Subject: Biological Resources Due Diligence Report for the Hermosillo Park Rehabilitation, Stormwater Capture and Infiltration Project, Norwalk, Los Angeles County, California

Dear Mr. Chen:

Rincon Consultants, Inc. (Rincon) prepared this Biological Resources Due Diligence Report to provide the City of Norwalk with information on the potential impacts to biological resources associated with implementation of the Hermosillo Park Rehabilitation, Stormwater Capture, and Infiltration Project (project). The biological evaluation herein includes the results of a background literature review and site reconnaissance survey conducted by Rincon.

Project Location and Description

The project is located at 11959 162nd street in the City of Norwalk (City), Los Angeles County, California (Figure 1). The project includes the upgrade and improvement of facilities at Hermosillo Park. The project includes construction of a 11.8-acre-foot capacity stormwater capture, reuse, and infiltration system under the existing park area. Storm water flows will be intercepted, treated, and infiltrated. Following construction of the stormwater capture and infiltration system, upgrades and improvements to Hermosillo Park will include, but are not limited to, replacement and construction of a community center, refurbishment of active and passive play areas/fields/courts, and picnic areas. Also included is refurbishment or construction of accessory structures, such as restrooms, fitness stations, parking lot improvements, upgrades in lighting, and water efficient landscape and irrigation. The project also includes community visioning, engagement, and surveys for the proposed improvements.

Methodology

A literature review and field survey were conducted to document the current site conditions and determine the potential for special status species to be present. The study area encompassed the entirety of Hermosillo Park (0.56 acre) as shown in Figure 2.

Literature Review

A literature review was conducted to establish the environmental and regulatory setting of the proposed project. Specific literature reviewed for the subject analysis is provided in the references section. The reviewed literature also included the United States Department of Agriculture (USDA) Soil Survey (USDA 2023), and literature detailing the habitat requirements of subject species. Aerial photographs, topographic maps, and soil survey maps were also examined.

Queries of the United States Fish and Wildlife Service (USFWS) Environmental Conservation Online System (ECOS): Information, Planning and Conservation System (IPaC) (USFWS 2023a), USFWS Critical Habitat Portal (USFWS 2023b), USFWS National Wetland Inventory (NWI) (USFWS 2023c), California Department of Fish and Wildlife (CDFW) California Natural Diversity Database (CNDDB) (CDFW 2023a), CDFW Biogeographic Information and Observation System (BIOS) (CDFW 2023b), and California Native Plant Society (CNPS) *Online Inventory of Rare, Threatened and Endangered Plants of California* (CNPS 2020), were conducted. The queries were conducted to obtain comprehensive information regarding state and federally listed species, sensitive communities and federally designated Critical Habitat known to or considered to have potential to occur within the vicinity of the project site.

Field Survey

The field reconnaissance survey was limited to assessing the vegetation and overall conditions of the project site for potentially supporting sensitive biological resources, including special-status plant and wildlife species, sensitive plant communities, jurisdictional waters and wetlands, protected trees, and habitat for nesting birds. Rincon Biologist, Katy Teare, conducted the field reconnaissance survey on November 8, 2023, from 0800 to 1115. The survey was performed by walking the study area to characterize the existing biological resources present (e.g., vegetation communities, potential presence of sensitive species and/or habitats, and presence of potentially jurisdictional waters). Inspection of the study area and vicinity was also conducted using binoculars (10 x 40). Weather conditions during the survey included temperatures between 62- and 73-degrees Fahrenheit, with winds between 2 and 3 miles per hour and clear skies. Representative photographs of the site were also taken (Attachment 2).

