the Proposed remedial action identified in the Record of Decision/Remedial Action Plan (ROD/RAP). The remedial action includes application of institutional controls, inspection and maintenance of the concrete containment wall and surface cover, monitoring of ground water and surface water, monitoring of landfill gas, maintenance of the french drain system and associated sumps, periodic reviews of monitoring results, and preparation of a contingency plan. Based on the Special Initial Study, a Negative Declaration was prepared pursuant to the provisions of CEQA. The draft Negative Declaration was circulated for a 30-day public review and comment period. DTSC has found, on the basis of the

MAP FINDINGS

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

Special Initial Study and comments received on the Negative Declaration, that there is no substantial evidence that the project will have a significant effect on the environment. ' PEA - PCL35 and PCL 21: The Department of Navy has a lead-in-soil sampling program. Its objective, at MCAF Tustin is to evaluate potential lead-based paint hazards in the soil adjacent to the housing units within the housing areas constructed prior to 1978. Lead-based paint on the exterior of the houses could potentially flake off of the housing units and impact soil in the yard and also in areas adjacent to the perimeter of the house. A work plan was developed for the evaluation of potential lead-based paint hazards in soil at the former housing areas, one of which is Moffett Meadows (PCL 35) and Tustin Villas (PCL21). The intent of the soil sampling at the housing areas was to determine whether further evaluation was necessary prior to transferring the property for future use. Base on the sampling results, it was determined that no further action was required for lead-based paint in soil at Moffett Meadows or at Tustin Villas.

Completed Area Name: Sites With No Operable Unit

 Completed Document Type: Removal Action Completion Report
 Completed Date: 12/20/1998
 Comments: Not reported

Completed Area Name: OU-1B
 Completed Sub Area Name: Not reported
 Completed Document Type: Fact Sheets
 Completed Date: 01/21/2005
 Comments: This task is completed

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: MWA15
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 05/17/2001
 Comments: PEA - MWA15: Analytical results for hand-auger, pothole, and excavation confirmation soil samples from Site MWA-15 were below the target cleanup levels or laboratory reporting limits. These results indicate that soil at this site has not been impacted. Therefore, no further action is required for this site. ' PEA - UST89: Analytical results for the confirmation soil sample collected from the bottom floor of the excavation were below the target cleanup level or laboratory reporting limits, indicating that soil at the site has not been impacted. Therefore, no further action is required for this site. ' PEA - MAE7: This is a miscellaneous air emission area, consists of two separate areas: Building 273 (Test Cell) and Building 231 (Engine Test Area). The activities of PEA included facility decontamination, collection and analysis of rinse water samples, and subsurface soil sampling using a hand auger. Analytical results for the rinse water samples and soil samples were below source water (i.e., fire hydrant water) concentrations with the following exceptions: aluminum, barium, iron, molybdenum, selenium, and vanadium, which were below the tap water PRGs; and calcium, magnesium, and potassium, which are common metals for which no PRGs have been established. Soil sample results were below target cleanup levels and laboratory reporting limits, indicating that soils at the site were not impacted. The results of the risk screening assessment indicate that concentrations at Site MAE-07 pose acceptable risk

Comments: Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: ST13A
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/26/2000
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/14/2004
Comments: PEA-DSD7: The Site Inspection (SI) report summarizes the results of previous investigations conducted at DSD-07. Based on the delineation results, DSD-07 does not appear to be the source of trichloroethylene (TCE) contamination in the area. This is based on the low levels of TCE found in shallow soils directly below the storm drain line to 6 feet below ground surface. The site data do not indicate a release occurred directly from DSD-07. Based on the information Navy requested No Further Action (NFA) for the site. DTSC did concur with the NFA recommendation.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: MAW7
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/06/2001
Comments: PEA - MAW7 : Sites MAW-7, MAW-8 and MAW-16 each abandoned well was closed according to Orange County Health Care Agency guidelines. Samples were collected from the groundwater that was displaced during backfilling of wells MAW-7 & MAW-16 with grout. The samples were analyzed for disposal characterization purposes. A minimal amount of water was produced during the grouting of MAW-8 and, therefore, a sample was not collected. Analytical results for the groundwater samples were below either target cleanup levels or laboratory reporting limits. Because soil samples were not collected from Sites MAW-7, MAW-8 and MAW-16, a risk screening assessment was not required. Not reported

MAP FINDINGS

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: ST35
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 05/22/2001
 Comments: PEA : Facility decontamination and subsurface sampling was conducted at eight sites. Excavation of impacted soil was performed at Sites ST-36, ST-51, and ST-88. The contaminated soil was treated in a thermal desorption unit (TDU) located on site. In the no-landscaped excavated areas, non-impacted overburden and treated soil was used as backfill material. The excavation was compacted to greater than 90 percent relative compaction to surface grade. In the landscaped excavation areas or areas scheduled for demolition, no compaction testing was performed. ' ST-35, ST-89, ST-90 and ST-91 - Analytical results for rinse water and soil boring samples support no further action. ' ST-36 and ST-51 - Analytical results for soil boring and confirmation soil samples support no further action ' ST-72A - Results of the screening risk assessment indicate that the concentrations at ST-72A pose acceptable risk levels and support no further action. ' ST-88 - The analytical results for the rinse water samples and the deeper soil sample results support no further action. However, the shallow hot spot areas with elevated concentrations of arsenic (as identified at ST-86, ST-88, and MAE-03) will be addressed as a separate arsenic AOC report.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: ST18B
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 02/01/2001
 Comments: PEA - SITE 18B: In 1995, a Resource Conservation and Recovery Act (RCRA) Facility Assessment was completed for MCAF Tustin. Site 18B was identified as potentially contaminated site. Hand auger samples were collected and contaminated soil was excavated. The results of the screening risk assessment showed acceptable levels and support no further action.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: MWA10
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 05/30/2001
 Comments: PEA - MWA10: The contaminated soil was treated in a thermal desorption unit (TDU) located on site. In the non-landscaped excavated areas, non-impacted overburden and treated soil was used as backfill material. The excavation was compacted to greater than 90 percent relative compaction to surface grade. In the landscaped excavation areas, no compaction testing was performed. Analytical results for the rinse water samples, soil samples, and excavation samples collected at the site was below source water concentrations (collected from local fire hydrants), target cleanup levels, or laboratory reporting limits. These results indicate that impacted soil at the site was removed. In addition, the results of the screening risk assessment support no further action.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: LPL
 Completed Document Type: Finding of Suitability to Lease
 Completed Date: 06/26/2000
 Comments: PEA - ST-5A, ST-12, ST-22, ST-37B, ST-39, ST-42, ST-45: 1.) ST-5A and

TUSTIN MARINE CORPS AIR STATION (Continued)

S101272797

ST-12: The concrete pads were decontaminated and samples collected from the rinse water were below action levels. Soilsamples were taken and results were also below action levels. 2.) ST-22: Soil samples were collected and results were below action levels. 3.) ST-37B: Results from soil samples triggered an excavation (approximately 129 tons) of TPH-impacted soil. The soil was treated at an on-site thermal desorption unit (TDU). confirmation sampling indicated that all TPH-impacted soil had been removed. 4.) ST-39 and ST-45: Results from soil samples triggered an excavation(approximately 22.3 tons and 27 tons) from ST-39 and ST-45 respectively of PAH-impacted soil. The soil was treated at an on-site thermal desorption unit (TDU). confirmation sampling indicated that all PAH-impacted soil had been removed. 5.) ST-42: The concrete building was decontaminated and samples collected from the rinse water were below action levels. Soil samples were taken and results were also below action levels. ' PEA - ST-13A, ST-13B, ST-18A, ST-26A, ST-34A, ST-46, ST-55, ST-60A, and ST-80: Facility decontamination was conducted at Sites ST-13A, ST-18A, ST-26A, ST-34A, ST-46, ST-55 and ST-56. A rinse water sample was taken and analyzed for each of the above sites. Soil sampling was also conducted for each of these sites. Based on the results of the screening risk assessment, the concentrations at sites ST-13A ST-13B, ST-18A, ST-26A, ST-34A and ST-56 pose acceptable risk levels. ' Soil sample results for ST-46 and ST-55 indicated that excavation was required. All confirmation sample results for ST-46 and ST- 55 were below target cleanup levels and the results of the screening risk assessment indicate that concentrations at these two sites pose acceptable risk levels. ' Decontamination activities at ST-60A and ST-80 were not necessary because the sites were located on asphalt. The analytical results for soil samples from ST-60A and ST-80 were below target cleanup levels. The results of the screening risk assessment indicate that concentrations at ST-60A and ST-80 pose acceptable risk levels.

Completed Area Name: OU-2
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 12/12/2000
Comments: RAP - OU2: No action is the selected remedy for the three IRP sites and nine AOCs. In selecting the no action remedy for these sites/AOCs, it was determined that the existing condition of the sites/AOCs is protective of human health and the environment. ' CEQA - OU2: A Notice of Exemption (NOE) for the OU-2 No Action Remedial Action Plan (RAP) was filed with the State Clearinghouse on September 28, 2000. DTSC found the project the project to be exempt under Title 14 California Code of Regulations (CCR), Section 15061(b)(3) based on the following: DTSC in conjunction with the RWQCB, U.S. EPA and DON, determined that no further remedial action is necessary to ensure the protection of human health and the environment at sites IRP-2, IRP-13E and AOCs AD-04, AS-06, AS-08, AST-02, AST-04, MDA-04, MDA-07, MMS-01, and MWA-03. This determination was based upon extensive field investigations, laboratory analyses, and a through assessment of potential human health risk assessments at each specific location. The results of the human health risk assessment at these sites/AOCs do not present an unacceptable risk to human health or the environment. Therefore, since DTSC has determined that there is no possibility that the project may have a significant effect on the environment, the activity is not subject to CEQA.

 Completed Date: 03/03/2000
 Comments:

PEA - ST-7, ST-8, ST-21C, ST-21D, ST-21E, ST-21F, ST-79, and ST- 82: Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Investigation and cleanup work was conducted under the RCRA Stabilization as required by the RCRA Permit. The Regional Water quality Control Board provided oversight of cleanup of petroleum contamination. DTSC's Office of Military Facilities provided oversight of removal and remediation of hazardous material contamination and reviewed the final closure reports for the above sites in accordance with the RCRA and Comprehensive Environmental Recovery Compensation and Liability Act (CERCLA) guidelines, and pursuant to the Federal Facilities Site Remediation Agreement (FFSRA), signed on 8/18/1999. Remedial actions were taken at these sites as follows: 1) At Sites ST-7, ST-21D and ST-82 the concrete slab was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample was taken and tested for metal and chlorinated solvents. In addition, soil samples were taken and analyzed for the same chemicals. Levels found were below action level. However rinse water was still collected and treated in the onsite thermal desorption unit (TDU) before being discharged into the sanitary sewer. 2) At Site ST-8, soil samples were taken and analyzed for TPH-extractable, Solvents, PCBs, and metals. All samples were below PRGs. 3) At ST-21C, soil and groundwater samples were taken and screened for solvents, metals and petroleum. Methyl-Tertiary- Butyl-Ether MTBE was detected in the soil above action level. Impacted soil was removed and treated on site at the local TDU, confirmation samples were taken. 4) At ST-21E, soil samples were taken and analyzed for solvents, metals, PCBs, and petroleum. One sample indicated a high hit of benzo(a)pyrene. Impacted soil was removed and treated on site at the local TDU, confirmation samples were taken. 5) At ST-2F the concrete slab was decontaminated using mechanical scrubbing and pressure washing with detergent and rinsed with source water. A rinsate sample was taken and tested for metals, chlorinated solvents and PCBs. In addition, soil samples were taken and analyzed for the same chemicals. Levels found were below action level. However rinse water was still collected and treated in the onsite thermal desorption unit before being discharged into the sanitary sewer. 6) At ST-79, soil samples were taken and analyzed for TPH-extractable, chlorinated Solvents, pesticides, PCBs, and metals. One sample detected contained Aroclor-1260, and dieldrin above action level. Impacted soil was removed and is being stockpiled and will be transported off site for storage.

Completed Area Name: Sites With No Operable Unit
 Completed Sub Area Name: MWA-5
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 03/15/2000
 Comments: PEA - MWA-05, TOW-06, UST-508, MWA-12, TOW-11, UST-251, MWA-13, TOW-12, UST-252: Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Remediation actions were taken at these sites as follows; 1) At Site

S101272797

MWA-05, a total of 25 samples were collected and tested for TPH-extractable. TOW-06 and UST-508 were excavated confirmation samples were taken. Sample results were below action levels. 2) At MWA-12, the concrete pad was decontaminated and final rinsate samples showed no detection of contamination. Rinsate water was collected and treated on site before being discharged into the channel under the NPDES permit. In addition, soil samples were taken at MWA-12, TOW-11, UST-251 after the removal of the oil/water separator and the assigned Storage tank (UST-251). Samples collected triggered an excavation of 156 tons of TPH impacted soil at UST-251 site. Deeper confirmation samples indicated the removal of the impacted soil which was treated at the onsite Thermal Desorption Unit (TDU). 3) For MWA-13 the concrete pad was decontaminated and rinsate samples were taken. Rinsate samples indicated no contamination present, however rinsate water was collected and treated locally before being discharged into Peter Canyon Channel. For TOW-12 and UST-252, The oil/water and the tank were removed. Soil samples taken at both sites triggered an excavation of TPH impacted soil at UST-252. 82 tons of soil were removed and treated at the local TDU.

Completed Area Name: IRP-9
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/26/2000
Comments: IRP 9A: Between July 1997 and September 1997, approximately 676 tons of PAH-contaminated soil and 25 tons of total petroleum hydrocarbon (TPH)-contaminated soil was excavated and treated from IRP-9A Subareas 1 and 2 combined. The contaminated soil was transported to the on-site thermal desorption unit (TDU), treated, and transported back to IRP-9A for use as backfill in the excavation. The removal action at IRP 9A Subarea 2 encompassed the boundaries of two STs: ST-40A and ST-40B. The remaining STs were outside the excavation limits of the removal action. ' IRP 9B: Between October 1998 and January 1999, approximately 3788 tons of PAH-contaminated soil from IRP 9B Subarea 1 and 3049 tons of PAH-contaminated soil from IRP 9B Subarea 3 were excavated and treated. The contaminated soil was transported to the on-site thermal desorption unit (TDU), treated, and transported back to IRP-9B for use as backfill in the excavation. The removal action at IRP 9B Subarea 1 encompassed the boundaries of two STs: ST-47A and ST-47B. ' Based on the post-removal action human health risk assessment, it was determined that exposure to the remaining soil and residual PAH concentrations at IRP 9A and IRP 9B would result in a human health risk well within the acceptable range for resident children and industrial workers, and at the NCP point of departure for resident adults, as defined by the EPA for unrestricted residential or industrial use.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: TUST2
Completed Document Type: * Community Environmental Response Facilitation Act
Completed Date: 03/12/1998
Comments: CERFA - TUST2: Subsequent to the April 14, 1994 CERFA concurrence, an additional environmental investigation and evaluation of the MCAS Tustin found additional areas within the base that meets the CERFA uncontaminated criteria in accordance with the amendment to Section 120(h)(4) of CERCLA. These areas included the agricultural land which were evaluated under a pesticide investigation in 1996. The investigation found these areas to contain pesticides at concentrations within or below the statistical range for land of similar use at MCAS Tustin and the levels are not a threat to human health or the environment. Additional areas were also identified based on the Base wide groundwater investigation of 1994. These areas were found to be property upon which no hazardous substances and no petroleum products or their derivatives were known to have been released or disposed of, including no migration of these substances from adjacent areas. These properties are eligible for CERFA concurrence.

for vehicle maintenance, and a former wash pad. The buildings and wash pad occupy an area of approximately 3,400 square yards in the northwestern corner of former MCAS Tustin. The lateral extent of the associated 1,2,3-trichloropropane (1,2,3-TCP) groundwater plume is approximately 27 acres. VOCs are the contaminants of concern at IRP-13S. The Navy proposes to remediate soil and groundwater contaminated by hazardous substances at Operable Unit (OU) 1A, Site 13S, which are located on the former Marine Corps Air Station (MCAS) Tustin. DTSC has prepared a revised initial study pursuant to the requirements of the California Environmental Quality Act(CEQA, Section 21000 et.seq., California Public Resources Code) and implementing Guideline (Section 15000 et seq., Title 14, California Code of Regulations). Based upon this analysis, DTSC has determined that the proposed project will not have a significant effect upon the environment and a Negative Declaration was prepared. DTSC approved the CEQA Notice of Determination on November 18, 2004.

Completed Area Name: OU-1B
Completed Sub Area Name: Not reported
Completed Document Type: * CEQA
Completed Date: 11/18/2004
Comments: OU-1B consists of a paint stripper disposal area known as IRP-3 that occupies approximately 1.4 acres. The site includes seven buildings, several of which were used for chemical storage, painting, and paint stripping operations from 1967 to 1999 when military activities were discontinued. Solvents, paint strippers, battery acids, and water used for washing inactive oil/water separators were reportedly poured directly onto the ground outside some of the buildings. In addition, OU-1B consists of a drum storage area known as IRP-12 occupies a total area of about 3.5 acres. The site was used by the Marine Corps primarily for materials storage and warehouse functions from the mid-1960s to 1975. Solvents, motor oil, and hydraulic fluids were stored in this area. The Navy proposes to remediate soil and groundwater contaminated by hazardous substances at Operable Unit (OU) 1B, Sites 3 and 12, which are located on the former Marine Corps Air Station (MCAS) Tustin. DTSC has prepared a revised initial study pursuant to the requirements of the California Environmental Quality Act(CEQA, Section 21000 et.seq., California Public Resources Code) and implementing Guideline (Section 15000 et seq., Title 14, California Code of Regulations). Based upon this analysis, DTSC has determined that the proposed project will not have a significant effect upon the environment and a Negative Declaration was prepared. DTSC approved the CEQA Notice of Determination on November 18, 2004.

Completed Area Name: OU-1A
Completed Sub Area Name: 13S
Completed Document Type: * CEQA
Completed Date: 08/17/2001
Comments: CEQA - RA1A: An Initial Study and a Negative Declaration were prepared by Department of Toxic Substances Control (DTSC) for a time-critical removal action (TCRA) for IRP site 13S. The TCRA consists of groundwater extraction to hydraulically contain groundwater contaminated with volatile organic compounds (VOCs), principally 1,2,3-TCP. TCRA will eliminate further downgradient migration of contaminated groundwater and prevent vertical migration to the underlying regional aquifer. The extracted groundwater will be treated using granular activated carbon (GAC) and discharged to

Peters Canyon Channel through a storm drain or injected back to the aquifer. Discharge to Peters Canyon Channel will comply with the substantive provisions of Regional Water Quality Control Board (RWQCB), Santa Ana Region, Order Number 96-18, General National Pollution Discharge Elimination System (NPDES) Permit Number CAG918001. Discharge will also comply with supplementary RWQCB requirements (e.g. discharge limits for 1,2,3-TCP) that are not included in the General Permit. DTSC has found, on the basis of Initial Study and comments received on the Negative Declaration, that there is no substantial evidence that this project will a significant effect on the environment. The Notice of Determination was forwarded to the Office of Environmental Analysis, Regulations and Audits 17, 2001 for filling.

Completed Document Type: Federal Facility SR Agreement
Completed Date: 08/18/1999
Comments: ORDER(FFSRA) - BASEWIDE: DTSC entered into an enforceable agreement with the United States Navy for the Marine Corps Air Station located in Tustin, California on August 18, 1999. Elsie L. Muncell, the Deputy Assistant Secretary of the Navy (Environment & Safety) and John Scandura, Chief of the Southren California Branch of the Military Facilities, signed the Federal Facilities Site Remediation Agreement(FFSRA). The purpose of the agreement was to ensure that the Navy's corrective action obligations required by the Resource Conservation and Recovery Act (RCRA) permit, are complied with environmental impacts associated with past military activities at the facility are investigated and that the appropriate corrective, removal and/or remedial actions are taken as necessary. The FFSRA provides for DTSC review and approval of a Site Management Plan (SMP), document submittals, and quarterly progress report in accordance with specified deadlines.

Completed Area Name: OU-3
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 07/20/2006
Comments: A land use covenant was recorded on July 20, 2006 that restricts residential, industrial and other use, since it was a former landfill. The Moffett Trenches and Crash Crew Burn Pit was designated as OU-3 and is also known as Installation Restoration Program Site 1. OU-3 is generally bounded to the northeast by the southern edge of Edinger Avenue, to the northwest by the western edge of the access road on the northwest edge of the Jamboree Road roadbed fill (approximately 20 feet west of the landfill gas probes), to the southwest by the toe of the northern concrete support structure for the Jamboree Road overpass above Moffett Drive, and to the southeast by the western edge of the Peters Canyon Channel bottom where it meets the containment remedy wall or western channel bank. The OU-3 Record of Decision/Remedial Action Plan (ROD/RAP) was approved on December 20, 2001 and selected a surface cover, containment wall along Peters Canyon Channel; landfill gas, groundwater and surface water monitoring program; land use restrictions; and a contingency plan as the remedial action for OU-3. The ROD/RAP provided that the Covenant must provide for access for Department, the Regional Water Quality Control Board, and other regulatory agencies that have jurisdiction, including any contractor or representative acting at the direction of any such aforementioned entity. The areas of applicability of the restrictions set forth in this Covenant are referred to as the Property and are more particularly described and depicted in Exhibit A and B, respectively.

Comments: PEA - MWA-05, TOW-06, UST-508, MWA-12, TOW-11, UST-251, MWA-13, TOW-12, UST-252: Under a Resource Conservation and Recovery Act (RCRA) Facility Assessment completed on MCAS Tustin in 1995, the above sites were identified as potentially contaminated sites. Remediation actions were taken at these sites as follows; 1) At Site MWA-05, a total of 25 samples were collected and tested for TPH-extractable. TOW-06 and UST-508 were excavated confirmation samples were taken. Sample results were below action levels. 2) At MWA-12, the concrete pad was decontaminated and final rinsate samples showed no detection of contamination. Rinsate water was collected and treated on site before being discharged into the channel under the NPDES permit. In addition, soil samples were taken at MWA-12, TOW-11, UST-251 after the removal of the oil/water separator and the assigned Storage tank (UST-251). Samples collected triggered an excavation of 156 tons of TPH impacted soil at UST-251 site. Deeper confirmation samples indicated the removal of the impacted soil which was treated at the onsite Thermal Desorption Unit (TDU). 3) For MWA-13 the concrete pad was decontaminated and rinsate samples were taken. Rinsate samples indicated no contamination present, however rinsate water was collected and treated locally before being discharged into Peter Canyon Channel. For TOW-11

Waste Code: D009
Waste Description: MERCURY

Waste Code: D018
Waste Description: BENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U003
Waste Description: ACETONITRILE (I,T)

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U404
Waste Description: U404

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/22/2015.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 402914
Site Name: STERLING COLLISION CENTER LLC
Violation Date: 06-03-2014
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 06/04/2014. Standing liquids were observed on top of the waste oil and waste antifreeze drums. Be sure to keep the tops of drums free from standing liquids. The liquids were removed during the course of the inspection. The secondary containment totes used for the waste oil and waste antifreeze drums were full of liquid. The totes should be used to capture liquids that could release from

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 01-26-2018
Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: Reviewed and declined HMBEP submittal. The following corrections are still needed: CHEMICAL INVENTORY Waste Oil - either supply the missing CAS#s or complete the chart as follows: %WT = 100, Hazardous Component = various petroleum oils, CAS # = 64742-65-0 Waterborne Cleaning Solution complete the %WT for chemicals listed on the Mixture Chart. Unfortunately, regulations require that the Mixture chart be fully completed. If you are not able to find the information on the SDS forms, you will need to contact the manufacturer to obtain the information. Please note that only hazardous components at/above 1% are required to be listed.

Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is pre-populated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-20-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site for a routine inspection. Consent to enter and inspect granted by Arnel Agustin. Observed the hazardous materials storage area and compared to the CERS submittal for materials that meet threshold reporting limits. All materials meeting threshold limits appear to have been reported. The Business Emergency Plan is complete and available for review. Annual employee hazardous materials training records are current and available for review.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-12-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site for a routine hazardous materials inspection. An inspection of the facility was completed with Antoio Vergara. Observed the hazardous materials storage areas. Materials and volumes observed confirmed with those reported in CERS portal. Emergency Response/Contingency Plan is complete and available. Annual hazardous materials training certification is current for employee handling the materials.

Eval Division: Orange County Environmental Health

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Disadvantaged Community: Not reported
CA Enviroscreen 3 Score: 76-80%
CA Enviroscreen 4 Score: 60-65%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: In July 1986, leakage from piping associated with three USTs was detected. The USTs stored ISOPAR G (C10-C11) and H (C11-C12), which was used in the manufacture of toner. Based on the results of a soil gas survey, four soil borings were advanced at the site. TPH (C6-C8) were detected at a concentration ranging from 50 to 1000 ppm. Six groundwater monitoring wells and twenty groundwater well points were installed to characterize the groundwater. Groundwater was encountered at approximately 10 feet bgs and was found to flow to the south. Free product was detected up to 6.9 ft. In February 1988, FP recovery was initiated. On July 8, 1988 the Board issued Cleanup and Abatement Order CAO 88-78, requiring Ricoh to implement corrective measures and to establish waste discharge limits. In August 1988, Ricoh implement groundwater extraction and treatment. Up to 14,000 gallons per day were discharged to the local storm drain which discharged into San Diego Creek. In September 1992, Ricoh requested cessation of groundwater remediation because free product was no longer detected in the Isopar/groundwater recovery system. In a letter dated December 15, 1992, Regional Board staff denied the request due to the continued presence of free product in some groundwater monitoring wells and the lack of consistent groundwater monitoring. The recovery system reportedly operated until July 1998, when the three USTs were removed and replaced. In July through September 1998, the three USTs were removed and replaced by one 40,000-gallon Isopar UST. The UST area was reportedly excavated to a depth of 16 feet, approximately 100,000 gallons of groundwater from the excavation was treated and discharged, and ORC was placed in the backfill. Due to the continued detection of elevated concentration of TPH in the groundwater, a subsurface investigation was conducted in December 2000. Five soil borings were advanced to 17 to 20 feet and three grab groundwater samples were collected. TPH was detected at a concentration of up to 1.9 mg/kg in the soil samples and up to 8,000,000 ug/l TPH was detected in the groundwater. In January 2003, two confirmatory wells were installed at the site. TPH was detected at a concentration of up to 2.1 mg/l in the groundwater. In February 2003, a 24-hour two phase extraction test was conducted. Vapor influent concentrations peaked at 1,060 ppmv after 18 hours of operation. Approximately 13.5 lbs (2.1 gallons) of petroleum hydrocarbons were recovered. In April 2005, the TPH concentrations in the groundwater monitoring wells have reduced to 400 ug/l. As a result, Ricoh requested site closure. Final consideration of closure of the site was delayed due to the pending removal of the one remaining UST. In September 2006, the 40,000-gallon UST was removed. Two soil samples were collected each from under the UST and the dispenser. TPH (C13-C28) and TPHC29-40) were detected at a concentration of up to 360 ppm and 860 ppm, respectively. TPH (C13-C28) and TPHC29-40) were detected in groundwater samples collected from the excavation at a concentration of up to 530 ug/l and not detected, respectively.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History:

The site was owned and operated by Steelcase from 1972 until February 2003 when the property was sold to Voit Development Company (Voit). Voit redeveloped the property from March to October 2003 and then leased the property to Bedrosians, a wholesale tile distributor. Reportedly, contaminated soil was not encountered during redevelopment activities. In 2005, Bedrosians purchased the facility as a warehouse; and in September 2007, Bedrosians leased the facility to Ricoh Electronics (RicoH). RicoH continues to operate a warehouse at the site and does not show any signs of vacating. Steelcase manufactured furniture at the site from 1972 until February 2003. As part of the manufacturing process, Steelcase maintained an underground storage tank (UST) containing a xylene solution, which was used to clean the paint distribution lines. A transfer line ran underground from this tank into an aboveground storage tank (AST) in the paint room. The location of the transfer line and UST are shown on Figure 3 of the 1984 Feasibility Study (Emcon Associates [Emcon], 1984). A solvent recycler provided the xylene solvent stored in the

UST, which appears to have contained trace amounts of other compounds. On 8 November 1983, a release of approximately 3,000 gallons was detected in the area between the UST and the AST. The UST was immediately pumped dry and site remediation and investigation began the following day. The investigation indicated that the source of the release was from the transfer line and not the UST. In 1984, the UST was removed and replaced with a new UST. In 1988, this replacement UST was removed from the site under permit from the Orange County Health Care Agency.

