

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

 Project Title: Alameda Creek West End North Turnaround Project

 Lead Agency: Alameda County Flood Control & Water Conservation District

 Contact Name: James Yoo

 Email: jamesy@acpwa.org

 Phone Number: 510-670-6632

 Project Location: Fremont
*City*
Alameda
*County*

Project Description (Proposed actions, location, and/or consequences).

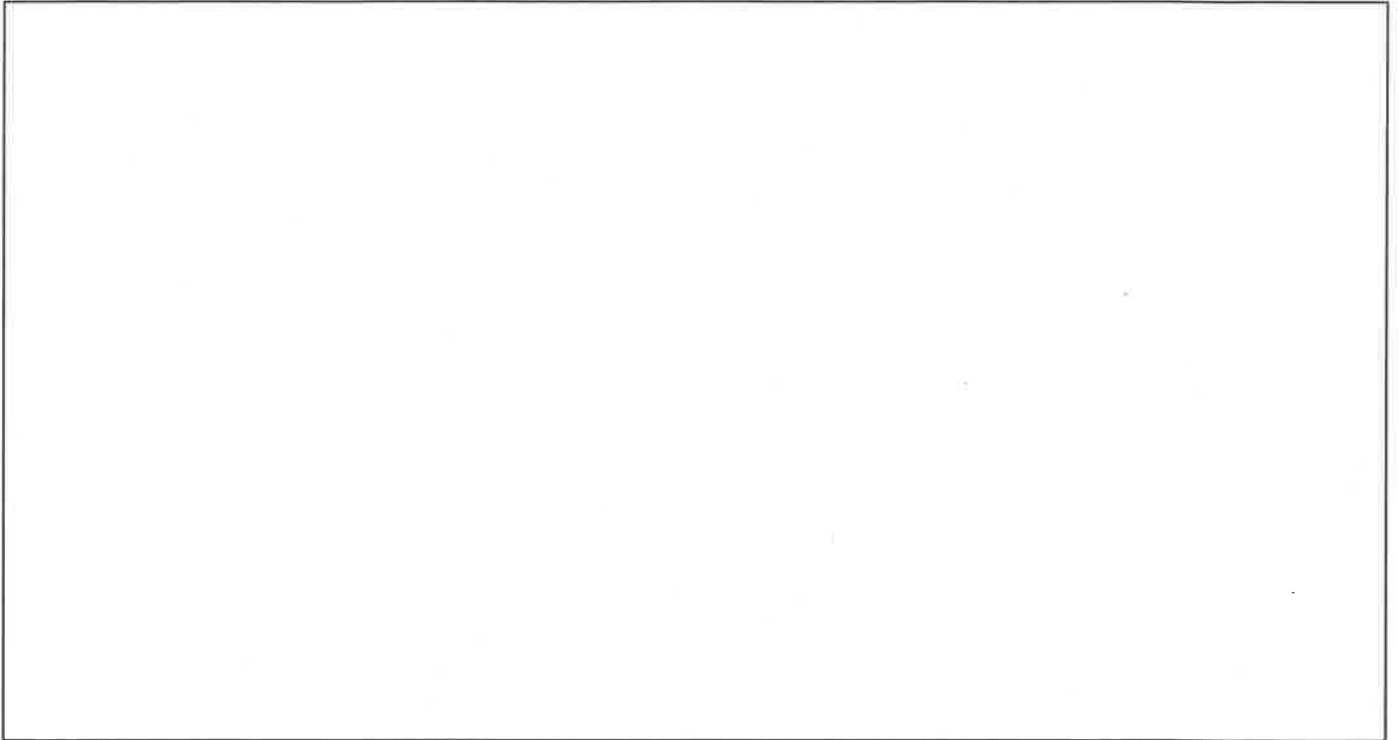

The Alameda County Flood Control and Water Conservation District (District) plans to reconstruct a circular turnaround structure along the north bank levee at the mouth of Alameda Creek (Zone 5, Line A) in Fremont, Alameda County, California. Erosion along the San Francisco Bay shoreline has damaged the terminus of the existing levee vehicular access road turnaround and to minimize potential shoreline erosion, the new vehicular turnaround structure would be re-located approximately 600 feet upstream from the original turnaround location. The District would mitigate the Project's impacts to intertidal marsh by creating a season wetland, approximately 2.5 miles upstream from the Project.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