Survey Results and Analysis

The existing Hermosillo Park is surrounded by a heavily developed urban residential neighborhood. The park consists of paved walking paths, ornamental landscaping, sport recreational fields, picnic table stations, playground equipment, a concrete amphitheater, and a community center. The land cover is actively maintained for ornamental purposes and does not contain naturally occurring vegetation. Ornamental landscaping consists of a variety of drought-tolerant trees and shrubs, including London plane tree (*Platanus × acerifolia*), southern live oak (*Quercus virginiana*), pink shower (*Cassia javanica*), creeping fig (*Ficus pumila*), and Bradford pear (*Pyrus calleryana*),

The study area contains a small variety of mature ornamental trees that provides suitable habitat for wildlife species that commonly occur in developed areas. The wildlife species detected on site during field surveys are common, widely distributed, and adapted to living in proximity to human development. Common avian species detected on or adjacent to the site include American crow (*Corvus brachyrhyncos*), black phoebe (*Sayornis nigricans*), and house finch (*Haemorhous mexicanus*), lesser goldfinch (*Spinus psaltria*), house sparrow (*Passer domesticus*), yellow-rumped warbler (*Setophaga coronata*), and turkey vulture (*Cathartes aura*). Other wildlife species observed included fox squirrel (*Sciurus niger*).

Six special status plant species and 17 special status wildlife species were listed in the CNDDB to occur within a nine-quadrangle search area (i.e., USGS 7.5-minute quadrangles). Based on the developed conditions onsite, no special status plant and wildlife species are expected to occur. Special status plant species have specialized habitat requirements, including plant community types, soils, and other components absent from the study area. Special status wildlife species typically have specific habitat requirements that include vegetation communities, elevations, topography, and

availability of primary constituent elements (i.e., space for individual and population growth, breeding, foraging, and shelter). These habitat requirements do not occur within the study area. Accordingly, special-status plant and animal species are not expected to occur within or immediately adjacent to the study area.

The study area contains suitable nesting habitat for numerous native bird species, which could nest in trees and shrubs during the nesting season (generally February 1 through August 31). Native bird species are protected pursuant to the California Fish and Game Code and federal Migratory Bird Treaty Act (MBTA). Given the presence of shrubs and trees on and adjacent to the project site, it is probable nesting birds will be present during the nesting season. Project construction during the nesting season could impact nesting birds. The November 8, 2023, survey was not conducted within the usual breeding and nesting season for resident and migratory birds. No active nests or birds exhibiting breeding behavior (e.g., courtship displays, copulation, vegetation or food carries, presence of fledglings, or territorial displays) were observed within the study area.

Potentially jurisdictional surface waters and wetlands were not observed within the study area; however, an underground storm water drainage system bisects the study area and transmits municipal storm water flows from north to south. Stormwater discharges are regulated under the Municipal Separate Storm Sewer System Permit (MS4), which is outside the scope of this analysis.

As the City does not have a tree protection ordinance, there are no locally protected trees within the study area.

Hermosillo Park is surrounded by urbanization. The study area is not located within or near a wildlife movement corridor and there are no local, regional, or state habitat conservation plan areas in the vicinity.

Recommended Avoidance and Minimization Measures

The proposed project has potential to result in impacts to nesting birds if construction occurs while they are present within or adjacent to the Hermosillo Park, through direct mortality or abandonment of nests. The loss of a nest due to construction activities would be a violation of the MBTA and CFGC Section 3503. The following Avoidance and Minimization Measure is recommended for compliance with the MBTA and CFGC 3503.

If project activities must begin during the breeding season (February 1 – August 31), then a pre-construction nesting bird survey should be conducted no more than seven days prior to initiation of ground disturbance and sediment removal activities. The nesting bird pre-construction survey should be conducted on foot inside the project site, including a 100-foot buffer (300-foot for raptors), and in inaccessible areas (e.g., private lands) from afar using binoculars to the extent practical. The survey should be conducted by a biologist familiar with the identification of avian species known to occur in southern California communities. If nests are found, an avoidance buffer (dependent upon the species, the proposed work activity, and existing disturbances associated with land uses outside of the site) should be determined and demarcated by the biologist with bright orange construction fencing, flagging, construction lathe, or other means to mark the boundary. All construction personnel should be notified as to the existence of the buffer zone and to avoid entering the buffer zone during the nesting season. No ground-disturbing or vegetation removal activities should occur inside this buffer until the avian biologist has confirmed that breeding/ nesting is completed, and the young have fledged the nest. Encroachment into the buffer should occur only at the discretion of the qualified biologist.

