

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Idyllwild Wastewater Treatment Plant Improvement Project

Lead Agency: Idyllwild Water District (IWD)

Contact Name: Curt Sauer

Email: GM@idyllwildwater.com

Phone Number: 951 659 2143

Project Location: Idyllwild

City

Riverside

County

Project Description (Proposed actions, location, and/or consequences).

The proposed project would improve the Idyllwild WWTP to meet existing and future discharge requirements efficiently and consistently for the Idyllwild community. The proposed project consists of the following improvements: Headworks to include new flume and splitter box; additional equalization for heavy precipitation events/two new secondary treatment bioreactors; new sludge holding tank and new sludge handling system; new supervisory control and data acquisition (SCADA) system to integrate controls for plant; new blowers and associated controls in existing blower room; and, new generator and automatic transfer for standby power.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Nesting Birds potentially impacted. Mitigation Measure BIO-1 would require preconstruction nesting surveys if construction occurs during nesting season (February 1 to August 31).

Special-Status Plant Species potentially impacted. Mitigation Measure BIO-2 requires focused surveys for special-status plants during the normal blooming period for target species.

Unknown Archaeological Resource potentially impacted. Mitigation Measure CUL-1 would require all work to stop within 100 feet if previously unknown resource is located. Qualified professional archaeologist may be retained to evaluate the find if necessary.

Tribal Cultural Resources. Due to the location of the project being within proximity to Cahuilla Band of Indians potential sensitive areas, Mitigation Measure TCR-1 would be implemented requiring a Cahuilla Band of Indians monitor at the side during project construction activities occurring on original ground (natural/non-fill soils).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known.

Provide a list of the responsible or trustee agencies for the project.
