Sacramento, California 95826

Project Title: Emergency Permit for Treatment of Hazardous Waste, Materia, Inc, Pasadena, California

Project Location: 60 North San Gabriel Boulevard, Pasadena, California 91107

County: Los Angeles

Project Applicant: Paul Raphael, EHS Lead

Approval Action Under Consideration by DTSC: Emergency Permit

Statutory Authority: California Health and Safety Code, Chapter 6.5

Project Description: The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations (CCR), Title 22, Division 4.5, Chapter 20, Sec. 66270.61, has issued an Emergency Permit to the Materia, Inc, (EPA ID# CAR000184796) to treat hazardous wastes through a controlled reaction with chemical solutions. Specifically, one (1) 1-ounce container of ethyl vinyl ether; one (1) 1-liter container of tetramethylene monovinyl ether; one (1) 100-milliliter container of styrene; five (5) 1-liter containers of divinylbenzene; one (1) 1-liter container of methyl styrene; three (3) 100-gram and one (1) 220-gram containers of sodium amide; one (1) 25-gram container of 2,4 dinitrophenylhydrazine; one (1) 100-gram container of p-toluenesulfonylhydrazine; one (1) 100-gram, one (1) 1-gram, and two (2) 25-gram containers of 2,2 azobisisobutyronitrile; one (1) 500-milliliter container of borane tetrahydrofuran; and three (3) 500-gram containers of benzoyl peroxide must be stabilized prior to transport to an authorized hazardous waste treatment, storage, and disposal facility.

These chemicals are currently being stored at Materia, Inc located at 60 North San Gabriel Boulevard, Pasadena, California 91107. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous wastes prior to storage and eventual transportation off-site by Clean Harbors Environmental Services (Clean Harbors).

State of California – California Environmental Protection Agency
Department of Toxic Substances Control

Background: The containers have peroxide formation present on either the inside, outside, or the bottom of the chemicals' containers, as well as the thread container caps. The presence of peroxide formation may be unstable at relatively low concentrations, resulting in fire and/or explosion if improperly handled. The chemicals noted above also include shock and/or temperature sensitive material which can decompose or detonate with external energy when dry or concentrated. Solids are also prone to explosive decomposition if ground, for example with pestle and mortar. Due to the presence of peroxide formation and shock and/or temperature sensitive material, DTSC considers these chemicals to be an imminent and substantial endangerment to human health and the environment. Chemical stabilization is recommended prior to transport to a permitted treatment, storage, and disposal facility.

Project Activities: The treatment of these hazardous wastes involves the addition of solutions to the containers in a controlled manner to reduce the reactive or ignitable characteristics of the chemicals. Treatment will take place within a designated exclusion zone. Only technicians from CHES will be allowed in the exclusion zone. Movement, preparation, and treatment of the containers will be in accordance with established standards.

Within 10 business days of the expiration of this permit, Materia, Inc will submit a final report, signed in accordance with Title 22, CCR Sec. 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed. The Emergency Permit is effective beginning July 23, 2024, and shall expire on September 20, 2024.

Name of Public Agency Approving Project: Department of Toxic Substances Control

Name of Person or Agency Carrying Out Project: Clean Harbors Environmental Services

Exempt Status: Emergency Project [Public Resources Code (PRC), Sec. 21080(b)(4); 14 CCR, Sec.15269(b)(c)]

Reasons Why Project is Exempt: This action is necessary to prevent an emergency. Chemical stabilization of the chemicals is necessary prior to transportation to an authorized hazardous waste treatment, storage, and disposal facility to prevent accidental fire and/or explosion during transport.
