Project Description (Proposed actions, location, and/or consequences).

Request for a Use Permit (UP-24;4-1) to install a 90-foot-tall monopine design wireless communication tower with 9 panel antennae and associated tower and ground equipment, within a 30' x 30' enclosed lease area. (APN 021-390-006).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Impacts to Aesthetics, Biological, Cultural, and Tribal Cultural Resources would be significant unless mitigated. Therefore, Mitigation Measures AES-1, BIO-1, BIO-2, CULTR-1, CULTR-2, CULTR-3, and TRI-1 are required of the project.

The implementation of the Mitigation Measures identified above would result in less than significant impacts to the chapters mentioned above. Therefore, the project will not degrade the quality of the environment and no habitat, wildlife populations, and plant and animal communities would not be greatly impacted. All environmental topics are either considered to have "No Impact," "Less Than Significant Impact," or "Less than Significant Impacts with Mitigation Incorporated."

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
