**Re: CAN AND WILL SERVE LETTER  
200 Madera Street, Los Osos - APN 074-483-009  
3,890 sq. ft. Single Family Residence**

This letter is to inform you that Golden State Water Company (GSWC) will be able to provide domestic and fire protection water service to the proposed 3,890 sq. ft. single-family residence located at 200 Madera Street in GSWC's Los Osos ("Project"), subject to the requirements listed below. As a general matter, GSWC's ability to extend water service to new customers is done pursuant California Public Utilities Commission's approved rules and regulations applicable to GSWC.

The Los Osos community, specifically the Los Osos Water Basin has been impacted by water resource issues for many years. The legal judgement of Los Osos Community Service District v. Golden State Water Company, S&T Mutual Water Company and County of San Luis Obispo referred to as "Stipulated Judgement" approved the Los Osos Basin Plan. As a party to the Stipulate Judgement GSWC is required to abide by the terms of the judgement. Therefore, this project may be subject to various improvements identified in the Los Osos Basin Plan to ensure the integrity of the local groundwater supply.

You are responsible for providing GSWC with an accurate count of water fixtures for all proposed buildings and irrigation sprinkler and bubbler heads to ensure proper sizing of the water meter. Please provide this information along with the Application for Water Service to Natalie Correa. GSWC will install a water meter to the property after the following items have been completed:

1. Completed Application for Water Service is submitted to GSWC.
2. Construction Permit is issued by County of San Luis Obispo and a copy submitted to GSWC.
3. The necessary piping to make the connection from the meter to the place of consumption is installed.

This Can and Will Serve commitment expires one year from the date of this letter. If construction of the Project has not started within one year, a time extension may be

requested. Such time extension will be subject to any requirements in place at the time of the request.

Sincerely,

Kenneth Brown, P.E.  
Operations Engineer  
Coastal District

cc: Matt Cook, GSWC
