******PLEASE REVIEW REFERRAL PROCESS POLICY******

The Stanislaus County Department of Planning and Community Development is soliciting comments from responsible agencies under the Early Consultation process to determine: a) whether or not the project is subject to CEQA and b) if specific conditions should be placed upon project approval.

Therefore, please contact this office by the response date if you have any comments pertaining to the proposal. Comments made identifying potential impacts should be as specific as possible and should be based on supporting data (e.g., traffic counts, expected pollutant levels, etc.). Your comments should emphasize potential impacts in areas which your agency has expertise and/or jurisdictional responsibilities.

These comments will assist our Department in preparing a staff report to present to the Planning Commission. Those reports will contain our recommendations for approval or denial. They will also contain recommended conditions to be required should the project be approved. Therefore, please list any conditions that you wish to have included for presentation to the Commission as well as any other comments you may have. Please return all comments and/or conditions as soon as possible or no later than the response date referenced above.

Thank you for your cooperation. Please call (209) 525-6330 if you have any questions.

Applicant: Benjamin Gomez and Gloria Esquivias
Project Location: 902 California Avenue, between Seybold Avenue and the Modesto Irrigation District Lateral No. 5 canal, in the Modesto area
APN: 030-014-022
Williamson Act Contract: N/A
General Plan: Low Density Residential
Current Zoning: Single-Family Residential (R-1)

Project Description: Request to subdivide a 1-acre± parcel into two parcels, 8,726± and 36,808± square feet in size, in the Single-Family Residential (R-1) zoning district. The current parcel receives both public sewer and water services from the City of Modesto. If approved, both proposed parcels will be connected to the available public sewer and water facilities from the City of Modesto. Proposed Parcel 1 is improved with a single-family dwelling and Proposed Parcel 2 is improved with an existing detached garage and barn; however, in accordance with Stanislaus County Zoning Ordinance Section 21.28.020(B), accessory buildings are permitted when normally incidental to single-family residences. In the case where an accessory building will be located on a separate parcel after subdivision, the structure will be required to be demolished prior to recording of the

map. If approved, each structure will meet all setback and lot coverage requirements of the R-1 zoning district. The parcel is located within the Local Agency Formation Commission (LAFCO)-adopted Sphere of Influence (SOI) for the City of Modesto. If approved, both proposed parcels have access to County-maintained Seybold and California Avenues. The garage on Proposed Parcel 2 has a driveway onto Seybold Avenue.

We have conducted a non-confidential extended records search as per your request for the above-referenced project area located on the Salida USGS 7.5-minute quadrangle map in Stanislaus County.

Search of our files includes review of our maps for the specific project area and the immediate vicinity of the project area, and review of the following:

National Register of Historic Places (NRHP)

California Register of Historical Resources (CRHR)

California Inventory of Historic Resources (1976)

California Historical Landmarks

California Points of Historical Interest listing

Office of Historic Preservation Built Environment Resource Directory (BERD) and the

Archaeological Resources Directory (ARD)

Survey of Surveys (1989)

Caltrans State and Local Bridges Inventory

General Land Office Plats

Other pertinent historic data available at the CCaIC for each specific county

The following details the results of the records search:

Prehistoric or historic resources within the project area:

- There are no formally recorded prehistoric or historic archaeological resources or historic buildings and structures within the project area.
- The 1854 edition of the General Land Office survey plat for T3S R9E shows Section 31 divided into parcels of various acreage, with the SE ¼ shown as a 160-acre parcel. No historic features are referenced.

- The Official Map of the County of Stanislaus, California (1906) shows California Avenue, with historic Lateral No. 5 to the west of the project area, and the SE ¼ of Section 31 divided into numerous small parcels.
- The 1915 edition of the Salida USGS 7.5' quadrangle shows California Avenue and Lateral No. 5 to the west.
- The 1953 edition of the Salida USGS quadrangle also shows Seybold Avenue and a building within the project area that would be 70 years in age (or older). We have no further information on file regarding this possible historical resource.

Prehistoric or historic resources within the immediate vicinity of the project area: None has been formally reported to the Information Center.

Resources that are known to have value to local cultural groups: None has been formally reported to the Information Center.

Previous investigations within the project area: None has been formally reported to the Information Center.

Recommendations/Comments:

Please be advised that a historical resource is defined as a building, structure, object, prehistoric or historic archaeological site, or district possessing physical evidence of human activities over 45 years old. Since the project area has not been subject to previous investigations, there may be unidentified features involved in your project that are 45 years or older and considered as historical resources requiring further study and evaluation by a qualified professional of the appropriate discipline.

If the current project does not include ground disturbance, further study for archaeological resources is not recommended at this time. If ground disturbance is considered a part of the current project, we recommend further review for the possibility of identifying prehistoric or historic-era archaeological resources.

If the proposed project contains buildings or structures that meet the minimum age requirement (45 years in age or older) it is recommended that the resource/s be assessed by a professional familiar with architecture and history of the county. Review of the available historic building/structure data has included only those sources listed above and should not be considered comprehensive.

If at any time you might require the services of a qualified professional the Statewide Referral List for Historical Resources Consultants is posted for your use on the internet at <http://chrisinfo.org>

If archaeological resources are encountered during project-related activities, work should be temporarily halted in the vicinity of the discovered materials and workers should avoid altering

the materials and their context until a qualified professional archaeologist has evaluated the situation and provided appropriate recommendations. Project personnel should not collect cultural resources.

If human remains are discovered, California Health and Safety Code Section 7050.5 requires you to protect the discovery and notify the county coroner, who will determine if the find is Native American. If the remains are recognized as Native American, the coroner shall then notify the Native American Heritage Commission (NAHC). California Public Resources Code Section 5097.98 authorizes the NAHC to appoint a Most Likely Descendant (MLD) who will make recommendations for the treatment of the discovery.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the State Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the CHRIS Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.
