Present Land Use/Zoning/General Plan Designation:

Public Park

Project Description: (please use a separate page if necessary)

The proposed Remedial Action Plan (RAP) for the remediation of chemicals of potential concern (COPCs) in soil at Boorman Park (Site). The remedial action would involve capping and institutional controls, excavation, soil stabilization, and offsite disposal. This remedial action was selected because it is the most effective and acceptable alternative for achieving the site Remedial Action Objectives, which consist of minimizing or eliminating potential exposure of site receptors to COPCs; reducing the human health-based risks associated with onsite COPCs in soil and groundwater so that the site is acceptable for restricted land use; and remediating impacted site media so that COPCs are either below their respective remediation goals or mitigated to protect site receptors.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
