

THIS NOTICE WAS POSTED

ON May 03 2024

UNTIL June 03 2024

REGISTRAR – RECORDER/COUNTY CLERK

**CITY OF LOS ANGELES**  
**DEPARTMENT OF PUBLIC WORKS**  
**BUREAU OF ENGINEERING**  
**1149 S. BROADWAY, 7<sup>th</sup> FLOOR**  
**LOS ANGELES, CALIFORNIA 90015**  
**CALIFORNIA ENVIRONMENTAL QUALITY ACT**  
**NOTICE OF EXEMPTION**  
 (Articles II and III – City CEQA Guidelines)

**2024 096364**  
  
**FILED**  
 May 03 2024  
Dean F. Logan, Registrar - Recorder/County Clerk  
Electronically signed by TINA TRAN

Submission of this form is optional. The form shall be filed with the County Clerk, 12400 E. Imperial Highway, Norwalk, California, 90650, pursuant to Public Resources Code Section 21152(b), and with the state Office of Planning and Research pursuant to Public Resources Code Section 21080.27(c), when applicable; and on the City website pursuant to Public Resources Code Section 21092.2(d). Pursuant to Public Resources Code Section 21167(d), the filing of this notice starts a 35-day statute of limitations on court challenges to the approval of the project.

<b>LEAD CITY AGENCY AND ADDRESS:</b> City of Los Angeles c/o Bureau of Engineering (BOE) 1149 S. Broadway, MS 939 Los Angeles, CA 90015	<b>COUNCIL DISTRICT</b> 2
--	------------------------------

<b>PROJECT TITLE:</b> CD 2 Tiny Home Village at 11471 Chandler Blvd. Lease	<b>LOG REFERENCE</b> C.F. 20-0841
--	--------------------------------------

**PROJECT LOCATION:** 11471 Chandler Boulevard (Los Angeles County Assessor's Parcel No. 2350-011-900), in the North Hollywood Recreation Center (11466 Chandler Boulevard), in the North Hollywood - Valley Village Community Plan Area of the City of Los Angeles (City), Los Angeles County. See Figure 1: Project Location. T.G. 562-J2

**DESCRIPTION OF NATURE, PURPOSE, AND BENEFICIARIES OF PROJECT:** The CD 2 Tiny Home Village at 11471 Chandler Blvd. Lease project (Project) consists of an extended, or new lease, for approximately up to one year with continued use/operation, for approximately up to four years total use of the Tiny Home Village or Pallet Housing. A third-party service provider will operate the Project for the City and it is anticipated that a lease or similar operating and/or funding agreement may be executed. The purpose of the Project is to provide approximately up to one additional year, to the previously approved three years, of emergency shelter and case management for people experiencing homelessness to help bridge their transition from living on the streets to finding services and, ultimately, living in transitional and/or permanent housing. Project beneficiaries include the homeless community, the public, and local businesses. (Please see the attached.) On November 2, 2023, the Board of Recreation and Park Commission determined the Project was exempt under the California Environmental Quality Act (CEQA) and approved the Project. On December 12, 2023, the City Council determined the Project is exempt under CEQA and approved the Project.

<b>EXEMPT STATUS:</b>	<u>CITY CEQA GUIDELINES</u>	<u>STATE CEQA GUIDELINES</u>	<u>CA PUBLIC RESOURCE CODE</u>
STATUTORY		15269(c)	21080.27 & 21080(b)(4)

**JUSTIFICATION FOR PROJECT EXEMPTION:** This Project is statutorily exempt from CEQA under Public Resources Code (PRC) Section 21080.27, applicable to City of Los Angeles emergency homeless shelters and PRC Section 21080(b)(4), as a specific action necessary to prevent or mitigate an emergency, and as reflected in Article 18 of the State CEQA Guidelines, Section 15269(c). This determination is consistent with the Notice of Exemption (NOE) supporting documents in the Board of Recreation and Park Commission File Nos. 20-160 and 23-187, and Council File (CF) No. 20-0841; and consistent with, and supported by, the City Council's prior actions approving the development and use of this shelter (see attached narrative).

**IF FILED BY APPLICANT, ATTACH CERTIFIED DOCUMENT OF EXEMPTION FINDING**

## EXEMPTION NARRATIVE

### I. PROJECT DESCRIPTION, CONTINUED

The Project consists of an approximately up to one-year lease extension or new lease, and operation, in furtherance of providing an emergency homeless shelter in the City of Los Angeles at the Tiny Home Village located on a City-owned property at 11471 Chandler Boulevard that was found to be statutorily exempt and approved by the Board of Recreation and Park Commissioners on August 6, 2020 (Board Report No. 20-160) and subsequently by the City Council on September 9, 2020 (CF No. 20-0841). The documents supporting those determinations (Board Report No. 20-160 and CF No. 20-0841) are incorporated herein by reference as support for this CEQA determination. On July 22, 2021 the Department of Recreation and Parks (RAP) issued a right-of-entry permit for the operation of the Shelter for a period of three years. This Project continues the existing use of the Tiny Home Village that was built at 11471 Chandler Boulevard, and is currently operating, without substantial change. On November 2, 2023, the RAP Commission determined the Project was exempt under the CEQA and approved the Project (Board Report No. 23-187).

