

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Haynes Generating Station Sewer Force Main Project

Lead Agency: Long Beach Utilities Department

Contact Name: Dennis Santos

Email: dennis.santos@lbwater.org

Phone Number: 562-5570-2381

Project Location: Long Beach
City

Los Angeles County
County

Project Description (Proposed actions, location, and/or consequences).

The Project includes the construction of a new 12-inch diameter sewer force main that would extend from Los Angeles Department of Water Power (LADWP) Haynes Generating Station (HGS) to an existing Los Angeles County Services District (LACSD) 42-inch sewer main located at the LACSD's Long Beach Water Reclamation Facility. The Project would facilitate the beneficial reuse of up to 2.766 million gallons per day (MGD) of industrial wastewater discharge and 0.075 MGD of on-site storm water runoff (for a total of 2.841 MGD) from the HGS to LACSD's Long Beach Water Reclamation Facility. Total pipeline installed would be 17,000 feet using a combination of trenching and trenchless construction methods. A flow control/pressure reducing station consisting of an above grade or partially buried structure not to exceed 300 square feet would be constructed at the Long Beach Water Reclamation Facility. In addition, the LACSD proposes to expand its SOI to include the HGS, which are located on Assessor Parcel Numbers 095-681-19, 7237-018-270 and 7237-019-270. and annex the HGS. In conjunction with the LACSD's SOI amendment, the LACSD is proposing the concurrent annexation of LADWP's HGS property into the LACSD's Sanitary District Number 19 service area.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

No significant impacts would occur. Less than significant impacts with mitigation incorporated, would occur for the following topic areas: aesthetics, biological resources, geology and soils, hydrology and water quality, noise, cultural resources, transportation, hazards and hazardous materials, public services, and mandatory findings of significance.

Proposed mitigation measures include screening staging areas and restoring construction areas; incorporating visual design elements; light and glare reduction; pre-construction nesting bird and bat surveys; tree trimming permitting; worker environmental and cultural training; Native American monitoring; archaeological, cultural, tribal resource, paleontology, and hazardous material discovery clauses; preparation of a geotechnical report; pipeline failure contingency measures; preparation of a stormwater pollution prevention plan; noise and vibration reduction; and preparation of a traffic control plan.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy were identified during the initial scoping process for this initial study and none have been identified during preparation of this document.

Provide a list of the responsible or trustee agencies for the project.

Responsible Agency: Los Angeles Department of Water and Power, Los Angeles Department of Water and Power (LADWP), City of Seal Beach, Los Angeles County Sanitation District (LACSD), California Department of Transportation (District 7)

Trustee Agency: California Department of Fish and Wildlife (CDFW)