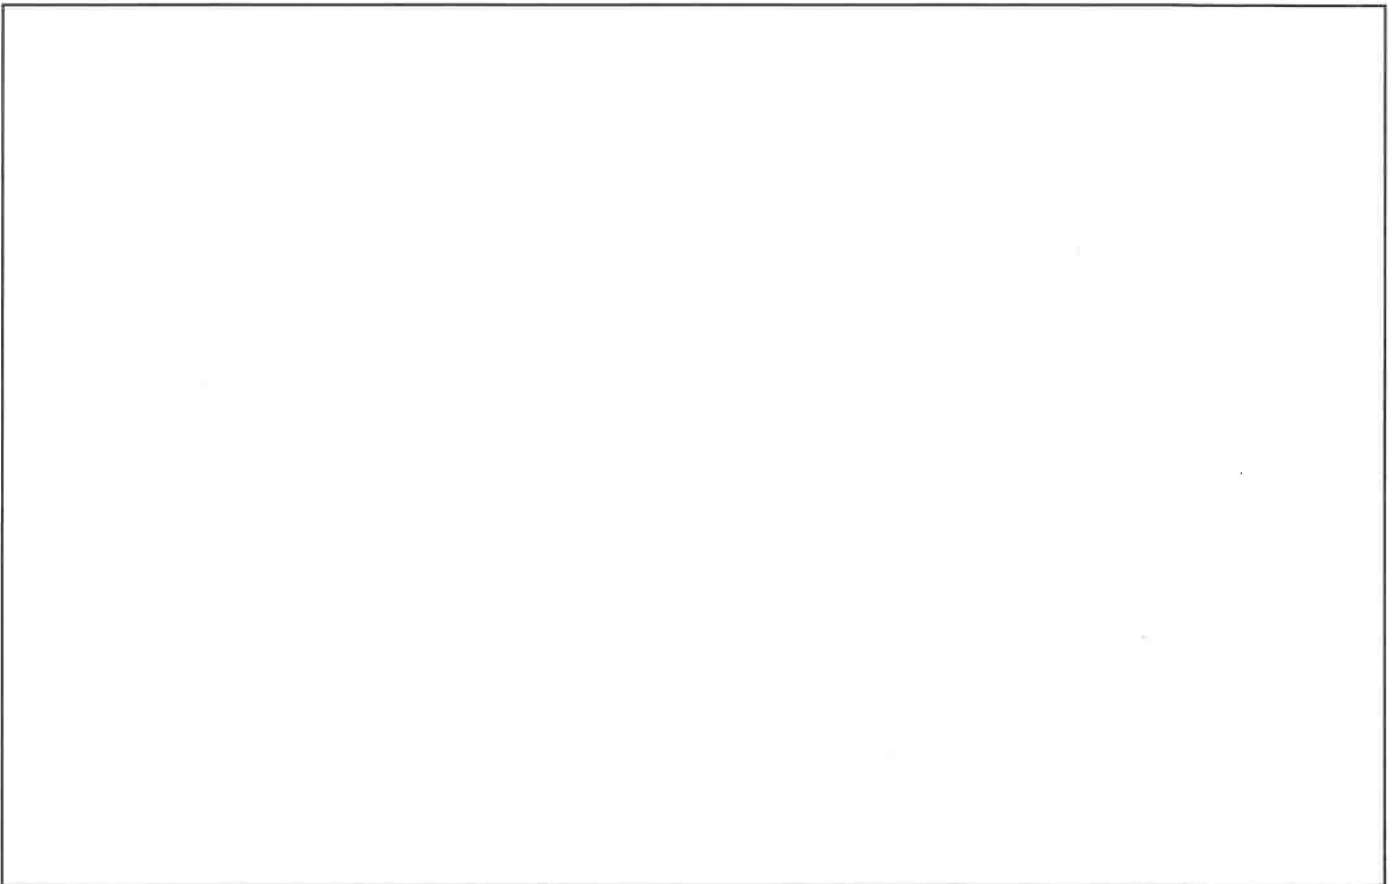

The Initial Study for the proposed project identified potentially significant impacts in the environmental area of Biology, Tribal and Cultural Resources, and Transportation. Environmental analysis determined that measures were available to mitigate potential adverse impacts to insignificant levels. As a result, a Mitigated Negative Declaration (MND) has been prepared pursuant to Public Resources Code Section 21080(c), 21063.5, and Article 6 of the California Environmental Quality Act (CEQA) Guidelines.

The project is located in a creek/wetland environment, and Biological Avoidance and Minimization Measures have been incorporated into the project to address potential impacts to biological resources. The project also addresses potential impacts to cultural resources if encountered during project implementation.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

A large, empty rectangular box with a thin black border, intended for the user to describe any areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