TSCA SUBMITTER
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110000480293

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as

CA Water Watershed Name: Santa Ana River - Lower Santa Ana River - East Coastal Plain (801.11)
Dwr Groundwater Subbasin Name: Coastal Plain Of Orange County (8-001)
Disadvantaged Community: Not reported
CA Enviroscreen 3 Score: 71-75%
CA Enviroscreen 4 Score: 60-65%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: Various subsurface investigations had been conducted on-site between 1989 and 1998. Relatively high levels of TCE-impacted soil and groundwater had been reported by others, such as TCE at 12,000 ug/kg in soil, and at 4,200 ug/l in groundwater. Reportedly, tetrachloroethene (PCE) was detected at 4,100,000 ug/kg in soil. In addition, concentrations of TPH as gasoline were detected in soil and groundwater beneath the subject property as high as 5,340 mg/kg in soil, for example, and 2322 S. Pullman Street April 25, 2008 benzene was detected as high as 27,000 ug/l in groundwater. The TPH and gasoline-related compounds were apparently related to a release from an underground storage tank (UST) on the adjacent Henley property. AEI conducted a subsurface investigation on-site in 2000. The investigative activities included advancement of 11 borings to depths of 62 feet (maximum). A soil vapor extraction and air sparge pilot test was conducted by AEI in 2001. Quarterly groundwater monitoring was initiated on-site in March 2002. In September 2003, AEI installed the high vacuum dual-phase extraction (HVDPE) system. The extraction system was modified in April 2005, and this remedial system was operated almost continuously since January 2005. Discharge to the sanitary sewer system was started in October 2005. The HVDPE system was modified again in January 2006, and several different changes to the remedial system were completed through March 2006. The HVDPE system was shutdown in March 2007. It appears that the most practical remedial approach at this time is to determine the feasibility of insitu groundwater treatment. A In situ pilot injection study was conducted in February 2009. This was accomplished to determine the potential beneficial effect of reducing the concentrations of the primary chemical of concern (COC), namely trichloroethene (TCE), in the source area beneath the subject building. The injection of the Hydrogen Release Compound (HRC)TM (3-D Microemulsion and HRC Primer) supplied by Regenesys was completed on February 11, 2009. The

injection probes were positioned within about 3-5 feet of W-16 as planned. Approximately 1,275 gallons of HRC were injected in the five probes at depths of about 16-27 feet (720 pounds of 3-D Microemulsion and 210 pounds of HRC Primer). As discovered, TCE was detected by the laboratory at 2,600 micrograms per liter (8g/l) in March 2009, at 3,200 8g/l in April 2009, at 14,000 8g/l in June 2009, and at 12,000 8g/l in January 2010 in monitoring well W-16. There was a reduction in the TCE concentration between January 2010 and April 2010, which was about one year after the HRC injection. Specifically, the TCE concentration apparently decreased from 12,000 8g/l in January 2010 to only 64 8g/l in April 2010. This latter TCE concentration seemed to be directly related to the effect of the HRC in this area. The presence of breakdown compounds in W-16, such as cis-1,2-dichloroethene (cis-1,2-DCE), suggested that chemical degradation was occurring in the vicinity of W-16. For example, cis-1,2-2322 S. Pullman Street February 9, 2015 ject DCE was detected at 4.6 8g/l in December 2008, at 39 8g/l in June 2009, at 560 8g/l in January 2010, and as high as 23,000 8g/l in April 2010. Trans-1,2-DCE was not detected in March 2009, April 2009, or June 2009. However, trans-1,2-DCE was reported at 19 8g/l in January 2010, and at 42 8g/l in April 2010. Vinyl chloride was not detected in December 2008 through April 2010 in W-16, as indicated by the laboratory. These data had shown that the HRC was able to dechlorinate the TCE in the source/treated area. As discussed at our meeting with the CRWQCB on September 19, 2011, the presence of cis-1,2-DCE at a relatively high concentration in groundwater within the previous pilot study area was a concern to the CRWQCB. As indicated, this demonstrated that some conversion of TCE had occurred as desired, but that continued and complete breakdown of the TCE to cis-1,2-DCE, trans-1,2-DCE, vinyl chloride, and ultimately to ethane had not occurred. The CRWQCB had suggested that some further corrective action, such as additional groundwater treatment, would ultimately be needed to obtain regulatory closure. As proposed, Regenesi would conduct a full-scale field test of its new groundwater treatment product. This new product, identified as Plume Stop™, is typically applied in two parts. Part 1 is applied in high volume to maximize contact with the soil and groundwater below the water table. Part 2 is a lower-volume, slow-release substrate that is designed to enhance biodegradation of the chlorinated volatile organic compounds (VOC). The process is intended to: 1) adsorb contaminants and reduce VOC groundwater concentrations; 2) inhibit transport of contaminants in groundwater; and 3) provide nourishment and a matrix for bacteria and contaminants to facilitate bioremediation. In other words, the application was anticipated to result in a substantial and sustained reduction of chlorinated VOCs in the targeted treatment area. The planned additional assessment, data collection, and groundwater treatment (i.e., field-scale beta test) were generally accomplished as intended in January and February 2012. The results were reported on September 5, 2012.

CERS Description: Toxic Release Inventory

Violations:

Site ID: 275191
Site Name: AXIOM MATERIALS INC
Violation Date: 04-13-2018
Citation: HSC 6.5 25201.5(d)(5) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(d)(5)

Violation Description: Failure to prepare, implement, and maintain onsite, for three years at the facility, a treatment system inspection program and log of inspections conducted.

Violation Notes: Returned to compliance on 04/18/2018. The facility has submitted written operating instructions, inspection log/schedule, and a treatment log for their Conditionally Exempt Special Waste (CESW) permit. The documents have been reviewed and accepted. The violation observed has been corrected as of 4/19/18. There are no outstanding violations. No further corrective action necessary.

Violation Division: Orange County Environmental Health
Violation Program: CE
Violation Source: CERS,

Site ID: 275191
Site Name: AXIOM MATERIALS INC
Violation Date: 01-13-2022
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 01/13/2022. 1) One 55 gallon drum containing waste resin with solvent was observed in the hazardous waste storage area stored with the bung cap open. 2) One 55 gallon drum containing waste resin with solvent was observed in the hazardous waste storage area stored with a funnel open. 3) Two 1 gallon containers accumulating waste MEK and ethanol were observed in a fume hood in the on site laboratory with caps open. Corrective action: 1) During the inspection Jake Newkirk closed the bung cap on the 55 gallon drum containing waste resin with solvent. The violation was corrected on site. 2) During the inspection Jake Newkirk closed the lid on the funnel of the 55 gallon drum containing waste resin with solvent. The violation was corrected on site. 3) During the inspection a laboratory technician placed caps on the one gallon containers of waste MEK and ethanol. The violation was corrected on site.

Inc. Dean Freed, Supervising Hazardous Materials Specialist, and Karen Blanchard, Hazardous Materials Specialist, were present representing OC Health. Ownership was confirmed to be AXIOM MATERIALS INC, and the number of employees is 133. The facility manufacturer s adhesives and composites for aerospace, automobile, and other industries. The facility generates waste solids from cleaning, spent solvents, waste resins, and other waste streams. The following areas were inspected: manufacturing areas, raw materials storage areas, finished product storage areas, hazardous waste storage areas, mixing areas, the perimeter and the municipal trash. The following documents were reviewed during the inspection: -biennial report exception letter -Employee Training [Truncated]

Eval Notes: INSPECTOR COMMENTS: On site for routine hazardous materials and Hazardous Materials Business Emergency Plan (HMBEP) inspection. Consent to enter and conduct inspection activities was provided by Juan Contreras, Engineering Manager and Jacqueline Cao, Safety Manager. Observed the facility and inspected hazardous materials storage. Disclosure thresholds for the HMBEP program are 55 gallons of a liquid, 500 pounds of a solid or 200 cubic feet of a compressed gas. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: -Propane, four 7 gallon cylinders -New Resin, approx twenty five 55 gallon drums -New Solvent, four 55 gallon drums -Ethanol, two 55 gallon drums -Aceton, two 55 gallon drums -MEK, four 55 gallon drums Business emergency plan has been submitted through the California Environmental Reporting System (CERS) and a copy is available on site. Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still accurate. Eval Notes: On site for a routine hazardous waste inspection. Consent to enter and conduct inspection activities was provided by Juan Contreras, Engineering Manager and Jacqueline Cao, Safety Manager. Business ownership information was verified. The current number of employees is 80. Walked throughout the facility. Observed hazardous waste storage areas. Waste drums were observed to be properly closed while not in use. Labels were missing required information, violation cited. Waste observed included two 55 gallon drums of waste rags, three 55 gallon drums of waste resin, one 55 gallon drum of ethanol and two 55 gallon drums of MEK. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted throughout warehouse. A perimeter walk was conducted and the dumpster enclosure was observed. No signs of illegal dumping were noted.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still accurate. Address: 2322 PULLMAN ST
City,State,Zip: SANTA ANA, CA 92705
Site ID: 275191
CERS ID: 110055500104
CERS Description: US EPA Air Emission Inventory System (EIS)

Violations:

Site ID: 275191
Site Name: AXIOM MATERIALS INC
Violation Date: 04-13-2018
Citation: HSC 6.5 25201.5(d)(5) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(d)(5)

Violation Description: Failure to prepare, implement, and maintain onsite, for three years at the facility, a treatment system inspection program and log of inspections conducted.

Violation Notes: Returned to compliance on 04/18/2018. The facility has submitted written operating instructions, inspection log/schedule, and a treatment log for their Conditionally Exempt Special Waste (CESW) permit. The documents have been reviewed and accepted. The violation observed has been corrected as of 4/19/18. There are no outstanding violations. No further corrective action necessary.

Violation Division: Orange County Environmental Health
Violation Program: CE
Violation Source: CERS,

Site ID: 275191
Site Name: AXIOM MATERIALS INC
Violation Date: 01-13-2022
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 01/13/2022. 1) One 55 gallon drum containing waste resin with solvent was observed in the hazardous waste storage area stored with the bung cap open. 2) One 55 gallon drum containing waste resin with solvent was observed in the hazardous waste storage area stored with a funnel open. 3) Two 1 gallon containers accumulating waste MEK and ethanol were observed in a fume hood in the on site laboratory with caps open. Corrective action: 1) During the inspection Jake Newkirk closed the bung cap on the 55 gallon drum containing waste resin with solvent. The violation was corrected on site. 2) During the inspection Jake Newkirk closed the lid on the funnel of the 55 gallon drum containing waste resin with solvent. The violation was corrected on site. 3) During the inspection a laboratory technician placed caps on the one gallon containers of waste MEK and ethanol. The violation was corrected on site.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Jake Newkirk, Compliance Partner, and Kathy Escobar, EHS Coordinator. Dean Freed, Supervising Hazardous Materials Specialist, and Karen Blanchard, Hazardous Materials Specialist, were present representing OC Health. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Acetone- 220 gallons - Ancamine

Eval Type: Other, not routine, done by local agency
Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still accurate. Eval Notes: I received an email from Dean Freed notifying me that Axiom Materials called him and notified him that they have submitted a HazMat disclosure package. I researched this and found that they submitted on 3/10/2014 to CERS, so I voided the violations written (#292 and 169) and wrote an F04 report noting this.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Commercial Offsite Facility Types: Not reported
Quarterly Update: McKesson was a distributor of organic and inorganic chemicals. As service to it's customers, it temporarily stored drummed wastes before transporting to central recycling facilities. McKesson facility Recieved an operating permit on 8/27/84. The facility closed in 1985 (although closure plan is not available). A letter of 12/18/85 acknowledges receipt of certification of closure and states DHS considers McKesson to be closed and ISD is no longer in effect. Additionally, a letter from USEPA dated 1/25/1988 states that they are in agreement the facility no longer operates as haz waste facility based on DHS's acknowledgement letter of 12/18/85 and inspection conducted on 5/21/87. For corrective action, a Preliminary Assessment was conducted in August 1984. The PA recommended no further action.

CA Enviroscreen 4 Score: 60-65%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: On October 14, 2014, groundwater samples were collected from wells MW-2, MW-4 through MW-8, MW-10 through MW-13, and MW-15 through MW-17 at the subject site. Maximum total petroleum hydrocarbons-gasoline (TPH-g), benzene, toluene, ethylbenzene, total xylenes (BTEX), methyl tert-butyl ether (MTBE), tert-butyl alcohol (TBA), and di-isopropyl ether (DIPE) concentrations were detected up to 51,000 ppb (MW-5), 26,000 ppb (MW-5), 250 ppb (MW-5), 1,400 ppb (MW-18), 3,070 ppb (MW-17), 230 ppb (MW-7), 8,400 ppb (MW-7), and 840 (MW-7), respectively. In addition, several other volatile and halogenated organic carbons (VOCs and HVOCs) were also detected.

Completed Document Type: Site Screening
Completed Date: 06/15/1993
Comments: Region 4 staff screened a certified letter dated 4/6/93 notifying the Department of the presence of abandoned solid and hazardous waste pursuant to 42 U.S.C. Sec. 6972 (a) et seq (RCRA). The intent of Mr Niles Gates to commence a citizens suit alleges that Universal Circuits, General Automation, Helix Circuits, LIKA & Tandy Corporations caused the soil, subsoil, and groundwater to be contaminated with: heavy metals, halogenated volatile organic compounds, (VOCs) including 1,1-Dichloroethylene (1,1-DCE), 1,2-Dichloroethane (1,2-DCA), 1,1,1-TCA, TCE, and PCE.

Longitude: -117.8259
Case Type: Military Cleanup Site
Status: Open - Remediation
Status Date: 01/15/2010
Lead Agency: SANTA ANA RWQCB (REGION 8)
Caseworker: PAH
Local Agency: DEPARTMENT OF TOXIC SUBSTANCES CONTROL
RB Case Number: Not reported
LOC Case Number: 400091 -- 6
File Location: Regional Board
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
EDR Link ID: DOD100397200
Potential Contaminants of Concern: Toluene, Trichloroethylene (TCE), Polychlorinated biphenyls (PCBs), Aviation, Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
EPA Region: 9
Coordinate Source: Manual Entry on Screens
Cuf Case: NO
Quantity Released Gallons: Not reported
Begin Date: 10/06/1994
Leak Reported Date: 10/06/1994
How Discovered: Site Assessment/Site Investigation
How Discovered Description: Not reported
Discharge Source: Not reported
Discharge Cause: Not reported
Stop Method: Not reported
Stop Description: Not reported
No Further Action Date: Not reported
CA Water Watershed Name: Santa Ana River - Lower Santa Ana River - East Coastal Plain (801.11)
Dwr Groundwater Subbasin Name: Coastal Plain Of Orange County (8-001)
Disadvantaged Community: Not reported
CA Enviroscreen 3 Score: 71-75%
CA Enviroscreen 4 Score: 60-65%
Military DOD Site: Yes
Facility Project Subtype: Not reported
RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: Drum storage area No. 3, includes Areas of Concern MAE-4 and TOW-X7, both located within former Building 98 and areas located near former Buildings 575 and 47T. 1991 1993, Site Inspection sediment soil and groundwater samples were analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. 1995 1997, Remedial Investigation sediment and surface samples were analyzed for VOCs, SVOCs, TPH and metals. Chemical of concern detected in the soil: volatile organic compounds, semivolatile organic compounds, polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), pesticides and metals. Groundwater samples were collected and 25 micrograms/liter (g/L) of TCE and 4 g/L of MEK was detected. June December of 1997, a removal action was completed in which approximately 4,000 tons of petroleum-impacted soil was excavated from the upper two feet of 0.5 acre of the site and treated on site utilizing thermal unit or taken to an off-site disposal facility. Confirmation samples indicated that the chemicals of concern were successfully removed. In 2000, a Focused Feasibility Study was conducted to develop and evaluate remedial alternative to mitigate risks to human health and the environment and define the scope of potential cleanup activities. In 2003, a shallow groundwater investigation was conducted to update the

human health risk assessment. In 2003 additional groundwater investigation was conducted. The maximum detected TCE in the groundwater was 16 g/L. 1,2,3, trichloropropane was also detected in the groundwater at 9 g/L. In 2008, Feasibility Study was performed to address VOCs in groundwater at concentrations exceeding remediation goals and to develop and evaluated remedial alternatives. In 2009, the Proposed Plan was published to invite public comment on the proposed cleanup plan for contaminated groundwater. January 15, 2010, Final Record of Decision for Operable Unit 4B presents the selected remedy for groundwater and documents no further action for soil. The groundwater remedy is institutional controls to prohibit or restrict groundwater use or other activities that could result in exposure to VOCs.

 CA Water Watershed Name: Santa Ana River - Lower Santa Ana River - East Coastal Plain (801.11)
 Dwr Groundwater Subbasin Name: Coastal Plain Of Orange County (8-001)
 Disadvantaged Community: Severely Disadvantaged Community
 CA Enviroscreen 3 Score: 86-90%
 CA Enviroscreen 4 Score: 80-85%
 Military DOD Site: No
 Facility Project Subtype: Not reported
 RWQCB Region: SANTA ANA RWQCB (REGION 8)
 Site History: Historic remediation efforts (e.g DPE, ISCO) have not reduced contaminant concentrations to adequate levels for closure consideration. Data from most recent CPT investigation indicate that add'l characterization (vertical) is needed to delineate UCI plume. Add'l mitigation also req'd to mitigate dissolved-phase chlorinated solvents and 1,4-dioxane attributed to UCI site.

<p>Eligibility: Has Projects: NPL Status: Project Required: Feature Description:</p>	<p>Eligible No Not reported No Between 19 January 1943 and 2 August 1988, the Navy acquired a total of 1,683.94 acres from Mr. Frank P. Borchard and The Irvine Company. The Naval Air Station was commissioned initially as a Lighter-Than-Air (LTA) Navy base to support observation blimps and personnel conducting antisubmarine patrols off the coast of Southern California during World War II. Presently, the site is used as a Marine Corps helicopter base that is in a transitional phase for closure under the Base Realignment and Closure (BRAC) program. Improvements consist of over 200 buildings and facilities including: family housing units, barracks, Bachelor Officer Quarters (BOQs), Naval Reserve Armory, blimp hangars, helicopter landing pads, maintenance facilities, radio transmitter facilities, water treatment plant, sewage pump plant, firehouse, public works office, chapel, pistol and skeet ranges, and storage for fuel and ammunition. The Navy disposed of 102.34 acres total, including 36.64 acres revested to Mr. Borchard on 11 September 1945, and 65.70 acres net, in four parcels (1.40 acres, 2.57 acres, 3.08 acres, and 58.65 acres), conveyed to The Irvine Company between 20 January 1981 and 5 August 1988. No facilities are known to have been constructed on the disposed properties by the Navy or the Marine Corps, and these properties are not known to have been used for training activities. The 36.64-acre area is now occupied by a business park. The 1.40-acre and 3.08-acre parcels are undeveloped. The 2.57-acre parcel is occupied by a self-service storage facility. The 58.65-acre parcel is occupied by commercial facilities in various stages of development.</p>

Quarterly Update:	This is a closing military base which is being redeveloped for civilian use. For corrective action status, this site was transferred to Site Mitigation (SM) group around 1998 (exact date could not be confirmed but around this time many of the military bases were transferred from Permitting program to Site Mit for Cleanup) for corrective action work. Since then, Site Mitigation has been working to cleanup areas of the site. As areas were remediated, they were transferred for civilian use thru the "Finding of Suitability to Transfer" (FOST) process. For each FOST, a number of SWMUs were cleaned up and transferred for civilian use. As of 6/06, 5 FOSTs were completed with many areas issued a No Further Action letter. A table was compiled to document the status for each SWMU found in the transferred areas. The facility requested DTSC not pursue a Class 3 permit modification equivalent process and public notice for corrective action complete determination for any past or future FOST properties. When the properties are transferred to the receiving

entities, they can pursue this last step - corrective action complete determination. CA999 Corrective Action Terminated event can not be issued unless and until the receiving entities request it and pursue the associated Class 3 permit modification equivalent process. Since most of the corrective action activities have taken place by Site Mitigation. Refer to Site Mitigation EnviroStor database for details.

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 04/11/2022. OBSERVATION: Facility has not established and provided annual hazardous materials emergency response training (e.g., emergency response procedures, spill/release communications, safety procedures, etc.) to their employees. CORRECTIVE ACTION: Please implement an emergency response training plan, conduct the training with all employees for 2022, and provide documentation of the training (e.g., a sign-in sheet) to this Agency within 30 days.

Violation Division: Orange County Environmental Health

to provide annual emergency response training and maintain records for a minimum of three years Failure to correct the violation listed above will result in a Notice of Violation (NOV) and the violation being elevated to Class I, which will require formal enforcement by OC CUPA in the form of an Administrative Enforcement Order (AEO) or referral to the District Attorney s Office, which will include the assessment of administrative penalties outlined in H&SC section 25404.1.1. Continue to correct all outstanding violations. Any business that does not comply with the HMD/BEP requirements is civilly liable to the administrating county or city in an amount not more than two thousand dollars (\$2,000.00) for each day in violation. If the business continues to be in violation after reasonable notice of violating the HMD/BEP requirements, the business is civilly liable to the administrating county or [Truncated]

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-02-2022
Violations Found: No
Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine hazardous waste inspection. Walked throughout the facility and inspected hazardous waste storage areas. The facility is a small quantity generator of the following hazardous waste(s): - Used Oil Manifests were available and reviewed. Last pickup was on 04/12/2021, by Worldwide Recovery Systems Inc. Emergency response information was posted. Emailed a copy of this report to mjaramillo@griswoldcontrols.com.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-02-2022
Violations Found: Yes
Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine hazardous materials inspection. Walked throughout the facility and inspected hazardous materials storage. The following hazardous materials were observed in amounts that exceed the required disclosure quantities: - 3 X 261-gal Instapack Component A - 2 X 261-gal Instapack Component B - 3 X 330-cf Helium (g) - 36 X 304-cf Nitrogen (g) - 263-gal Oxygen (l) - 1 X 55-gal Metal Fluid 3440 (Cutting Oil) - 1 X 55-gal Propylene Glycol (Heat Transfer Fluid) - 1 X 55-gal Used Oil The facility is responsible for identifying all hazardous materials, including hazardous wastes, whose quantities exceed the disclosure thresholds (55 gallons liquid, 500 lbs solid, 200 cu.ft. gas). If there is a change in the type or 100% increase in the amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Please note, California Health and Safety Code mandates that any [Truncated]

(SCC) Facility (Site) is located approximately 28 miles south of central Los Angeles in an area within the Santa Ana city limits zoned for light industrial use. It is a small site of about 120 by 200 feet and approximately 0.5 acres in area. Historically, Holchem provided solvent recycling and chemical disposal services. Holchem accepted drums containing hazardous waste for the purposes of recycling or transfer to another treatment, storage and disposal (TSD) facility. Wastes in drums arriving at Holchem that were determined suitable for recycling were transferred into a pretreatment tank and passed into the appropriate distillation unit for recycling. Upon completion of the recycling process, the recycled solvents were placed into new drums for resale. The non recyclable liquid waste was stored in drums until a sufficient quantity was collected so the waste can be economically shipped to another recycling treatment facility. An off-site facility would either further recycle or blend the waste with flammable waste to raise the British Thermal Unit content. This blend was then disposed of as a supplemental fuel for a cement kiln. Typical waste stream generating processes included dry cleaning, metal parts degreasing, paint and coating manufacturing, adhesives production, and compounding/formulation. Typical chemical components of waste streams accepted by Holchem include: 1,1,1,-trichloroethane (TCA), trichloroethylene, (TCE) perchloroethylene, (PCE), methylene chloride, flammable solvents and trace metals. Interim Status as a TSD facility for hazardous waste was initially granted to Holchem in 1981 by the California Department of Health Services (DHS). Holchem submitted a revised Part B operations plan to the DHS in August 1989. On November 29, 1990, a final Hazardous Waste Permit was issued to Holchem (dba SCC) as operator and Mr. Lenzion as owner by the DHS for operation of the facility. As part of the DHS operation permit requirements,

Public Information Officer:	Not reported
Commercial Offsite Facility Types:	Not reported
Quarterly Update:	Updated 10/11/07. Embee Incorporated is a metals plating facility that operates a wastewater treatment system under Permit by Rule. Since 1993, the facility has been authorized to operate three PBR units (two pretreatment units and a sludge dryer) for treating metals and acid-containing waste using chemical and precipitation processes. In 1997, DTSC issued a Consent Order to the facility authorizing the on-site treatment of aqueous cyanide hazardous waste. In 2001, DTSC issued to the facility a Corrective Action Consent Agreement. Under the Consent Agreement, the facility has undergone facility investigation, and is currently performing a pilot study to address impacted shallow soil and groundwater near the plating building. Constituents detected in shallow soil and groundwater beneath the site include, but are not limited to: hexavalent chromium, chromium, cadmium, copper, nickel, chlorinated volatile organic compounds, and perchlorate. A report summarizing the results of the Pilot Study was submitted on 11/30/06 and is being reviewed by DTSC staff. On July 17, 2008 DTSC met with the facility to discuss interim measures to prevent further offsite migration of contaminated groundwater, overall site cleanup objectives and the results of the Pilot Study. As a result of this meeting the facility submitted their conceptual plan for overall site cleanup to DTSC on July 29, 2008. 04/11/2018 - This facility is being administrative closed due to never being regulated as a TDSF; rather, it is a Tiered Permit. See "Facility Info Form" dated 09/17/1997, which includes information regarding the basis for this facility not needing a Federal Permit. Furthermore, the Consent Order dated 12/23/1997 states that the facility submitted a notification under Permit by Rule (PBR). This facility shows up as applicable in the California Environmental Reporting System (current tiered permit database) and a screenshot of this has been uploaded.

Site Name: Embee Processing
Violation Date: 05-07-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/30/2018. The following containers were observed to be missing required labeling information: -Non-empty paint cans in hazardous waste storage area were missing all required elements -Containers of filter cake were missing the hazardous characteristic (Toxic). Labels on these containers were filled in during inspection. -One cubic yard box of sand blast media was observed with the old owner's name (Triumph Processing/Embee Division) on label, correct label to reflect current owner

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 02/18/2021. A 5 gallon step canister containing paint contaminated waste was observed to be overfilled to a level which did not allow it to be closed. Corrective action: The waste was transferred to a larger container and the canister was properly closed. The violation was observed to be corrected.

replenish rinse tanks. The following containers were observed on site and labeled as Excluded Recyclable Material (ERM): -one 55 gallon drum of scrap metals with coating, dated 08/04/2018 -two 55 gallon drums of HVOF Powder Heavy, dated 09/08/2018 -two 55 gallon drums of Scrap Metal with HVOF, dated 06/15/2017 and 08/31/2017 -one 55 gallon drum of HBOR Powder (Fine), dated 09/08/2018 -four 5 gallon buckets of HVOF solid, dated 08/04/2018 Per Mr. Santos, materials are recycled off-site and may contain chrome. The process of recycling these materials off-site is being reviewed by this agency. To date facility has not submitted the Recyclable Materials Report (RMR) to the California Environmental Reporting System (CERS). Photographs taken during inspection.

Trench is sloped towards a collection sump; on this date trench was observed to have pitting, cracks and breaks in concrete. Trench should be cleared of standing liquid at least daily due to low points in trench that will prevent the flow of liquid to collection sump. Failure to follow wet processing floor standards will result in the trench being regulated as a hazardous waste tank and trench will be subject to Article 10, Tank Management Standards.

