Sacramento, California 95826

Project Title: Emergency Permit for Management of Hazardous Waste, Takeda Development Center Americas, Inc., San Diego, California

Project Location: 9625 Towne Center Drive, San Diego, California 92121

County: San Diego

Project Applicant: Bill Teudt, Environmental Health & Safety Director

Approval Action Under Consideration by DTSC: Emergency Permit

Statutory Authority: California Health and Safety Code, Chapter 6.5

Project Description: The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations (CCR), Title 22, Division 4.5, Chapter 20, Sec. 66270.61, has issued an Emergency Permit to the Takeda Development Center Americas, Inc. (Takeda), (EPA ID# CAR000286682) to treat hazardous wastes through a controlled reaction with chemical solutions. Specifically, two (2) 25-gram and one (1) 6-ounce containers of 2,4-Dinitrophenylhydrazine, one (1) 6-ounce container of 2,4 Dinitrophenol, one (1) 25-gram container of Nitrourea, one (1) 200-gram container of 1-Hydroxybenzotriazole , one (1) 5-gram container of 1-Methyl-3-Nitroguanidine, three (3) 25-gram containers of p-Toluenesulfonyl Hydrazide, eleven (11) (including three (3) 100-gram, two (2) 25-gram, two (2) 10-gram, and four (4) 5-gram) containers of 3,6-Dichloro-1,2,3,4,5-Tetrazine, two (2) 25-gram containers of 2,2 Azobisisobutyronitrile, one (1) 25-gram container of Diazald, one (1) 5-gram container of 1,1-AzobisCyanocyclohexane, four (4) 25-gram containers of Diethyl Amino Sulfur Trifluoride, one (1) 100-gram container of Sodium Amide must be stabilized prior to transport to an authorized hazardous waste treatment, storage, and disposal facility.

These chemicals are currently being stored at Takeda, located at 9625 Towne Center Drive, San Diego, California. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous wastes prior to

Department of Toxic Substances Control

storage and eventual transportation off-site by Clean Harbors Environmental Services (Clean Harbors).

Background: The containers have shock sensitive chemicals and peroxide formation present on either the inside, outside, or the bottom of the chemicals' containers, as well as the thread container caps. These chemicals may be unstable at relatively low concentrations, resulting in fire and/or explosion if improperly handled. DTSC considers these chemicals to be an imminent and substantial endangerment to human health and the environment. Chemical stabilization is recommended prior to transport to a permitted treatment, storage, and disposal facility.

Project Activities: The treatment of these hazardous wastes involves the addition of solutions to the containers in a controlled manner to reduce the reactive or ignitable characteristics of the chemicals. Treatment will take place within a designated exclusion zone. Only technicians from Clean Harbors will be allowed in the exclusion zone. Movement, preparation, and treatment of the containers will be in accordance with established standards.

Within 10 business days of the expiration of this permit, Takeda will submit a final report, signed in accordance with Title 22, CCR Sec. 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed. The Emergency Permit is effective beginning September 9, 2024 and shall expire on November 9, 2024.

Name of Public Agency Approving Project: Department of Toxic Substances Control

Name of Person or Agency Carrying Out Project: Clean Harbors Environmental Services

Exempt Status: Emergency Project Public [Resources Code (PRC), Sec. 21080(b)(4); 14 CCR, Sec.15269(b)(c)]

Reasons Why Project is Exempt: This action is necessary to prevent an emergency. Chemical stabilization of the chemicals is necessary prior to transportation to an authorized hazardous waste treatment, storage, and disposal facility to prevent accidental fire and/or explosion during transport.
