Project Title: Norco College Center for Human Performance and Kinesiology MNDLead Agency: Riverside Community College DistrictContact Name: Mehran MohtashamEmail: Mehran.Mohtasham@rccd.edu Phone Number: (951) 222-8946Project Location: Norco Riverside
City *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project would involve the construction of the Center for Human Performance and Kinesiology Building (building), a 56,284 gross square feet, two-story building, which would support Norco College's physical education program. The building would include one classroom laboratory, office space, a conference room, a lounge, and athletic space. The athletics space would include a multi-use gymnasium with retractable seating for 500, a weight room, a training room, a cardio and wellness studio, exercise studios, storage space, a laundry room, student locker rooms, and faculty changing rooms. Once operational, the new building would provide students a comprehensive physical education program. The proposed project would result in the generation of approximately 500 to 1,000 new students and 6 new full-time employees. The building would host approximately 20 –25 home games per year with a maximum of 500 attendees, which could occur on weekday evenings and weekends. The project would become operational in July 2027.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

As discussed in Section 3.4 of the MND, through compliance with MM-BIO-1 through MM-BIO-3, project impacts to biological resources would be less than significant. As discussed in Section 3.5, through compliance with MM-CUL-1, MM-CUL-2, and MM-TCR-1, project impacts to cultural resources and tribal cultural resources would be less than significant. As discussed in Section 3.9, through compliance with MM-HAZ-1, project impacts to hazards and hazardous materials would be less than significant. As discussed in Section 3.13, through compliance with MM-NOI-1, project impacts to noise would be less than significant. Therefore, with mitigation incorporated, the project would not result in a significant impact.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy.

Provide a list of the responsible or trustee agencies for the project.
