The existing system has reached its end-of-life. The components are prone to failures and new equipment are necessary to meet current directives and policies. Project work includes replacing cables, loop detection sites, controller cabinets, accessible pedestrian signals, and pedestrian signal heads and installing an intersection camera with performance measure. There will be minimal soil disturbance when installing foundations for the controller cabinets and associated pull boxes. All project activities will occur within the Caltrans Right-of-Way. Environmental Commitments are contained in the ECR.