Rincon appreciates the opportunity to support the City of Norwalk in the Hermosillo Park Rehabilitation, Stormwater Capture, and Infiltration Project. Please do not hesitate in reaching out to the undersigned with questions related to the contents herein.

Sincerely,
Rincon Consultants, Inc.

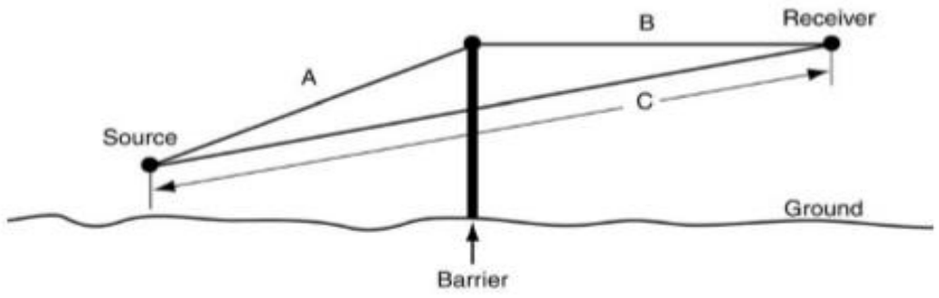
$Source_{elev}$	5.0	A_{horiz}	24.0	A	25.0
$Receiver_{elev}$	10.0	B_{horiz}	38.0	B	38.1
C	62.2	C_{horiz}	62.0		
P	0.85				
$Barrier_{elev}$	12				
Abarr	12.3				

The above calculations, refering to inputs from the figure at right, helps a user estimate what barrier attenuation (Abarr) to expect (i.e., up to 15 per formula to right) based upon source height (above grade), barrier height, and receiver height, and the horizontal distances between the source and receiver to the barrier. The FTA-based formula in the grid_barr_IL_X worksheets use these path length (P) and Abarr values to determine the barrier's insertion loss for each barrier element with respect to the ID'd source-to-receptor path it occludes.

Barrier Parameter P

P= A+B-C



For all other barriers, and for protrusion of terrain above the line of sight:	$A_{barrier} = \min\left\{15 or \left[20 \times \log\left(\frac{2.51\sqrt{P}}{\tanh\left[4.46\sqrt{P}\right]}\right) + 5\right]\right\}$
Barrier Insertion Loss	$IL_{barrier} = \max\left\{0 or \left[A_{barrier} - 10(G_{NB} - G_B)\log\left(\frac{D}{50}\right)\right]\right\}$

D = closest distance between the receiver and the source, in feet
P = path length difference, in feet (see figure below)
G_{NB} = Ground factor G computed *without barrier* (see Figure 6-5)
G_B = Ground factor G computed *with barrier* (see Figure 6-5)

† The term "tanh(variable)" stands for hyperbolic tangent, available on many scientific calculators. If "tanh" is not available, then compute E = exp(variable), and set tanh(variable) = (E - 1/E) / (E + 1/E), where exp(variable) is the "exponential" function, also written as e^x on calculator keypads.

Sources: Transit Noise & Vibration Impact Assessment (FTA 2006)

05/09/21, MCS: This model now considers effect of up to two barriers ("nearest" and "farthest" w.r.t. the receiver) so that "B" is still distance between Receiver and the nearest barrier, while "A" may be distance from Source to top edge of the farthest barrier. In such a situation, the path length difference calculation will include the horizontal distance between the two barriers. If it's a single barrier, this difference equals zero. If there are more than two intervening barriers, only the nearest and farthest will be considered. Hence, good practice should avoid more than two barriers, especially if "middle" barriers are much taller than the nearest or farthest.

