The City of Atwater (Applicant) proposes to construct a new water well to serve the residents of Atwater. The well is designed to output approximately 2,000 gallons per minute (gpm) and be equipped with a variable frequency drive to adjust output based on demand. Treatment systems will also be constructed. The well and treatment systems will be hidden from view by a concrete masonry unit wall and an access road off of Champagne Way will also be constructed.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