Eval Notes: Inspector Comments: Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification for this facility. The 2016 Closure Cost Estimate (CCE) was not properly calculated since the incorrect 2015 inflation factor (1.014557899) that was not accepted when submitted in 2015, was used. The inflation factor for 2015, 1.106, was provided in this agency s letter which was mailed to your company in January 2015. The 2014 CCE was approved at \$26,864.09. The approved 2015 CCE was \$26,864.09 x 1.016 (inflation factor) = \$27,293.92 - salvage value. Therefore, the 2016 CCE is \$27,293.92 x 1.009 (2016 inflation factor) = \$27,539.57 salvage value. Corrected Certification Of Financial Assurance Form and Estimated Closure Cost form must be submitted by 4/8/16.

CERS Description: Industrial Facility Storm Water

Violations:
Site ID: 28158
Site Name: Embee Processing
Violation Date: 05-07-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/30/2018. The following containers were observed to be missing required labeling information: -Non-empty paint cans in hazardous waste storage area were missing all required elements -Containers of filter cake were missing the hazardous characteristic (Toxic). Labels on these containers were filled in during inspection. -One cubic yard box of sand blast media was observed with the old owner's name (Triumph Processing/Embee Division) on label, correct label to reflect current owner

Site ID: 28158
Site Name: Embee Processing
Violation Date: 05-07-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Tiered Permitting Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 08/15/2018. Cyanide processing and rinse tanks are not meeting the following standard for facilities that treat cyanide: -Use of counter current rinsing to reduce water use and wastewater generation (22 CCR 67450.11(d)) Facility is missing counter current rinsing on two of three cyanide process lines with multiple rinse tanks.

Violation Division: Orange County Environmental Health
Violation Program: PBR
Violation Source: CERS,

Site ID: 28158
Site Name: Embee Processing
Violation Date: 05-07-2018
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 08/15/2018. The following was observed in the outdoor hazardous waste storage area: -Liquid from non-empty paint cans was observed to be leaking from bag into the secondary containment -Dried grinding sludge in secondary containment Trench running through building is used to catch liquid and drains to a sump. Trench was observed with pitting and build up of liquid from processes. Trench shall be maintained dry and in good condition to prevent a release to the environment. Clean out trench immediately and perform any necessary repairs.

Violation Source: CERS,

Site ID: 28158
Site Name: Embee Processing
Violation Date: 05-07-2018
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)

Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.

Violation Notes: Returned to compliance on 05/30/2018. The following containers were observed to have accumulation start dates over 90 days: -One 55 gallon container of muriatic acid waste, start date 12/27/17 -One 55 gallon container of porous pot waste, start date 12/19/17 -One cubic yard box of sand blast media, start date 1/16/18 Have waste hauled by a licensed hauler or run through treatment units immediately. Provide records of disposal to this agency within 30 days.

Eval Notes: INSPECTOR COMMENTS: On site for follow-up hazardous waste inspection, consent to enter and conduct inspection activities was provided by Rey Santos, Environmental Manager. Walked through building with chrome plating lines and observed the trench. Trench has been cleared of debris and standing liquid, violation I333 has been corrected. After review by this agency, trench in chrome plating building is a wet processing floor and must adhere to wet processing floor standards. Trench is sloped towards a collection sump; on this date trench was observed to have pitting, cracks and breaks in concrete. Trench should be cleared of standing liquid at least daily due to low points in trench that will prevent the flow of liquid to collection sump. Failure to follow wet processing floor standards will result in the trench being regulated as a hazardous waste tank and trench will be subject to Article 10, Tank Management Standards.

Eval Type: Routine done by local agency

Eval Notes: INSPECTOR COMMENT: On site for a routine Hazardous Waste Recycler inspection, accompanied by Terry Carrier, Supervising Hazardous Waste Specialist. Consent to enter and inspect was given by Rey Santos, Environmental Health & Safety Manager. Facility treat and regenerate rinse water for on-site use through ion exchange. Facility also manages the tungsten-cobalt carbide powder as recyclable materials. Manifests were available for review. The Certificate of Consumption was provided, showing utilization and recyclable materials. Facility has not submitted the Recyclable Material Report, due July 1st of every even year. Please submit the report at the next due date (7/1/2018).

Eval Notes: INSPECTOR COMMENT: On site for a routine RCRA Large Quantity Generator hazardous waste inspection, accompanied by Terry Carrier, Supervising Hazardous Waste Specialist. Consent to enter and inspect was given by Rey Santos, Environmental Health & Safety Manager. Facility is a RCRA Large Quantity Hazardous Waste Generator. This facility consists of several buildings on a contiguous property. The inspection included a walk of the production area, hazardous waste generation areas, perimeter check, hazardous waste storage area, and trash storage areas. The process floors are sectioned by chemicals, and flow to the low point sumps. The sumps are inspected daily, and pumped daily if needed, per Mr. Santos. Additionally, every rinse tank get drained into the treatment system once a week. All hazardous waste containers and tanks had accumulation start dates within the last 90 days. The HVOF stripping waste container and filter cake waste container, stored in the area, [Truncated]

that was not accepted when submitted in 2015, was used. The inflation factor for 2015, 1.106, was provided in this agency s letter which was mailed to your company in January 2015. The 2014 CCE was approved at \$26,864.09. The approved 2015 CCE was \$26,864.09 x 1.016 (inflation factor) = \$27,293.92 - salvage value. Therefore, the 2016 CCE is \$27,293.92 x 1.009 (2016 inflation factor) = \$27,539.57 salvage value. Corrected Certification Of Financial Assurance Form and Estimated Closure Cost form must be submitted by 4/8/16.

Eval Date: 10-23-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency

Eval Notes: INSPECTOR COMMENTS: During on-site re-inspection, Mr. Santos described the following rinsing process for the LHE Cadmium Tank and Bright Cadmium Tank: The facility currently removes the rinsewater from the first rinse tank following the cyanide process tank. Following removal of the first rinse, the contents of the second rinse tank is then transferred to the first tank, making them static rinse tanks. Countercurrent rinsing involves the rinsewater of sequential rinse tanks flowing in the opposite direction of the process flow. To date facility is not using countercurrent rinsing, violation I516 remains outstanding.

Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	D040
Waste Description:	TRICHLOROETHYLENE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F006
Waste Description:	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Waste Code:	F007
Waste Description:	SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.
Waste Code:	F008

ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: P098
Waste Description: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

Waste Code: P106
Waste Description: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/25/2023	Source: EPA
Date Data Arrived at EDR: 02/02/2023	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Number of Days to Update: 83	Next Scheduled EDR Contact: 07/03/2023
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 01/05/2023	Source: CalEPA
Date Data Arrived at EDR: 01/06/2023	Telephone: 916-323-2514
Date Made Active in Reports: 01/11/2023	Last EDR Contact: 04/18/2023
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/31/2023
	Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 01/06/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 02/02/2023	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

CENTURIAN PLAZA REDHILL
15661 REDHILL AVENUE
TUSTIN, CA 92780

TARGET PROPERTY COORDINATES

Latitude (North):	33.714963 - 33° 42' 53.87"
Longitude (West):	117.835071 - 117° 50' 6.26"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	422623.6
UTM Y (Meters):	3730671.8
Elevation:	70 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12014866 TUSTIN, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

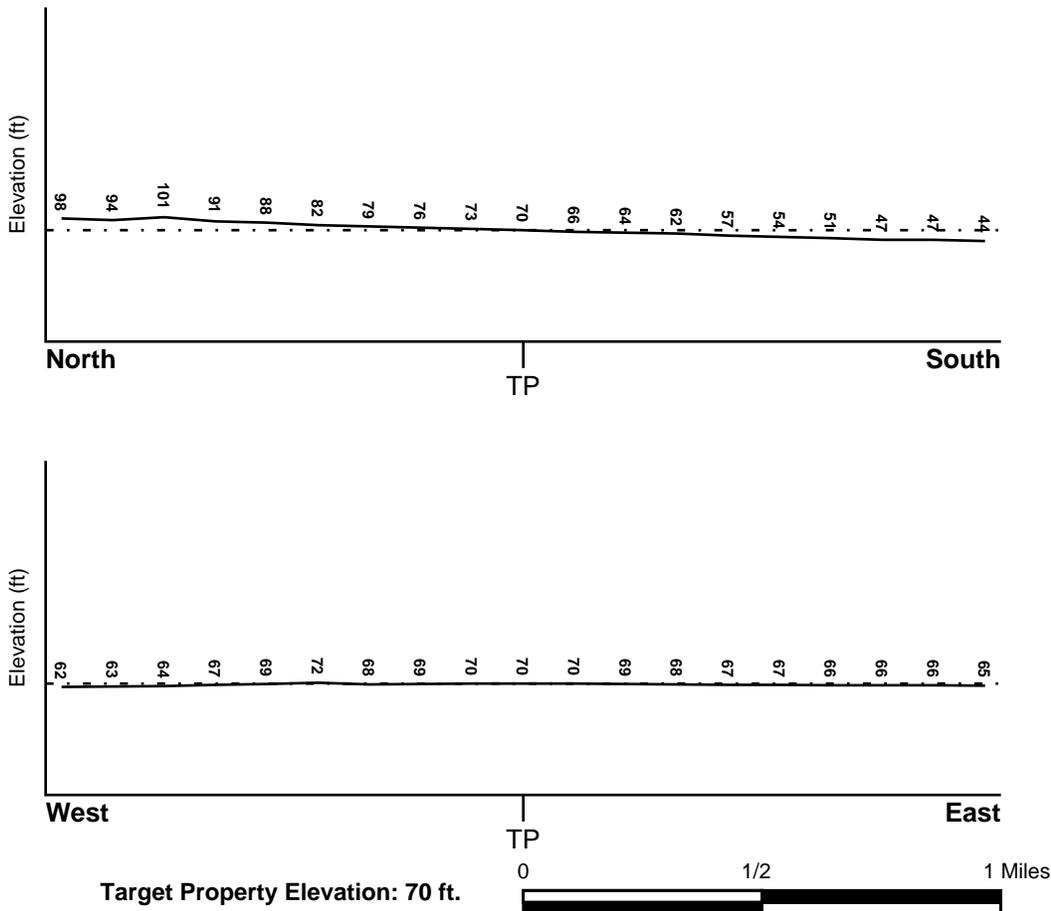

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06059C0279J	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06059C0276J	FEMA FIRM Flood data

06059C0278J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
TUSTIN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile WNW
Site Name:	UNIVERSAL CIRCUITS INC.
Site EPA ID Number:	CAT080033004
Groundwater Flow Direction:	Northeast
Measured Depth to Water:	15 feet in the semi-perched "pressure area".
Hydraulic Connection:	The deep aquifer exhibits characteristics of a confined aquifer. There is no conclusive evidence of a hydraulic connection between the semi-perched and underlying deeper aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

7G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CHINO

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	24 inches	silty clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	24 inches	59 inches	sandy clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR PROPERTY TAX MAP REPORT

Centurian Plaza Redhill

15661 Redhill Avenue
Tustin, CA 92780

Inquiry Number: 7322993.6
April 28, 2023

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

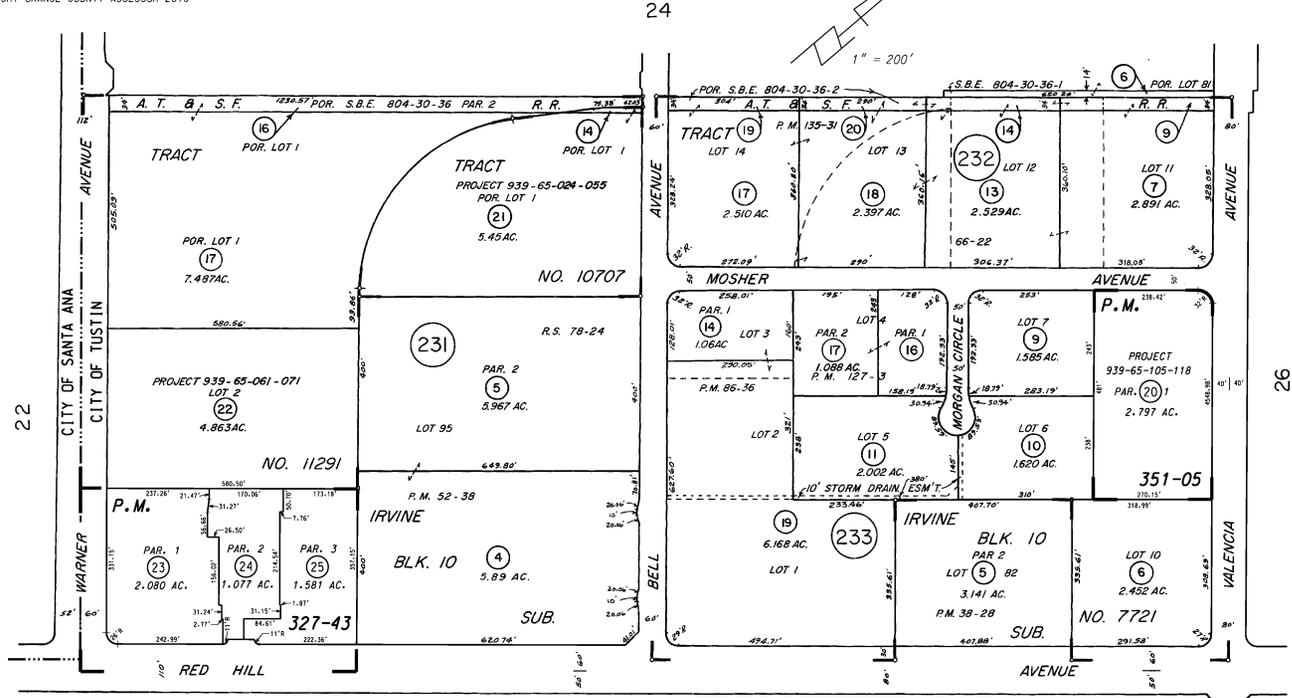

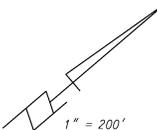

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Management Strategies were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # CEB9-40D6-A400
PO # EMS621
Project Centurian Plaza Red Hill

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: CEB9-40D6-A400

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT.

ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.

Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Env. Management Strategies on May 01, 2023.

TARGET PROPERTY

15661 Redhill Avenue
Tustin, CA 92780

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- **Permit Number:** The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- **Description:** A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- **Permit Type:** Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

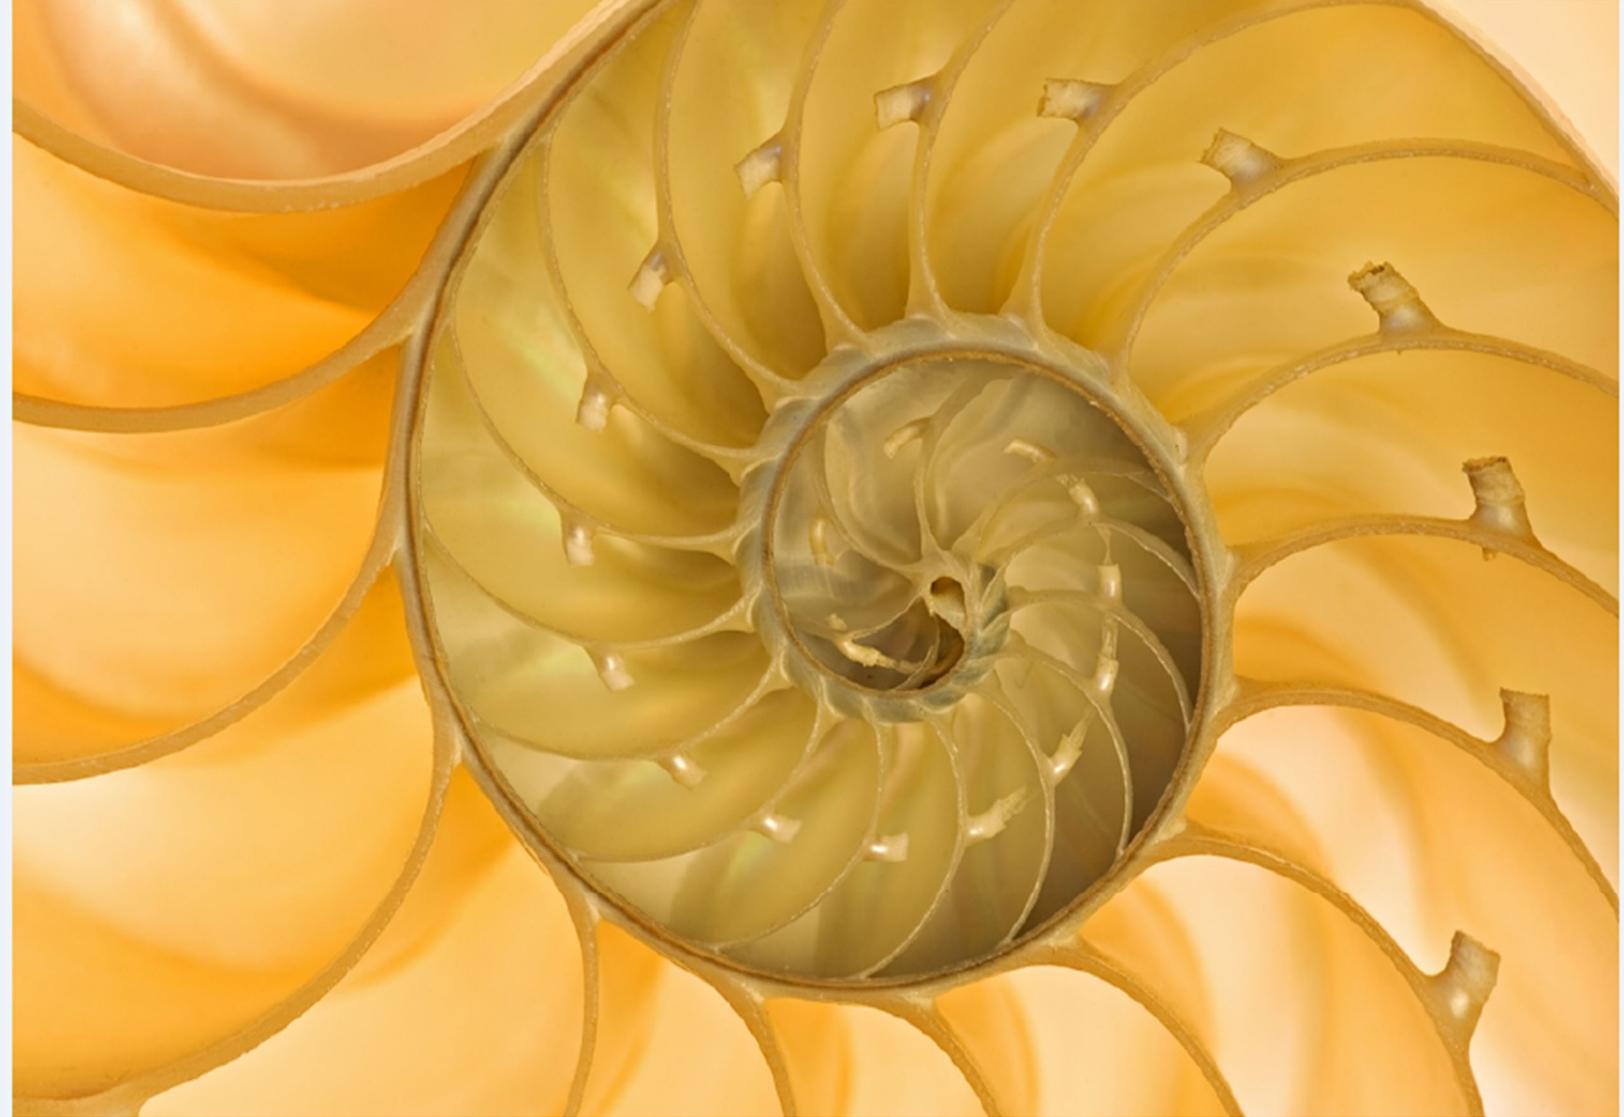

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

1. INTRODUCTION

1.1 Site Description

The former Steelcase Incorporated (Steelcase) facility is located at 1123 Warner Avenue in Tustin, California (the Site). The Site is adjacent to the southeast side of the Costa Mesa Freeway (State Route 55), between Bell Avenue and Warner Avenue, in a mixed, light industrial area of Tustin, Orange County, California (Figure 1-1). The Site occupies an area of approximately 6 acres in an area currently zoned as Planned Community Industrial Use.

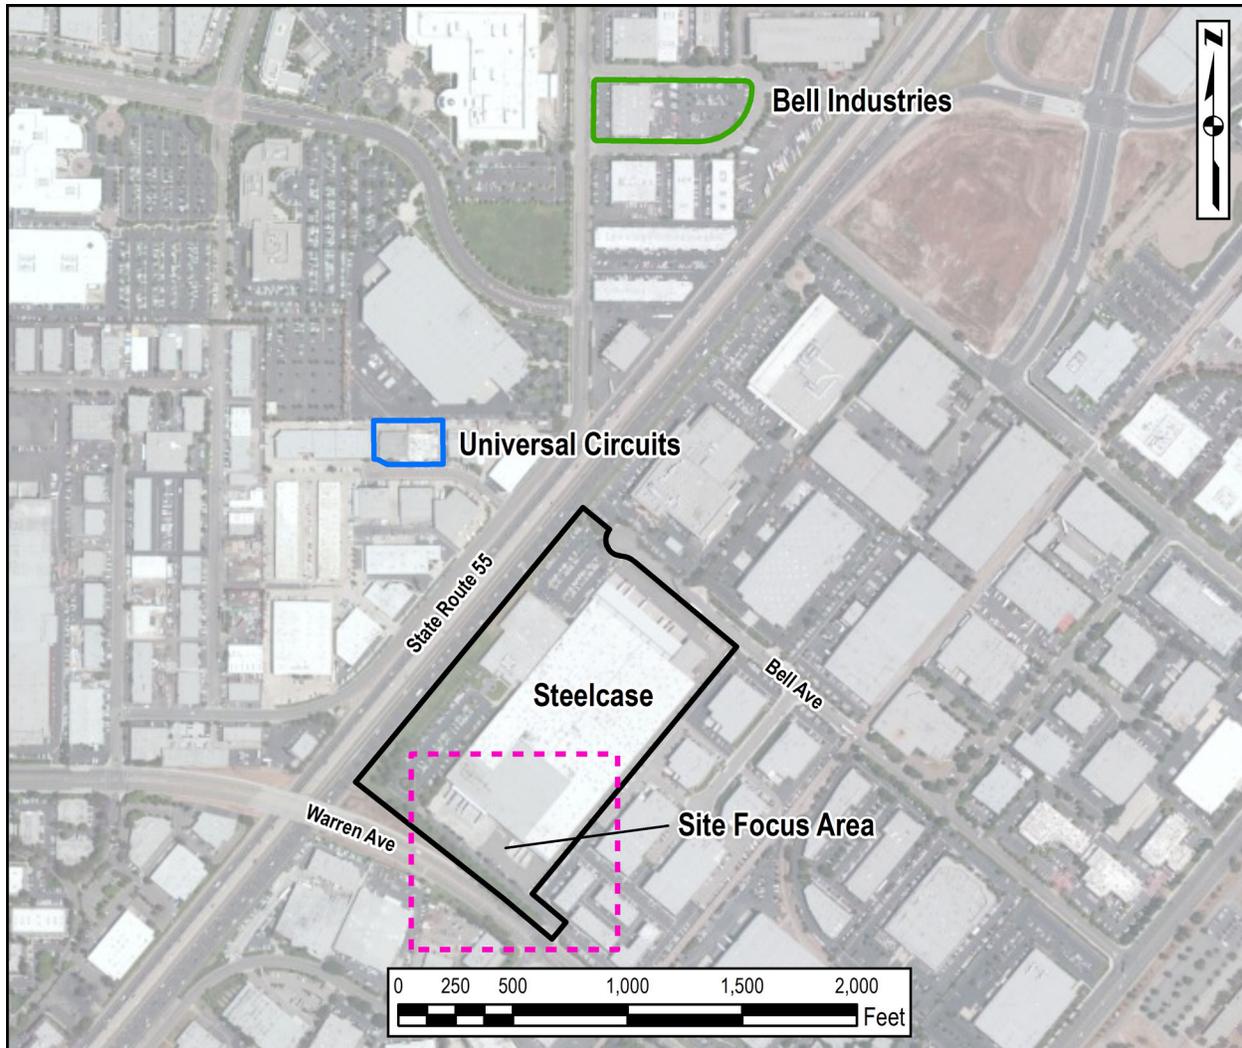

Figure 1-1: Site Location Map

1.2 Site History

Steelcase operated a furniture manufacturing facility at the Site from 1972 until February 2003; they no longer own or operate the facility. An organic solvent containing aromatic hydrocarbons was historically used to clean the paint distribution lines at the facility. The solvent was stored in an underground storage tank (UST) and was transferred via an underground transfer line to an aboveground storage tank in the

paint room. Despite no records of chlorinated solvent use at the Site, these compounds have been found in soil, soil vapor, and groundwater in the vicinity of the solvent UST, suggesting historical use at the Site.

In November 1983, a release of approximately 3,000 gallons of solvent from the subsurface transfer line occurred. The day after the discovery of the release, Steelcase responded by installing an extraction well (RW-01) in the release area for recovery of light non-aqueous phase liquid (LNAPL). The UST and associated piping were replaced in 1984 and removed in 1998. Operation of a groundwater recovery and treatment system began in 1985 to treat shallow groundwater via a recovery trench sump and recovery well RW-02. In 1996, the remediation system was modified for dual-phase vapor (SVE-01 and SVE-02) and groundwater extraction. In 2012, the remediation system was expanded to include extraction and treatment of deeper groundwater from wells MW-22B and MW-23B.

Since January 2013, the current groundwater recovery and soil vapor extraction (SVE) treatment systems have been used at the Site for remediation of groundwater and soil vapor (Figure 1-2).

