Pleasant Grove Stormwater Retention Basin Project
SCH# 2024100114
Placer County

Dear Ms. Lynch:

The Division of Safety of Dams (DSOD) has reviewed the Notice of Preparation for the Pleasant Grove Stormwater Retention Basin Project, submitted by the City of Roseville, which describes the construction of a new stormwater retention basin facility. The facility will consist of one or two basins, each including embankments of jurisdictional size.

As defined in sections 6002 and 6003, Division 3, of the California Water Code, dams 25 feet or higher with a storage capacity of more than 15 acre-feet, and dams higher than 6 feet with a storage capacity of 50 acre-feet or more are subject to State jurisdiction. The dam height is the vertical distance measured from the maximum possible water storage level to the downstream toe of the barrier.

As proposed, the work will be subject to the jurisdiction of DSOD. As such, a construction application, together with plans, specifications, and the appropriate filing fee, must be filed with DSOD for the work. All dam safety related issues must be resolved prior to approval of the application, and the work must be performed under the direction of a civil engineer registered in California. Erik Malvick, our Design Engineering Branch Manager, is responsible for the application process and can be reached at (916) 820-7820.

If you have any questions or need additional information, you may contact Area Engineer Thomas Banks at (916) 565-7821 or me at (916) 565-7820.

Sincerely,

Timothy Jimenez

Timothy W. Jimenez, P.E., Regional Engineer
