**Project Description:** *(please use a separate page if necessary)*

The Project proposes a 566.56-foot-long sewer station and pipeline that would be located underground and run from the southwest to the northeast of the Project site. The Project would connect the valve vault to the discharge manhole to CSD. The Project would also require an electrical conduit to be built underground along with the pipeline. The electrical conduit would extend from Houston Drive to the end of a dirt road approximately 500 feet northwest from Edelweiss Drive. The Project pipeline and connecting structures, along with the electrical conduit, are owned and operated by the Project applicant.

*Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.*