The approximately 75-bed Tiny Home Village will continue to be operated consistent with the Los Angeles Homeless Services Authority’s (LAHSA) program requirements for bridge shelters including, but not limited to, *Crisis Housing Program for All Populations Scope of Required Services* (LAHSA, 2020-2021). A third-party service provider, e.g., Hope the Mission (Formerly known as Hope of the Valley), will operate the Project for the City, as it has been for the past three years, and it is anticipated that a lease, lease extension, or similar operating and/or funding agreements may be executed with the service provider, County, and/or LAHSA.

Project operation continues per a security plan consistent with the LAHSA’s standards. By creating a stable environment and providing access to basic needs, clients can maintain a consistent connection to outreach workers and case managers to create a path to interim or permanent housing. The shelter will continue to be operated consistent with LAHSA program requirements for crisis and bridge shelters including, but not limited to, LAHSA’s *Scope of Required Services and Program Standards*, as noted in the references section.

The Project site is on an irregularly shaped parcel with an area of approximately 21,706 square feet. The project is zoned OS with an Open Space land use. The site is a triangular shaped infill parcel located just west of the intersection of Chandler Boulevard and Tujunga Avenue and is bounded on the east by commercial parcels adjacent to Tujunga Avenue, on the south and north by Chandler Boulevard (westbound and eastbound), on the west tapering to a point between Chandler Boulevard east and westbound lanes near Interstate 170 Hollywood Freeway. Parcels that surround the site on the north are zoned commercial with commercial uses and on the south are zoned open space with public institutional uses as a public park; and to the east are parcels zoned commercial with commercial uses (City of Los Angeles Department of City Planning, 2020).

## II. PROJECT HISTORY

### A. Homelessness Imposes a Loss of, or Damage to, Life, Health, Property, and to Essential Public Services in the City

Homelessness presents a danger of loss or damage to the health and property of the people of the City and an undue burden on essential public services. Based on information from the Census and the Los Angeles Homeless Services Authority (LAHSA), in 2022, homeless persons constituted approximately 1.2 percent of the City's population. (U.S Census Bureau, 2022 & LAHSA, 2022)

In 2018, homeless persons constituted 13.5 percent of LAFD's total patient transports to a hospital, meaning a homeless person is 17 percent more likely to require emergency hospital transportation than the general population (LAFD Battalion Chief and Paramedic Douglas Zabalski, 2019). Studies have shown that individuals identified as homeless utilize health care services more frequently than comparable non-homeless individuals of the same age, gender, and low-income status, particularly high-cost services such as Emergency Room (ER) visits and psychiatric hospitalizations (Hunter, 2017) (Hwang SW, 2013).

Los Angeles County's Chief Executive Officer reported the County spent \$965 million on health, law enforcement, and social services toward individuals experiencing homelessness in fiscal year 2014–2015 (Wu, 2016). Consistent with that report, a 1998 study in the *New England Journal of Medicine* found that homelessness was associated with substantial excess costs per hospital stay in New York City, with homeless patient staying in the hospital 36 percent longer per admission on average than other patients (Salit, Hospitalization Costs Associated with Homelessness in New York City, 1988).

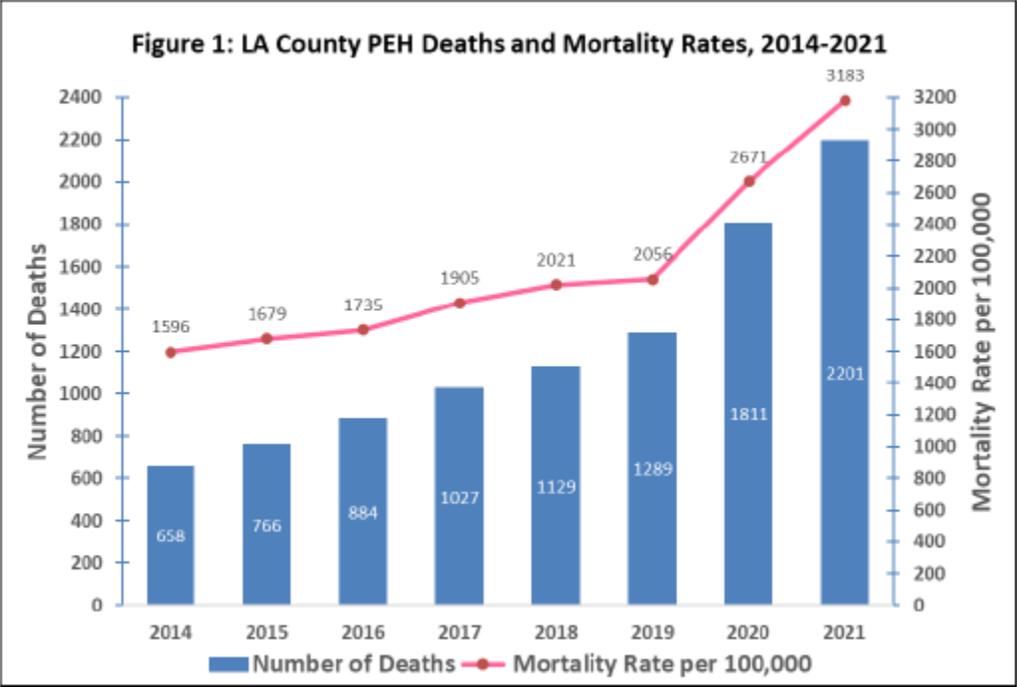

Homelessness also causes significant danger to the health and lives of persons who are homeless. Homeless individuals living in the City are frequent crime victims. In 2018, LAPD reported 2,965 instances where a homeless individual was a victim of a serious crime, including homicide, rape, aggravated assault, theft, and arson (also known as "Part 1 Crimes.") (Commander Dominic H. Choi, 2019). This compares to 1,762 such crimes in 2017, a 68 percent increase (*Id.*). This dramatic increase in Part 1 Crime statistics may be due to more rigorous LAPD data collection methodologies, however it is consistent with the increasing incidence of homelessness documented in June of 2019 detailed below (*Id.*). During the first six months of 2020, LAPD reported 1,738 instances where a homeless individual was a victim of a serious crime including homicide, rape, aggravated assault, burglary, and larceny (LAPD, 2020).

