Placerville, CA 95667

**From:** El Dorado Irrigation District  
2890 Mosquito Road  
Placerville, CA 95667

**Project Title:** Wastewater Collections SCADA and PLC Upgrades Project

**Project Location - Specific:** Various sites within EID's service area

**Project Location - City:** Placerville

**Project Location - County:** El Dorado County

**Description of Project:** The El Dorado Irrigation District (District) proposes to upgrade communication equipment at existing wastewater lift stations throughout its service area. The District maintains 60 wastewater lift stations that have varying genres of on-site programming that automatically operate equipment at the lift stations and relay information to telemetry equipment, providing staff the ability to remotely view alarms, statuses, and data trends at each of the stations. The work involves upgrades to the Supervisory Control and Data Acquisition (SCADA) system and the Programmable Logic Controller (PLC) that together manage control signals and telemetry at the lift stations. New equipment includes converters, radios, coax cables, antennas, and other miscellaneous parts. The new equipment will be operated in tandem with the existing equipment, which will allow work at individual sites to be completed without disrupting ongoing operations. District crews will install the new equipment with support from a consultant to assist with hardware integration. All construction activities will occur within the existing facilities and involve no new ground disturbing activities.

**Name of Public Agency Approving and Carrying Out Project:** El Dorado Irrigation District

**Exempt Status:**

Categorical Exemption: Class 1 - Existing Facilities (CCR, Title 14, Sec. 15306)

**Reasons why project is exempt:** The project consists of maintenance of communications equipment located within existing facilities and involves no expansion of existing or former use. None of the applicable exceptions to this exemption, as identified under CCR, Title 14 section 15300.2, are valid for this project, including location in an area of critical concern, significant effect due to unusual circumstances, scenic highways, hazardous waste sites, cumulative effect, and historical resources.
