

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: NorthStar 3 Solar and Battery Storage Project

Lead Agency: Imperial County Planning and Development Services Department

Contact Name: Gerardo Quero, Planner II

Email: gerardoquero@co.imperial.ca.us Phone Number: 442.265.1736

Project Location: Salton City Area Imperial  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The project applicant is proposing two conditional use permits (CUP) to allow for the construction and operation of a 100-megawatt (MW) solar photovoltaic (PV) facility and a 200-MW battery energy storage system (BESS) on a project site currently zoned open space/preservation (S-2). The project is proposed to connect to the electrical grid via an existing on-site transmission line. The existing IID 161 kV "L" Line traverses the site, generally extending from the northwestern portion of the site to the southeastern portion of the site. Construction and operational water supply is proposed via a new groundwater well which would be drilled and operated on-site.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

BIO: Special-status plant and wildlife have the potential to occur within or near the project site. There is also potential for the project to impact existing wildlife corridors. Implementation of MMs BIO-1 through BIO-9 would reduce potential impacts.  
CUL: There is potential of finding a buried archaeological site and encounter subsurface human remains during project construction; implementation of MMs CR-1 and CR-2 would reduce potential impacts.  
GEO: The project site is located within an area where paleontological sensitivity is considered to be high; implementation of MM GEO-1 would reduce potential impacts.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None have been expressed at this time.

Provide a list of the responsible or trustee agencies for the project.

- California Regional Water Quality Control Board
- California Department of Fish and Wildlife
- U.S. Fish and Wildlife Service
- Imperial County Air Pollution Control District
- Imperial County Public Works Department
- Imperial County Fire Department
- Imperial Irrigation District
