

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: PD-24-21 - Sacramento River Floodplain Enhancement Project at Rancho Caleta

Lead Agency: County of Colusa

Contact Name: Steve Geiger

Email: sgeiger@countyofcolusaca.gov Phone Number: (530) 458-0891

Project Location: West side of Butte Slough Rd., east side of Sacramento River, Colusa,CA Colusa County  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project will restore floodplain and fish habitat adjacent to the Sacramento River by manipulating the existing topography, re-contouring a swale, and planting native vegetation. The purpose of the project is to provide juvenile salmonids access to high-quality rearing habitat on the floodplain and remove any barriers that prevent them from returning to the main channel when the floodwaters recede. Engineering designs plan to remove the earthen berm, allowing the site to flood more frequently at approximately 22,000 cfs. After the construction of floodplain enhancements, the applicant will restore the riparian habitat on the site. This includes actively planting native riparian species and supporting the restoration with ongoing monitoring and maintenance for three years. The proposed plans to enhance the floodplain will benefit resident and migratory birds, fish, mammals, and invertebrates.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially Significant Impact Include:  
  
Air Quality; Biological Resources; Cultural Resources; Greenhouse Gas Emissions; Hazards & Hazardous Materials; Hydrology/Water Quality; Tribal Cultural Resources; Wildfire.  
  
Mitigation Measures are:  
  
Mit. Measure #1 - Air Quality: Air Pollution and Dust Control; Mit. Measure #2 - Herbicide Application and Water Quality Protection: Increased Turbidity and Suspended Sediment Prevention, Herbicide Application; Mit. Measure #3 - Worker Environmental Training; Mit. Measure #4 - Valley Elderberry Longhorn Beetle; Mit. Measure #5 - Anadromous Fish; Mit. Measure #6 - Migratory Birds and Raptors; Mit. Measure #7 - Waters of the U.S.; Mit. Measure #8 - Cultural Resources; Mit. Measure #9 - Human Remains inadvertently discovered; Mit. Measure #10 - Hazardous Materials and Wildfire: Potential Spill of Hazardous Materials, Herbicide Application, Wildfire Potential.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy are known to Colusa County.

Provide a list of the responsible or trustee agencies for the project.

Responsible or trustee agencies for the project include:

California Department of Fish and Wildlife;  
California Regional Water Quality Control Board;  
Central Valley Flood Protection Board; and  
U.S. Army Corps. of Engineers.
