Project Title: San Diego Bay/SD Bay National Wildlife Refuge *Caulerpa prolifera* Infestation Eradication Project

Project Location – Specific: Various and outside the San Diego Unified Port District jurisdictional boundary and inside the Coastal Commission permitting jurisdiction

Project location – City: Coronado

Project Location – County: San Diego

Description of Nature, Purpose, and Beneficiaries of Project: The Port of San Diego and the Southern California *Caulerpa* Action Team, including member agencies California Department of Fish and Wildlife, the Santa Ana and San Diego Regional Water Quality Control Boards, California Coastal Commission, NOAA's National Marine Fisheries Service, and U.S. Fish and Wildlife Service are mobilizing a response to a new discovery of the invasive algae (seaweed) *Caulerpa prolifera* in the San Diego Bay National Wildlife Refuge, in the San Diego Bay. During monitoring surveys, the new discoveries occurred on both April 18, and April 20, 2024. This non-native seaweed can take over natural habitats, disrupting the ecosystem and displacing native plants and the animals that rely on them. Invasions have happened in several locations in southern California, as well as across the globe. It is illegal in California to possess, sell, or transport any seaweed in the in genus *Caulerpa*. The Southern California *Caulerpa* Action Team is preparing a Rapid Response Eradication Plan to address the immediate need to remove this invasive species. It is critical that the response begin immediately to prevent additional spread, and to minimize the cost of the response effort while the infestation site is still small. It is fortunate that the Southern California *Caulerpa* Action Team and the eradication teams are already in place and active; regional authorizations and funding sources are being sought. The Rapid Response Eradication plan includes the following components:

- **Control of Infestation Site-** To prevent disturbance by boat anchors and boat wakes the affected boat slip will be controlled through coordination with the site homeowner's association and slip occupant. Additional visual exclusion markers will be deployed if necessary.
- **Localized Eradication Level Survey** - An intensive diver survey will be conducted within the affected area. Divers will locate, record, and map any *Caulerpa prolifera* found. The current coverage estimate is 23 square meters.
- **Localized Removal** – The *Caulerpa prolifera* will be covered by trained divers with a sealed barrier that will kill the algae by exclusion from light, oxygen, and circulation. This method has been successfully used in the past at three other *Caulerpa* infestation sites.
- **Post Removal Surveys** – Diver surveys will be conducted both immediately following removal and over a longer timeframe to help ensure the species is completely removed and does not repopulate the area.
- **Broad Area Surveys** – Diver surveys will occur in surrounding areas of San Diego Bay to ensure other areas have not been invaded.

The summarized work will occur generally within the Expanded Survey Boundary and may be performed outside of this expanded area but located within the District's jurisdictional boundaries, as depicted in Figure 1, below.

Name of Public Agency Approving Project: San Diego Unified Port District (SDUPD)

Name of Persons or Agency Carrying Out Project:

SDUPD, Eileen Maher, Director, Environmental Conservation Department, 3165 Pacific Highway San Diego CA 92101 619.686.6352;
Marine Taxonomic Services, Ltd. (MTS), 920 Rancheros Drive Suite F-1 San Marcos CA 92069 769.410.8392; and
Merkel & Associates, Inc. (M&A), 5434 Ruffin Road San Diego CA 92123 858.560.5465
US Fish & Wildlife Service, San Diego National Wildlife Refuge Complex, 1080 Gunpowder Point Drive Chula Vista CA 91910 760.535.7065

Exempt Status: (Check one):

- Ministerial (Sec. 21080(b)(1); 15268);
- Declared Emergency (Sec. 21080(b)(3); 15269(a));
- Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- Categorical Exemptions: *Actions by Regulatory Agencies for Protection of Natural Resources (SG § 15307) (Class 7) and Actions by Regulatory Agency for Protection of the Environment (SG § 15308) (Class 8)***
- Statutory Exemption. State code number:

Reason Why Project Is Exempt: The proposed project is determined to be Categorically Exempt pursuant to the CEQA Guidelines and the Sections of the District's *Guidelines for Compliance with CEQA* as identified above. These are appropriate since the SDUPD is a regulatory agency and the proposed *Caulerpa prolifera* eradication will protect native species from infestation, by this invasive seaweed. *Caulerpa prolifera* can take over natural habitats, disrupting the ecosystem and displacing native plants and the animals that rely on them. Further, this species grows very quickly, at one centimeter-per-day and has the potential to swiftly overtake native species in the project area. Invasions have happened in several locations in southern California, as well as across the globe. The project applicants must rapidly remove this invasive species and it is critical that the response to begin immediately, in order to prevent additional spread, and to minimize the cost of the response effort while the infestation site is still within a small area of the Bay.