Re: ***Formal Assembly Bill 52 Notification for the Hermosillo Park Stormwater Capture and Park Rehabilitation Project, City of Norwalk, California***

Dear Mr. Salas

Pursuant to California Assembly Bill (AB) 52, the City of Norwalk (City), as Lead Agency pursuant to the California Environmental Quality Act, is providing you with formal notification of the Hermosillo Park Stormwater Capture and Park Rehabilitation Project (proposed Project), located in the City of Norwalk, in Los Angeles County, California. The City is reaching out to all groups listed on the California Native American Heritage Commission (NAHC) Sacred Lands File (SLF) Contact List in a good faith effort to provide notification of the proposed Project to groups that are traditionally or culturally affiliated with the geographic area. This correspondence is intended as formal notification of the proposed Project pursuant to AB 52.

The present notice includes:

- A description of the proposed Project and location;
- Project Location figure;
- A summary of cultural resources work to date, and summary of associated information that can be made available upon request;
- A clear and definitive statement that the tribe has 30 days to request consultation; and
- The lead agency contact information.

Project Location and Description

The proposed Project is located in the southern portion of the City of Norwalk, at 162nd Street east of Clarkdale Avenue and west of Horst Avenue in Los Angeles County, California, within Section 30 of Township 3 South and Range 11 West of the *Whittier, California* U.S. Geological Survey 7.5-minute series quadrangle map (Figure 1, Project Location).

The project entails constructing and operating a stormwater capture, treatment, and infiltration facility within the northern portion of Hermosillo Park, and implementing a comprehensive park rehabilitation project to replace existing park features with improved amenities that will be similar in nature to the existing features. The stormwater capture component of the proposed Project would divert and capture stormwater runoff from the two existing storm drain facilities within the Project area into three subterranean concrete basins proposed beneath the Park's existing grass fields. Prior to flow into the subterranean basins, runoff would be directed through a pre-treatment device that would remove trash, sediments, and solids present in the runoff. Concurrently with construction of the proposed stormwater capture and treatment infrastructure, the City proposes to install two surf soccer fields with concrete bleacher seating, replace the existing

community center and restroom building, replace and modernize the existing picnic areas and walking paths, add shade structure, and reconfigure and expand the parking lot.

Project Involves Ground Disturbance: Yes

Summary of Cultural Resources Identification Efforts

Cultural resources identification efforts undertaken for the proposed Project include a California Historical Resources Information System records search conducted at the South Central Coastal Information Center, a search of the NAHC SLF, a cultural resources field survey, and a review of historical topographic maps and aerial imagery.

The cultural resources records search conducted by Dudek on January 2, 2024, identified five (5) previous cultural resources studies conducted within a half-mile of the proposed Project, none of which address or intersect with the proposed Project. Additionally, no previously recorded cultural resources were identified within the proposed Project or a half-mile radius. Dudek requested a search of the NAHC SLF, and results were received on January 31, 2024. Results were negative for Native American cultural resources within a half-mile radius of the proposed Project. A cultural resources field survey conducted by Dudek on January 25, 2024, did not identify any Native American cultural resources within the proposed Project, and a review of historical topographic maps and aerial imagery indicate the proposed Project area has been subject to ground disturbances as early as 1953. Cultural resources documentation can be provided upon request. Please note, this information should be considered confidential and is not to be redistributed to individuals without traditional or cultural affiliation to the geographic area.

Consultation Request

If you have any comments or concerns regarding potential impacts to tribal cultural resources (as defined in Public Resources Code § 21074) in relation to the proposed Project, or would like to request any additional information, please contact the City of Norwalk at the address below or via email to Run Chen, RChen@norwalkca.gov. All requests for formal tribal consultation, pursuant to AB 52, must be received within 30 days of receipt of this notice. Please include in any request the name of the designated lead contact person. If you have any questions, please don't hesitate to contact Run Chen at RChen@norwalkca.gov.

Sincerely,

Run Chen

- A clear and definitive statement that the tribe has 30 days to request consultation; and
- The lead agency contact information.

Project Location and Description

The proposed Project is located in the southern portion of the City of Norwalk, at 162nd Street east of Clarkdale Avenue and west of Horst Avenue in Los Angeles County, California, within Section 30 of Township 3 South and Range 11 West of the *Whittier, California* U.S. Geological Survey 7.5-minute series quadrangle map (Figure 1, Project Location).

