Present Land Use/Zoning/General Plan Designation:

Open Space

Project Description: *(please use a separate page if necessary)*

The City proposes to construct and operate a new stormwater retention basin facility to address the City's current and projected flood impact mitigation needs. The retention basin would help reduce potential downstream flooding that could be caused by projects that increase impervious area within the City and in certain portions of southwest Placer County. The construction of the retention basin facility would help reduce the risk of flood hazards to downstream communities, including portions of Sutter County.

The project would consist of one or two basins, one basin would be located south of Pleasant Grove Creek and the second basin, if constructed, would be located north of the creek. Each basin would have certain typical features such as embankments, low-flow channels, outlet structures, and spillways. Access roads would be constructed to provide access to the site for construction and maintenance activities.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