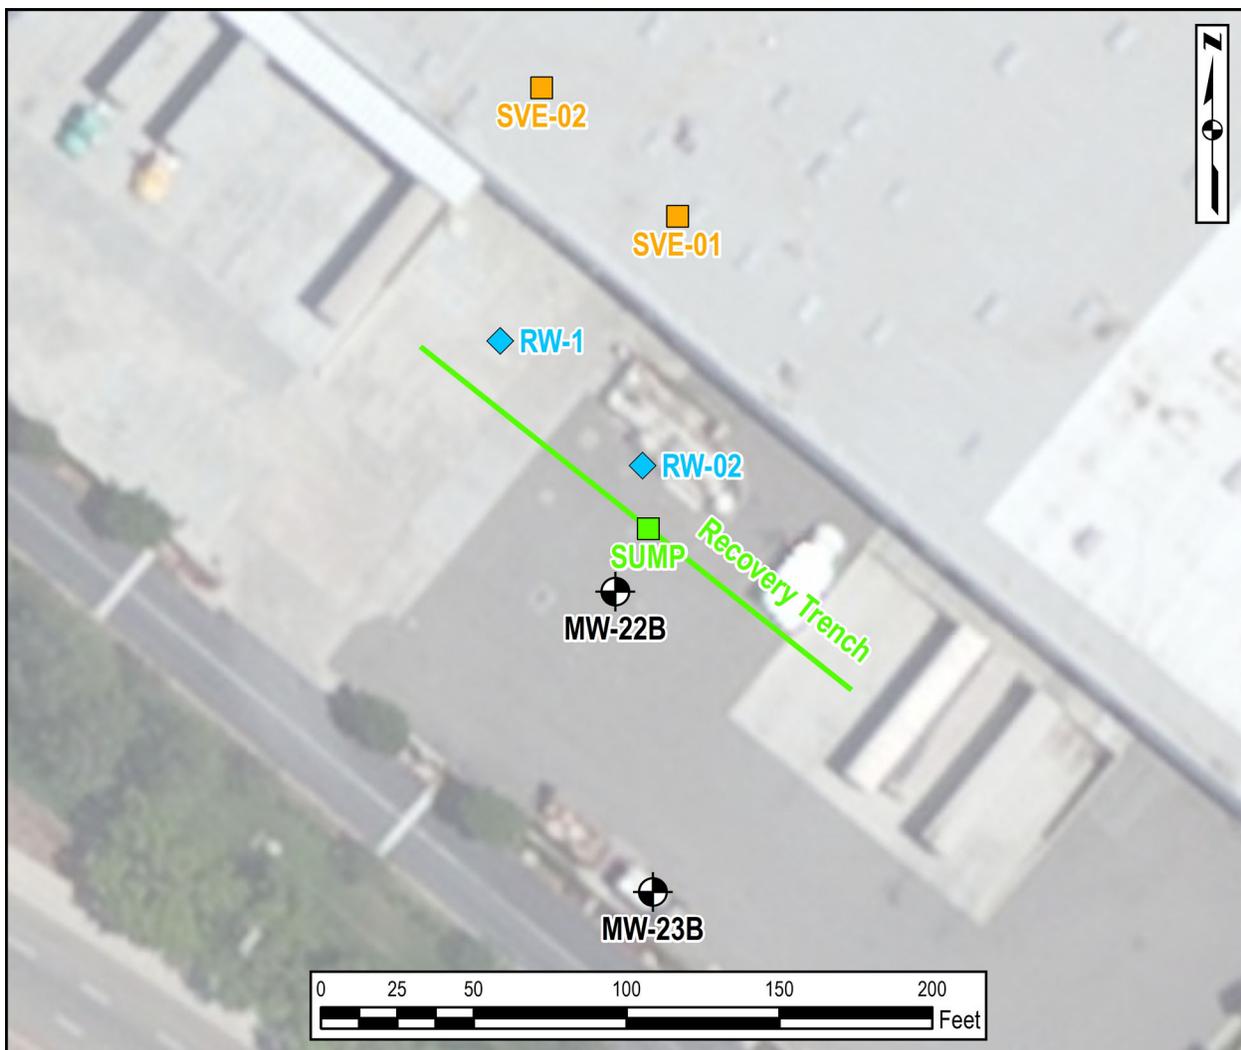

Figure 1-2: Remediation System Layout

2. CONCEPTUAL SITE MODEL

2.1 Regional and Site Geology

Geology in the vicinity of the Site is primarily comprised of interbedded fine- and coarse-grained soil from ground surface to a depth of 100 feet below ground surface (Emcon Associates [Emcon] 1984a; 1984b; E2 Environmental, Inc. [E2] 2010; 2013). Geologic heterogeneity is greater at the site scale than at the regional scale (i.e., there are a number of relatively thin layers in each boring that do not appear to be laterally continuous over long distances), as shown on Figure 2-1. Laterally continuous, coarse-grained layers represent potential regional-scale groundwater transport zones; two such layers exist in the vicinity of this Site and are referred to as Zones A (shallow) and B (deeper).

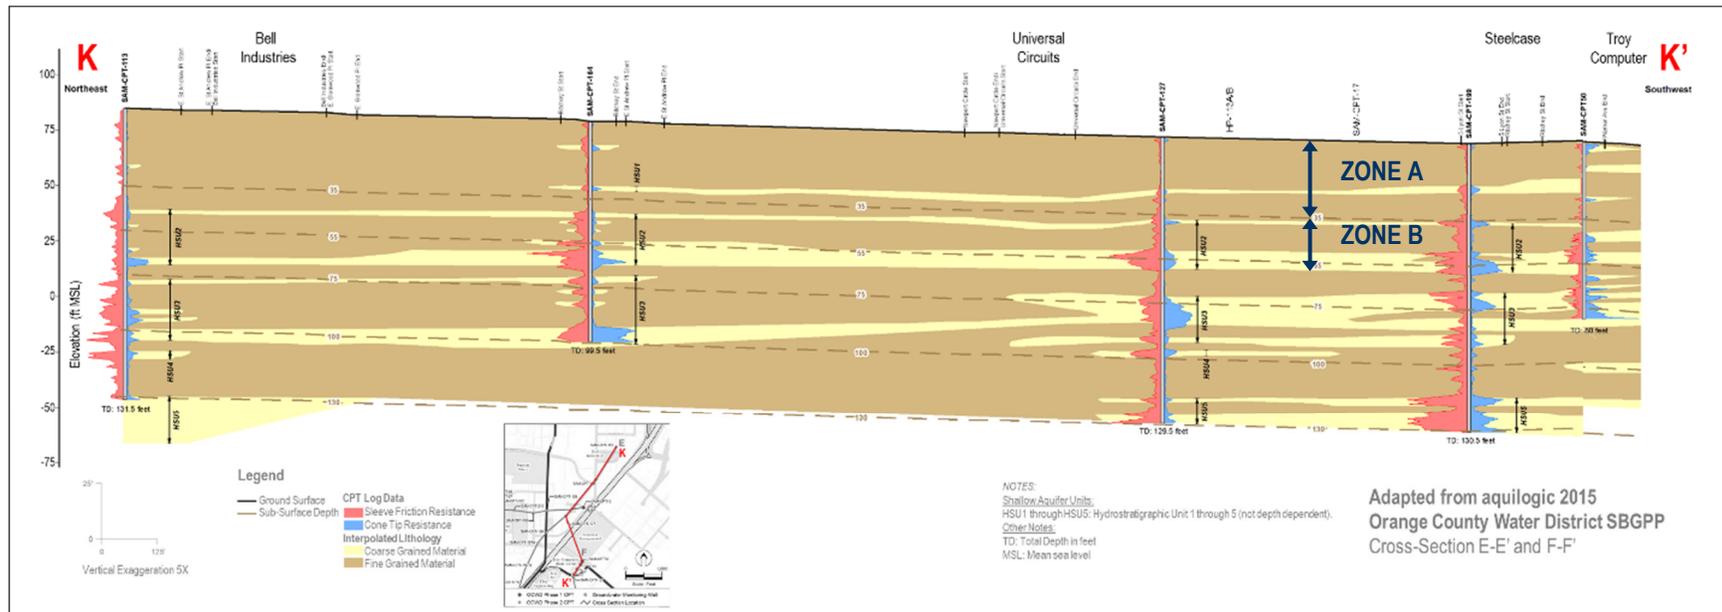

Figure 2-1: Regional Cross Section

2.2 Site Hydrogeology

Regionally, groundwater flows generally from north to south, as shown on Figure 2-2. The scale of the dataset used to map these potentiometric surfaces is very coarse (i.e., the distance between wells is significant). Given the heterogeneous nature of the geology in the vicinity of the Site, it is likely that local-scale groundwater flow directions are more complex than those shown on these maps, but the general flow direction is from north to south.

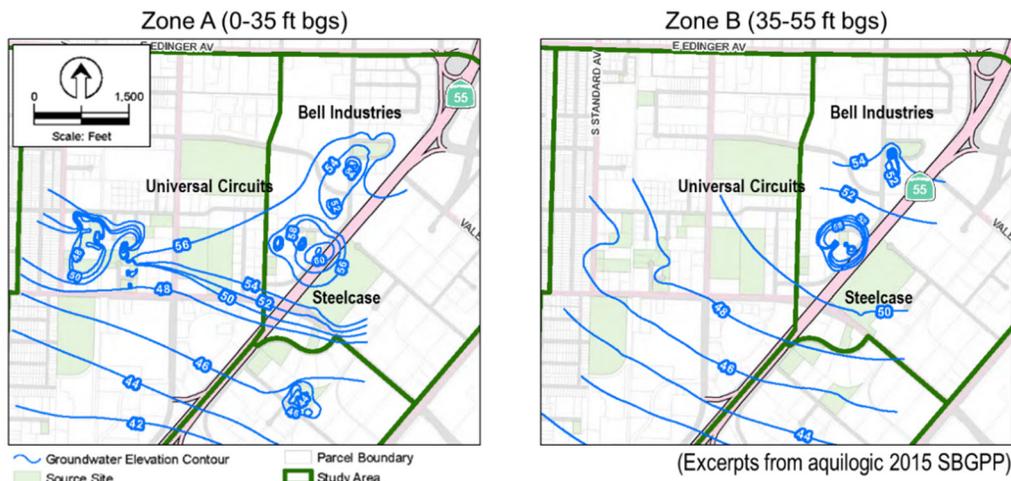

Figure 2-2: Regional Groundwater Elevation Contour Maps

Groundwater elevation data demonstrate a significant downward vertical hydraulic gradient at the Site, with higher groundwater elevations measured in Zone A and lower groundwater elevations measured in Zone B (Table 1).

The presence of a significant vertical hydraulic gradient indicates that the intervening fine-grained layer impedes equilibration of groundwater elevations between the Zone A and Zone B coarse-grained layers, resulting in little or no actual groundwater flow between these layers. The hydraulic gradient indicates a potential for flow, but also demonstrates that such flow is not readily occurring because, if it was, the groundwater elevation values at different depths, at a given location, would equilibrate.

Table 1: November 2019 Groundwater Elevation Ranges in Source Area Wells

Zone	Groundwater Elevation (feet above mean sea level)	
	Minimum	Maximum
Zone A	48.07	50.62
Zone B	37.51	44.92

2.3 Distribution of Impacts in the Source Area

No evidence of dense non-aqueous phase liquid (DNAPL) has been observed and no concentrations greater than one percent of the aqueous solubility of any chlorinated solvent compound have ever been detected in groundwater at the Site. Therefore, since there is no evidence of current or historical DNAPL

and no significant advective transport between Zones A and B, the only mechanism for migration of contamination from Zone A to Zone B at the Site is molecular diffusion.

The extent of diffusion in the source area would be more significant than at any other location, due to a stronger concentration gradient. A membrane interface probe (MIP) investigation was conducted in the source area in 2010. The continuous MIP flame ionization detector (FID) data are shown on Figure 2-3, which demonstrate that impacts (shown as orange on the logs below) have diffused into, but not through the fine-grained layer (the transparent zone between the sand layers [gray shaded zones] below). Impacts within the fine-grained layer are effectively immobile due to the low permeability of this layer. Therefore, the presence of volatile organic compounds (VOCs) diffused into the fine-grained layer should not adversely impact groundwater quality in Zone B.

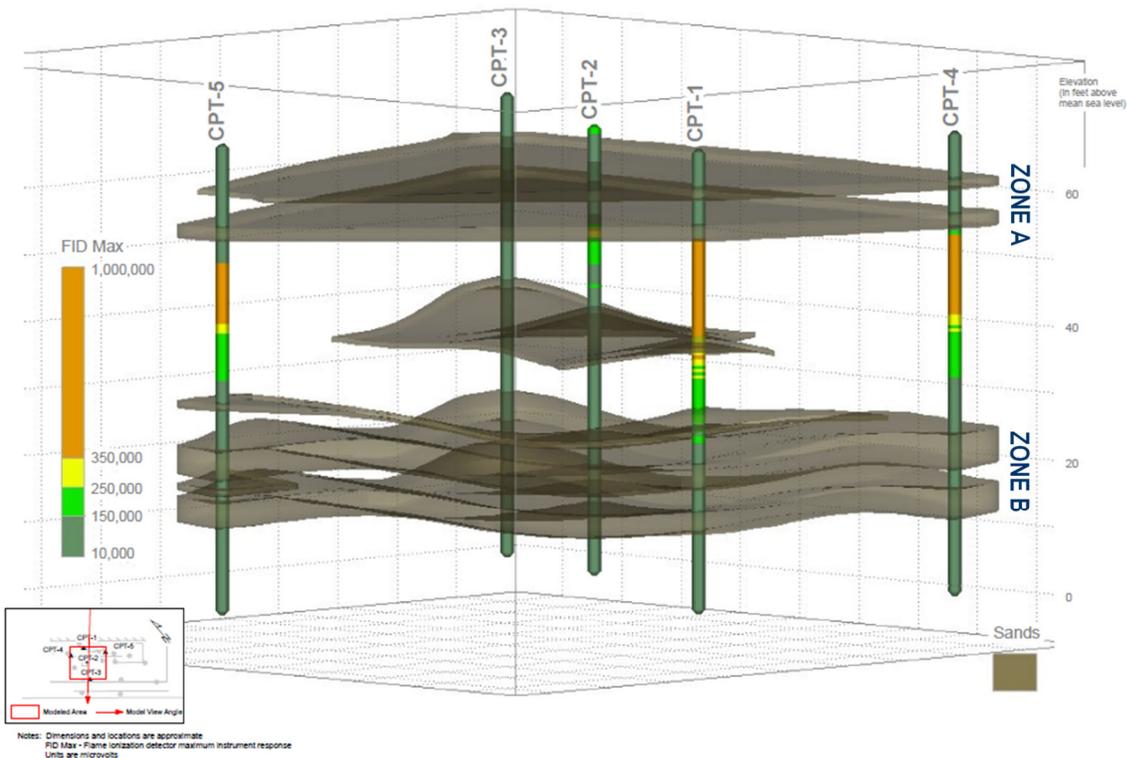

Figure 2-3: Three-Dimensional Model of MIP FID Data (E2 2010)

2.4 Chemical Speciation Evaluation

ERM-West, Inc. (ERM) evaluated chemical speciation data to differentiate between separate and distinct plumes, which are present beneath the Site. Chemical speciation data are presented using a consistent color scheme developed to convey relationships between chlorinated VOCs (CVOCs), as illustrated on Figure 2-4.

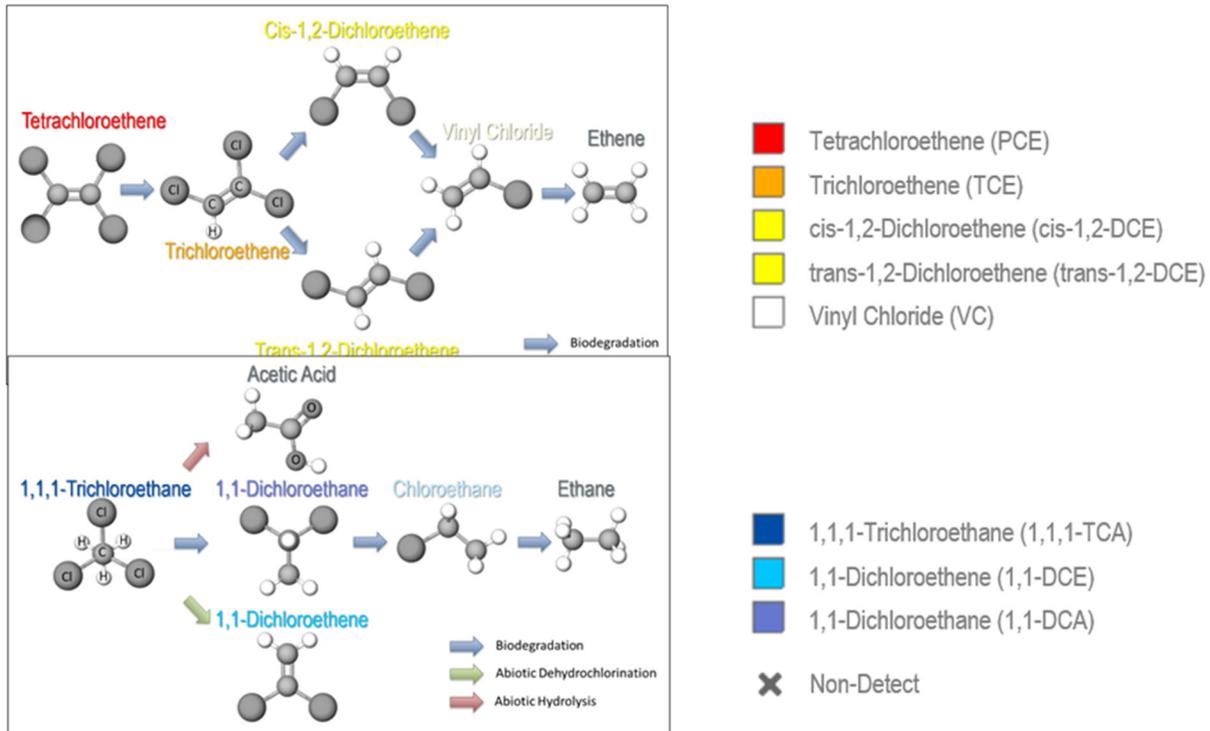

Figure 2-4: Degradation Pathways and Color Scheme

ERM prepared plan-view maps for Zone A and Zone B layers using pie charts to present chemical speciation data for groundwater. In an effort to evaluate the most spatially extensive dataset possible, historical maximum total CVOC concentration data were used from all wells and grab groundwater samples. Data were also evaluated from other known contaminated sites located hydraulically upgradient (i.e., to the north) of the Site; data were not segregated vertically, as well construction data was not available for wells from the other known contaminated sites. ERM prepared time-series plots for wells with temporally extensive datasets to evaluate chemical signatures and total CVOC concentrations over time.

On-site wells in Zone A exhibit a consistent chemical signature dominated by 1,1,1-trichloroethane (1,1,1-TCA; historically) and its biological degradation product, 1,1-dichloroethane (1,1-DCA; Figure 2-5). Over time, 1,1,1-TCA completely biodegraded to 1,1-DCA and has not been detected above the laboratory reporting limit since 2012 (Figure 2-6). Significant intrinsic biodegradation is common at sites where both chlorinated solvents and petroleum hydrocarbons were released at the same location, which was the case at this Site. 1,1,1-TCA also degrades abiotically via hydrolysis to form 1,1-dichloroethene (1,1-DCE), though very little 1,1-DCE was detected within Zone A groundwater at the Site. Low concentrations of various chlorinated ethenes, including tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), and vinyl chloride (VC) have been detected within Zone A groundwater in portions of the Site.

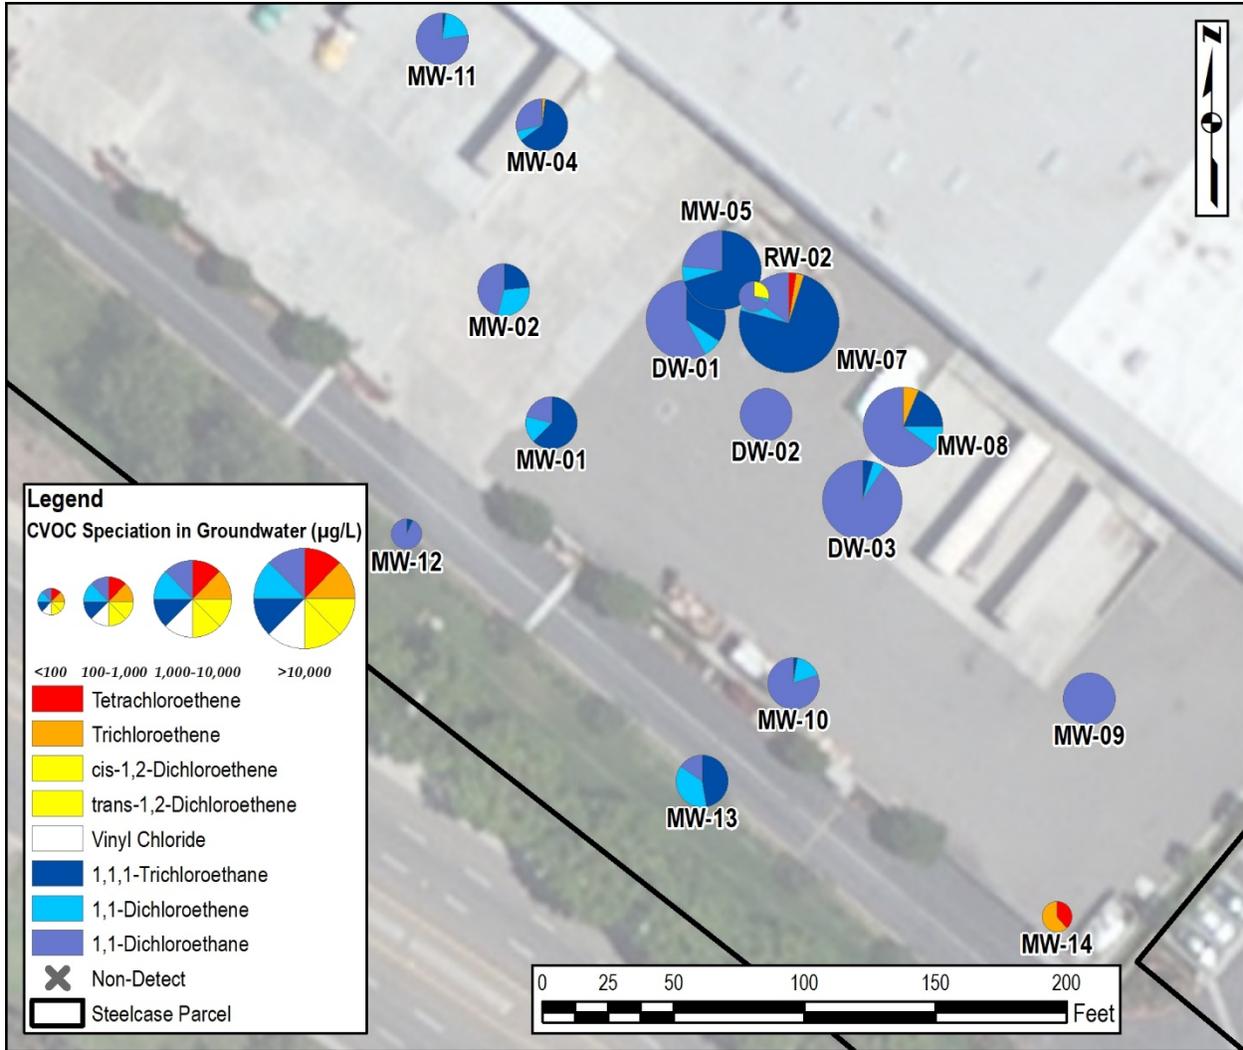

Figure 2-5: Zone A Maximum Historical CVOC Pie Charts

Zone A time-series plots show a consistent enrichment in the biological degradation product, 1,1-DCA, over time. This demonstrates that biological reductive dechlorination has consistently been the dominant degradation process; thus, it will likely continue in the future. These plots also show significant decreases in total CVOC concentrations over time, due to a combination of ongoing intrinsic biological reductive dechlorination and the various active remediation programs conducted at the Site.

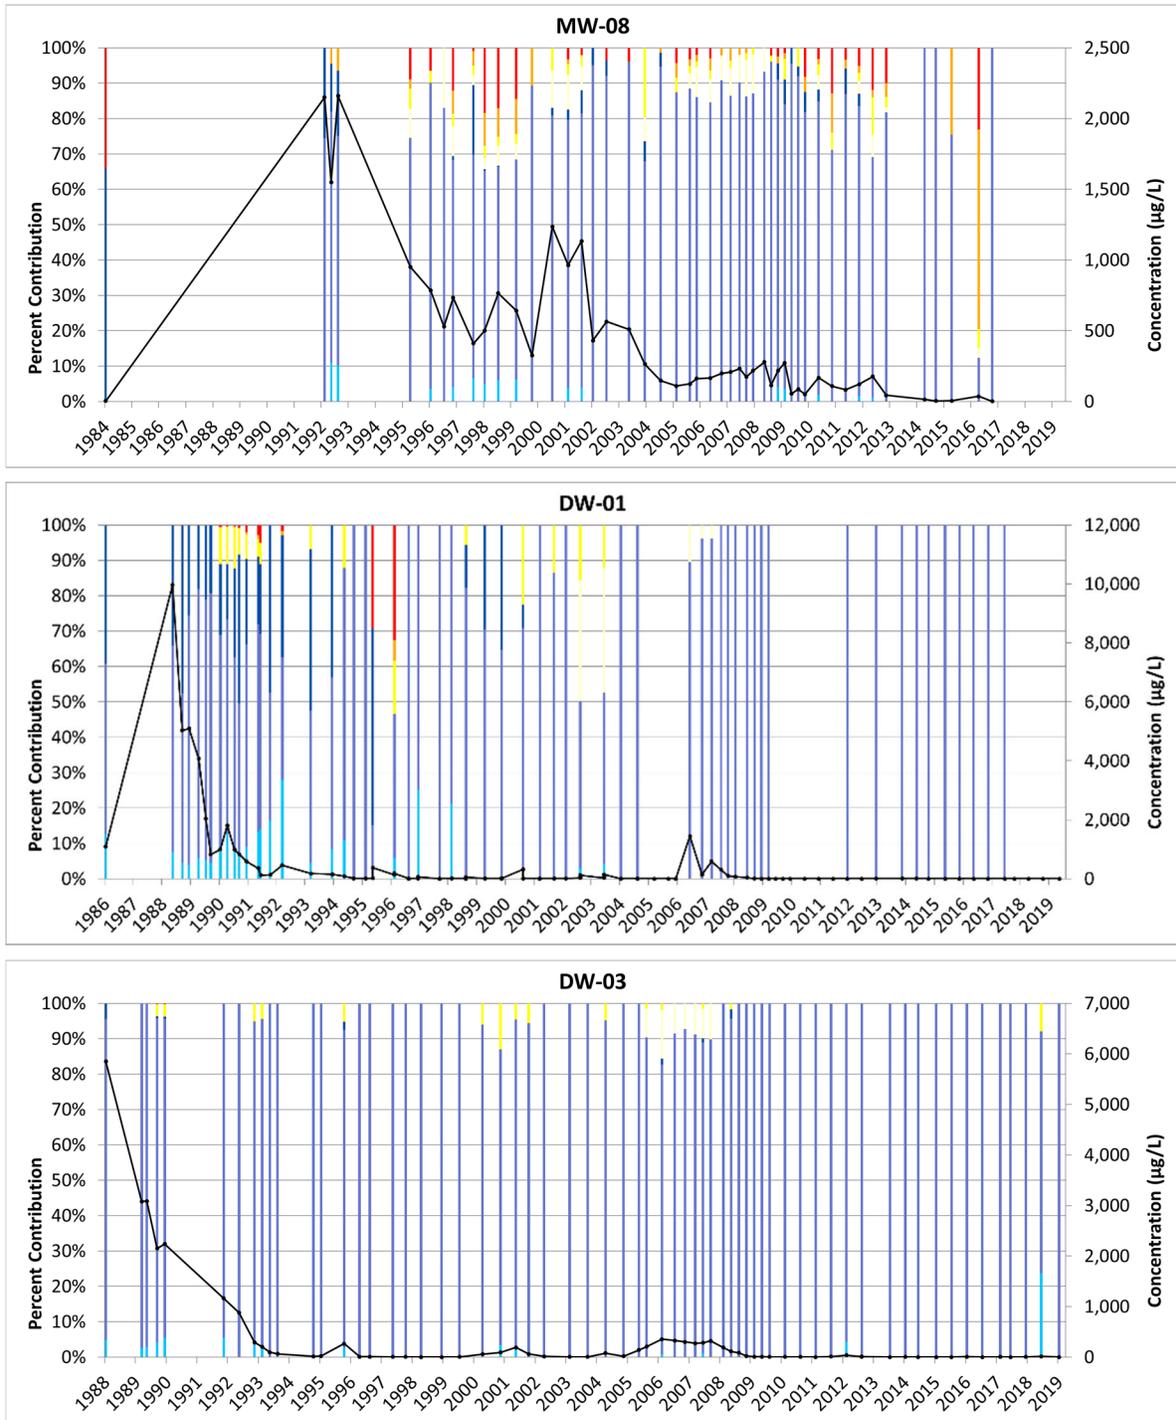

Figure 2-6: Time Series Stacked Bar Charts for Zone A Wells

A consistent chemical signature was observed for on-Site wells screened within the deeper Zone B coarse-grained layer (Figure 2-7). This chemical signature is dominated by 1,1-DCE with some 1,1-DCA and is significantly different than the chemical signature consistently observed within the Zone A wells at the Site.

