Authority cited: Section 21083, Public Resources Code. Reference: Section 21161, Public Resources Code.

Project Description:

The project includes adoption of an ordinance amending Title 84 of the Coronado Municipal Code (CMC) and adoption of a Historic Context Statement and Historic Resources Inventory (hereinafter referred to as the Historic Property Survey). Specifically, the project would update CMC Chapter 84.10, Historic Resource Code, to provide updated criteria for the City of Coronado's (City's) definition and determination of historical significance. Multiple sections of the Historic Resource Code could be revised to remove structures referred to in the Historic Resources Inventory as a Tier 3 property from further historic review.

To inform the proposed Historic Resource Code amendments, a Historic Property Survey was prepared. The Historic Property Survey was focused on the City's historic core and excludes Naval Air Station North Island, the U.S. Navy Amphibious Base, Port of San Diego property, state or federally owned property located within the City limits, and other sections of the City, such as the Coronado Cays. The Historic Property Survey evaluated properties under CMC Section 84.10.030, Criterion C to identify whether structures possess distinctive characteristics of an architectural style that have not been substantially altered (CMC Section 84.10.030(C)). While Criterion C is only one of the five criteria cited in CMC Section 84.10.030, Criterion C served as the basis of the Historic Property Survey as it was the most readily identifiable criterion that could be accomplished with reasonable effort, and because it was a criterion applied in nearly all—90.2 percent—of Historic Designation determinations. The purpose of the Historic Property Survey was to provide an architectural evaluation of properties, in an effort to identify potentially architecturally significant resources and reduce the number of properties that would be required to go through an in-depth historical review process based on the City's current Determination of Historic Significance. The Historic Property Survey defined three tiers relative to whether they may meet the Criterion C significance related to original architectural appearance, as follows:

- Tier 1 - Unaltered or minimally altered from historic condition and potentially eligible for City designation under Criterion C.
- Tier 2 - Recognizable as a particular architectural style but based on observation and/or construction history are more than "unaltered or minimally altered" from historic condition and do not appear to be eligible for historic designation under Criterion C.
- Tier 3 - Substantially altered properties that retain little to no elements of a particular architectural style and, based on observation and/or construction history, are not eligible for historic designation under Criterion C.

The Historic Property Survey identified a total of 1,667 Tier 3 properties categorized as follows: 1,007 structures built in 1949 or earlier and another 660 structures built between 1950 to 1970. With adoption of the amendments to the CMC, Tier 3 structures as defined by the Historic Property Survey would no longer require further historic review.