The project entails constructing and operating a stormwater capture, treatment, and infiltration facility within the northern portion of Hermosillo Park, and implementing a comprehensive park rehabilitation project to replace existing park features with improved amenities that will be similar in nature to the existing features. The stormwater capture component of the proposed Project would divert and capture stormwater runoff from the two existing storm drain facilities within the Project area into three subterranean concrete basins proposed beneath the Park's existing grass fields. Prior to flow into the subterranean basins, runoff would be directed through a pre-treatment device that would remove trash, sediments, and solids present in the runoff. Concurrently with construction of the proposed stormwater capture and treatment infrastructure, the City proposes to install two surf soccer fields with concrete bleacher seating, replace the existing

community center and restroom building, replace and modernize the existing picnic areas and walking paths, add shade structure, and reconfigure and expand the parking lot.

Project Involves Ground Disturbance: Yes

Summary of Cultural Resources Identification Efforts

Cultural resources identification efforts undertaken for the proposed Project include a California Historical Resources Information System records search conducted at the South Central Coastal Information Center, a search of the NAHC SLF, a cultural resources field survey, and a review of historical topographic maps and aerial imagery.

The cultural resources records search conducted by Dudek on January 2, 2024, identified five (5) previous cultural resources studies conducted within a half-mile of the proposed Project, none of which address or intersect with the proposed Project. Additionally, no previously recorded cultural resources were identified within the proposed Project or a half-mile radius. Dudek requested a search of the NAHC SLF, and results were received on January 31, 2024. Results were negative for Native American cultural resources within a half-mile radius of the proposed Project. A cultural resources field survey conducted by Dudek on January 25, 2024, did not identify any Native American cultural resources within the proposed Project, and a review of historical topographic maps and aerial imagery indicate the proposed Project area has been subject to ground disturbances as early as 1953. Cultural resources documentation can be provided upon request. Please note, this information should be considered confidential and is not to be redistributed to individuals without traditional or cultural affiliation to the geographic area.

Consultation Request

If you have any comments or concerns regarding potential impacts to tribal cultural resources (as defined in Public Resources Code § 21074) in relation to the proposed Project, or would like to request any additional information, please contact the City of Norwalk at the address below or via email to Run Chen, RChen@norwalkca.gov. All requests for formal tribal consultation, pursuant to AB 52, must be received within 30 days of receipt of this notice. Please include in any request the name of the designated lead contact person. If you have any questions, please don't hesitate to contact Run Chen at RChen@norwalkca.gov.

Sincerely,

Run Chen

Re: ***Formal Assembly Bill 52 Notification for the Hermosillo Park Stormwater Capture and Park Rehabilitation Project, City of Norwalk, California***

Dear Ms. Goad

Pursuant to California Assembly Bill (AB) 52, the City of Norwalk (City), as Lead Agency pursuant to the California Environmental Quality Act, is providing you with formal notification of the Hermosillo Park Stormwater Capture and Park Rehabilitation Project (proposed Project), located in the City of Norwalk, in Los Angeles County, California. The City is reaching out to all groups listed on the California Native American Heritage Commission (NAHC) Sacred Lands File (SLF) Contact List in a good faith effort to provide notification of the proposed Project to groups that are traditionally or culturally affiliated with the geographic area. This correspondence is intended as formal notification of the proposed Project pursuant to AB 52.

The present notice includes:

- A description of the proposed Project and location;
- Project Location figure;
- A summary of cultural resources work to date, and summary of associated information that can be made available upon request;
- A clear and definitive statement that the tribe has 30 days to request consultation; and
- The lead agency contact information.

Project Location and Description

The proposed Project is located in the southern portion of the City of Norwalk, at 162nd Street east of Clarkdale Avenue and west of Horst Avenue in Los Angeles County, California, within Section 30 of Township 3 South and Range 11 West of the *Whittier, California* U.S. Geological Survey 7.5-minute series quadrangle map (Figure 1, Project Location).