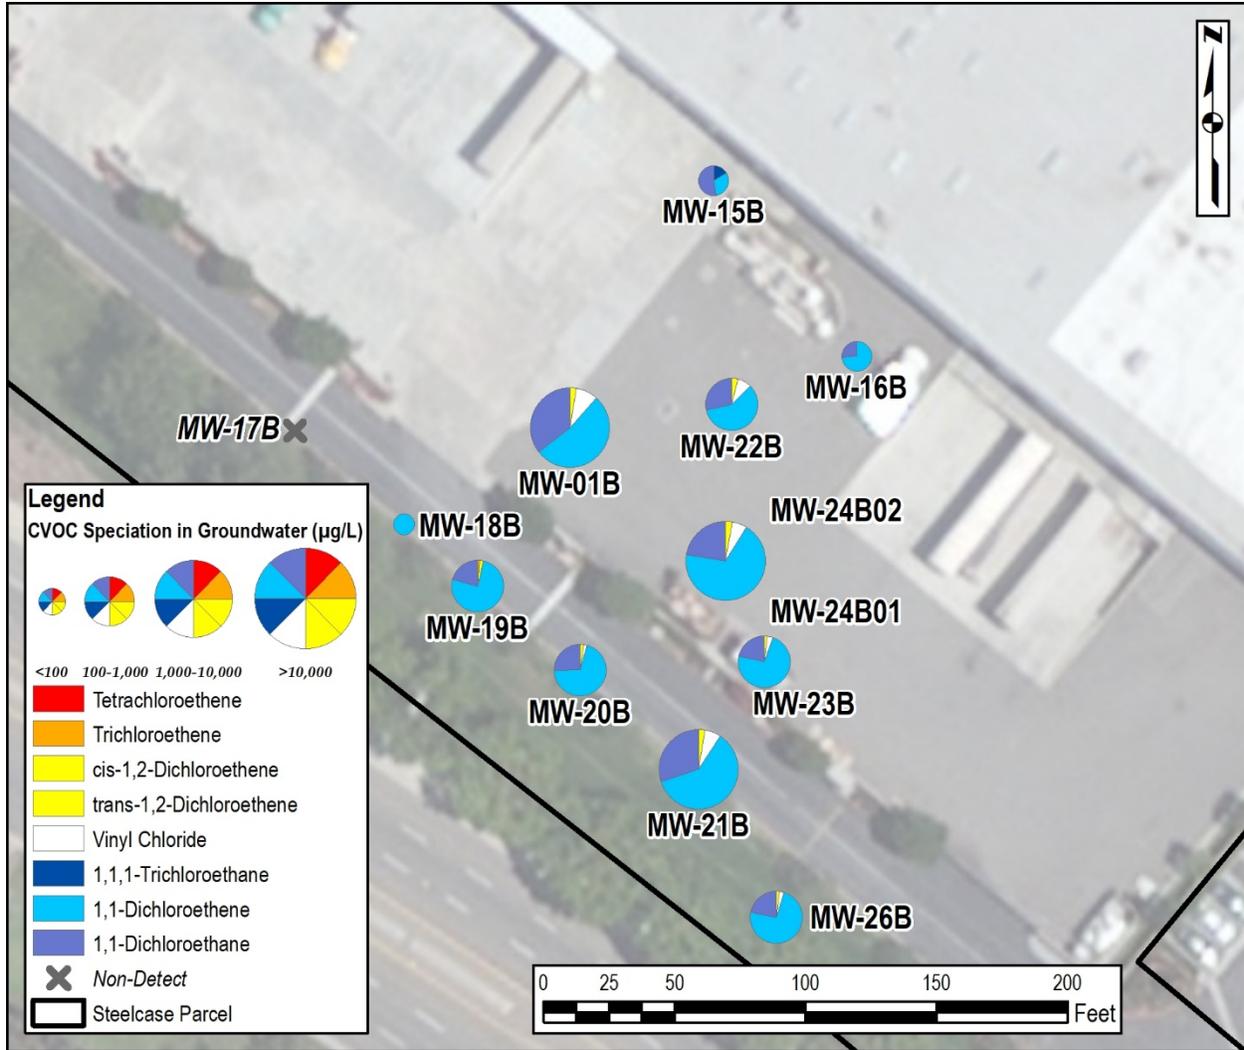

Figure 2-7: Zone B Maximum Historical CVOC Pie Charts

The 1,1-DCE enriched chemical signature has been consistent over time, as shown on the following time-series plots.

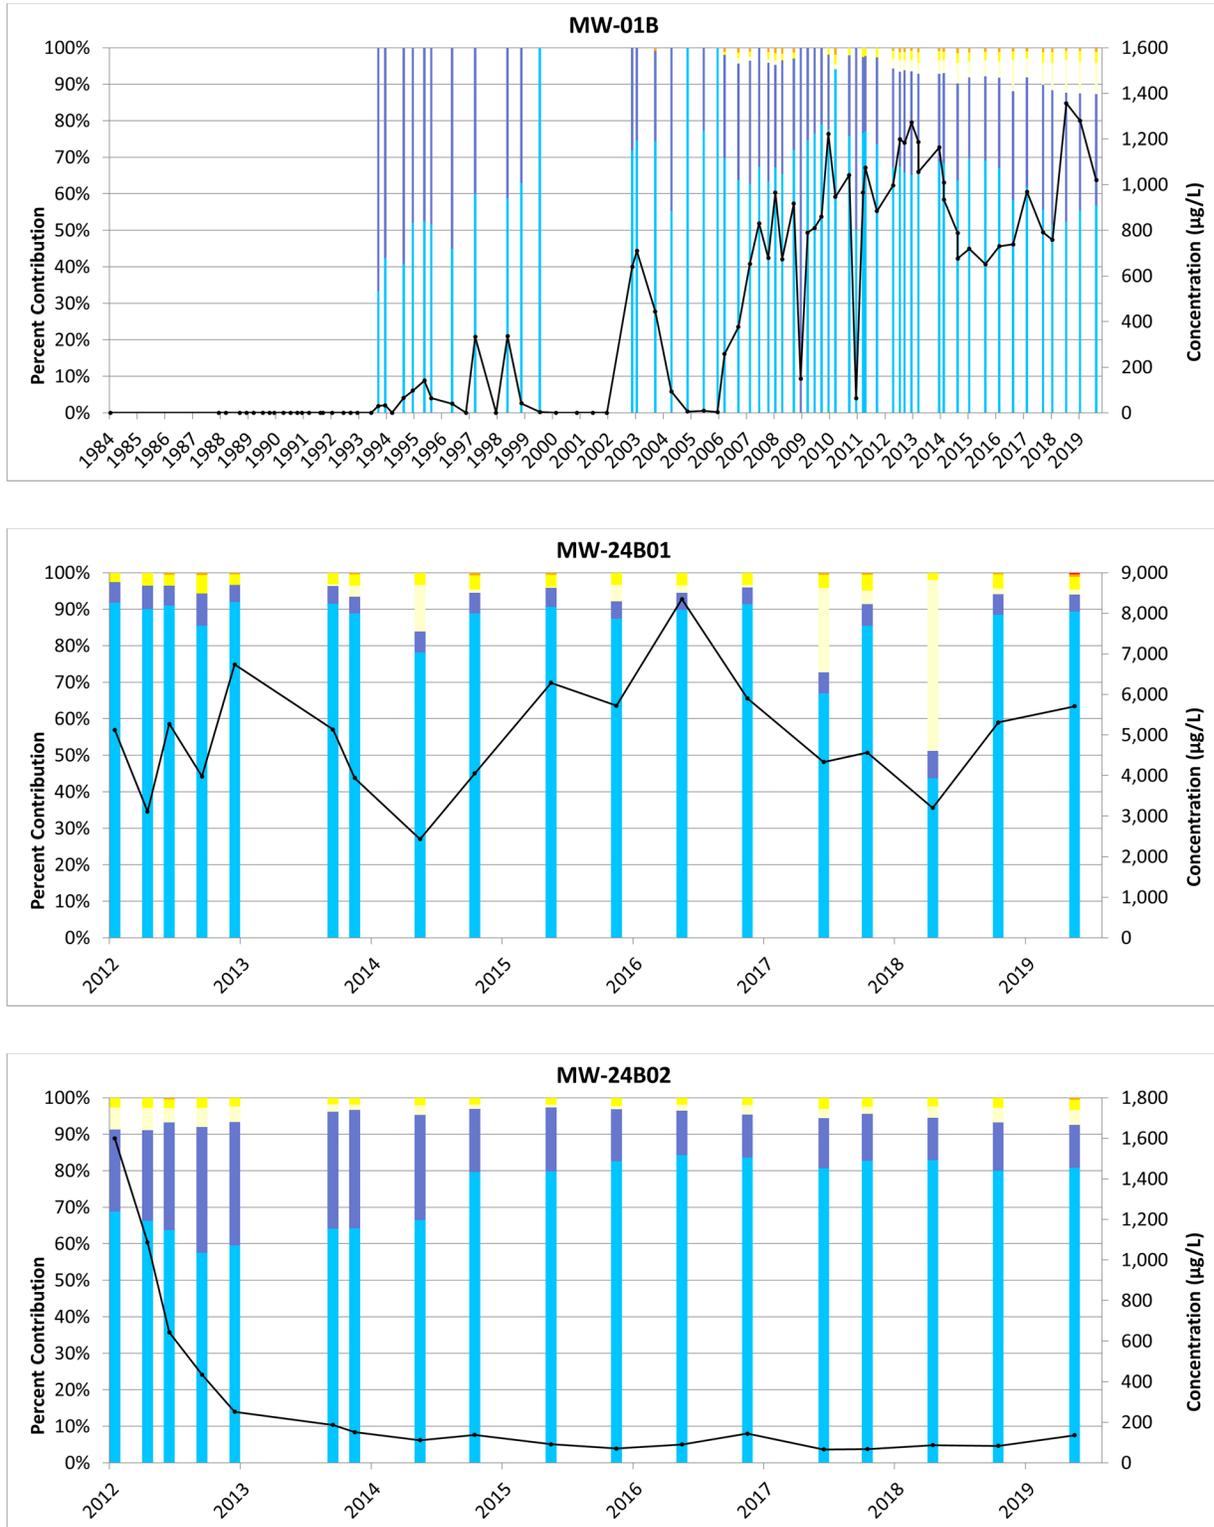

Figure 2-8: Time Series Stacked Bar Charts for Zone B Wells

As discussed in Sections 2.2 and 2.3, there is no evidence that shallow dissolved-phase contamination or DNAPL has migrated downward to create the deeper dissolved-phase plume present at the Site. This is due to the presence of a significant geologic barrier that inhibits vertical groundwater flow; the historical and current absence of DNAPL; and the limited degree of matrix diffusion that has occurred at the Site. Those lines of evidence, and the significantly different chemical signatures identified in Zone A and Zone B groundwater, indicate that the Zone B groundwater contamination beneath the Site is attributable to one or more hydraulically upgradient, off-Site sources.

The nearest potential known source of groundwater contamination is the Universal Circuits site, which is hydraulically upgradient of the Site (aquilogic 2015) and exhibits a similar chemical signature to that observed in Zone B groundwater at the Site.

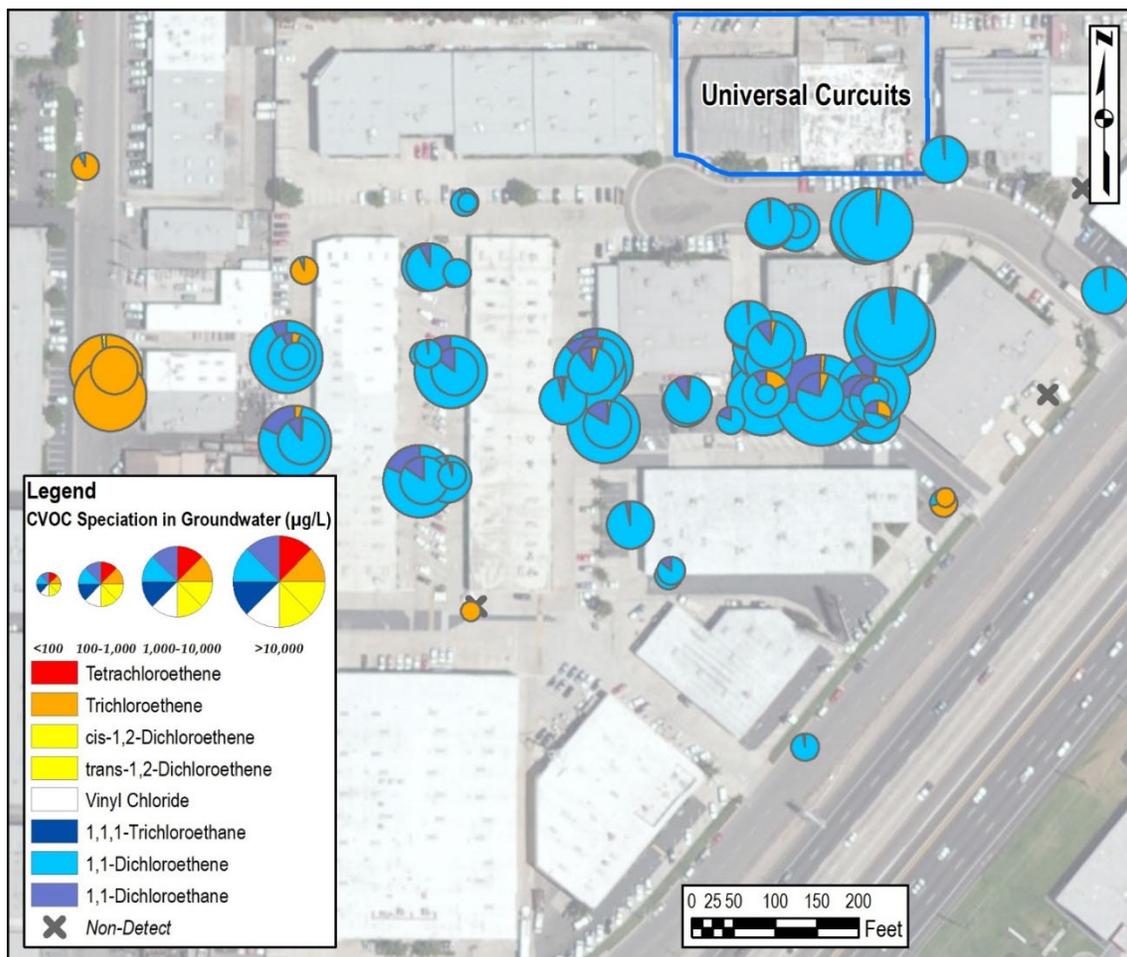

Figure 2-9: Universal Circuits Maximum Historical CVOC Pie Charts

Time-series chemical speciation and concentration plots were prepared for wells on the Universal Circuits site that have historically exhibited total VOC concentrations greater than 1,000 micrograms per liter (µg/L). These plots show that the chemical speciation of groundwater from the Universal Circuits site has consistently been dominated by 1,1-DCE with some 1,1-DCA and trace concentrations of PCE, TCE, and cis-1,2-DCE, (Note: the available Universal Circuits dataset did not include VC data.) Given the similarity of the contaminant speciation detected in Zone B groundwater on the Site and that found on the Universal

Circuits site, we have interpreted that CVOC contamination migrated in groundwater from the hydraulically upgradient Universal Circuits site onto and beneath the Site in Zone B.

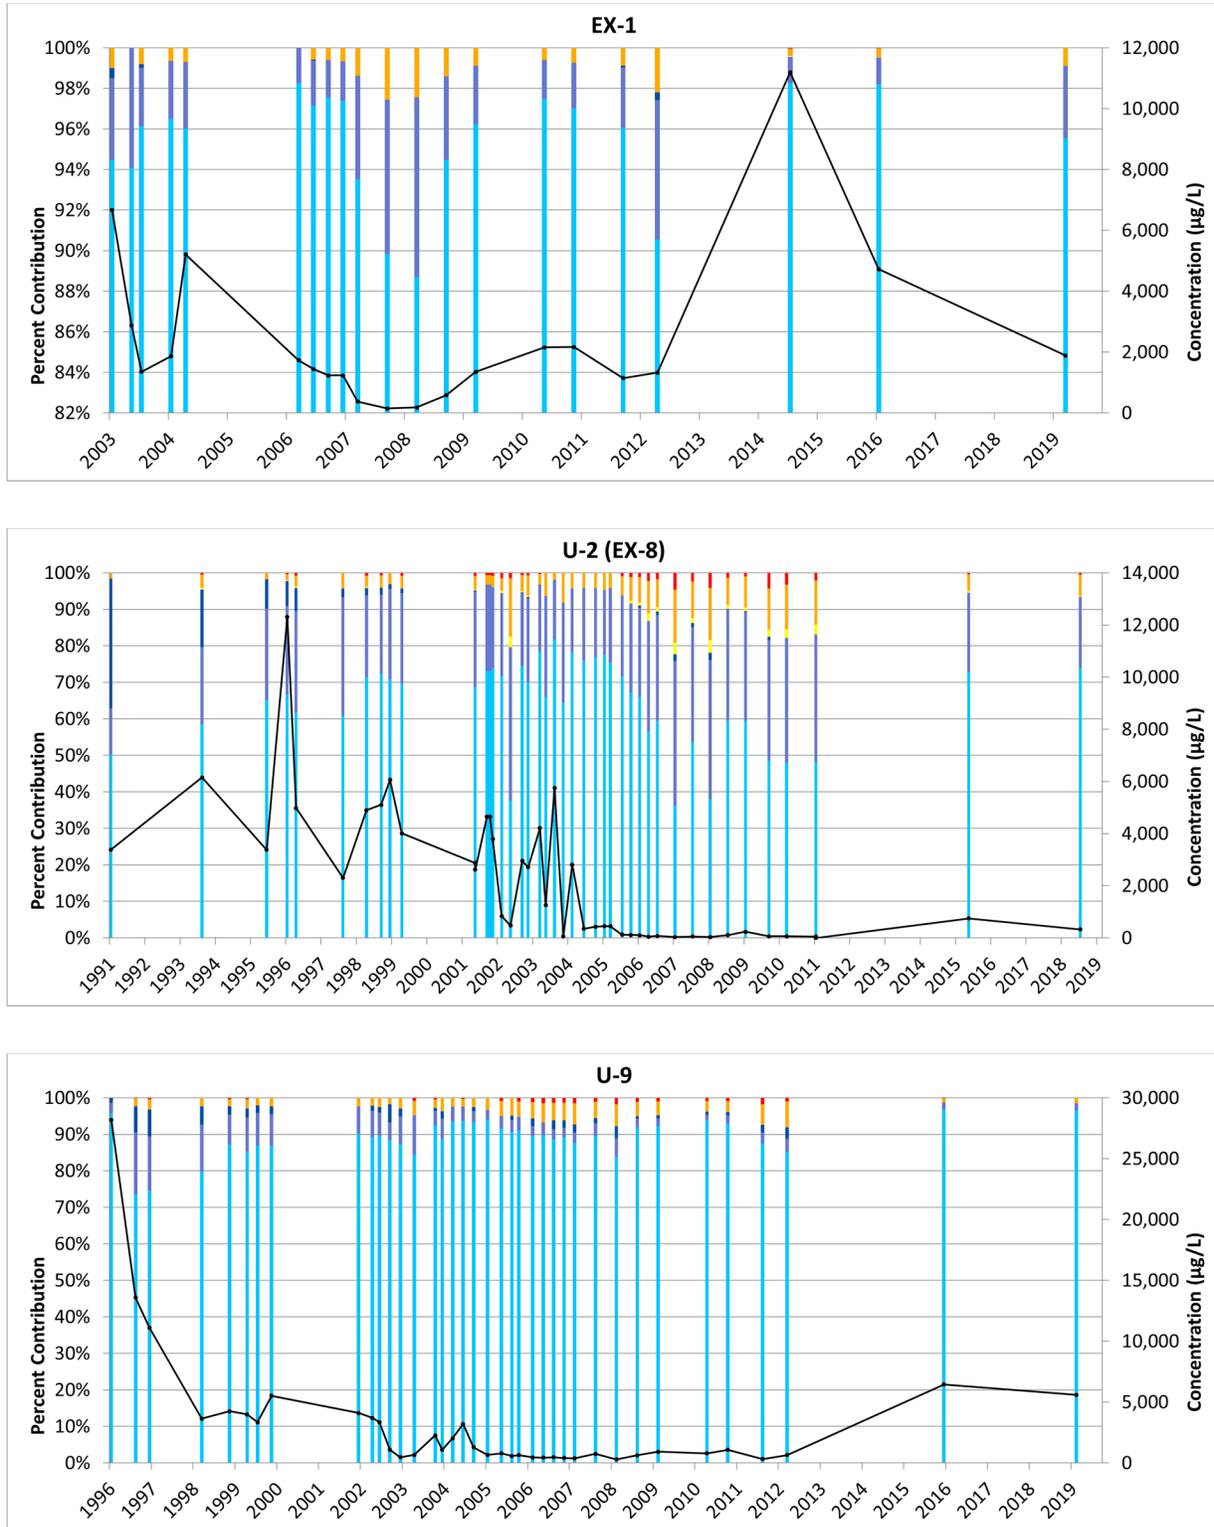

Figure 2-10: Time Series Stacked Bar Charts for Universal Circuits Wells

3. CURRENT CONDITIONS

Steelcase historically removed the source of contamination at the Site (i.e., the former UST and associated piping) and has been actively remediating soil and groundwater since 1983. In addition, due to the mixture of contaminants present at the Site, intrinsic biological reductive dechlorination has been occurring since the late 1980s. Collectively, the remedial activities have significantly reduced contaminant concentrations in Zone A groundwater, as shown below. As of 2019, only two Zone A monitoring wells exhibited CVOC concentrations in groundwater greater than the applicable regulatory cleanup standards (1,1-DCA at 5.2 µg/L in MW-09 and 5.3 µg/L in MW-11 [Figure 3-1], compared to the applicable environmental screening level [ESL] of 5 µg/L). The 1,1-DCA concentration trend at MW-09 exhibits a statistically significant decreasing trend; no statistically significant concentration trend exists for MW-11 (ERM 2020b). Given the low CVOC concentrations remaining in Zone A groundwater and ongoing intrinsic biological reductive dechlorination, it is highly inefficient and unnecessary to continue operating the groundwater extraction system.

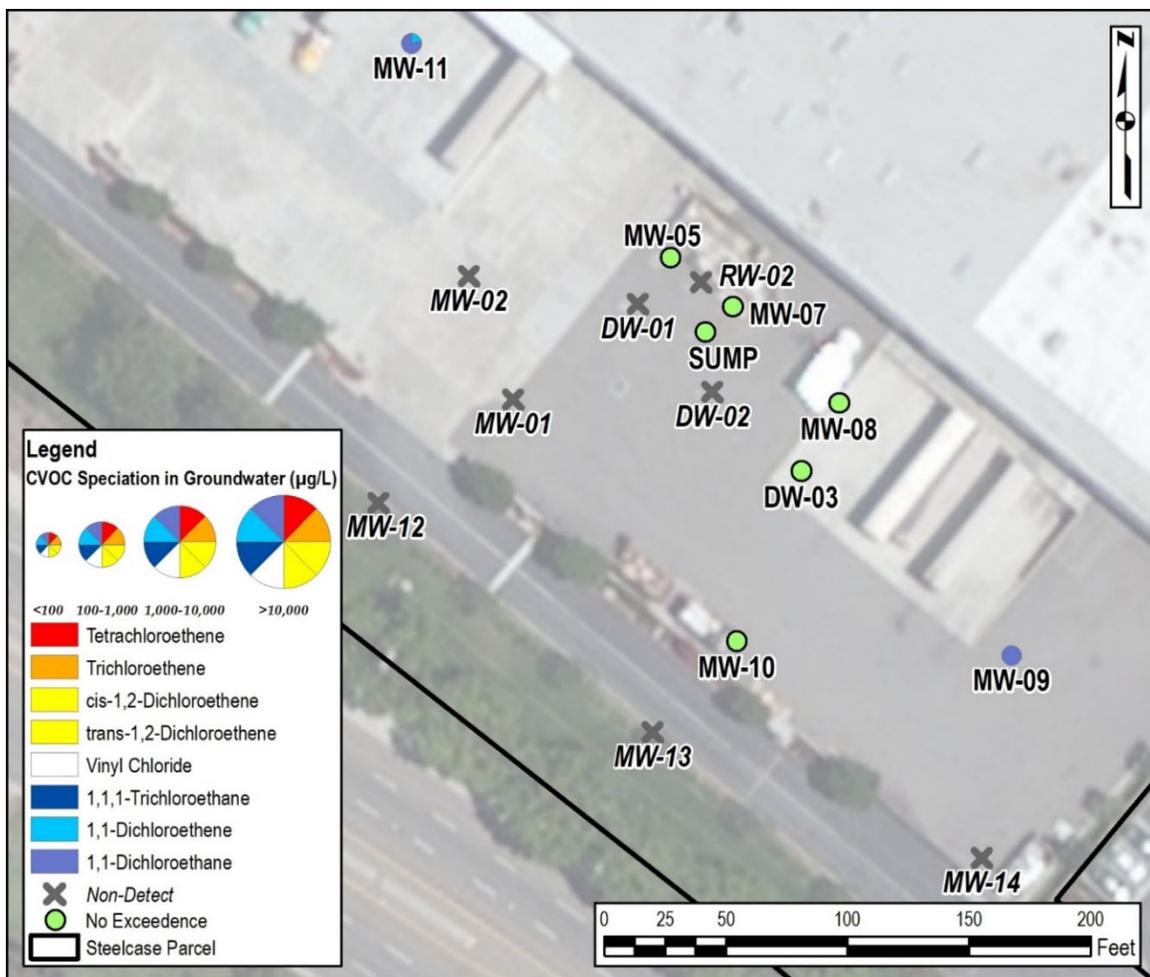

Figure 3-1: Zone A Most Recent CVOC Pie Charts (2017-2019)

1,4-Dioxane continues to be present in Zone A groundwater at concentrations up to 22 µg/L (Figure 3-2), which is above the applicable ESL (0.38 µg/L). The lateral extent of 1,4-dioxane concentrations greater than ten times the standard is localized, indicating that a significant 1,4-dioxane plume does not emanate from the Site. In contrast, the 1,4-dioxane concentrations in Zone B groundwater at the Site are up to 320 µg/L and are as high as 2,200 µg/L on the hydraulically upgradient Universal Circuits site, as shown on Figure 3-3. From 2011 through 2019, Zone A monitoring wells exhibited statistically significant decreasing concentration trends for 1,4-dioxane in groundwater, except for the SUMP samples, which exhibited a stable concentration trend (ERM 2020b).

