1. Project Title:	Ridgeview Terrace Emergency Water Main Replacement
2. Project Applicant:	Tom Moody, Director of Utilities
3. Project Location – Identify Street address and cross streets or attach a map showing project site (preferably a USGS 15' or 7 1/2' topographical map identified by quadrangle name):	Ridgeview Terrace, a section on Via Santiago, and four cul-de-sac sections adjacent to Ridgeview Terrace, Corona, CA 92881
4. (a) Project Location – City:	Corona, California
(b) Project Location – County:	Riverside
5. Description of nature, purpose, and beneficiaries of Project:	The Ridgeview Terrace Emergency Water Main Replacement Project involves the replacement of approximately 3,510 feet of an aging 6-inch Asbestos Cement Pipe with a modern 8-inch Ductile Iron Pipe along Ridgeview Terrace, a section on Via Santiago, and four cul-de-sac sections adjacent to Ridgeview Terrace. This replacement addresses persistent service interruptions and flooding by enhancing the potable water distribution system's reliability, water quality, and capacity. Aimed at significantly benefiting Corona's residents, the project ensures a dependable and safe water supply, contributing to the City's public health and safety. Operational staff and the broader community will experience improved system efficiency and reduced maintenance demands, affirming the City of Corona's commitment to sustainable infrastructure development.
6. Name of Public Agency approving project:	City of Corona

9.	Reason why project was exempt:	The Ridgeview Terrace Emergency Water Main Replacement qualifies for exemption under CEQA because it constitutes a minor alteration to an existing utility system without significant expansion of use. The project specifically involves the replacement of an outdated and failure-prone 6-inch Asbestos Cement Pipe with a new, more reliable 8-inch Ductile Iron Pipe. This action is undertaken within the existing infrastructure footprint on Ridgeview Terrace, a section on Via Santiago, and four cul-de-sac sections adjacent to Ridgeview Terrace and is designed to improve the reliability, water quality, and capacity of the City's potable water distribution system. The replacement falls squarely within routine maintenance and infrastructure upgrading activities, aimed not at expanding the water system's capacity but at ensuring its continued efficient operation and safety for the public. Furthermore, the project is not expected to have significant environmental impacts, as it utilizes the existing roadway and utility corridors, maintaining the current use and avoiding any significant alteration of the landscape.