Overall, in 2018, the LAPD reported 6,671 instances in total where a homeless individual was a Part 1 Crime victim and/or suspect, among the 31,285 estimated homeless individuals throughout the City (Commander Dominic H. Choi, 2019). This means that in 2018 there was approximately one Part 1 Crime per every 4.68 homeless individuals in the City. By comparison, for the same year LAPD reported 129,549 total Part 1 Crimes Citywide among an estimated population of 4,054,400 City residents, or approximately one Part 1 crime per every 31.29 City residents. Accordingly, the rate of Part 1 crimes among homeless individuals in 2018 was approximately seven times higher than the rate among the City population as a whole (*Id.*). According to the LAPD Use of Force Year-

End Report in 2020, among the 41,290 estimated homeless individuals throughout the City, 7,872 persons were reported to be victims of a violent or property crime. In the same year, 5,722 persons experiencing homelessness were reported as suspects of a violent or property crime. (LAPD, 2020). On October 4, 2018 and again on February 6, 2019, the Los Angeles County Department of Public Health identified an outbreak of endemic flea-borne typhus in downtown Los Angeles among persons experiencing homelessness. On September 19, 2017, the Los Angeles County Department of Public Health declared a Hepatitis A virus outbreak among persons who are homeless and/or use illicit drugs in the County. Likewise, a January 2018 report from the Los Angeles County Department of Mental Health reported that data from the Los Angeles County Medical Examiner-Corner's showed that a significant number of deaths in the homeless population were caused by treatable conditions such as arteriosclerotic cardiovascular disease, pneumonia, diabetes, cancer, cirrhosis, severe bacterial infections and other conditions (Choi, 2019). As noted by the Board of Supervisors for the County of Los Angeles on October 29, 2019:

Mortality rates for people experiencing homelessness are much higher than those for the general population, have risen in the County over the past five years, and are expected to increase again for 2019. A recent analysis by the County's Department of Public Health on mortality rates and causes of death among people experiencing homelessness shed critical light on this issue and provided sobering data on recent trends. The overall mortality rate, which accounts for increases in the total homeless population over the 6-year period from 2013 to 2018, increased each year from 1,382 per 100,000 to 1,875 deaths per 100,000, with the total number of deaths among people experiencing homelessness increasing each year from 536 in 2013 to 1,047 in 2018. The leading causes of death included coronary heart disease (22%) and unintentional drug and alcohol overdose (21%), indicating that there are opportunities for interventions to prevent premature deaths (Supervisor Ridley-Thomas, Supervisor Solis, 2019) (Department of Public Health, 2019).

In May 2023, LA County Department of Public Health released a report on its finding that mortality rates among the homeless population have recently continued to drastically rise from 2,056 per 100,000 people experiencing homelessness in 2019 to 3,183 per 100,000 in 2021. (LAC Department of Public Health, May 2023.) Indicators of mortality in the homeless population "began increasing dramatically beginning in 2020, with the mortality rate increasing by 55% between 2019 and 2021." (LAC Department of Public Health, May 2023.)

(Source: LA County DPH May 2023.)

In a press release dated May 12, 2023, the LA County Board of Supervisors released statements noting “We have declared a state of emergency in Los Angeles County because there are far too many people on our streets” and the report “underscores how important it is that we continue to treat the homelessness crisis with a sense of urgency and move as many people as possible inside so we can begin to save their lives.” (LA County DPH May 12, 2023.)

These significant adverse health impacts suffered by the homeless in the City and County of Los Angeles are consistent with the impacts identified by a well-established body of expert social science studies that document the significant adverse health and welfare impacts experienced by homeless persons in the United States and in other countries, which the homeless in the City and County experience as well. Some of that research has documented the following impacts upon homeless persons:

*Mortality Rates.* A study of the mortality rates of sheltered homeless people in New York City between 1987 and 1994 documented that homeless men died at a rate more than twice that of other residents of New York, and that homeless women died at a rate more than 3.7 times greater than other New York residents (Barrow, Susan M., PhD, Daniel B. Herman, DSW, Pilar Cordova, BA, and Elmer L. Struening, PhD, 1999). A study conducted between 1985 and 1988 in Philadelphia found that the mortality rate among homeless persons in Philadelphia was nearly four times greater than for the general population (Hibbs, Jonathan R., MD, et. al., 1994). A review of five years of data between 2000 and 2005 in Glasgow, Scotland found that homelessness is, itself, is an independent risk factor for death, distinct from other specific causes (Morrison, 2009).

*Access to Healthcare.* A 2003 nationwide survey of homeless persons documented that homeless adults reported substantial unmet needs for multiple types of health care (Baggett, Travis P., MD, MPH, James J. O’Connell, MD, Daniel E. Singer, MD, and Nancy A. Rigotti, MD, 2010). The report found 73 percent of the respondents reported at least one unmet health need, including an inability to obtain needed medical or surgical care (32%), prescription medications (36%), mental health care (21%), eyeglasses (41%), and dental care (41%) (*Id.*).