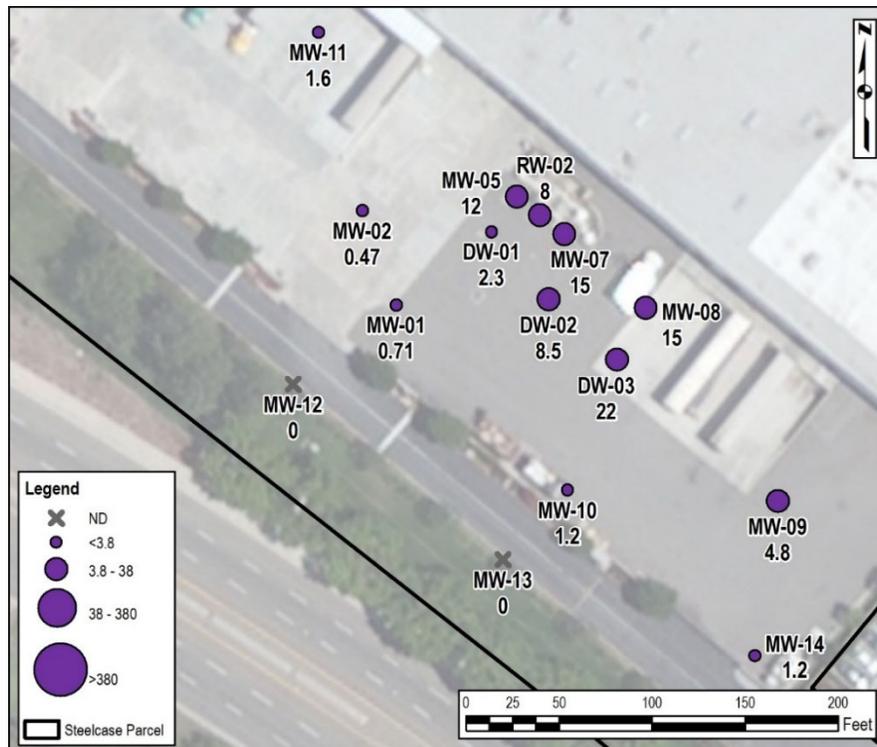

Figure 3-2: Zone A Most Recent 1,4-Dioxane Concentrations (2017-2019)

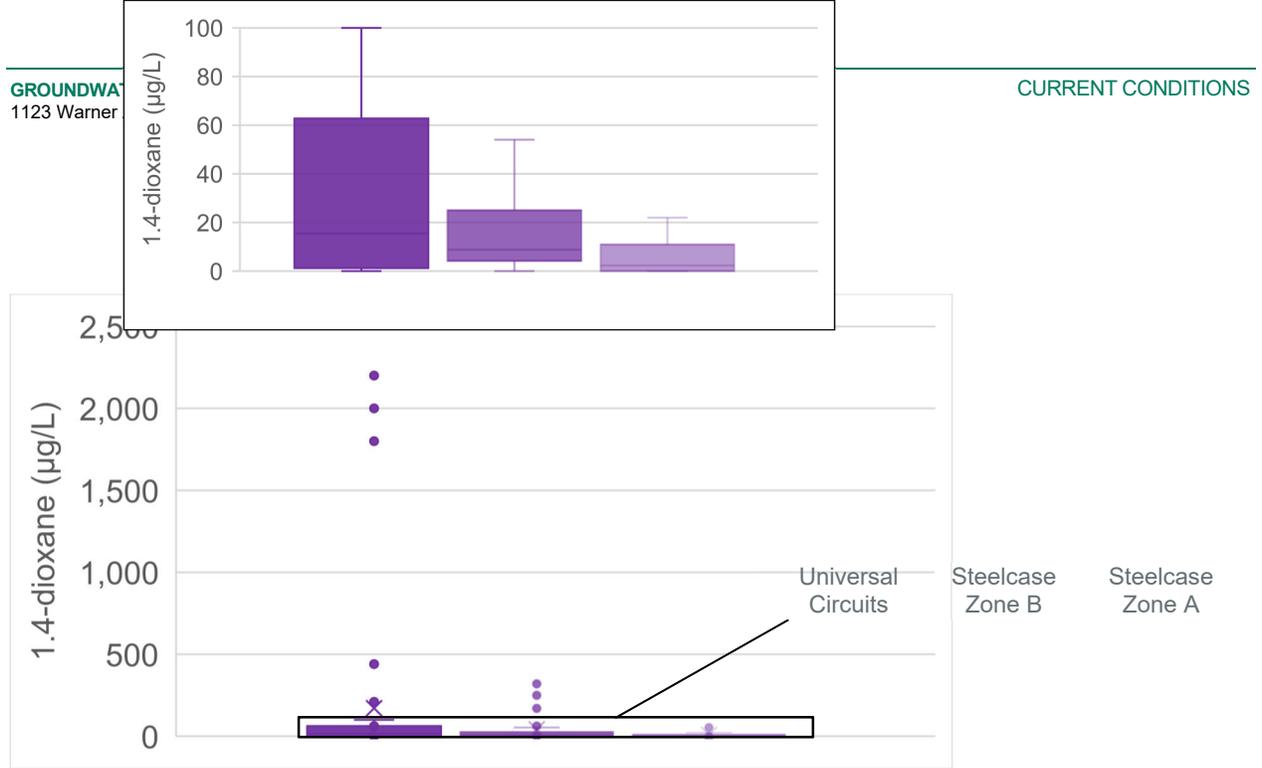

Figure 3-3: Box and Whisker Plot Comparing 1,4-Dioxane Concentrations (2019)

4. TREATMENT SYSTEM OVERVIEW

4.1 Completed Remedial Activities

Remedial efforts have been ongoing at the Site since 1983. In November 1983, IT Corporation installed eight 2-inch-diameter groundwater monitoring wells (MW-01 through MW-08) and one 12-inch-diameter groundwater recovery well in the southwest portion of the Site (TRC, Inc., 2003a and 2003b). The 12-inch-diameter groundwater recovery well and two monitoring wells (MW-5 and MW-7) were used to remove LNAPL on a daily basis from November 1983 to February 1984 (Crosby and Overton, 1984).

In 1985, Emcon Associates installed a groundwater extraction trench to capture and treat shallow groundwater. The trench was approximately 3.5 feet wide, 20 to 22 feet deep, and 150 feet long. A 4-inch-diameter, slotted polyvinyl chloride drain pipe was installed at the bottom of the trench and covered with approximately 8 to 10.5 feet of sand filter material. Groundwater and, historically, LNAPL, entered the trench and flowed through the drainpipe to a sump in the middle of the trench, where it was removed using the remediation system's high vacuum extraction pump.

In the 1990s, a dual-phase extraction (DPE) system was connected to Zone A wells (MW-5, MW-7, MW-8, DW-2) and the sump of the recovery trench. The DPE system consisted of a 7.5-horsepower (hp) vacuum blower, two 2,000-pound vapor-phase granular activated carbon vessels, two 200-pound liquid-phase carbon vessels, and a condensate knock-out vessel that separated water from vapor.

By 2011, it was clear that the DPE system had become inefficient, as it removed less than 3 pounds of constituents of concern from the subsurface in 2011 (E2, 2012). In 2012, Steelcase made the decision to replace the DPE system with a 1-hp pump, extracting from the sump of the 150-foot long recovery trench, to maintain a capture zone for Zone A groundwater. In December 2012, Steelcase submitted a formal request to abandon the air permit application to the South Coast Air Quality Management District. The DPE system was dismantled in December 2012 and replaced with a new pump-and-treat system.

In 2012, pumps were installed in wells MW-22B and MW-23B with piping to the separator vessel to provide capture of groundwater in Zone B (E2, 2013). These wells were pumped at flow rates up to 4 gallons per minute. The liquid-phase carbon vessels were replaced with two 1,000-pound vessels in series to accommodate the greater flow rate and the discharge piping was fitted with rotameters to measure the flow from each pump.

In 2013, an SVE system was installed and used to remove constituents of concern from vapors in the subsurface. The SVE system recovery has reached asymptotic levels, and a *Soil Vapor Extraction Shut Down Work Plan* was recently submitted to the Santa Ana Regional Water Quality Control Board (SARWQCB; ERM 2020a).

4.2 Mass Recovery

The groundwater extraction and treatment system in its current configuration has operated from 2013 through 2019, pumped more than 33 million gallons of water, and recovered a total of 32.2 pounds of VOC mass. As shown on Figure 4-1, the mass recovery rate from Zone A groundwater reached asymptotic levels in 2015.

As discussed in Section 3, only two Zone A monitoring wells exhibited CVOC concentrations greater than the applicable regulatory cleanup standards in 2019: 1,1-DCA was detected in wells MW-09 and MW-11 at concentrations of 5.2 µg/L and 5.3 µg/L, respectively, as compared to the applicable ESL of 5 µg/L. Given the low CVOC concentrations remaining in Zone A groundwater and ongoing intrinsic biological reductive dechlorination, continued operation of the highly inefficient groundwater extraction system is unnecessary and a waste of resources.

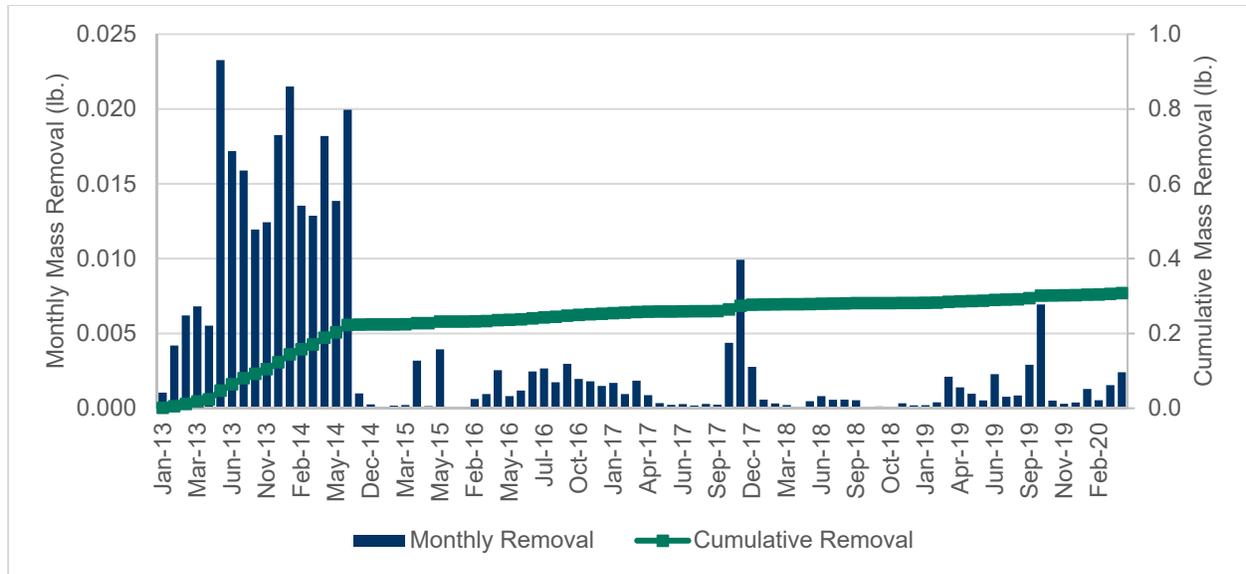

Figure 4-1: Zone A - Sump Mass Removal

As presented in Section 2.4, VOC impacts in Zone B groundwater beneath the Site migrated in groundwater from the hydraulically upgradient Universal Circuits site. VOC mass recovery from the Zone B groundwater extraction system over time shows that the mass recovery rate has been constant (

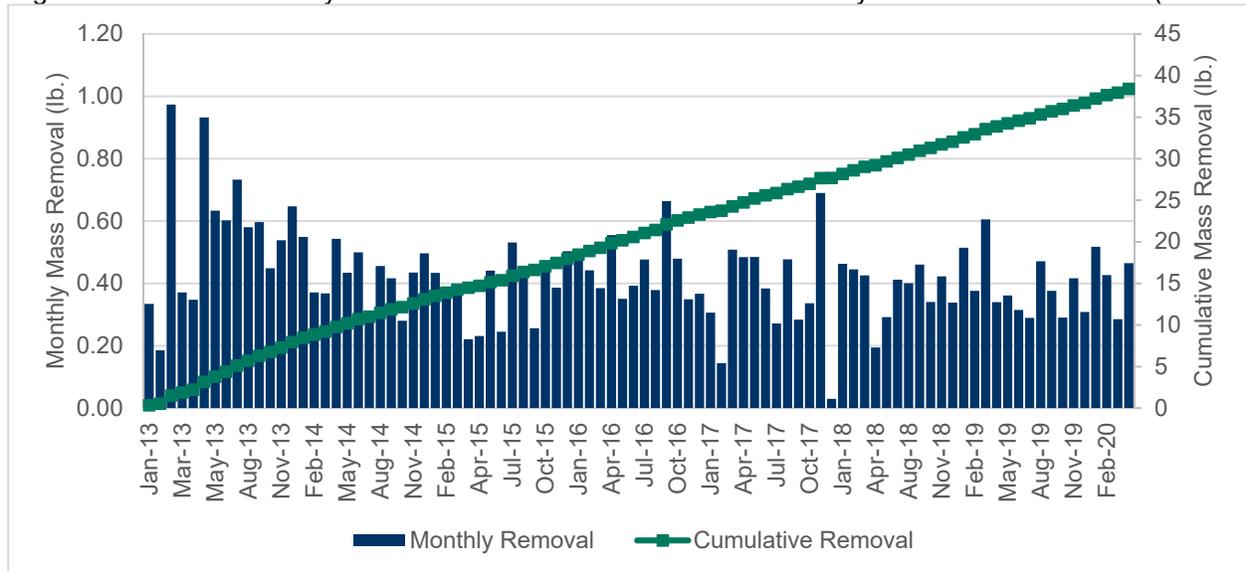

Figure 4-2), which is in direct contrast to the mass recovery curve shown on Figure 4-1. This is another line of evidence that the groundwater contamination in Zone B originates from a hydraulically upgradient, ongoing source that has not been remediated. It is not the responsibility of Steelcase to contain a plume from another site, but Steelcase has been doing just that since 2013. Continued operation of the Zone B groundwater extraction system by Steelcase is not warranted.

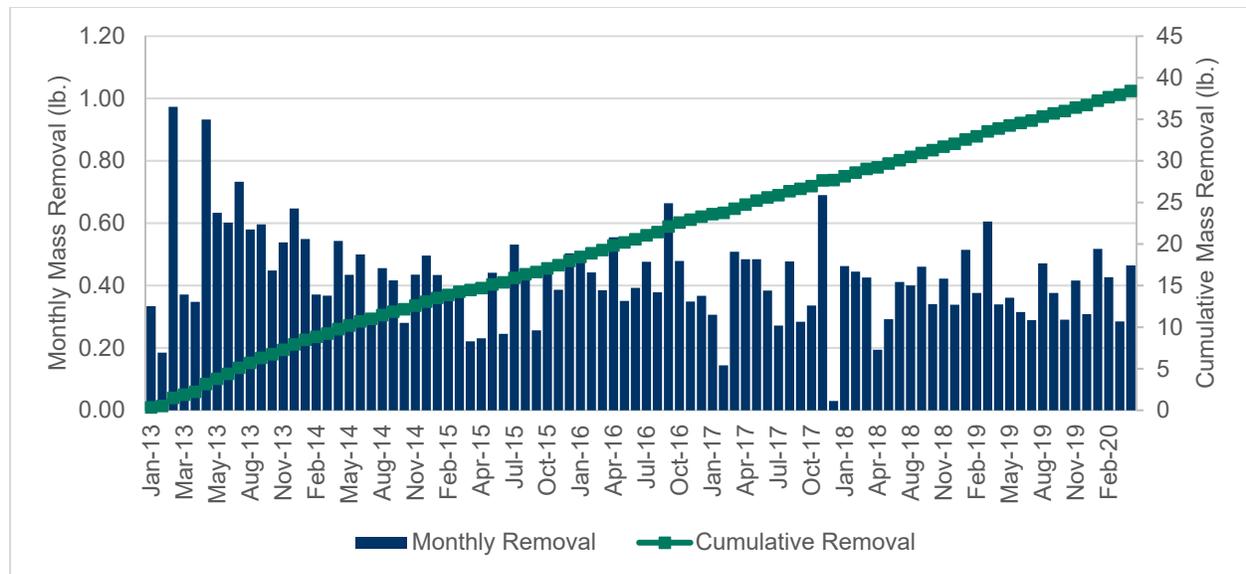

Figure 4-2: Zone B - Monitoring Wells 22B and 23B Mass Removal

4.3 Proposed Shut Down Process

Based on the conceptual site model (Section 2) and current conditions (Section 3), the groundwater extraction and treatment system has effectively treated Zone A groundwater to the extent feasible.

Remaining impacts in Zone A groundwater are a result of diffusion out of the fine-grained, low-permeability soil. Impacts present within low-permeability soil is very difficult to treat, as it is not easily extractable using ex situ remediation technologies (e.g., groundwater extraction and treatment) or accessible using in situ remedial technologies (e.g., in situ bioremediation). In situ treatment technologies involve the injection of remedial additives that have to come into direct or close contact with contaminant mass to enable effective treatment. There are a variety of means to distribute remedial additives in the subsurface, but none of them are highly effective in low-permeability soil. High-pressure injection technologies are infeasible at the Site due to the presence of backfill associated with the former UST, underground utilities and numerous existing monitoring wells within the target treatment area that will cause short circuiting and daylighting of remedial additives during injection. This will result in poor distribution of remedial additives within the low-permeability soil. The presence of a building over and immediately adjacent to the impacted area renders more intrusive remedial technologies (e.g., excavation, soil mixing, or in situ stabilization) infeasible.

Monitored natural attenuation can be effective at reducing 1,4-dioxane concentrations at starting concentrations below 500 µg/L (Interstate Technology and Regulatory Council [ITRC] 2020), which is the case for Zone A groundwater.

Remaining impacts in Zone B groundwater are attributable to upgradient sources, as demonstrated by multiple lines of evidence previously discussed, and not the responsibility of Steelcase.

The shut down process for the groundwater extraction and treatment system is illustrated on Figure 4-3.

4.4 Proposed Shut Down Schedule

The proposed schedule for system shut down and sampling is as follows:

- Within 1 month of approval of this work plan, the system will be shut down.

- Long-term groundwater monitoring of Zone A groundwater will occur using the following sampling plan: quarterly groundwater monitoring will be conducted for up to 2 years, followed by semiannual monitoring for 2 years, and then annual monitoring until CVOC and/or 1,4-dioxane concentrations are below MCL/NL for two consecutive sampling events.
- A report will be submitted following each sampling event.
- Within 2 months of completion of long-term groundwater monitoring, submit a Completion Report to the SARWQCB.

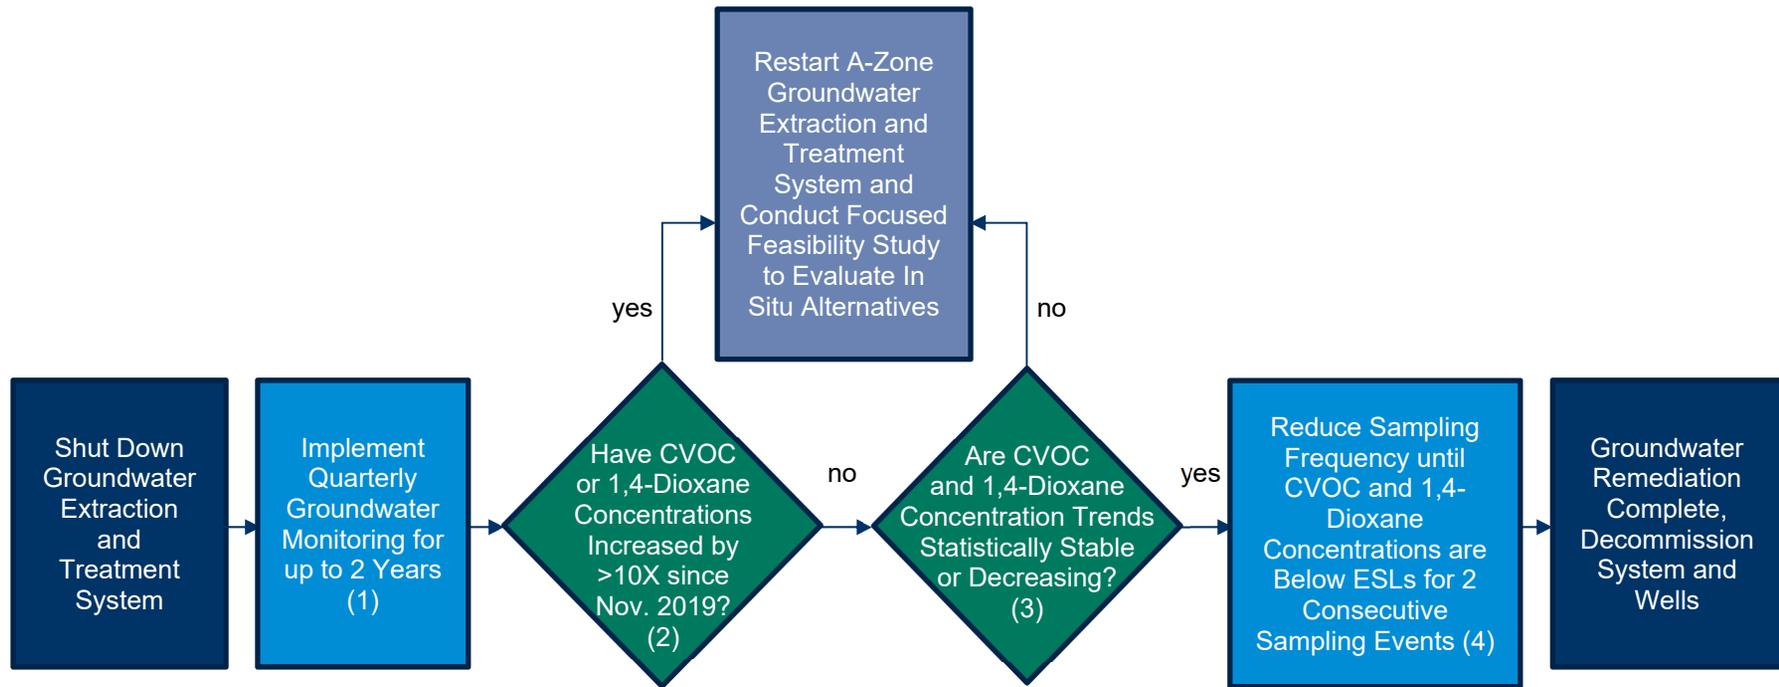

Figure 4-3: Proposed Shut Down Process

Notes:

1. Monitoring program will include impacted monitoring wells MW-07, MW-09, and MW-11 as well as sentinel wells MW-12, MW-13, and MW-14. All other on-Site monitoring wells will be destroyed following shut down.
2. Prior to restarting the groundwater extraction and treatment system, results will be verified through a combination of laboratory validation and/or resampling of impacted wells.
3. A minimum of eight sampling events will be conducted for the monitoring well network prior to conducting a statistical evaluation.
4. Sampling frequency will be reduced to semiannual for 2 years and then, if necessary, to annual. The groundwater monitoring program will be evaluated over time and the number of wells, analytical parameters, and monitoring frequency may be adjusted with agreement from the SARWQCB

**FINDING OF SUITABILITY TO TRANSFER
PARCELS 3, 21, 38, 39 AND PORTIONS OF 40
MARINE CORPS AIR STATION TUSTIN, CALIFORNIA**

1.0 PURPOSE

The purpose of this Finding of Suitability to Transfer (FOST) is to document the conclusion that real property made available through the base realignment and closure (BRAC) process is environmentally suitable to transfer by deed under Section 120(h) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Parcels 3, 21, 38, 39, and portions of 40 at Marine Corps Air Station (MCAS) Tustin are proposed for transfer.

This FOST is based on the Final Basewide Environmental Baseline Survey (EBS) for MCAS Tustin (BNI 2001) as well as information contained in documents listed in Attachment 1. These documents include the MCAS Tustin Business Plan (DON 2001a), which provides updated information through 31 December 2000 and schedules for planned environmental activities at the base. Tables and figures in this FOST represent conditions as of 31 July 2001. Parcel designations match those presented in the EBS and are consistent with those presented in the final MCAS Tustin Specific Plan/Reuse Plan Errata (Reuse Plan) (City of Tustin 1998).

This FOST was prepared in accordance with United States Department of Defense (DoD) guidance documents, including DoD Guidance on the Environmental Review Process to Reach a Finding of Suitability to Transfer for Property Where Release or Disposal Has Occurred (DoD 1994a). The MCAS Tustin environmental documents are available from the information repository located within the government document section of the main library of the University of California at Irvine.

2.0 PROPERTY DESCRIPTION

MCAS Tustin is located in southern California near the center of Orange County (Figure 1). The installation is located in a residential and light industrial/manufacturing area approximately 40 miles south of downtown Los Angeles and approximately 100 miles north of the California/Mexico border. It encompasses approximately 1,600 acres of land. Most of the base is located within the city of Tustin; approximately 95 acres in the southern portion of the base are within the city of Irvine. The base is bordered by the cities of Tustin, Irvine, and Santa Ana.

MCAS Tustin was commissioned in 1942 as a United States Department of the Navy (DON) lighter-than-air base. The installation was used to support observation blimps and personnel conducting antisubmarine patrols off the coast of southern California during World War II. In 1949, the base was officially decommissioned as an active facility because of the diminished need for blimp patrols. However, in 1951, the base was reactivated to support helicopter operations for the Korean conflict and was renamed "MCAS (Helicopter) Santa Ana." In 1978, the installation name was changed to "MCAS (H) Tustin" to reflect its annexation by the city of Tustin. In 1986, the installation was renamed "MCAS Tustin."

MCAS Tustin was operationally closed on 02 July 1999 in accordance with the Defense Base Closure and Realignment Act of 1990. Currently, the majority of the buildings are unoccupied, and the primary activities at MCAS Tustin are maintenance and environmental cleanup.

The locations of Parcels 3, 21, 38, 39, and portions of 40 are depicted on Figure 2. Parcel descriptions are included in Sections 2.1 through 2.5. Buildings and structures located within the transfer parcels are shown on Figures 3 and 4. Table 1 presents information on the buildings and structures within these parcels.

2.1 Parcel 3

Parcel 3 (Figure 3) consists of about 6 acres located along the western boundary of MCAS Tustin within the city of Tustin. The parcel is bordered by Parcel 1 to the north and south, Landsdowne Road to the east, and Parcel 40 to the west.

One active well (MAW-3) is partially located within Parcel 3 (Figure 5) and is also located within Parcel 40 (See Section 2.5). The Irvine Ranch Water District (IRWD) owns this well and has an easement for access established in 1989. The well is enclosed in a shed also owned by IRWD and designated as Building 10E. This well was recommended (to the regulatory agencies) for removal from consideration as an AOC based on the past and current use of the site. The regulators concurred with the recommendation for removing the well from consideration as an AOC (Table 2). The IRWD easement and ownership of the active well and associated shed will remain in effect after the property has been transferred. One former underground storage tank (UST) site (UST-10A) is located within Parcel 3 (Figure 6) and has received no further action (NFA) concurrence from the Regional Water Quality Control Board (RWQCB), Santa Ana Region, lead agency for UST closures in the state (Table 2). Closure sampling results did not identify any evidence of a release at the site.

Three buildings/structures (553, 554, and 557) are located within the boundaries of Parcel 3 and were constructed in 1991 (Table 1). Buildings 553 and 554 were previously used as bachelor enlisted quarters and are three-story buildings, approximately 41,000 square feet each. Building 557, a mechanical utilities building for Buildings 553 and 554, is a vacant, single-story building with an area of approximately 400 square feet. Building 557 will continue to house utilities to support Buildings 553 and 554 after transfer. Building 10E, located outside the MCAS Tustin fenceline, is owned by IRWD and will remain the property of IRWD after transfer.

It is anticipated that Parcel 3 will be transferred for emergency housing needs. The city of Tustin currently has a lease for similar use of Parcel 3. Buildings 553 and 554 are planned to be converted to support transitional housing after transfer of the property. The lease will be terminated upon property conveyance.

2.2 Parcel 21

Parcel 21 (Figure 3) consists of about 10 acres in the northwestern corner of MCAS Tustin within the city of Tustin. The parcel is bordered by city of Tustin industrial areas to the north; Parcel 22 to the east; Parcels 20, 22, and 40 to the south; and Parcel 40 to the west.

No AOC or UST was identified in Parcel 21. Two background groundwater monitoring wells, BMW04S and BMW04D, are located within the parcel boundaries. Access to the monitoring wells, used for quarterly water-level measurements, will be required after property transfer (Figure 8).

Three buildings (A, B, and C) are currently located within the boundaries of Parcel 21 (Figure 3). Buildings A and B, constructed in 1946, were formerly commanding officers' quarters and executive officers' quarters, respectively. They are approximately 2,800 and 2,200 square feet in area, respectively (Table 1). Building C, constructed in 1946, was used as VIP quarters and is approximately 972 square feet in area. Buildings A, B, and C are currently vacant and are planned for demolition after transfer.

It is anticipated that Parcel 21 will be transferred to become a new elementary school site (kindergarten through sixth grade).

2.3 Parcel 38

Parcel 38 (Figure 4) consists of about 9 acres in the southeastern corner of MCAS Tustin within the city of Irvine. The parcel is bordered to the east by Harvard Avenue, to the south by Parcel 39, and to the north and west by Parcel 37. Parcel 38 was historically used for agricultural purposes since at least 1939 (GeoRemediation 1992). In 1988, DON acquired land from The Irvine Company, which included the area that is now designated as Parcel 38 as well as a portion of Parcel 39, for development of a family housing project (JEG 1994). Since that time, the parcels have not been farmed, and pesticides and herbicides have not been applied to the property (BNI 2001). Development of these areas was not implemented because base closure was scheduled. In the interim, Osumi Farms periodically plowed the property to control the weeds (BNI 1997a).

