

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: 911 Emergency Call Center Project

Lead Agency: City of Fresno

Contact Name: Mike Mooneyham

Email: mike.mooneyham@fresno.gov Phone Number: 559-621-8623

Project Location: Fresno, Fresno County
City County

Project Description (Proposed actions, location, and/or consequences).

The City of Fresno (City) is proposing the construction of a new 12,072-square-foot 911 Emergency Call Center for the Fresno Police Department on a 1.25-acre project site located in the eastern portion of the City's Municipal Service Center (MSC). The proposed emergency call center would consist of a single-story building with a large call center space, office space for managers and supervisors, a conference room, a training room, breakrooms, restrooms, an exercise and fitness room, a server room, an electrical room, and an outdoor courtyard. The proposed emergency call center would be operational 24 hours a day, every day of the calendar year, and would be operated and maintained by the Fresno Police Department. Operation of the emergency call center would involve transferring existing operations (i.e., number of employees) from the police department. It is anticipated that future operation of the emergency call center would generate 30 to 35 new employment opportunities.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Air Quality: The project has the potential to disturb asbestos containing material (ACM). Mitigation has been identified to reduce risk associated with ACM.

Biological Resources: The project has the potential to disturb nesting migratory birds during construction activities. Mitigation has been identified to reduce potential impacts through a preconstruction nesting bird survey and implementation of avoidance buffers if birds are observed in the project area.

Cultural/Tribal Cultural Resources: The project has the potential for inadvertent discovery of unknown cultural/tribal cultural resources. Mitigation has been identified to reduce impacts through implementation of proper protocol.

Hazards and Hazardous Materials: The project has the potential to disturb ACM and lead containing paint (LCP). Mitigation has been identified to reduce risk associated with ACM and LCP through proper testing, handling, and disposal techniques.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
