

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Twin Pines Park Belmont Creek Restoration Project

Lead Agency: City of Belmont

Contact Name: Sean Rose

Email: sean@srroseengineering.com

Phone Number: (650) 400-1462

Project Location: Belmont

City

San Mateo

County

Project Description (Proposed actions, location, and/or consequences).

The Project would undertake restoration activities which would improve and enhance a segment of Belmont Creek in Twin Pines Park by stabilizing eroded sections. Specific actions include widening the channel, raising the streambed, grading the bank, and constructing riffles. The stream restoration activities would improve water quality and enhance habitat and ecologic conditions along the creek. In addition, the Project would help alleviate downstream flooding and sedimentation, improve, and improve public safety. The Project would stabilize and enhance 458 LF of the creek bed and adjacent banks using biotechnical treatments and native riparian plantings

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Project would be located in an area with the potential for special status species to occur. Implementation of Mitigation Measure (MM) BIO-1 (Special-Status Plant Surveys), BIO-2 (Pre-construction Wildlife Surveys), BIO-3 (Roosting Bat Surveys), and BIO-4 (Nesting Birds Surveys) would mean that direct and indirect impacts to special-status plant and wildlife species would be less than significant with mitigation.

With respect to cultural resources, the Project is not anticipated to result in adverse effects to archaeological resources. However, given the proximity to previously recorded elements, MM CUL-1 (Conduct Archaeological and Tribal Cultural Monitoring), CUL-2 (Stop Work in the Event of an Archaeological Discovery) and CUL-3 (Protect Native American Human Remains) would reduce impacts related to currently unknown archaeological resources or human remains to a less-than-significant level with mitigation.

Potential hazards created during construction with trucks maneuvering on and off site would be reduced to a less-than-significant level through implementation of MM TRA-1 (Prepare and Implement a Construction Traffic Management Plan).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife
San Francisco Bay Regional Water Quality Control Board
U.S. Army Corps of Engineers
