

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: California Street and Redlands Boulevard Intersection Widening

Lead Agency: City of Redlands, Municipal Utilities and Engineering Department

Contact Name: Gerard Nepomuceno

Email: gnepomuceno@cityofredlands.org

Phone Number: 909-798-7584 ext. 4

Project Location: Redlands

City

San Bernardino

County

Project Description (Proposed actions, location, and/or consequences).

The Project proposes to reconstruct the northwest corner of the California Street and Redlands Boulevard intersection and widen the west side of California Street, refer to Figure 2-3: Site Plan. The California Street widening extends approximately 770 feet north of the Redlands Boulevard intersection. The Project site is located south of Interstate 10 (I-10) and extends into a portion of the Mission Zanja Channel. The Project includes storm drain improvements that involve the construction of a triple reinforced concrete box (RCB) culvert and concrete transition structure in the Mission Zanja Channel. The Project area is located on three (3) irregular shaped parcels: Accessor's Parcel Numbers (APNs) 0292-034-10, 0292-034-11 & 0292-034-17.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project area includes suitable habitat for: Pallid Bats, and nesting birds. Mitigation measures to be implemented include: preconstruction surveys for nesting birds and bats are required prior to culvert demolition. The project site also includes the Mission Zanja Channel which is defined as a wetland. Mitigation measures to be implemented include: jurisdictional delineation and USACE Consultation and Jurisdictional Regulatory Permitting. No prehistoric resources were identified during the archaeological field survey, this does not preclude the possibility of undisturbed subsurface deposits. In the unlikely event subsurface archaeological materials are identified during ground-disturbing activities, work shall be halted within 60 feet of the find. A qualified archaeologist shall be retained to record and evaluate the find. A Cultural Resource Management Plan is required before grading. A pre-grading meeting is required before any grading takes place, and on-site monitoring will be in place. Unstable soils have the potential to exist on site, and therefore the requirements and recommendations from the Soil Investigation will be followed. The discovery of tribal cultural resources is possible. The following measures shall be implemented: A Tribal Monitor from the from the Consulting Tribe (s) shall be onsite to monitor all project-related earthmoving work; if tribal cultural resources are discovered and avoidance cannot be ensured, a Monitoring and Treatment Plan shall be developed; and the City shall coordinate with the Consulting Tribe(s) throughout the life of the project. Worker training shall be required and in the unlikely event human remains or funerary objects are encountered, all activity within the work location shall be halted within 100 feet of the find, and the City and the San Bernardino County Coroner notified immediately.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy.

Provide a list of the responsible or trustee agencies for the project.

- U.S. Army Corps of Engineers (USACE), Regional Water Quality Control Board (RWQCB), and California Department of Fish and Wildlife (CDFW).
- City of Loma Linda