The project entails constructing and operating a stormwater capture, treatment, and infiltration facility within the northern portion of Hermosillo Park, and implementing a comprehensive park rehabilitation project to replace existing park features with improved amenities that will be similar in nature to the existing features. The stormwater capture component of the proposed Project would divert and capture stormwater runoff from the two existing storm drain facilities within the Project area into three subterranean concrete basins proposed beneath the Park's existing grass fields. Prior to flow into the subterranean basins, runoff would be directed through a pre-treatment device that would remove trash, sediments, and solids present in the runoff. Concurrently with construction of the proposed stormwater capture and treatment infrastructure, the City proposes to install two surf soccer fields with concrete bleacher seating, replace the existing

community center and restroom building, replace and modernize the existing picnic areas and walking paths, add shade structure, and reconfigure and expand the parking lot.

Project Involves Ground Disturbance: Yes

Summary of Cultural Resources Identification Efforts

Cultural resources identification efforts undertaken for the proposed Project include a California Historical Resources Information System records search conducted at the South Central Coastal Information Center, a search of the NAHC SLF, a cultural resources field survey, and a review of historical topographic maps and aerial imagery.

The cultural resources records search conducted by Dudek on January 2, 2024, identified five (5) previous cultural resources studies conducted within a half-mile of the proposed Project, none of which address or intersect with the proposed Project. Re: ***Formal Assembly Bill 52 Notification for the Hermosillo Park Stormwater Capture and Park Rehabilitation Project, City of Norwalk, California***

Dear Mr. Ontiveros

Pursuant to California Assembly Bill (AB) 52, the City of Norwalk (City), as Lead Agency pursuant to the California Environmental Quality Act, is providing you with formal notification of the Hermosillo Park Stormwater Capture and Park Rehabilitation Project (proposed Project), located in the City of Norwalk, in Los Angeles County, California. The City is reaching out to all groups listed on the California Native American Heritage Commission (NAHC) Sacred Lands File (SLF) Contact List in a good faith effort to provide notification of the proposed Project to groups that are traditionally or culturally affiliated with the geographic area. This correspondence is intended as formal notification of the proposed Project pursuant to AB 52.

The present notice includes:

- A description of the proposed Project and location;
- Project Location figure;
- A summary of cultural resources work to date, and summary of associated information that can be made available upon request;
- A clear and definitive statement that the tribe has 30 days to request consultation; and
- The lead agency contact information.

Project Location and Description

The proposed Project is located in the southern portion of the City of Norwalk, at 162nd Street east of Clarkdale Avenue and west of Horst Avenue in Los Angeles County, California, within Section 30 of Township 3 South and Range 11 West of the *Whittier, California* U.S. Geological Survey 7.5-minute series quadrangle map (Figure 1, Project Location).

The project entails constructing and operating a stormwater capture, treatment, and infiltration facility within the northern portion of Hermosillo Park, and implementing a comprehensive park rehabilitation project to replace existing park features with improved amenities that will be similar in nature to the existing features. The stormwater capture component of the proposed Project would divert and capture stormwater runoff from the two existing storm drain facilities within the Project area into three subterranean concrete basins proposed beneath the Park's existing grass fields. Prior to flow into the subterranean basins, runoff would be directed through a pre-treatment device that would remove trash, sediments, and solids present in the runoff. Concurrently with construction of the proposed stormwater capture and treatment infrastructure, the City proposes to install two surf soccer fields with concrete bleacher seating, replace the existing

community center and restroom building, replace and modernize the existing picnic areas and walking paths, add shade structure, and reconfigure and expand the parking lot.

Project Involves Ground Disturbance: Yes

Summary of Cultural Resources Identification Efforts

Cultural resources identification efforts undertaken for the proposed Project include a California Historical Resources Information System records search conducted at the South Central Coastal Information Center, a search of the NAHC SLF, a cultural resources field survey, and a review of historical topographic maps and aerial imagery.

