

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Adobe Creek Sewer Main Replacement Project

Lead Agency: City of Los Altos

Contact Name: Thanh Nguyen

Email: Tnugyen@losaltosca.gov

Phone Number: 650-947-2624

Project Location: Los Altos

City

Santa Clara

County

Project Description (Proposed actions, location, and/or consequences).

The City is proposing to replace the existing Adobe Creek Sewer Main which includes 53 sewer lines, totaling 6,580 linear feet. The project site is located largely within private properties, the City's public right-of-way, and various parks. The existing sewer mains are due for replacement because of their current condition. The purpose of the proposed project would increase resiliency and longevity of the sewer main and would greatly reduce maintenance needs associated with sewer line repair.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The IS/MND for the proposed project identifies potentially significant impacts of the project related to biological resources (sensitive species and associated habitats may be impacted by construction activities), air quality (construction emissions from equipment and fugitive dust), cultural and tribal cultural resources (accidental discovery of unknown archaeological resources and/or human remains), geology and soils (accidental discovery of paleontological resources), hydrology and water quality (erosion impacts), noise (construction noise impacts) and transportation/traffic (traffic impacts during construction, emergency access). Mitigation measures proposed in the Draft IS/MND include agency-identified measures to reduce toxic air contaminant emissions (Bay Area Air Quality Management District-recommended fugitive dust control measures and engine controls for construction equipment); avoid impacts to biological resources (rare plant surveys, pre-construction surveys for nesting bird surveys and special-status species, replacement of protected trees to be removed, and tree protection measures); avoid impacts to cultural, tribal cultural, and paleontological resources (compliance with CEQA Guidelines Section 15064.5(f)); minimize siltation, sedimentation, and erosion (erosion control plan); minimize noise impacts (construction noise reduction measures); and ensure emergency access throughout the project site (traffic control plan).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy are known to the Lead Agency.

Provide a list of the responsible or trustee agencies for the project.

California Air Resources Board, Department of Boating and Waterways, Caltrans District 4, California Department of Fish and Wildlife Region 3, Office of Historic Preservation, Department of Parks and Recreation, Native American Heritage Commission, Public Utilities Commission, Regional Water Quality Control Board #2, State Water Resources Control Board Division of Water Quality, Department of Toxic Substances Control, Department of Water Resources.
