

ATTACHMENT TO SUMMARY FORM

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources, continued.

Substantial adverse effect on any riparian habitat or other sensitive natural community. Applicable mitigation: MM BIO-10: Implement Revegetation in Riparian Habitat and Sensitive Natural Communities Disturbed during Construction.

Substantial adverse effects on state or federally protected wetlands. Applicable mitigation: MM HAZ-1, Hazardous Materials Spill Prevention and Containment.

Substantial interference with wildlife movement, established wildlife corridors, or the use of native wildlife nursery sites. Applicable mitigation: MM HAZ-1.

Conflict with local policies or ordinances protecting biological resources. Applicable mitigation: MM BIO-3, MM BIO-10.

Cultural Resources

Adverse change in the significance of a historical resource. Applicable mitigation: MM CR-1: Conduct Cultural Resources Awareness Training, Provide Tribal and Archaeological Monitors during All Ground Disturbing Activities, and Immediately Halt Construction if Cultural Resources Are Discovered, Evaluate All Identified Cultural Resources for Eligibility for Inclusion in the CRHR/NRHP, and Implement Appropriate Mitigation Measures for Eligible Resources.

Adverse change in the significance of an archaeological resource—Less than Significant with Mitigation. Applicable mitigation: MM CR-1, MM CR-2: Erect Exclusionary Fencing to Protect Known Archaeological Resources.

Disturbance of any human remains, including those interred outside of formal cemeteries. Applicable mitigation: CR-3: Immediately Halt Construction if Human Remains Are Discovered and Implement Applicable Provisions of the California Health and Safety Code Section 7050.5

Geology, Soils, and Seismicity

Destruction of a unique paleontological resource or site or unique geological feature. Applicable mitigation: MM GEO-1: Halt Construction if Paleontological Resources Are Discovered, Evaluate Discoveries for Uniqueness, and Implement Appropriate Mitigation Measures for Unique Resources.

Hazards and Hazardous Materials

Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. Applicable mitigation: MM HAZ-1.

Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. Applicable mitigation: MM HAZ-1.

Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. Applicable mitigation: MM TR-1, Prepare and Implement a Construction Traffic Management Plan.

Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires. Applicable mitigation: MM WF-1, Implement Fire Suppression Measures during Construction.

Hydrology and Water Quality

Violate any water quality standards, waste discharge requirements or otherwise substantially degrade water quality. Applicable mitigation: MM HAZ-1.

Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff. Applicable mitigation: MM HAZ-1.

Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. Applicable mitigation: MM HAZ-1.

Land Use

Divide an established community. Applicable mitigation: MM TR-1.

Public Services

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services?

Fire protection. Applicable mitigation: MM WF-1.

Parks. Applicable mitigation: MM TR-1.

Other public facilities. Applicable mitigation: MM TR-1.

Transportation

Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment). Applicable mitigation: MM TR-1.

Inadequate emergency access. Applicable mitigation: MM TR-1.

Tribal Cultural Resources

Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically

defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

(i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)

(ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe

Applicable mitigation: MM CR-1, MM CR-2, MM CR-3.

Wildfire

Substantially impair an adopted emergency response plan or emergency evacuation plan. Applicable mitigation: MM TR-1.

Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire.

Applicable mitigation: MM WF-1.

Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment. Applicable mitigation: MM WF-1.
