Project Title: PVRWRF Biosolids Loadout Facility Improvement and Vector Truck Dump Station
Project Location: 1301 Case Road
City: Perris
County: Riverside

Description of Nature, Purpose, and Beneficiaries of Project:

Eastern Municipal Water District (EMWD) owns and operates the Perris Valley Regional Water Reclamation Facility (PVRWRF). The PVRWRF dewater biosolids and uses a loading hopper to transfer the dewatered biosolids to trucks for hauling offsite. The truck loading hopper was constructed in 1992 and has reached the end of its service life. The PVRWRF Biosolids Loadout Facility Improvement and Vector Truck Dump Station Project (project) replaces the existing loadout facility with a new hopper designed to integrate with the existing support frame, installs a weighbridge beneath the hopper, and replaces electrical components and controls associated with the operation of the new hopper.

The PVRWRF receives debris and earthen materials collected by vector trucks from EMWD's routine cleaning and maintenance of sewers and lift stations. The current practice of using unlined sludge drying beds to deposit the debris to dry is unsustainable and concerns regarding odors, vector control, and potential impacts to groundwater are drivers to implement a more sustainable solution for vector waste disposal. The project would also implement an engineered solution for vector waste handling and disposal by constructing a maintenance dump station, a lift station cleaning dump station with two mechanical screens, installation of a chemical building and repaving the project site within the existing PVRWRF facility.

The beneficiaries of this project are EMWD's diverse customers. The District implements cost-effective projects and programs to manage wastewater and biosolids to achieve long-term, environmentally sustainable reuse.

Public Agency Approving and Carrying Out Project: Eastern Municipal Water District

Exempt Status: Categorical Exemption. 15301(b)

Reasons why project is exempt:

