Present Land Use/Zoning/General Plan Designation:

Public street right-of-way, easements, or other public land; Numerous land use designations in various jurisdictions.

Project Description: (please use a separate page if necessary)

The Project will include the installation of fiber optic cable in various locations throughout the County. High-level network designs for last-mile connections have been prepared for four Priority Areas, while an additional five Priority Area locations are looking to be advanced for high-level network design (total of 9 Priority Areas identified). Components to be installed/constructed within the four Priority Areas include the following: broadband conduit (i.e., rigid casing to protect fiber optic cables from physical damage and the elements) with diameters between 3/4-inch and 2 inches to be installed within road rights-of-way (ROWS); aboveground, prefabricated walk-in hut/shelters made of aggregate wall materials; small aboveground steel distribution cabinets/enclosures; distribution fiber, splice points, and drops; drop hubs; and small underground structures such as hand holes. Additional Project components that may be necessary to connect end-users to the middle-mile broadband network may include: utility poles with aerial fiber and connection points; underground fiber markers; and signage. Once constructed, the broadband network components would generally operate passively, with only incidental maintenance typically consisting of weed abatement and periodic accessing of hand holes and splice cases from the ground surface along a given alignment.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
