Project Description (Proposed actions, location, and/or consequences).

The California Department of Transportation (Caltrans) proposes to replace and grind lanes, conduct a random slab replacement, replace outside shoulders, reconstruct the median, cold plane and overlay, upgrade metal beam guard rails, upgrade curb ramps to Americans with Disability Act (ADA) standards, construct a Gross Solids Removal Device (GSRD) trash capture device, install fiber optic cable systems, and improve roadside safety at gore areas. The project is located along Interstate 10 (I-10) from Post Mile (PM) 0.0 to PM 4.40 in Riverside County. All work is anticipated to be conducted within Caltrans right of way.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The following mitigation measure will be incorporated for the proposed Project:

WET-1 To mitigate for permanent impacts to jurisdictional waters, Caltrans will pursue purchasing mitigation credits through a mitigation bank. If pursuing mitigation bank credits does not prove feasible, Caltrans shall pursue and secure lands with jurisdictional water features that meet mitigation requirements for the Project.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
