Present Land Use/Zoning/General Plan Designation:

AE20 Exclusive Agricultural & A1 Agricultural District

Project Description: (please use a separate page if necessary)

The Project aims to improve groundwater sustainability in the region by improving water supply reliability and providing flexibility to local agencies complying with the SGMA. Agricultural land uses in the MAGSA area are exclusively dependent on groundwater for irrigation. Groundwater extraction has created a pumping cone of depression, resulting in large amounts of available aquifer storage space. The Project will provide a dry-year water supply to prevent agricultural field fallowing or loss of crops by establishing the 1.8 million AF capacity Bank underlying the MAGSA area, which is adjacent to, and will accept water from, the James Bypass and the Mendota Pool. The Project will be designed to divert and recharge up to 208,000 acre-feet per year (AFY) of contract water into the bank over a 5-month period, and subsequently recover up to 148,000 AFY of contract water from the bank over a 5-month period for use by SWP and CVP contractors.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