*AIDs Impacts.* A study of San Francisco residents diagnosed with AIDS from 1996 through 2006 and reported to the San Francisco Department of Public Health demonstrated that homeless persons with HIV/AIDS have greater morbidity and mortality, more hospitalizations, less use of antiretroviral therapy, and worse medication adherence than HIV infected persons who are stably housed (Schwarcz, Sandra K, Ling C Hsu,, Eric Vittinghoff, Annie Vu, Joshua D Bamberger and Mitchell H Katz, 2009).

*Cancer Impacts.* A study of 28,000 current and formerly homeless individuals in Boston documented that homeless men saw a significantly higher cancer incident rate than expected compared to the general Massachusetts general population, and that homeless women and men experienced significantly higher cancer mortality rates than the Massachusetts general population (Baggett, Travis P et al., 2015).

## **B. Unexpected Dramatic Surge in Homelessness**

A 2017 Rand Corporation study reported the County of Los Angeles as having the highest rate in the United States of unsheltered individuals who experience homelessness (Hunter, Sarah B., Melody Harvey, Brian Briscoombe, and Matthew Cefalu, 2017). The impacts of homelessness upon the homeless and upon the community, in terms of the danger to or loss of life, property, health and burden on public services is exacerbated in the City due the very size of the City’s homeless population. The homeless shelter crisis and the rise in homelessness are the type of emergency situations that led the State to adopt AB 1197, an urgency statute addressing homelessness that was deemed necessary for the immediate preservation of the public peace, health, or safety and for the critical necessity to address the shelter and homeless crisis within the City of Los Angeles.

The City Council declared a homeless shelter crisis pursuant to Government Code Section 8698, et seq. on April 17, 2018 (The Honorable M. Bonin & M. O’Farrell, 2019), which is currently in effect (The Honorable M. Bonin & M. Harris-Dawson, 2019). Following significant investment of resources by both the County and City, the 2018 Homeless Count showed progress in reducing homelessness, documenting a 5.5 percent overall decrease in the number of persons experiencing homelessness in LA County (LAHSA, 2020).

*Table 1 - 2018 Homeless Count Data Summary* presents the data revealed by the 2018 Homeless Count concerning the City of Los Angeles, as documented in the 2018 Data Summary in Table 1 (LAHSA, 2020).

<b>Table 1 2018 Homeless Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2017</b>
Sheltered Homeless	8,398	6% Decrease
Unsheltered Homeless	22,887	5.3% Decrease
Total Homeless Persons	31,285	5.5% Decrease

Despite these efforts and the initial progress shown in 2018, the revised 2019 Homeless Count, released on July 22, 2020, unexpectedly documented a dramatic increase in the number of individuals experiencing both sheltered and unsheltered homelessness (LAHSA, 2020). *Table 2 - 2019 Homeless Count Data Summary* presents the data revealed by the 2019 Homeless Count concerning the City of Los Angeles (LAHSA, 2020).

<b>Table 2 2019 Homeless Count Data Summary (Revised 07/20/2020)</b>		
	<b>Number of Individuals</b>	<b>Change from 2018</b>
Sheltered Homeless	8,944	6.5% Increase
Unsheltered Homeless	26,606	16.2% Increase
Total Homeless Persons	35,550	13.7% Increase

LAHSA published its 2020 Homeless Count, released on July 20, 2020, which shows that the homelessness emergency in the City of Los Angeles continues. The documented number of individuals experiencing both sheltered and unsheltered homelessness dramatically increased yet again, as shown in *Table 3 - 2020 Homeless Count Data Summary* (LAHSA, 2020).

<b>Table 3 2020 Homeless Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2019</b>
Sheltered Homeless	12,438	39% Increase
Unsheltered Homeless	28,852	8.4% Increase
Total Homeless Persons	41,290	16.1 % increase

LAHSA prepared a 2021 shelter point-in-time count for the City of Los Angeles that estimated the number and demographic characteristics of the sheltered homeless population on a single night in January 2021. Released on July 20, 2021, it shows that the homelessness emergency in the City of Los Angeles continues and uncertain. The documented number of individuals experiencing sheltered homelessness increased yet again, as shown in *Table 4 - 2021 Housing Inventory Count and Shelter Count Data Summary* (LAHSA, 2021). The 2021 unsheltered street count could not be conducted due to the COVID-19 pandemic. However, the availability of vaccinations enabled the resumption of the Homeless Count for February 2022 with appropriate precautions (LAHSA, 2022).

<b>Table 4 2021 Housing Inventory Count and Shelter Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2020</b>
Sheltered Homeless	12,503	1% Increase

LAHSA published its 2022 Homeless Count, released on September 7, 2022, which shows that the homelessness emergency in the City of Los Angeles continues. The documented number of individuals experiencing sheltered homelessness dramatically increased yet again, while the documented number of unsheltered homelessness indicated a slight decrease as shown in *Table 5 - 2022 Homeless Count Data Summary* (LAHSA, 2022).

<b>Table 5 2022 Homeless Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2020</b>
Sheltered Homeless	13,522	8.72% Increase
Unsheltered Homeless	28,458	1.37% Decrease
Total Homeless Persons	41,980	1.67% Increase

LAHSA published its 2023 Homeless Count, released on June 29, 2023, which shows that the homelessness emergency in the City of Los Angeles continues. The documented number of individuals experiencing sheltered homelessness dramatically increased, while the documented number of unsheltered homelessness indicated a slight increase as shown in *Table 6 - 2023 Homeless Count Data Summary* (LAHSA, 2023).