The cultural resources records search conducted by Dudek on January 2, 2024, identified five (5) previous cultural resources studies conducted within a half-mile of the proposed Project, none of which address or intersect with the proposed Project. Additionally, no previously recorded cultural resources were identified within the proposed Project or a half-mile radius. Dudek requested a search of the NAHC SLF, and results were received on January 31, 2024. Results were negative for Native American cultural resources within a half-mile radius of the proposed Project. A cultural resources field survey conducted by Dudek on January 25, 2024, did not identify any Native American cultural resources within the proposed Project, and a review of historical topographic maps and aerial imagery indicate the proposed Project area has been subject to ground disturbances as early as 1953. Cultural resources documentation can be provided upon request. Please note, this information should be considered confidential and is not to be redistributed to individuals without traditional or cultural affiliation to the geographic area.

Consultation Request

If you have any comments or concerns regarding potential impacts to tribal cultural resources (as defined in Public Resources Code § 21074) in relation to the proposed Project, or would like to request any additional information, please contact the City of Norwalk at the address below or via email to Run Chen, RChen@norwalkca.gov. All requests for formal tribal consultation, pursuant to AB 52, must be received within 30 days of receipt of this notice. Please include in any request the name of the designated lead contact person. If you have any questions, please don't hesitate to contact Run Chen at RChen@norwalkca.gov.

Sincerely,

Run Chen

Re: ***Formal Assembly Bill 52 Notification for the Hermosillo Park Stormwater Capture and Park Rehabilitation Project, City of Norwalk, California***

Dear Ms. Valdez

Pursuant to California Assembly Bill (AB) 52, the City of Norwalk (City), as Lead Agency pursuant to the California Environmental Quality Act, is providing you with formal notification of the Hermosillo Park Stormwater Capture and Park Rehabilitation Project (proposed Project), located in the City of Norwalk, in Los Angeles County, California. The City is reaching out to all groups listed on the California Native American Heritage Commission (NAHC) Sacred Lands File (SLF) Contact List in a good faith effort to provide notification of the proposed Project to groups that are traditionally or culturally affiliated with the geographic area. This correspondence is intended as formal notification of the proposed Project pursuant to AB 52.

The present notice includes:

- A description of the proposed Project and location;
- Project Location figure;
- A summary of cultural resources work to date, and summary of associated information that can be made available upon request;
- A clear and definitive statement that the tribe has 30 days to request consultation; and
- The lead agency contact information.

Project Location and Description

The proposed Project is located in the southern portion of the City of Norwalk, at 162nd Street east of Clarkdale Avenue and west of Horst Avenue in Los Angeles County, California, within Section 30 of Township 3 South and Range 11 West of the *Whittier, California* U.S. Geological Survey 7.5-minute series quadrangle map (Figure 1, Project Location).

The project entails constructing and operating a stormwater capture, treatment, and infiltration facility within the northern portion of Hermosillo Park, and implementing a comprehensive park rehabilitation project to replace existing park features with improved amenities that will be similar in nature to the existing features. The stormwater capture component of the proposed Project would divert and capture stormwater runoff from the two existing storm drain facilities within the Project area into three subterranean concrete basins proposed beneath the Park's existing grass fields. Prior to flow into the subterranean basins, runoff would be directed through a pre-treatment device that would remove trash, sediments, and solids present in the runoff. Concurrently with construction of the proposed stormwater capture and treatment infrastructure, the City proposes to install two surf soccer fields with concrete bleacher seating, replace the existing

community center and restroom building, replace and modernize the existing picnic areas and walking paths, add shade structure, and reconfigure and expand the parking lot.

Project Involves Ground Disturbance: Yes

Summary of Cultural Resources Identification Efforts

Cultural resources identification efforts undertaken for the proposed Project include a California Historical Resources Information System records search conducted at the South Central Coastal Information Center, a search of the NAHC SLF, a cultural resources field survey, and a review of historical topographic maps and aerial imagery.