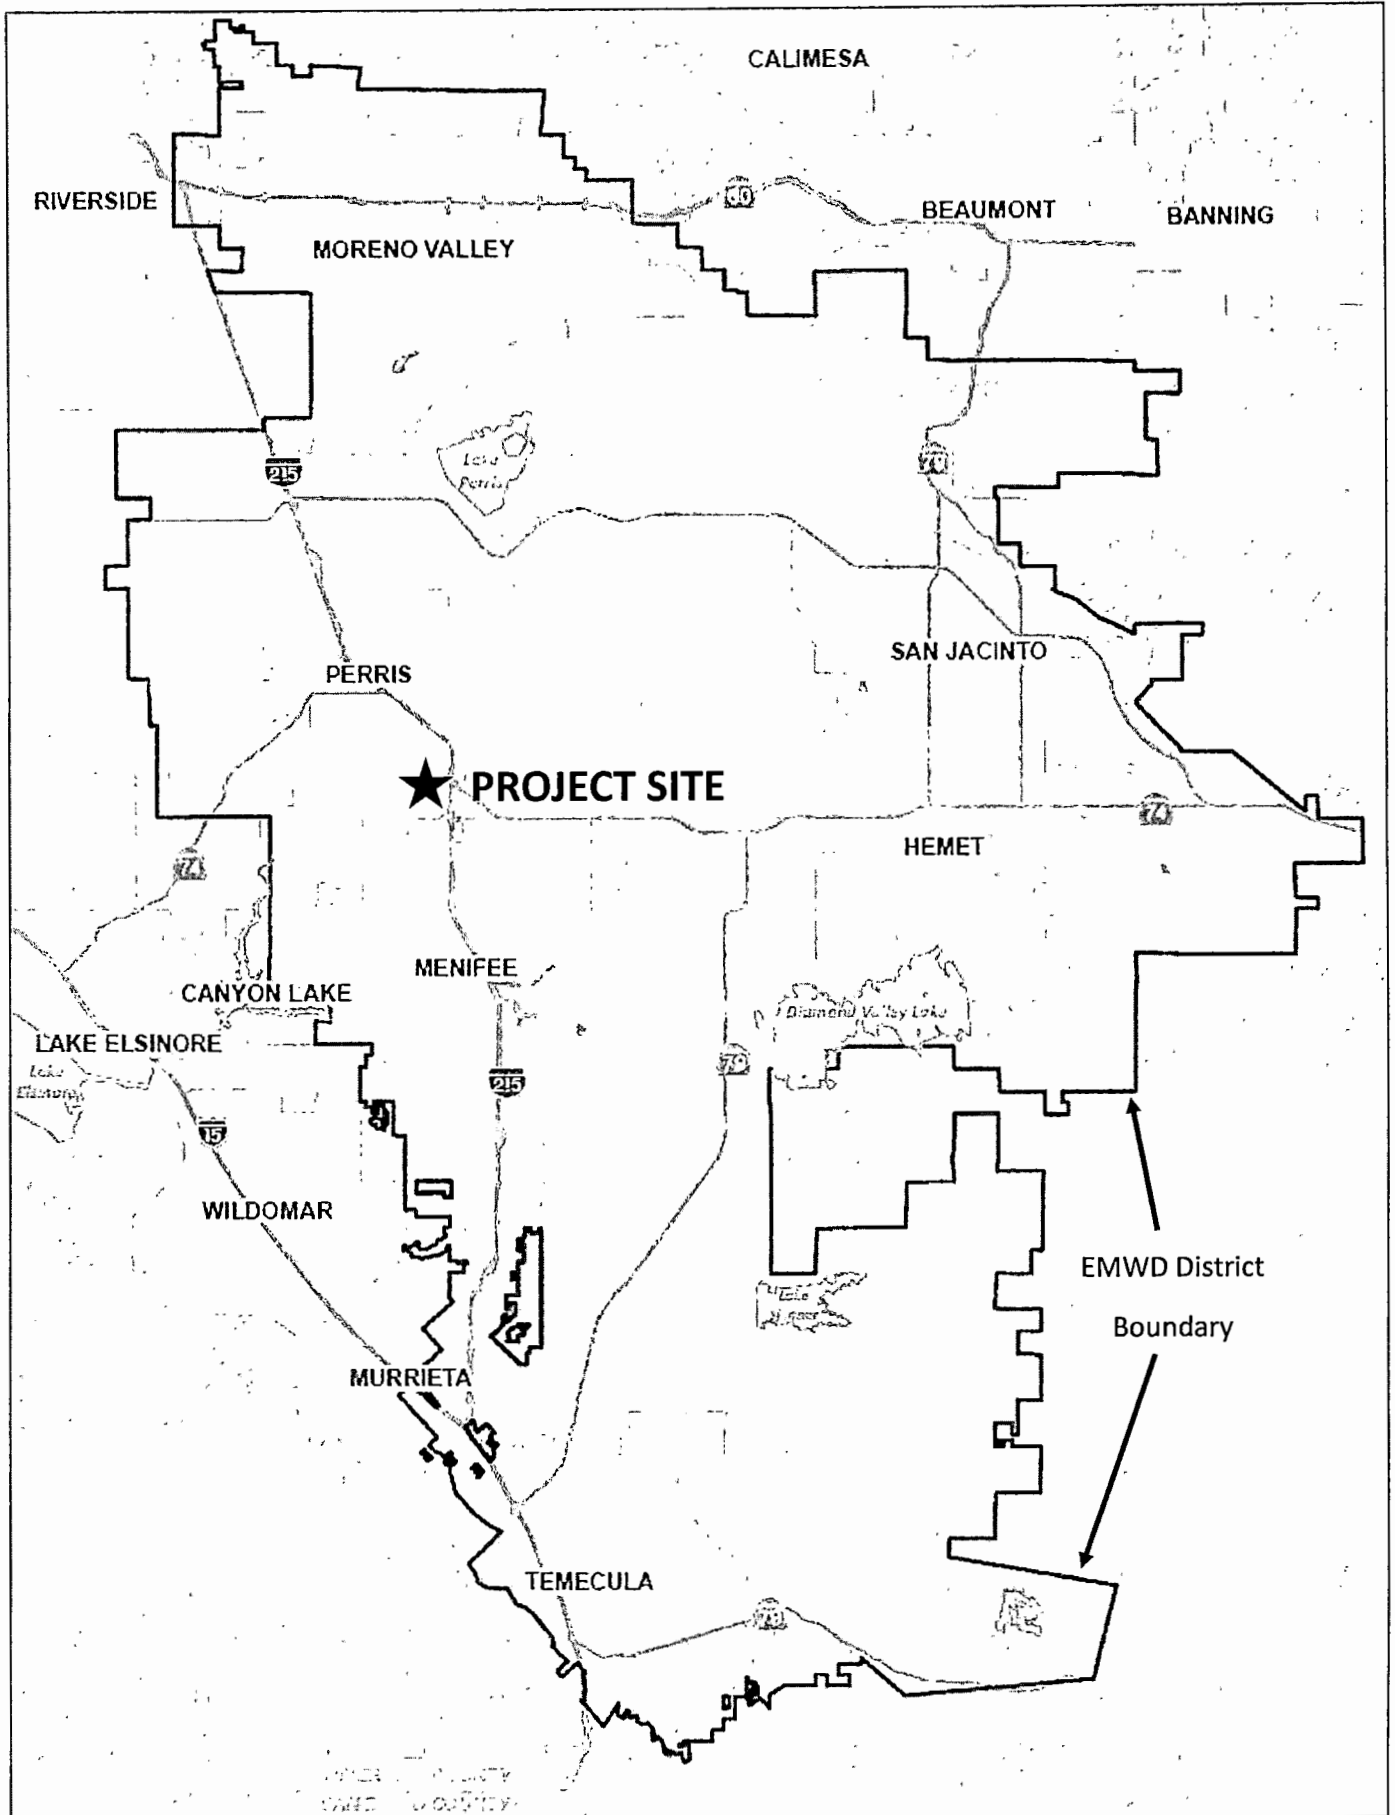

This class of this exemption covers repair, maintenance, or minor alteration of existing public structures, facilities, mechanical equipment involving negligible or no expansion of existing or former use. This project includes the replacement and repair of equipment at an existing sewage treatment facility that involves no expansion of use.