<b>Table 6 2023 Homeless Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2022</b>
Sheltered Homeless	13,580	0.43% Increase
Unsheltered Homeless	32,680	14.84% Increase
Total Homeless Persons	46,260	10.2% Increase

Taken together, the unexpected and dramatic increase in homelessness, exacerbated by the COVID-19 pandemic, is an emergency in the City of Los Angeles. This situation presents documented dangers to health, life, and property and a burden on, and loss of access to, essential public services, which presents an emergency as defined by CEQA as explained below.

**III. THE PROJECT IS EXEMPT FROM FURTHER CEQA REVIEW**

**A. The Project is Exempt Pursuant to AB 1197 Codified at PRC Section 21080.27**

Assembly Bill 1197 (Santiago, 2019) was signed into law on September 26, 2019, which adopted Section 21080.27 of the California Public Resources Code (PRC) and created a statutory exemption for compliance with CEQA for emergency shelter projects located within the City of Los Angeles. The intent of PRC Section 21080.27 is to help the City of Los Angeles address its homeless crisis and is an urgency statute that is deemed necessary for the immediate preservation of the public peace, health, or safety and for the critical necessity to address the shelter and homeless crisis. AB 1197 took immediate effect on September 26, 2019 in order to address the unique circumstances faced by the City of Los Angeles and to expedite the development of emergency homeless shelters. As noted in the following sections, this shelter Project complies with the requirements in AB 1197, and thus the Project is exempt from CEQA pursuant to AB 1197 (PRC § 21080.27).

**1. City of Los Angeles Declaration of a Shelter Crisis**

PRC Section 21080.27(a)(2) requires that emergency shelters be approved during a shelter crisis under Government Code, section 8698.2. The City of Los Angeles City Council declared a homeless shelter crisis pursuant to Government Code Section 8698, et seq. on April 17, 2018 (The Honorable M. Bonin & M. O'Farrell, 2019), which is currently in effect (The Honorable M. Bonin & M. Harris-Dawson, 2019).

## **2. The Project Meets the Definition of a Low Barrier Navigational Center in Government Code Section 65660**

Under PRC Section 21080.27, emergency shelters must meet the definition of “Low Barrier Navigational Center” in Government Code Section 65660, which defines Low Barrier Navigation Center as a “Housing First, low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities, while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter and housing. The City builds and operates emergency shelters, such as this Project, to be operated as low barrier navigation centers consistent with Government Code Section 65660.

**Service-Enriched Shelter with Case Managers Connecting to Services.** The requirements are met by this Project for a “service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities, while case managers connect families experiencing homelessness to income, public benefits, health services, shelter and housing.” This Project provides temporary housing, with case managers staffing the facility that provide connections to homeless family services and assistance for the occupants. This is one of the fundamental purposes of this shelter project. For example, the Project’s programs include Trauma Informed Care policies and procedures that involve understanding, recognizing, and responding to the effects of all types of trauma. Trauma Informed Care also emphasizes physical, psychological and emotional safety for both families and providers, and helps families rebuild a sense of control and empowerment. Trauma Informed services take into account an understanding of trauma in all aspects of service delivery and place priority on the trauma survivor’s safety, choice, and control. Trauma Informed Care services create a culture of nonviolence, learning, and collaboration.

The Project will be operated by service providers coordinated with the Los Angeles Homeless Services Authority (LAHSA). The intention of this emergency shelter is to provide persons experiencing homelessness with some stability, so that they can more easily maintain contact with housing navigation and/or case management services to facilitate safe and supportive housing placement.

Per LAHSA’s Crisis and Bridge Housing Scope of Required Services, which will be followed for operating the shelter in this Project, service providers that oversee an emergency shelter must provide case management services and develop a Housing Stability Plan with each person. The shelter will program implement a case management and service plan known as Housing-Focused Case Management and Support Services (HFCMSS). HFCMSS includes but is not limited to: support with completing housing applications, accompanying the individual to housing appointments and/or leasing appointments, and other support associated with the housing placement process. The primary objective of HFCMSS is to extend support to individuals through an individualized case management relationship that will ultimately translate to increased housing stability. The HFCMSS offers services to connect individuals to permanent housing. Case

Managers present at the shelter make rapid connections to a broad continuum of resources and permanent housing, emphasizing a short-term stay.

HFCMSS connects families to a Housing Navigator who assists individuals to gain access to permanent housing through referrals to housing programs (such as RRH, Permanent Supportive Housing, affordable housing, etc.). A case manager is assigned to an individual when the person enters the program and then helps the participant establish a connection to a Housing Navigator. A Housing Navigator assists individuals with Housing Navigation services. Housing Navigation services are available to individuals to support their housing placement goals and must be focused on assisting the participant in identifying and accessing permanent housing within the general ninety (90) days. Housing Navigation services may be provided onsite or offsite, and may also require participants' to be accompanied to off-site appointments.

Case management must be conducted on a regular and routine basis and must be routinely documented. The content and outcome of case management meetings with individuals are entered into a housing management information system with case notes that are tracked in the system. Housing-focused case management sessions are dedicated to assessing and reassessing needs, educating individuals on community resource opportunities, developing Housing Stability Plans, scheduling appointments, and providing necessary follow up to ensure housing stability plans are progressing on schedule and needs are adequately being addressed.

