Project Description: (please use a separate page if necessary)

The proposed project would reconfigure the existing Vallejo Ferry Terminal on the eastern shore of the Mare Island Strait, within the footprint of the existing ferry terminal and basin area. The proposed terminal would remove and replace 5,322 sf of existing gangway, passenger float, and piles with a new reconfigured four-section fixed pier and gangway extending from the existing ferry terminal access point, passenger float, and piles. The new passenger float would be approximately 134.5 feet by 42 feet, run parallel with the flow of Mare Island Strait, and accommodate two vessels at a time for passenger loading and unloading. The proposed project would facilitate a reduction in the need for regular dredging maintenance at the Vallejo Ferry Terminal.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
