Project Description (Proposed actions, location, and/or consequences).

The San Francisco Public Utilities Commission (SFPUC) is proposing construction of a new City Water Distribution Division campus at 2000 Marin Street in the Bayview District of San Francisco. The project would demolish the existing building and parking lot on the project site and construct six buildings, totaling 370,850 square feet, including various uses and facilities such as administrative offices, electrical, landscaping, carpentry, machine, auto and meter shops, a warehouse, a parking garage, and a fueling station. The proposed buildings range from one to six stories and from 20 to 60.5 feet in height.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Initial Study identifies resource protection measures and standard construction measures that would be implemented by the city to reduce potential project impacts across the following topics:

Cultural Resources

Noise

Air Quality

Geology/soils

Hazardous Materials

Mandatory Findings of Significance

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.