As noted in LAHSA's Program Standards, supportive services for the shelters focus on the income, resources, skills and tools needed to pay rent, comply with a lease, take reasonable care of a housing unit, and avoid serious conflict with other tenants, the landlord, and/or the police. The Program Standards also require service providers to utilize and maintain referral networks with specific lists of health services and public benefit services for connecting occupants to those benefits. Thus, the project is a service-enriched shelter focused on moving individuals into permanent housing that provides temporary living facilities, while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter and housing.

**Housing First.** The Project is a "Housing First" shelter pursuant to Government Code Section 65660. Also, in being such a Housing First shelter, the project complies with Chapter 6.5 of Division 8 of the Welfare and Institutions Code (commonly referred to as the Housing First Law) as required by Government Code Section 65662 (discussed further below). "Housing First" means the evidence-based model that uses housing as a tool, rather than a reward, for recovery from homelessness, and that centers on providing or connecting people experiencing homelessness to permanent housing as quickly as possible. Housing First providers offer services as needed and requested on a voluntary basis and that do not make housing contingent on participation in services.

Housing First also includes time-limited rental or services assistance, so long as the housing and service provider assists the recipient in accessing permanent housing and in securing longer-term rental assistance, income assistance, or employment. In the event

of an eviction, programs shall make every effort, which shall be documented, to link tenants to other stable, safe, decent housing options. Exit to homelessness should be extremely rare, and only after a tenant refuses assistance with housing search, location, and move-in assistance. If resources are needed to successfully divert an individual from entry into the homelessness system, a referral must immediately be made to a CES Diversion/Prevention program. In order to identify other permanent housing options, service providers continue to have such problem-solving conversations with the individual while residing in Crisis and Bridge Housing. More broadly, the project includes a housing and services plan and housing-focused case management, both with an orientation towards supporting individuals to exit to safe and stable housing. This Project meets the above-noted Housing First requirements.

The emergency shelters are operated by service providers coordinated through LAHSA. All service providers must comply with LAHSA's Scope of Required Services, Program Standards, and Facility Standards. Per LAHSA's Program Standards, all eligible participants are to be served with a Housing First approach. LAHSA's CES for Families' Principles and Practices that were approved by the CES Policy Council on August 23, 2017 shall be used to guide the development of systems-level policy and to ensure transparent and accountable decision-making with privately owned Service Providers who enter into a partnership with LAHSA. The basic underlying principle of LAHSA's System Components is that access to housing is the primary need for its program participants. Services are voluntary and not required to enter into a shelter. Individuals will not be rejected or exited from participation in the emergency shelter due to any unnecessary barriers.

The City's shelters are intended to be a Housing First program focused on quickly moving individuals experiencing homelessness into permanent housing and then providing the additional supports and services each person needs and wants to stabilize in that housing. The basic underlying Housing First principle is that individuals are better able to move forward with their lives once the crisis of homelessness is over and they have control of their housing. The City's emergency shelter will, provide a safe, low barrier, housing-focused, and homeless services support in a twenty-four (24) hour residence to help individuals who experience homelessness that meet the above-noted requirements for Housing First. One of the core components of the Housing First model is that longer-term housing accepts referrals directly from shelters. The City's shelters, including this Project, are primarily focused on connecting, transitioning, and referring homeless individuals into such permanent housing as quickly as possible in the Housing First model, and accepting occupants through the crisis response system. The intention of this emergency shelter project is to provide participants with some stability, so that they can more easily maintain contact with housing navigation and case management services and facilitate safe and supportive housing placement. Services in the City's shelters, including this Project, are never mandatory and cannot be a condition of obtaining the housing intervention. This Project will provide temporary housing, case managers and Housing Navigators staffed at the facility or offsite who provide connections to homeless services for the occupants. Based on the above-noted information, the project's emergency shelter meets the Housing First requirements relative to AB 1197.

**Low Barrier.** “Low Barrier” means the shelters use best practices to reduce barriers to entry, including but not limited to, the presence of partners (if it is not a population-specific site, such as for survivors of domestic violence or sexual assault, women, or youth); pets; storage for possessions; and privacy (such as partitions around beds in a dormitory setting or in larger rooms containing more than two beds, or private rooms). The City’s shelters, including this Project, meet these requirements.

The Project provides approximately 75 beds for individuals experiencing homelessness. Participants are allowed to bring their pets to the shelter. The Project has storage pallet for personal possessions. The Project is designed to provide privacy to participants by providing doors and locks in each pallet. Therefore, the project is managed and designed to allow the privacy of participants, which allows for the presence of partners, and is a pet friendly facility for participants who choose to be accompanied by their pets.

The Project uses low barrier best practices that reduce barriers to entry. They include the allowance for presence of partners, pet friendly facilities, storage areas for some possessions, and management and design for individuals’ privacy. All of the City’s emergency shelters, including this project, meet these requirements. Therefore, none of the noted conditions would preclude access to the project, and the project is considered crisis and bridge housing that is “low barrier” within the meaning of Government Code Section 65660 and AB 1197.

In sum, based on the above-noted information, which is additionally explained and provided with additional details in the documents from LAHSA cited in the Reference section to this document, the Project meets the definition of Low Barrier Navigation Center set forth in Government Code Section 65660.

**3. The Project Complies with Government Code Section 65662**

Under PRC Section 21080.27, emergency shelters must meet the four requirements identified in Government Code Section 65662(a) through (d), which are each discussed in turn in this section.

