

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____
San Bernardino County Animal Care Center Project No. PER-2024-00027

Project Title: _____
San Bernardino County

Email: _____ Phone Number: _____

Project Location: _____
Bloomington, San Bernardino County
City County

Project Description (Proposed actions, location, and/or consequences).

The County is proposing to relocate all small animal care services from Devore to the project site located in Bloomington. The project site has with sufficient area and ease of access to support the County's goals in continuing to provide excellent animal care services to County residents. The Devore Animal Shelter has currently exceeded its useful life span and is unable to accommodate the growth required due to existing facility deterioration, limited wastewater and sewage capacity, remote location and other factors. Thus, this project is proposed to enhance services and expand capacity and additional work areas to accommodate the growth of the Animal Care Division. The new facility is planned to, on average, house up to 240 dogs and 266 cats and 56 other animal species on any given day.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Mitigation is required to minimize impacts under Air Quality (Valley Corridor Specific Plan [VCSP] mitigation intended to protect air emissions through use of Tier 4 equipment; dust control; low VOC paint; Energy Star Appliances); Biological Resources (minimizing impacts to nesting birds and burrowing owl); Cultural Resources (minimizing impacts to any unknown buried cultural resources, including human remains); Geology and Soils (ensure geotechnical design measures are implemented; prevent soil erosion/instability, ensure paleontological resources are protected upon any accidental discovery); Hazards and Hazardous Materials (Hazardous Materials Business Plan; remediation in the event of accidental spills;); Hydrology and Water Quality (reduce stormwater runoff impacts/drainage management); Noise (VCSP mitigation to minimize construction noise); Tribal Cultural Resources (ensure Tribal Consultation mitigation measures are implemented, including monitoring and contact with the tribes if resources are discovered)

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known

Provide a list of the responsible or trustee agencies for the project.
