Project Description:

The project would restore flow for a stretch of Arroyo Las Positas and improve water quality by increasing the adjacent riparian habitat and reducing sediment input resulting from flood events. Arroyo Las Positas flows from east to west through the center of the project site, which includes portions of the Las Positas Golf Course and an undeveloped parcel to the east. Project elements include expanding the channel flood bank; installing flood walls, flood berms, flood gates, and culverts; raising one golf cart path bridge; and relocating golf course features. Construction work would require the removal of 116 riparian trees, which would be replaced at a 3:1 ratio.