**Connecting to Permanent Housing through a Services Plan.** Government Code Section 65662(a) requires that Low Barrier Navigation Centers offer services to connect families and individuals to permanent housing through a services plan that identifies services staffing. This Project meets that requirement. As noted above, the Project includes housing-focused case management sessions that involve developing Housing Stability Plans/Housing and Services Plans, scheduling appointments, and providing the necessary follow-up to ensure housing stability plans are progressing on schedule and needs are adequately being addressed. This is required in LAHSA’s Scope of Required Services.

The Housing Stability Plan is the family or individual’s service plan that summarizes the participant’s housing goals, services needed, what will be provided, actions that need to be taken (by staff and the participant), and referrals that need to be made. Case

managers develop the services plan in coordination with the family or individual right after intake and assessment, track the plan in a homeless management information system, and revise the plan as the family or person's situation changes and steps are completed or revised accordingly.

Families and individuals are assisted with a range of activities that address the stated goals of the family or individual in the Housing Stability Plan, including but not limited to:

- Accessing personal identification (For quick referral to permanent housing)
- Accessing certification of the current income (For quick referral to permanent housing)
- Mainstream Benefits
- Substance Abuse services
- Mental Health Services
- Health Services
- Vocational Services
- Employment Services
- Educational Support
- Legal Services
- Life Skills Development
- Independent Living Program for Youth
- Transitional Housing Program for Youth
- CES and CoC Rapid Re-Housing Program
- Housing Navigation Assistance
- CoC Permanent Supportive Housing
- LA County Department of Health Services, Housing for Health or Housing and Jobs Collaborative
- LA County Department of Health Services, Countywide Benefits Entitlement Services Team
- LA County Department of Mental Health, Countywide Housing Assistance Program
- Veterans Administration Housing Programs
- Housing Opportunities for Persons with Aids (HOPWA) Housing
- Crisis Housing for Unaccompanied Youth
- Youth Family Reconnection Program

Progress and problems implementing the plan are reviewed and updated frequently.

**Coordinated Entry System.** Government Code Section 65662(b) requires Low Barrier Navigation Centers to be linked to a coordinated entry system allowing staff and co-locating staff to conduct assessments and provide services to connect families and individuals to permanent housing. This is required by LAHSA's Scope of Required Services and Program Standards. Thus, all City of Los Angeles homeless shelters, including this project, are linked to the Los Angeles County Coordinated Entry System, a centralized or coordinated assessment system designed to coordinate program participant intake, assessment, and referrals. The residents are prioritized through the

coordinated entry system in the Los Angeles County Coordinated Entry System for safe and supportive housing resources. The City collaborates with Los Angeles County Case Entry System and provides case management services to program participants through a Housing Stability Plan. Case managers must develop a Housing Stability Plan in coordination with the participant right after intake and assessment. The Housing Stability Plan must be tracked in a Homeless Management Information System (HMIS) along with the date of completion.

The shelter will collaborate with Los Angeles County Case Entry System Housing Navigators and case managers from other outside agencies to provide case management services to program participants. Los Angeles County Coordinated Entry System case managers work with participants and assist by facilitating service appointments; and then eventually help them find permanent housing.

**Compliance with Welfare and Institutions Code.** Government Code Section 65662(c) requires Low Barrier Navigation Centers comply with Chapter 6.5 of Division 8 of the Welfare and Institutions Code, which specifies the Housing First requirements. As noted above, the City's emergency shelters, including this project, are Housing First shelters, and thus they comply with this requirement.

**Homeless Management Information System.** Government Code Section 65662(d) requires Low Barrier Navigation Centers to have a system for entering stays, demographics, income, and exit destinations through a local Homeless Management Information System designed to coordinate program participant intake, assessment, and referrals. These are required by LAHSA's Scope of Required Services and Program Standards. The City's emergency shelters use such a system in the Los Angeles Continuum of Care Homeless Management Information System (HMIS). In 2001, Congress directed the U.S. Department of Housing and Urban Development (HUD) to ensure the collection of more reliable data regarding the use of homeless programs. HUD required all Continuum of Care applicants to demonstrate progress in implementing a Homeless Management System (HMIS). LAHSA led a regional planning process, encompassing three Continuums of Care - Los Angeles, Glendale, and Pasadena. This process resulted in the selection of a system that would not only satisfy the HUD mandate, but would also provide the Los Angeles Continuum with a means to measure the effectiveness of programs serving homeless families. Presently, the Los Angeles Continuum of Care (LACoC) is part of a collaborative called the Los Angeles HMIS Collaborative. The LA HMIS Collaborative consists of three Continuums of Care (CoC): Los Angeles, Glendale, and Pasadena.

HMIS is a web-based application that is designed to collect information on the characteristics and service needs of homeless persons. The system allows agency users and the Los Angeles Homeless Services Authority (LAHSA) to use collected information for informed programmatic decision-making. Participating agencies collect and input standardized client-level and demographic data into the system, including client/household demographic details; relationships within a family and household; client/household income; client/household documents; case management and services;

housing placements; and progress for housing retention. The HMIS includes a focus on Outcomes Management that sets and measures milestones and target achievements of clients and program performance.

Housing Stability Plans are tracked in a Homeless Management Information System (HMIS) along with the date of completion. Case managers complete a Monthly Update with the family to assess progress towards achieving the goals defined in the Housing Stability Plan. All services must be tracked, and information is provided to families in HMIS with the goal of the individuals achieving housing stability and sustainability upon exit from the program. Exit destination information is also collected. Accordingly, the Project meets the HMIS requirements.

In sum, based on the above-noted information, which is additionally explained in more detail in the documents from LAHSA cited in the Reference section to this document, the Project meets the requirements set forth in Government Code Section 65662.

