

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Suscol Headwaters Park

Lead Agency: Napa County Regional Park and Open Space District

Contact Name: Chris Cahill

Email: ccahill@ncrposd.org

Phone Number: 7072534847

Project Location: Unincorporated Napa County

*City*

*County*

Project Description (Proposed actions, location, and/or consequences).

Adoption of an amended Park Development Plan by the Napa County Regional Park and Open Space District to allow the Suscol Headwaters Park to be improved and operated as a publicly-accessible open space and park and recreational facility. Access would be via a new entrance, +/- 0.75 acre parking lot, and trailhead off North Kelly Road across from Camino Dorado as well as through the existing Napa Solano Ridge Trail connection to Skyline Wilderness Park. Proposed development primarily consists of natural-surface, multi-use, non-motorized trails. Phase 1 of the Suscol Headwaters Park Development Plan was adopted in January 2020, including opening the park to the public through Skyline Park and approval of a trail network north of the main Jameson Canyon ridgeline. This project would expand the Park Development Plan to include Phase 2 development south of the main Jameson Canyon ridgeline including a trail network and a trailhead parking lot located off North Kelly Road, along with making some minor changes to the adopted Phase 1 trail plan. No development is presently proposed in Solano County. The proposed Park Development Plan and additional supporting information are available online at <https://napaoutdoors.org/documents/suscol-headwaters-park-phase-2-park-development-plan/>.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts are related to special status plants including Streamside daisy (*Erigeron bioletti*) and Narrow-anthered Brodiaea (*Brodiaea leptandra*). Mitigation measures are:

Mitigation Measure Biological Resources 1: Prior to the start of construction, a qualified biologist will flag the existing eight streamside daisy plants plus a 10-foot buffer surrounding the plants, such that all trail construction will avoid the plants.

Mitigation Measure Biological Resources 2: Prior to the start of any trail construction in or near the wooded riparian zone of Fagan Creek, a qualified biologist will conduct a focused in-season (May to July) survey to identify and flag any Narrow-anthered Brodiaea there-existing. Construction near any discovered plants shall maintain a 10-foot buffer, such that all trail construction will avoid the plants.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.

Responsible (R) and Trustee (T) Agencies:  
California Department of Fish and Wildlife (T)