With the exception of Building 3003T (Figure 4), a former guard shack located along the northern boundary, Parcel 38 is currently vacant land. Building 3003T, constructed in 1992, is approximately 25 square feet in area and is planned for demolition after transfer. No AOC or UST was identified in Parcel 38. Two groundwater monitoring wells (A000SB60D2 and A000SB61S) are located within Parcel 38. These wells were previously used in the MCAS Tustin groundwater monitoring program but are no longer part of the network. These wells have been recommended for decommissioning in the draft 2000 Annual Groundwater Monitoring Report. Decommissioning of these wells will be conducted prior to transfer.

It is anticipated that Parcel 38 will be transferred for use as a neighborhood park. The neighborhood park plans include facilities for childcare programs.

2.4 Parcel 39

Parcel 39 (Figure 4) consists of about 20 acres in the southern portion of MCAS Tustin within the city of Irvine. The parcel is bordered to the northeast by Parcel 38, to the northwest by Parcel 37, to the east by Harvard Avenue, to the south by Barranca Parkway, and to the west by Peters Canyon Channel. This parcel has historically been used for agricultural purposes since at least 1939 (GeoRemediation 1992). In 1988 and 1991, DON acquired land from The Irvine Company and the county of Orange,

respectively, that included the area that is now designated as Parcel 39 for development of a family housing project (JEG 1994). Since that time, the parcel has not been farmed, and pesticides and herbicides have not been applied to the property (BNI 2001). Development of the property was not implemented due to the scheduled base closure. In the interim, Osumi Farms periodically plowed the property to control the weeds (BNI 1997a).

No building/structure is located on Parcel 39. One AOC (AD-05) was located within the parcel boundaries (Figure 5). This AOC received regulatory concurrence for NFA (Table 2).

It is anticipated that Parcel 39 will be transferred to become a new elementary school site (kindergarten through eighth grade).

2.5 Parcel 40

The portions of Parcel 40 (circulation facilities) included in this FOST consist of about 1.0 acres and are located on the west side of Parcels 3 and 21 and on the east side of Redhill Drive (Figure 3). These portions of Parcel 40 are located in the northwestern corner of MCAS Tustin within the city of Tustin and are presently undeveloped grass-covered areas.

An AOC identified as MAW-03 is an active well and is contained within a corrugated metal shed (designated as Building 10E). Both the well and shed are owned by IRWD who have an easement (established in 1989) for access to the active well. The well was recommended (to the regulatory agencies) for removal from consideration as an AOC based on the past and current use of the site. The regulators concurred with the recommendation for removing the well from consideration as an AOC (Table 2). The IRWD easement and ownership of the active well and associated shed will remain in effect after the property has been transferred.

It is anticipated that these portions of Parcel 40 will be transferred for development/improvement of transportation/circulation facilities.

3.0 REGULATORY COORDINATION

The environmental restoration and compliance programs at MCAS Tustin have been defined and are being implemented pursuant to the following regulatory mechanisms:

- CERCLA, as amended by the Superfund Amendments and Reauthorization Act and the Community Environmental Response Facilitation Act
- Resource Conservation and Recovery Act (RCRA)
- National Environmental Policy Act (NEPA)
- California Environmental Quality Act (CEQA)
- Petroleum Corrective Action Program
- California Health and Safety Code

MCAS Tustin is not a Superfund site and is not listed on the National Priorities List. A Federal Facility Site Remediation Agreement (FFSRA) between DON and the California

Environmental Protection Agency Department of Toxic Substances Control (DTSC) was signed for MCAS Tustin on 18 August 1999. The FFSRA defines DON's corrective action and response action obligations under RCRA and CERCLA. Since 1993, the BRAC Cleanup Team (BCT) has coordinated cleanup and closure activities at MCAS Tustin. The BCT consists of representatives from DON, the United States Environmental Protection Agency (U.S. EPA), the Santa Ana Regional Water Quality Control Board, and DTSC. These agencies reviewed and commented on the required documents included in Attachment 1. DON is the lead federal agency regarding environmental restoration at MCAS Tustin, and DTSC is the lead regulatory agency providing oversight.

The BRAC Cleanup Plan (BCP) Guidebook (DoD 1996) provides the BCT with direction to classify base property into one of seven area types in order to facilitate and support reuse and transfer (Table 3). The area types are ranked in order of their suitability to transfer, with Area Types 1 through 4 being suitable for transfer by deed and Area Types 5 and 6 being defined as unsuitable for transfer by deed until all remedial actions have been completed or after the remedy has been demonstrated to be operating properly and successfully. Areas classified as Area Type 7 either are not evaluated or require further evaluation in order to classify them into one of the other area types.

4.0 NATIONAL ENVIRONMENTAL POLICY ACT COMPLIANCE

Potential environmental impacts pertaining to the disposal and reuse of MCAS Tustin were addressed in the final Environmental Impact Statement (EIS)/Environmental Impact Report (EIR) (DON 1999) and were disclosed to agencies and the public for comment and review in compliance with the requirements of NEPA and CEQA. The EIS/EIR was prepared through the joint effort of DON (EIS) and the city of Tustin (EIR). A NEPA Record of Decision (ROD) was prepared by DON to document the selected proposed alternative for reuse at each of the parcels discussed in the EIS/EIR. The NEPA ROD was published on 2 March 2001 (DON 2001b).

5.0 ENVIRONMENTAL FINDINGS

A Basewide EBS was prepared for MCAS Tustin to describe environmental investigation and closure activities at the base to support reuse (BNI 2001). The Basewide EBS summarizes environmental conditions at the facility and includes information concerning Installation Restoration Program (IRP) sites, AOCs, USTs, and aboveground storage tanks (ASTs). Information concerning polychlorinated biphenyls (PCBs), asbestos-containing material (ACM), and lead-based paint (LBP) surveys conducted at the facility is also included in the Basewide EBS. The BCT Business Plan (DON 2001a) provides updated information through 31 December 2000 and schedules for planned environmental activities at MCAS Tustin.

Two AOCs sites and one UST site were identified within the parcels to be transferred (Table 2). No ASTs were identified on the parcels to be transferred. Figures 5 and 6, respectively, show the locations of the AOCs sites and former UST site within the transfer parcels. AOC and UST site descriptions are provided in Table 2. IRP sites, AOCs, USTs, and ASTs on adjacent parcels were also evaluated in conjunction with this FOST, and it was concluded that contamination from adjacent parcels (e.g., groundwater plumes) does not affect the transfer parcels.

All of the AOCs and UST sites on the transfer parcels are designated as Area Type 1 (Table 2). All AOCs have received regulatory concurrence for NFA or were removed from the AOC list. The one UST has received concurrence for NFA from the RWQCB, the lead agency on UST site closures. Concurrence signature pages from the regulatory agencies for the AOCs and UST sites are included in Attachment 2.

Environmental factors considered for the five parcels in this FOST are listed in Table 4. Only those factors that require notification or restriction are discussed in this document.

6.0 USE RESTRICTIONS AND NOTIFICATIONS

The environmental documents listed in Attachment 1 (References) were evaluated to identify environmental factors that may warrant constraints on certain activities in order to assure that the intended use of the FOST parcels is consistent with protection of human health and the environment. In addition, environmental factors associated with parcels being transferred for ultimate use as a school site were considered. Factors that require notifications and/or restrictions are discussed below. Table 4 lists the environmental factors considered. Table 5 summarizes the notifications and restrictions for the parcels.

Attachment 3 contains comments from the regulators and other interested parties with corresponding Navy responses. The attachment contains a letter dated August 2, 2001 from DTSC regarding requirements for parcels intended for future school sites – The letter is enclosed as an unresolved comment per FOST policy in the DoD Base Reuse Implementation Manual. The Navy's response to the comment is also included.

6.1 Notification – Pesticides

Approximately 674 acres of MCAS Tustin are designated for agricultural use or are maintained for weed control, of which about 392 acres were farmed (BNI 2001). Farming was conducted within the base boundary prior to commissioning of the base in 1942 and has continued through December 2000. Parcels 38 and 39 were historically used for agricultural purposes before the property was acquired by DON in 1988 and 1991 for a planned family housing project (JEG 1994). Since that time, the parcels have not been farmed, and pesticides and herbicides have not been applied to the property by DON (BNI 2001). However, a Preliminary Endangerment Assessment (PEA) conducted for Parcels 38 and 39 (previously designated as Parcel C) indicated that pesticides and herbicides were likely used on the property for agricultural purposes by the previous landowners (GeoRemediation 1992), but the quantities and types of chemicals used on the area were unknown. Therefore, extensive sampling was conducted in the agricultural areas in 1992 to determine whether the concentrations of residual pesticides and metals in soils represent a threat to human health or the environment.

The PEA included soil and groundwater sampling in Parcels 38 and 39 and a health risk assessment for soil contaminants detected at concentrations exceeding screening values. These contaminants included the pesticides dichlorodiphenyltrichloroethane (DDT), dichlorodiphenyldichloroethene (DDE), and dichlorodiphenyldichloroethane (DDD). The risk assessment assumed residential land use and exposure to adults and children by soil ingestion, soil contact, and inhalation of soil particles. The risk assessment results indicated, on the basis of a residential-use scenario, that there was no significant environmental or human-health threat from the pesticides for these parcels (GeoRemediation 1992).

Additionally, groundwater sample results presented in the draft final Remedial Investigation (RI) Report for Operable Units 1 and 2 (BNI 1997b) did not indicate the presence of pesticides in groundwater beneath Parcels 38 and 39. While selenium was detected in groundwater during the RI at concentrations exceeding the PEA screening levels, an analysis of background metals in groundwater performed during the RI indicated that detected concentrations of selenium in groundwater were not the result of base operations.

Although pesticides were reportedly applied to transfer Parcels 38 and 39 prior to DON ownership in 1988 and 1991, the PEA sampling and risk assessment conducted in 1992 indicated that the property was suitable for unrestricted, residential use. DTSC provided concurrence on the findings in the PEA for the area containing Parcels 38 and 39 and the concurrence letter is provided in Attachment 2. Based on the conclusions from the PEA report and the RI, Parcels 38 and 39 do not require any restrictions for pesticides. At the time of transfer, DON will provide the transferee with copies of the PEA report and pertinent sections of the RI report.

6.2 Notification – Polychlorinated Biphenyls

An inventory of PCB items and equipment at MCAS Tustin was conducted in 1992 (Kennedy/Jenks Consultants 1992). Twenty-two items were identified as possibly containing PCB insulation fluid. With the exception of one item located off-base, these items were all replaced, or tested and found not to contain PCB fluids or insulation.

Fluorescent light fixtures were not included in the PCB items and equipment inventory. However, based on the date of construction, buildings in Parcel 21 could potentially contain light ballasts which may contain PCB. Fluorescent light ballasts manufactured before 1979 often contain PCB small capacitors that may be disposed of as municipal solid waste. No action is required at the buildings unless large quantities of PCB-containing fluorescent light ballasts are removed. According to DON guidance on disposal of fluorescent light ballasts containing PCBs (DON 1989), large quantities of PCB small capacitors generated from fluorescent light ballasts, such as when the fixtures in a large office or an entire building are replaced, should be disposed of as regulated PCB equipment.

Fluorescent light ballasts that contain PCBs have approximately 1.0 to 1.5 ounces of PCB fluid in each capacitor. For this given quantity, there would be approximately 3.1 to 4.7 pounds of PCB fluid for every 50 PCB small capacitors in fluorescent light ballasts. If the transferee plans to dispose fluorescent light ballasts containing more than 3 pounds of PCB fluid, the PCB small capacitors in those light ballasts should be processed as regulated items.

In 1996, a PCB transformer survey was conducted at MCAS Tustin (PWC 1996a). Per DON policy, transformers containing PCBs at concentrations exceeding 50 parts per million (ppm) were replaced. Transformers with PCB concentrations less than 50 ppm are classified by federal standards as non-PCB transformers. Three transformers are located within Parcel 3. One transformer was previously located on Parcel 21 and the survey results indicated PCBs at a concentration of 71 ppm. Since the PCB concentration in the transformer was above 50 ppm, the transformer was replaced (SWDIV 1998). The remaining transformers currently located within the boundaries of the transfer parcels

contain PCBs at maximum concentrations equal to or less than 2 ppm, and no additional action concerning transformers is required by DON before transfer.

6.3 Notification – Radon

DoD policy is to assure that any available and relevant radon assessment data pertaining to BRAC property being leased or transferred will be included in property lease/transfer documents. There is currently no federal requirement to perform any additional radon assessment or mitigation in federal buildings prior to transfer, including those to be transferred to the public or private sector (DoD 1994b).

A radon survey was conducted at a representative number of housing units and non-residential buildings at MCAS Tustin in 1991. The results indicated that none of the facilities or housing units contained levels of radon above 4 picocuries per liter (pCi/L). According to U.S. EPA guidance, radon at levels of 4 pCi/L or less are considered “low risk,” and no mitigation is required (Bufton 1991). Additional radon testing or mitigation, therefore, was not required.

6.4 Notifications and Restrictions – Asbestos-Containing Material

DoD policy with regard to asbestos-containing material (ACM) is to manage ACM in a manner protective of human health and the environment, and to comply with all applicable federal, state, and local laws and regulations governing ACM hazards. Therefore, unless it is determined by competent authority that the ACM in the property poses a threat to human health at the time of transfer, all property containing ACM will be conveyed, leased or otherwise disposed of as is through the BRAC process (DoD 1994b). ACM is considered to be a threat to human health if it is located within the interior of a building, and it is friable, accessible and damaged (FAD). A graphical representation of this policy and the decision-making process is presented as Figure 7.

Prior to property disposal, all available information on the existence, extent, and condition of ACM shall be incorporated into the Basewide EBS report or other appropriate document to be provided to the transferee. The survey report or document shall include:

- Reasonably available information on the type, location, and condition of asbestos in any building or improvement on the property;
- Any results of testing for asbestos;
- A description of any asbestos control measures taken for the property;
- Any available information on costs or time necessary to remove all or any portion of the remaining ACM; however, special studies or tests to obtain this material are not required; and
- Results of a site-specific FAD ACM survey performed to revalidate the condition of the ACM.

The DON is not required to conduct a FAD ACM survey when the building is scheduled for demolition, including situations where an interim use has been identified prior to demolition. Furthermore, a FAD ACM survey is not required if ACM has never been identified in the interior of a building during any previous asbestos survey, or if an

asbestos survey conducted after 1996 found no damaged ACM and there is no reason to suspect any damaged ACM is present. The 1996 date was established to be consistent with the Asbestos Hazard Emergency Response Act (AHERA), which calls for a re-inspection to assess the physical condition (i.e., good or damaged) of ACM at least once every three years. Since base closure occurred in 1999, any qualified inspection performed in 1997 or later meets the intent of these regulations.

Asbestos-containing material shall be remedied prior to property disposal only if it is of a type and condition that is not in compliance with applicable laws, regulations, and standards, or if it poses a threat to human health at the time of transfer of the property (i.e., FAD ACM). This remediation should be accomplished by the DON or by the transferee under a negotiated requirement of the property transfer. Use of such buildings must be restricted until abatement has been completed.

The remediation discussed above will not be required when the buildings are scheduled for demolition by the transferee; the transfer document prohibits occupation of the buildings prior to the demolition; and the transferee assumes responsibility for the management of any ACM in accordance with applicable laws. Buildings which are to be demolished may be occupied on an interim basis if the transferee conducts the necessary ACM surveys and abatement according to all local, state, and federal requirements.

The following summarizes notifications and restrictions due to ACM present in buildings located within the transfer parcels.

6.4.1 NOTIFICATIONS

Five ACM surveys conducted at MCAS Tustin included buildings in the transfer parcels, and the survey results were presented in reports dated December 1991, January 1996, and December 2000 (Ecology and Environment, Inc. 1991, PWC 1996b, BNI 2000, respectively). The December 2000 survey was limited to FAD ACM. Results from these surveys are summarized below and in Table 6. To assure full disclosure of all ACM on the FOST parcels, copies of the ACM survey reports will be included in the transfer documentation.

Buildings Planned for Demolition

Building A was built in 1946 and is located in Parcel 21. The 1996 asbestos survey reported only non-friable exterior ACM (roofing tar).

Building B was built in 1946 and is located in Parcel 21. The 1996 asbestos survey reported both non-friable ACM (floor tile) and friable ACM (pipe insulation). The friable ACM was reported to be in good condition.

Building C was built in 1946 and is located in Parcel 21. The 1991 and 1996 asbestos surveys reported both non-friable ACM (carpet mastic or backing, roofing, linoleum) and friable ACM (spray-on insulation). The friable ACM was reported to be in good condition.

Building 3003T was built in 1992 and is located in Parcel 38. Building 3003T has never been surveyed.

Buildings Planned for Reuse

Buildings 553, 554, and 557 were built in 1991 and are located in Parcel 3. These buildings had never been inspected for asbestos during the operational life of the base. Since these buildings were specified as being reused, the DON conducted a FAD ACM survey pursuant to DoD policy. The limited survey to identify FAD ACM was conducted in Buildings 553, 554, and 557 in October 2000 (BNI 2000). No FAD ACM was identified in any of the buildings.

6.4.2 RESTRICTIONS

Buildings B and C— Since the ACM surveys for Buildings B and C were conducted prior to 1997, the physical condition of the interior friable ACM as stated in the existing reports may no longer be accurate. Nevertheless, since the buildings are not designated for reuse, the DON is not obligated to conduct any additional surveys. In accordance with policy, these two buildings will be restricted from occupancy, and the transfer document will indicate that the transferee assumes responsibility for the management of ACM in accordance with applicable laws. These buildings may be occupied on an interim basis if the transferee conducts the necessary ACM surveys and abatement according to all local, state, and federal requirements.

Building 3003T — Since no ACM survey has ever been conducted on this building, this building will be restricted from occupancy, and the transfer document will indicate that the transferee assumes responsibility for the management of ACM in accordance with applicable laws. Since the building is not designated for reuse, the DON is not obligated to conduct an asbestos survey. This building may be occupied on an interim basis if the transferee conducts the necessary ACM surveys and abatement according to all local, state, and federal requirements.

Buildings A — Since no interior ACM was observed in Building A and the building is not designated for reuse, this building may be transferred without restrictions for occupancy due to ACM. However, the transferee must still assume responsibility for the management of ACM, if any.

Buildings 553, 554 and 557 — Since no FAD ACM was found in Buildings 553, 554 and 557, these buildings may be transferred without restrictions for occupancy due to ACM. However, the transferee must still assume responsibility for the management of ACM, if any.

6.5 Notifications and Restrictions – Lead-Based Paint

The following text provides information on lead-based paint (LBP) evaluations for these parcels including the requirements for surveys, notification of survey results, and restrictions based on identified or potential LBP hazards prior to transfer of property.

Residential Buildings

DoD policy for residential buildings is contained in the joint U.S. EPA/DoD interim final Lead-Based Paint Guidelines for Disposal of Department of Defense Residential Real Property (DoD 1999). The requirements in this document are principally from Title X, the Residential Lead-Based Paint Hazard Reduction Act, which includes the implementing regulations under TSCA Section 403 and HUD Section 1012/1013. Title

buildings where surveys were not conducted will be based solely on the age of construction (i.e., constructed before 1978).

6.5.1 NOTIFICATIONS

Two separate LBP surveys were conducted at MCAS Tustin within the parcels to be transferred, and the survey results are presented in reports dated January 1996 and February 2001 (PWC 1996 and CDM 2001, respectively). The 1996 survey consisted of an evaluation of lead-based paint, dust, and soil hazards at Buildings A and B in Parcel 21. The sampling activities for the 2001 LBP survey report were conducted in August 2000 and consisted of sampling for potential soil-lead hazards at Buildings A, B, and C in Parcel 21. Results of these surveys are summarized below and in Table 7. Non-residential buildings within the parcels of the FOST have not been surveyed. To assure full disclosure of identified LBP hazards within the parcels, copies of the LBP survey reports will be part of the transfer documents.

Residential Buildings

Building A was built in 1946, is located in Parcel 21, and is scheduled for demolition after transfer. The 1996 LBP survey report results indicate that there are LBP hazards at several locations within and on the exterior of the building. The survey conducted in August 2000 had a lead-in-soil result at the dripline (along the perimeter of the house) above 200 ppm. Consequently, the Navy conducted a hazard analysis using DTSC's Lead Spread 7.0 model using the survey results. Based on the results of the hazard analysis, no further action is required for soil under the condition that restrictions be placed on the property (CDM 2001).

Building B was built in 1946, is located in Parcel 21, and is scheduled for demolition after transfer. The 1996 LBP survey report identified lead based paint hazards at several locations within and on the exterior of the building. The lead-in-soil result from the 2000 LBP survey at the dripline was less than 100 ppm. For the 2001 LBP survey report, the Navy conducted a hazard analysis using DTSC's Lead Spread 7.0 model using the survey results. Based on the results of the hazard analysis no further action is required for soil under the condition that restrictions be placed on the property (CDM 2001).

Building C was built in 1946, is located in Parcel 21, and is scheduled for demolition after transfer. The only survey conducted was the 2000 LBP survey. The lead-soil result from the 2000 LBP survey at the dripline was less than 100 ppm. For the 2001 LBP survey report, the Navy conducted a hazard analysis using DTSC's Lead Spread 7.0 model using the survey results. Based on the results of the hazard analysis, no further action is required for soil under the condition that restrictions be placed on the property (CDM 2001).

Non-Residential Buildings

Building 553 was built in 1991, is located in Parcel 3, and is scheduled for reuse. Based on the age of construction, it is unlikely that LBP was used at this building.

Building 554 was built in 1991, is located in Parcel 3, and is scheduled for reuse. Based on the age of construction, it is unlikely that LBP was used at this building.

6.7 Covenant – Additional Remedial Action

The deed for transfer will include a covenant of the United States, made pursuant to CERCLA Section 120(h)(3)(A)(ii)(II), warranting that any remedial action found to be necessary after the date of transfer as a result of former activities of the United States within these parcels shall be conducted by the United States. This covenant will not apply to any remedial action required on the property that is a result of an act or omission of the transferee that causes a new release of hazardous substances.

6.8 Right of Access

The deed shall reserve and the transferee shall grant to the United States an appropriate right of access to the FOST parcels, pursuant to CERCLA Section 120(h)(3)(A)(iii), to enable the United States and others to enter said parcels in any case in which remedial action or corrective action is found to be necessary on said parcels or adjacent property after the date of property transfer.

Access to background groundwater monitoring wells BMW04S and BMW04D (Parcel 21), used for quarterly water-level measurements, will also be required after property transfer (Figure 8). A summary of the monitoring activities is included in Table 8. Additionally, ownership and the existing easement for the active well (MAW-3) and associated shed located partially in Parcel 3 and partially in Parcel 40 will be maintained by IRWD after transfer to allow for continued operation and maintenance of this well.

7.0 FINDING OF SUITABILITY

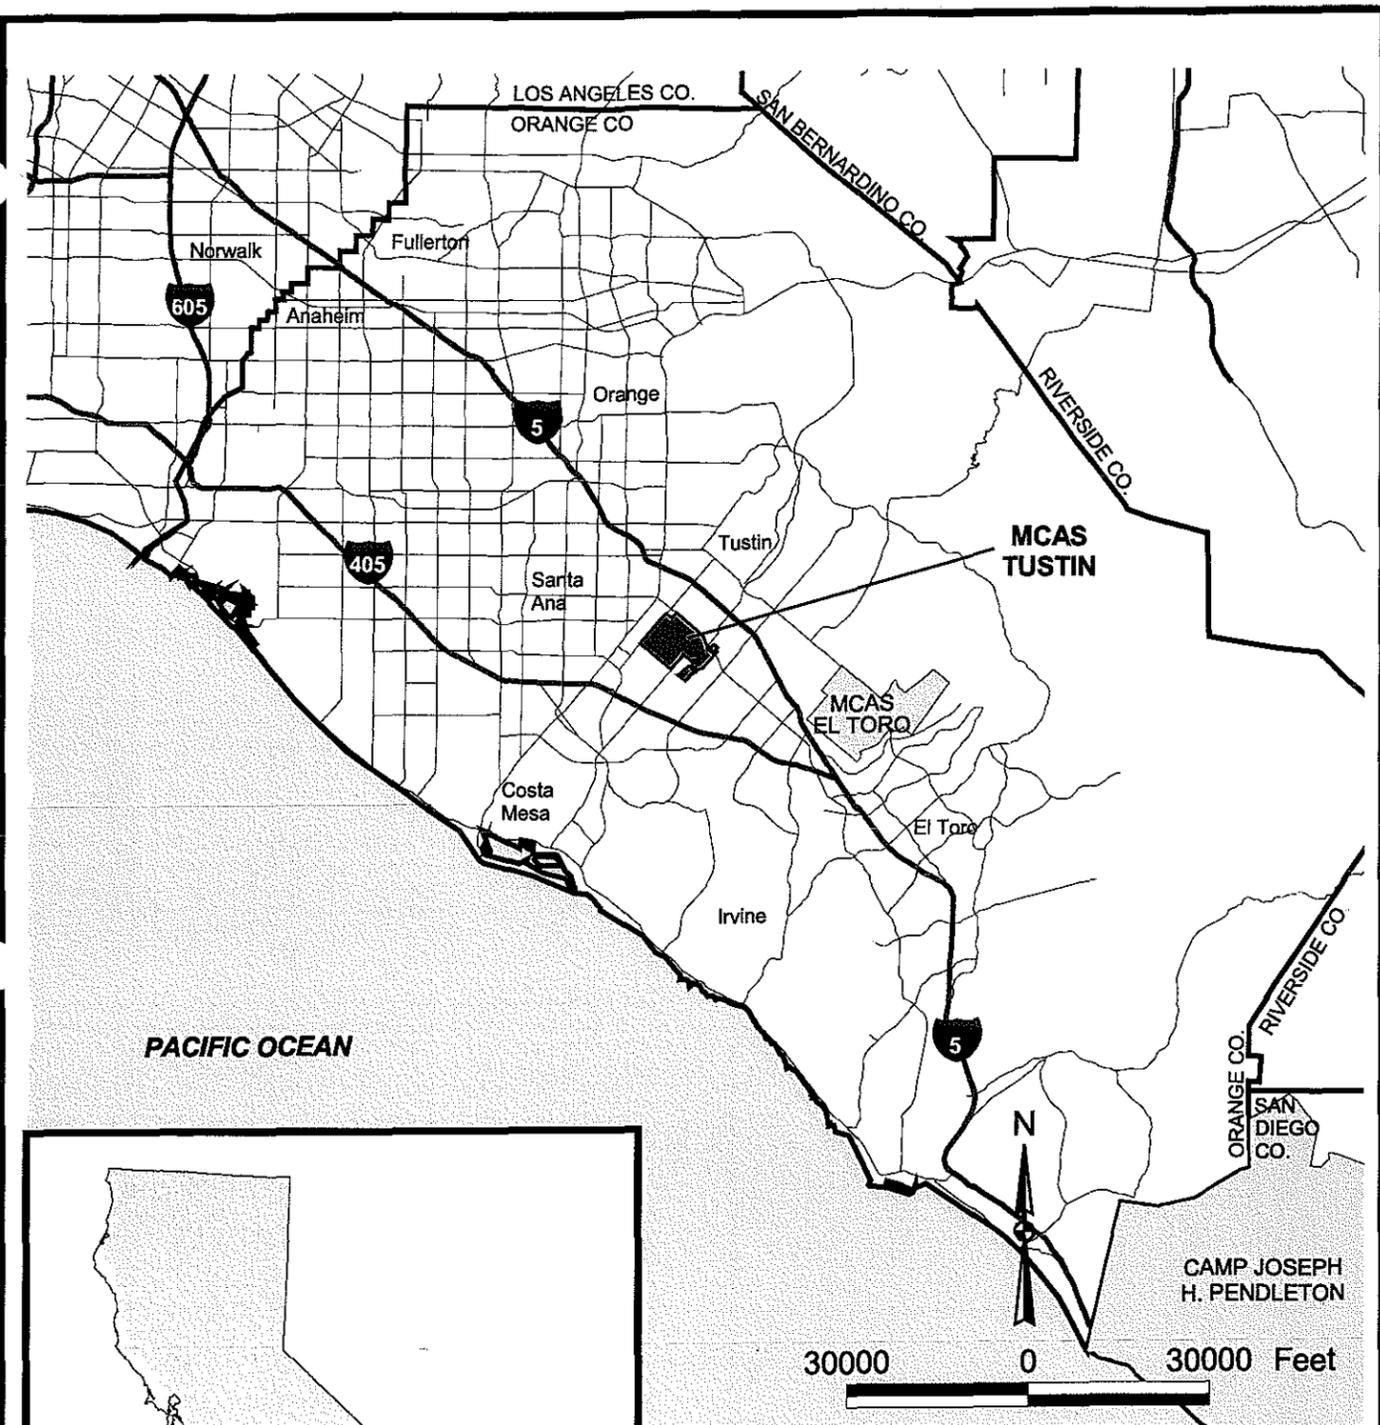

Pursuant to CERCLA Section 120(h)(3)(A)(i) and provisions of 40 *Code of Federal Regulations* Part 373, the deed will contain a notice of hazardous substances stored, released, or disposed within the transfer parcels at MCAS Tustin. Since there has been no reported storage, release, or disposal of hazardous substances at Parcels 21, 38, 39, and portions of 40, there will be no Part 373 notification for these parcels. The notice for the hazardous substance stored at Parcel 3 is provided in Attachment 4. No known releases have occurred within any of the transfer parcels.