The cultural resources records search conducted by Dudek on January 2, 2024, identified five (5) previous cultural resources studies conducted within a half-mile of the proposed Project, none of which address or intersect with the proposed Project. Additionally, no previously recorded cultural resources were identified within the proposed Project or a half-mile radius. Dudek requested a search of the NAHC SLF, and results were received on January 31, 2024. Results were negative for Native American cultural resources within a half-mile radius of the proposed Project. A cultural resources field survey conducted by Dudek on January 25, 2024, did not identify any Native American cultural resources within the proposed Project, and a review of historical topographic maps and aerial imagery indicate the proposed Project area has been subject to ground disturbances as early as 1953. Cultural resources documentation can be provided upon request. Please note, this information should be considered confidential and is not to be redistributed to individuals without traditional or cultural affiliation to the geographic area.

Consultation Request

If you have any comments or concerns regarding potential impacts to tribal cultural resources (as defined in Public Resources Code § 21074) in relation to the proposed Project, or would like to request any additional information, please contact the City of Norwalk at the address below or via email to Run Chen, RChen@norwalkca.gov. All requests for formal tribal consultation, pursuant to AB 52, must be received within 30 days of receipt of this notice. Please include in any request the name of the designated lead contact person. If you have any questions, please don't hesitate to contact Run Chen at RChen@norwalkca.gov.

Sincerely,

Run Chen

Re: ***Formal Assembly Bill 52 Notification for the Hermosillo Park Stormwater Capture and Park Rehabilitation Project, City of Norwalk, California***

Dear Ms. Martinez

Pursuant to California Assembly Bill (AB) 52, the City of Norwalk (City), as Lead Agency pursuant to the California Environmental Quality Act, is providing you with formal notification of the Hermosillo Park Stormwater Capture and Park Rehabilitation Project (proposed Project), located in the City of Norwalk, in Los Angeles County, California. The City is reaching out to all groups listed on the California Native American Heritage Commission (NAHC) Sacred Lands File (SLF) Contact List in a good faith effort to provide notification of the proposed Project to groups that are traditionally or culturally affiliated with the geographic area. This correspondence is intended as formal notification of the proposed Project pursuant to AB 52.

The present notice includes:

- A description of the proposed Project and location;
- Project Location figure;
- A summary of cultural resources work to date, and summary of associated information that can be made available upon request;
- A clear and definitive statement that the tribe has 30 days to request consultation; and
- The lead agency contact information.

Project Location and Description

The proposed Project is located in the southern portion of the City of Norwalk, at 162nd Street east of Clarkdale Avenue and west of Horst Avenue in Los Angeles County, California, within Section 30 of Township 3 South and Range 11 West of the *Whittier, California* U.S. Geological Survey 7.5-minute series quadrangle map (Figure 1, Project Location).

The project entails constructing and operating a stormwater capture, treatment, and infiltration facility within the northern portion of Hermosillo Park, and implementing a comprehensive park rehabilitation project to replace existing park features with improved amenities that will be similar in nature to the existing features. The stormwater capture component of the proposed Project would divert and capture stormwater runoff from the two existing storm drain facilities within the Project area into three subterranean concrete basins proposed beneath the Park's existing grass fields. Prior to flow into the subterranean basins, runoff would be directed through a pre-treatment device that would remove trash, sediments, and solids present in the runoff. Concurrently with construction of the proposed stormwater capture and treatment infrastructure, the City proposes to install two surf soccer fields with concrete bleacher seating, replace the existing

community center and restroom building, replace and modernize the existing picnic areas and walking paths, add shade structure, and reconfigure and expand the parking lot.

Project Involves Ground Disturbance: Yes

Project Name: Hermosillo Park Stormwater Capture and Park Rehabilitation

Dear Run Chen,

Thank you for your letter dated January 20,2024 regarding AB52 consultation. The above proposed project location is within our Ancestral Tribal Territory; therefore, our Tribal Government requests to schedule a consultation with you as the lead agency, to discuss the project and the surrounding location in further detail.

Please contact us at your earliest convenience. ***Please Note:AB 52, "consultation" shall have the same meaning as provided in SB 18 (Govt. Code Section 65352.4).***

Thank you for your time,

Andrew Salas, Chairman
