RE: MITIGATED NEGATIVE DECLARATION FOR THE LOCATELLI SUBDIVISION
PROJECT DATED SEPTEMBER 13, 2024, STATE CLEARINGHOUSE NUMBER
[2024090532](#)

Dear Jonathan DiSalvo,

The Department of Toxic Substances Control (DTSC) received a Mitigated Negative Declaration (MND) for the Locatelli Subdivision project (project). The proposed project would demolish two existing residential dwellings and related outbuildings and to construct 24 semi-detached townhomes and one detached townhome for a total of 25 residential units. This project requires approval of a Subdivision, Planned Unit Development, Residential Development Permit with Density Bonus, Park Site Review, Roadway/Roadside Exception, and Preliminary Grading Review. After reviewing the Project, DTSC recommends and requests consideration of the following comments:

1. DTSC recommends that all imported soil and fill material should be tested to assess any contaminants of concern meet screening levels as outlined in [DTSC's Preliminary Endangerment Assessment \(PEA\) Guidance Manual](#). Additionally, DTSC advises referencing the [DTSC Information Advisory Clean](#)

[Imported Fill Material Fact Sheet](#) if importing fill is necessary. To minimize the possibility of introducing contaminated soil and fill material there should be documentation of the origins of the soil or fill material and, if applicable, sampling be conducted to ensure that the imported soil and fill material are suitable for the intended land use. The soil sampling should include analysis based on the source of the fill and knowledge of the prior land use. Additional information can be found by visiting [DTSC's Human and Ecological Risk Office \(HERO\) webpage](#).

2. If buildings or other structures are to be demolished on any project sites included in the proposed project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition, and disposal of any of the above-mentioned chemicals should be conducted in compliance with California environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with [DTSC's PEA Guidance Manual](#).

DTSC appreciates the opportunity to comment on the MND for the Locatelli Subdivision project Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances. If you have any questions or would like clarification on DTSC's comments, please respond to this letter or via [email](#) for additional guidance.

Sincerely,

Tamara Purvis