**4. The Project is in a Qualified Location Under PRC Section 21080.27**

The project is zoned OS with an Open Space land use, which is an on-residential zone that allows for multifamily uses under certain circumstances. (City of Los Angeles Department of City Planning, 2020). The Project site is also qualified as an infill site location because the site is currently developed with a bridge housing facility, and at least 75% of the perimeter of the site is surrounded by qualified urban uses. Commercial uses are located to the north and east, open space with public institutional uses, a public park to the south; and a transportation use, the Hollywood Freeway to the west. The Project site is in a qualified location under PRC Section 21080.27. (City of Los Angeles Department of City Planning, 2023)

**5. The Project Involves Qualified Funding Under PRC Section 21080.27**

PRC Section 21080.27(a)(2)(A)-(D), exempts emergency shelter projects from CEQA which have at least a portion of the funding from qualified sources. Construction funds for this project included Homeless Emergency Aid Program (HEAP) funds. Because the Project is partly funded by a qualified funding source under PRC Section 21080.27(a)(2)(A), the funding requirement is met.

**6. The City’s Actions Qualify under PRC Section 21080.27 as Actions in Furtherance of Providing Emergency Shelters in the City of Los Angeles**

PRC Section 21080.27(b)(1)), exempts from CEQA “any activity approved by or carried out by the City of Los Angeles in furtherance of providing emergency shelters or supportive housing in the City of Los Angeles.” This Project involves a lease or other agreement, and continued operation of an existing bridge housing. The City will provide funding and enter into contracts with a qualified service provider, e.g., PATH, and/or LAHSA, to lease and operate the emergency shelter. Therefore, the City’s actions are in

furtherance of providing emergency shelters in the City of Los Angeles and qualify for exemption from CEQA under PRC Section 21080.27.

### **7. PRC Section 21080.27 Conclusion**

Based on the above-noted information, the Project is exempt from CEQA pursuant to PRC Section 21080.27.

#### **B. The Project is Exempt Pursuant to the Emergency CEQA Statutory Exemption (PRC Section 21080(b)(4))**

PRC Section 21080(b)(4) provides that CEQA does not apply to “specific actions necessary to prevent or mitigate an emergency.” Public Resources Code section 21060.3 defines Emergency as, “a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to, life, health, property, or essential public services.” Section 21060.3 further provides that Emergency, “includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage.”

Finally, 14 California Code of Regulations (Governor's Office of Planning and Research, 2018) Section 15269, “Emergency Projects,” provides examples of emergency projects exempt from the requirements of CEQA, including the following:

(c) Specific actions necessary to prevent or mitigate an emergency. This does not include long-term projects undertaken for the purpose of preventing or mitigating a situation that has a low probability of occurrence in the short-term, but this exclusion does not apply

(i) if the anticipated period of time to conduct an environmental review of such a long-term project would create a risk to public health, safety or welfare, or

(ii) if activities (such as fire or catastrophic risk mitigation or modifications to improve facility integrity) are proposed for existing facilities in response to an emergency at a similar existing facility.

On December 12, 2022, City of Los Angeles Mayor Bass declared a homelessness emergency in the City of Los Angeles. She specifically stated that she “declare[s] the existence of a local emergency and direct[s] all Divisions of the Emergency Operations Organization (EOO) and all other City Departments to take necessary steps for the protection of life, health and safety in the City of Los Angeles.” (City of Los Angeles, Dec. 12, 2022.) The Mayor’s declaration discussed how the homelessness crisis created a dramatic unanticipated impact on the population, and how it displaced people even greater than major hurricanes and earthquake events, all of which are emergencies requiring prompt action to avoid clear and imminent danger to the displaced populations. The City Council ratified the declaration. (CF No. 22-1545.)

On July 7, 2023, Mayor Bass, again, declared a local housing and homelessness emergency because “the City still finds itself in an emergency” with emergency conditions continuing to require prompt abatement due to the severe shortage of beds available to the unhoused population. (City of Los Angeles July 7, 2023.) The Mayor noted the City “is acting with urgency” to provide shelter for the homeless, and she “declare[d] the existence of a local emergency on affordable housing and homelessness and direct[ed] all City Departments to take necessary steps for protection of life, health and safety in the City of Los Angeles.” (City of Los Angeles, July 7, 2023.) In a press release, the Mayor added “It’s no secret that Los Angeles is facing an emergency when it comes to homelessness. This is an issue of life and death for the thousands of people who are living in tents and cars. That’s why I signed an updated declaration of emergency and have continued to lock arms with the City Council to maintain our momentum toward confronting homelessness and building more affordable housing.” (City of Los Angeles, July 10, 2023.)

The Project is a specific action necessary to prevent or mitigate an emergency – the conditions arising from a sudden and unexpected dramatic rise in the City’s already dangerously large homeless population, also adversely impacted by the COVID-19 pandemic for all of the reasons set forth above in Part II (Project History). The dramatic rise in the homeless population is a sudden unexpected occurrence, as is the unexpected and sudden occurrence of losing access to adequate shelter and essential services for each individual newly experiencing homelessness, as is the unexpected rise in mortality rates among the homeless population since 2019. Each is an emergency presenting impending acute harm to the individuals experiencing homelessness that would be prevented and mitigated through providing housing to those individuals, including through the emergency shelter provided by this Project. The Project, therefore, is exempt from CEQA environmental review pursuant to PRC Section 21080(b)(4), since it prevents and mitigates such imminent loss and damage.