On the basis of the foregoing information and analysis, I have concluded that the requirements of CERCLA Section 120(h)(3) have been met, and I find that Parcels 3, 21, 38, 39, and portions of 40 are suitable for transfer by deed for the purposes intended, subject to the notifications and restrictions set forth in Section 6.0. The parcels can be used with acceptable risk to human health and the environment and without interference with the environmental restoration process.

**FIGURE 7
DECISION TREE FOR ASBESTOS-CONTAINING MATERIAL SURVEYS**

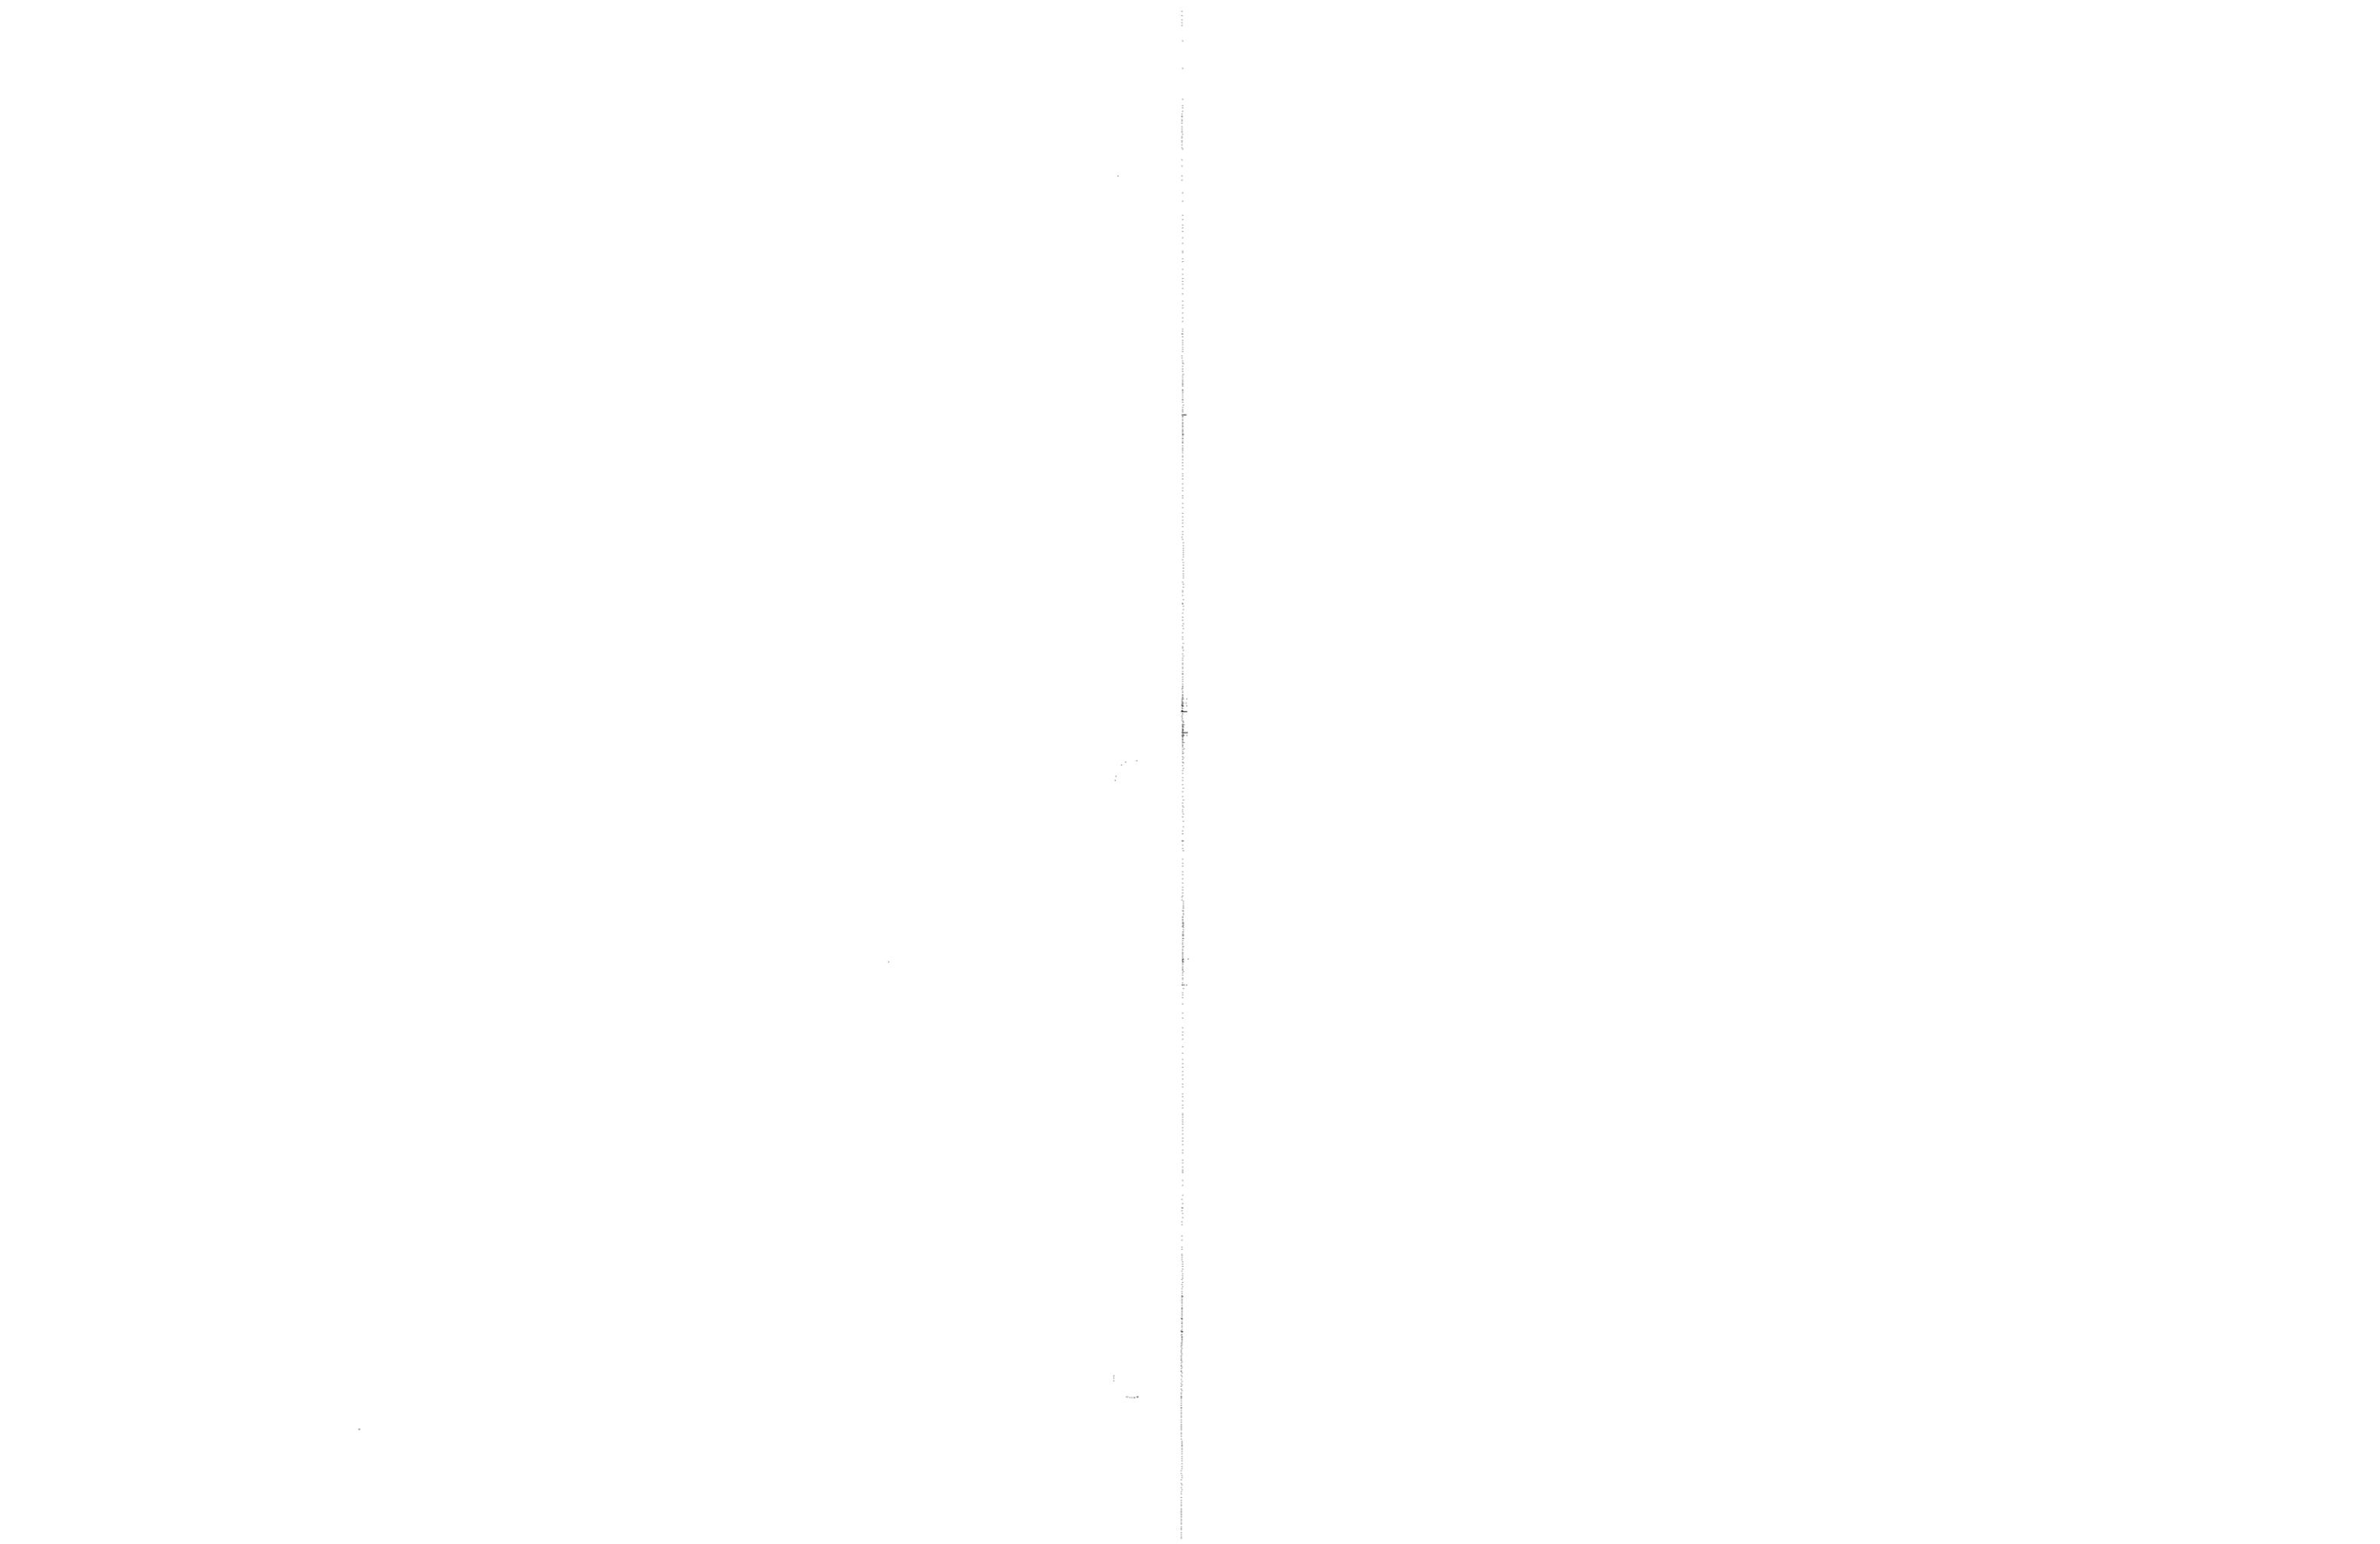

DOD POLICY ON ASBESTOS AT BRAC PROPERTIES

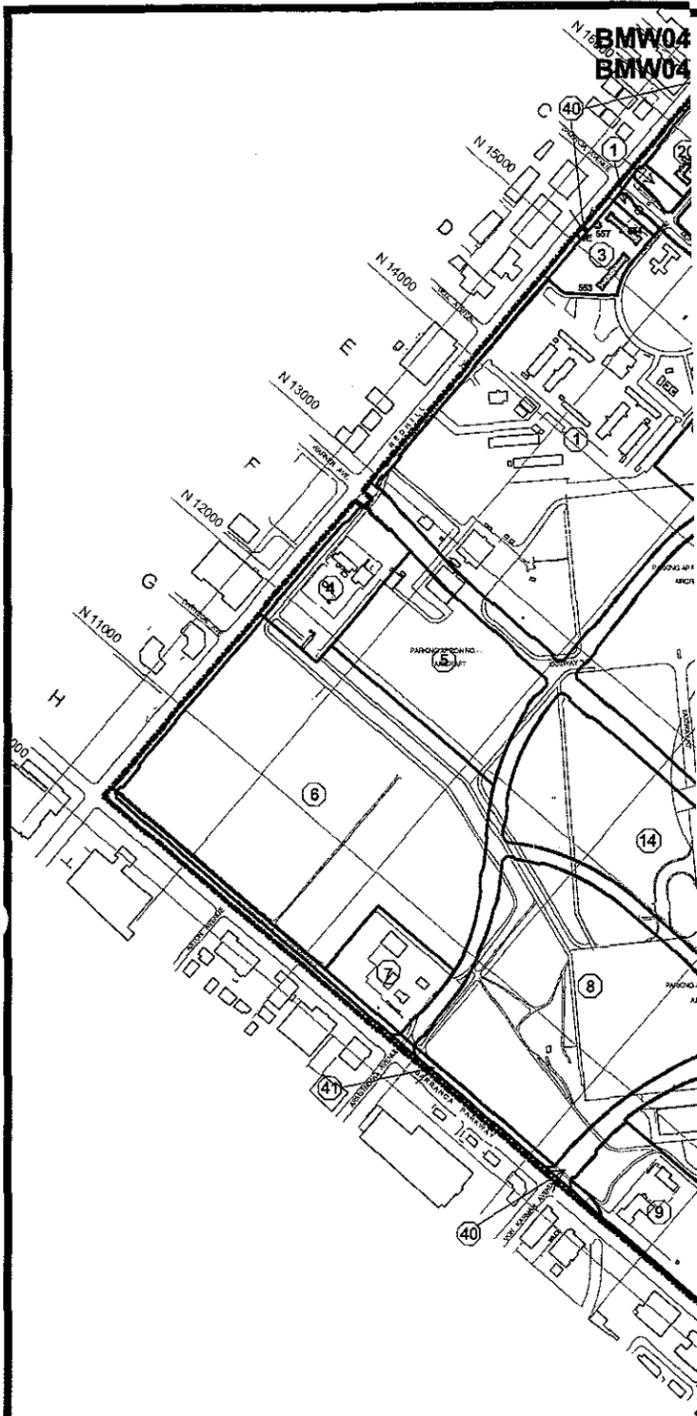

Prior to property disposal, all available information on the existence, extent and condition of ACM shall be provided to the transferee in an EBS report or other appropriate document. All property containing ACM will be conveyed, leased or otherwise disposed of as is through the BRAC process, unless it is determined by competent authority that the ACM in the property poses a threat to human health at the time of transfer. This flow chart summarizes the steps necessary to comply with the DOD policy on asbestos at BRAC properties.

- Per DOD Policy, the information to be provided to the transferee includes:
1. Reasonably available information on the type, location, and condition of asbestos in any building or improvement on the property.
 2. Any results of testing for asbestos.
 3. A description of any asbestos control measures taken for the property.
 4. Any available information on costs or time necessary to remove all or any portion of the remaining ACM.
 5. Results of a site-specific FAD ACM survey performed to revalidate the condition of the ACM.

* Unless existing surveys indicate that there is no ACM which poses a threat to human health, the transfer document must prohibit occupation of the buildings prior to the demolition, and the transferee must assume responsibility for the management of any ACM in accordance with applicable laws.

^b condition of building as specified in the Reuse Plan (City of Tustin 1998)

Acronyms/Abbreviations:

sq. ft. – square feet

**Table 2
AOCs/Former USTs Located Within the Transfer Parcels^a**

AOC/UST	Location	Description	Status	ECP Area Type^b
AD-05	Parcel 39	This unit was identified as a likely disposal site in an aerial photo dated 30 May 1966. Prior to 1965, the area was used for agriculture. An aerial photo dated 20 September 1965 indicates that the area was rough-graded and no longer used for agriculture. Available aerial photos from successive years indicate that the possible trench was filled (photograph dated 01 March 1967). This area is the same as the northwest third of Parcel C3 of Housing Project H-115 for which a PEA, including soil sampling and risk assessment, was performed.	RCRA AOC. NFA concurrence (letter received 20 March 1996)	1
MAW-3 (Well No. 2)	Parcels 3 and 40	Well was misidentified as an AOC. IRWD owns the well and has an existing easement for the well. The well has been removed from the AOCs list.	Removal from AOC list accepted on 12 July 2001	1
USI-10A	Parcel 3	This was removed prior to 1991. Excavation and backfill of concrete electrical vault was completed. There was no contamination detected.	December 1996 closure report; NFA approval, Santa Ana RWQCB, 27 January 1997	1

Notes:

- ^a there are no AOCs within Parcels 21 or 38
- ^b see Table 3 for definitions of ECP area types

Acronyms/Abbreviations:

- AOC – area of concern
- ECP – environmental condition of property
- IRWD – Irvine Ranch Water District
- NFA – no further action
- PEA – preliminary endangerment assessment
- RCRA – Resource Conservation and Recovery Act
- RWQCB – (California) Regional Water Quality Control Board
- UST – underground storage tank

**Table 3
Department of Defense
Environmental Condition of Property Area Types***

Area Type	Description
1	Areas where no release or disposal of hazardous substances or petroleum products has occurred (including no migration of these substances from adjacent areas)
2	Areas where only release or disposal of petroleum products has occurred
3	Areas where release of hazardous substances has occurred but at concentrations that do not require a removal or remedial action
4	Areas where release, disposal, and/or migration of hazardous substances has occurred, and all remedial actions necessary to protect human health and the environment have been taken
5	Areas where release, disposal, and/or migration of hazardous substances has occurred, and removal or remedial actions are underway, but all required remedial actions have not yet been taken
6	Areas where release, disposal, and/or migration of hazardous substances has occurred, but required response actions have not yet been implemented
7	Areas that have not been evaluated or require additional evaluation

Note:

* according to the Department of Defense BRAC Cleanup Plan Guidebook (DoD 1996), properties classified as Area Types 1 through 4 may be considered suitable for transfer, and properties classified as Area Types 5 through 7 are considered unsuitable for transfer

Acronyms/Abbreviations:

BRAC -- base realignment and closure
DoD -- Department of Defense

**Table 4
Environmental Factors Considered
Parcels 3, 21, 38, 39, and Portions of 40**

Environmental Factors May Pose Restrictions or Require Notification?		Environmental Factors Considered
No	Yes	
X		Hazardous substances (notification)
X		Areas of concern
X		Medical/biohazardous wastes
X		Oil/water separators
X		Monitoring wells

	X	Lead-based paint
	X	Polychlorinated biphenyls
	X	Radon
X		Air conformity/air permits
X		Coastal zones
X		Energy (utilities)
X		Flood plains
X		Groundwater use/subsurface excavation
X		Hazardous waste management (by lessee)
X		Historic property (archeological/Native American, paleontological)
X		Occupational Safety and Health Administration
X		Outdoor air quality
X		Prime/unique farmlands
X		Sanitary sewer systems (wastewater)
X		Sensitive habitat
X		Septic tanks (wastewater)
X		Solid waste
X		Threatened and endangered species
X		Transportation
X		Wetlands

Acronyms/Abbreviations:

AST – aboveground storage tank
UST – underground storage tank

Table 5
Notifications and Restrictions Summary

Parcel No.	Environmental Factor	Notification/Restriction
ALL	Access	Pursuant to CERCLA Section 120(h)(3)(A)(iii), the deed shall reserve and the transferee shall grant to the United States an appropriate right of access to enable the United States and others to enter Parcels 3, 21, 38, 39, and portions of 40 in any case which remedial action or corrective action is found to be necessary on the parcels or adjacent property after the date of property transfer.
ALL	ACM/LBP	Buildings restricted based on ACM FAD and LBP hazards may be occupied on an interim basis if the transferee conducts the necessary ACM and LBP surveys and abatement according to all local, state, and federal requirements.
ALL	Radon	Radon testing was conducted in 1991 at a representative number of housing units and non-residential buildings. No radon readings were measured above the U.S. EPA guidance level of 4 pCi/L.
3	ACM	Copies of the ACM survey reports and the Basewide EBS will be included in the transfer documentation.
3	ACM	Buildings 553, 554, and 557 will require the transferee to assume responsibility for the management of ACM, if any.
3	Wells	IRWD owns an active well and associated shed (Building 10E) as well as an existing easement for this well. The ownership of the well, associated shed, and the existing easement for the active well will be maintained by IRWD after transfer for the continued operation and maintenance of the well.
21	ACM	Copies of the ACM survey reports and the Basewide EBS will be included in the transfer documentation.
21	ACM	Buildings B and C restricted from occupancy based on ACM FAD and the transfer document will indicate that the transferee assumes responsibility for the management of ACM in accordance with applicable law.
21	ACM	Building A will require the transferee to assume responsibility for the management of ACM, if any.
21	LBP	Copies of the LBP survey reports and the Basewide EBS will be included in the transfer documentation.
21	LBP	Buildings A, B, and C are restricted from reuse prior to demolition due to identified or suspected LBP hazards. The transferee will be responsible for conducting post-demolition sampling of the soil and conduct any required abatement prior to occupancy of any newly constructed buildings.
21	PCBs	Fluorescent light fixtures that may contain small amounts of PCBs may be in buildings on this parcel. If the transferee plans to dispose of fluorescent light ballast containing more than 3 pounds of PCB fluid, the PCB small capacitors in those light ballasts should be processed as regulated items.
21	School Sites	Should the subject parcel be considered for the proposed acquisition and/or construction of school properties utilizing state funding, a separate environmental review process in compliance with the CEC section 17210 et.seq. will need to be conducted and approved by the Department of Toxic Substances Control (School Property Evaluation and Cleanup Division).

Table 5
Notifications and Restrictions Summary

Parcel No.	Environmental Factor	Notification/Restriction
38	ACM	Building 3003T is restricted from occupancy and the deed will indicate that the transferee assumes responsibility for the management of ACM in accordance with applicable laws.
38	Pesticides	Copies of PEA Report and pertinent sections of RI report to be included in transfer documentation.
39	Pesticides	Copies of PEA Report and pertinent sections of RI report to be included in transfer documentation.
39	School Sites	Should the subject parcel be considered for the proposed acquisition and/or construction of school properties utilizing state funding, a separate environmental review process in compliance with the CEC section 17210 et.seq. will need to be conducted and approved by the Department of Toxic Substances Control (School Property Evaluation and Cleanup Division).
40	Wells	IRWD owns an active well and associated shed (Building 10E) as well as an existing easement for this well. The ownership of the well, associated shed, and the existing easement for the active well will be maintained by IRWD after transfer for the continued operation and maintenance of the well.

Acronyms/Abbreviations:

- ACM – asbestos-containing material
- CEC – California education Code
- CERCLA – Comprehensive Environmental Response, Compensation, and Liability Act
- EBS – environmental baseline survey
- FAD – friable, accessible, and damaged
- IRWD – Irvine Ranch Water District
- LBP – lead-based paint
- PCBs – polychlorinated biphenyl
- PEA – preliminary endangerment assessment
- pCi/L – picocuries per liter
- RI – remedial investigation
- U.S. EPA – United States Environmental Protection Agency

Table 6
Results of ACM Surveys – Parcels 3, 21, 38, 39, and Portions of 40

Building	Parcel	Ultimate Disposition	Year Built	Asbestos Survey Performed?	Survey Report Date ^a	ACM Found?	Location	Type/ Friable Condition ^b

ASTM E 1527-13 USER QUESTIONNAIRE

E 1527 – 21
USER QUESTIONNAIRE

Centurion Plaza
15621, 15641 and 15661 Red Hill Avenue,
Tustin, California 92780

INTRODUCTION

To qualify for one of the *Landowner Liability Protections (LLPs)*²⁴⁷ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”),²⁴⁸ the *user* must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

(1.) Environmental liens that are filed or recorded against the subject property (40 § CFR 312.25).

Did a search of *land title records* (or judicial records where appropriate, see Note 1 below) identify any *environmental liens* filed or recorded against the *subject property* under federal, tribal, state, or local law?

Response: _____ *NO* _____

NOTE 1 – In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that *environmental liens* and *AULs* be filed in judicial records rather than in *land title records*. In such cases judicial records shall be searched for *environmental liens* and *AULs*.

(2.) Activity and use limitations that are in place on the subject property or that have been filed or recorded against the subject property.

Did a search of *land title records* (or judicial records where appropriate, see Note 1 above) identify any *AULs*, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *subject property* and/or have been filed or recorded against the *subject property* under federal, tribal, state or local law?

Response: _____ *No* _____

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 C.F.R. § 312.28).

Do you have any specialized knowledge or experience related to the *subject property* or nearby *properties*? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Response: _____ No _____

(4.) Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated (40 C.F.R. § 312.29).

Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property*?

Response: _____ No _____

(5.) Commonly known or *reasonably ascertainable* information about the *subject property* (40 C.F.R. § 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of *releases* or threatened *releases*? For example,

(a.) Do you know the past uses of the *subject property*?

Response: _____ No _____

(b.) Do you know of specific chemicals that are present or once were present at the *subject property*?

Response: _____ No _____

(c.) Do you know of spills or other chemical *releases* that have taken place at the *subject property*?

Response: _____ No _____

(d.) Do you know of any environmental cleanups that have taken place at the *subject property*?

Response: _____ No _____

(6.) The degree of obviousness of the presence or likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the *subject property*, are there any *obvious* indicators that point to the presence or likely presence of *releases* at the *subject property*?

Response: _____ No _____
