Project Title: Howard Road Drainage And Embankment Repair

Project Location: See attached vicinity map

Description of Nature, Purpose, and Beneficiaries: See attached project description

Public Agency Approving Project: San Joaquin County Public Works Department

Name of Agency Carrying Out Project: San Joaquin County Public Works Department

This is to advise that the San Joaquin County Public Works Department has approved the above described project on 10/15/2024 and has made the determination that the project is exempt due to the following:

Exempt Status (check one):

- Ministerial (Sec. 21080 (b) (1); 15268)
- Declared Emergency (Sec. 21080 (b) (3); 15269(a))
- Emergency Project (Sec. 21080 (B) (4); 15269(b) (c))
- Categorical Exemption: Existing Facilities (Sec. 15301 (c))
- Statutory Exemption (Sec. 15282(l))

Reason(s) why project is exempt: The project will repair damages to roadway, restoring functionality and enhancing safety.

HOWARD ROAD DRAINAGE AND EMBANKMENT REPAIR

Project Description

Project Location:

Howard Road: East and west of the San Joaquin River. **See attached Vicinity Map.**

Project Justification:

Howard Road has experienced roadway and embankment damages due to severe weather, daily traffic usage, agricultural equipment usage and time. As a result, the following repairs are needed to restore proper drainage to ensure the integrity of the embankment and roadway. As a result, repairs are needed to restore functionality to the road.

Scope of Work:

The project will consist of:

1. Removing and replacing approximately 4 feet of existing roadway asphalt (AC) shoulders on the northeast and southeast side of the bridge approach.
2. Placing back a twelve (12) inch section of Hot Mix Asphalt (HMA) and a three (3) inch section of HMA "key" to bridge the new shoulders with the existing roadway. Using Class 2 Aggregate Base (AB) where needed to prepare subgrade for Hot Mix Asphalt (HMA) placement, and placing and compact (95% relative compaction).
3. Removing and replacing approximately 2,700 linear feet (LF) of existing six (6) inch Asphalt (AC) dike along both sides of the eastern bridge approach.
4. Removing and replacing six (6) cross pipes, twelve (12) Storm Drain Inlets (SDI) and six (6) down drains at the east and west sides of the bridge.
5. Creating a swale/drainage ditch to move water runoff to existing ditch system on the southwest corner of the bridge approach.
6. Placing Rip Rap under outfalls/down drains to prevent erosion on the south side of the bridge.
7. Repairing embankment erosion at various locations, as needed.

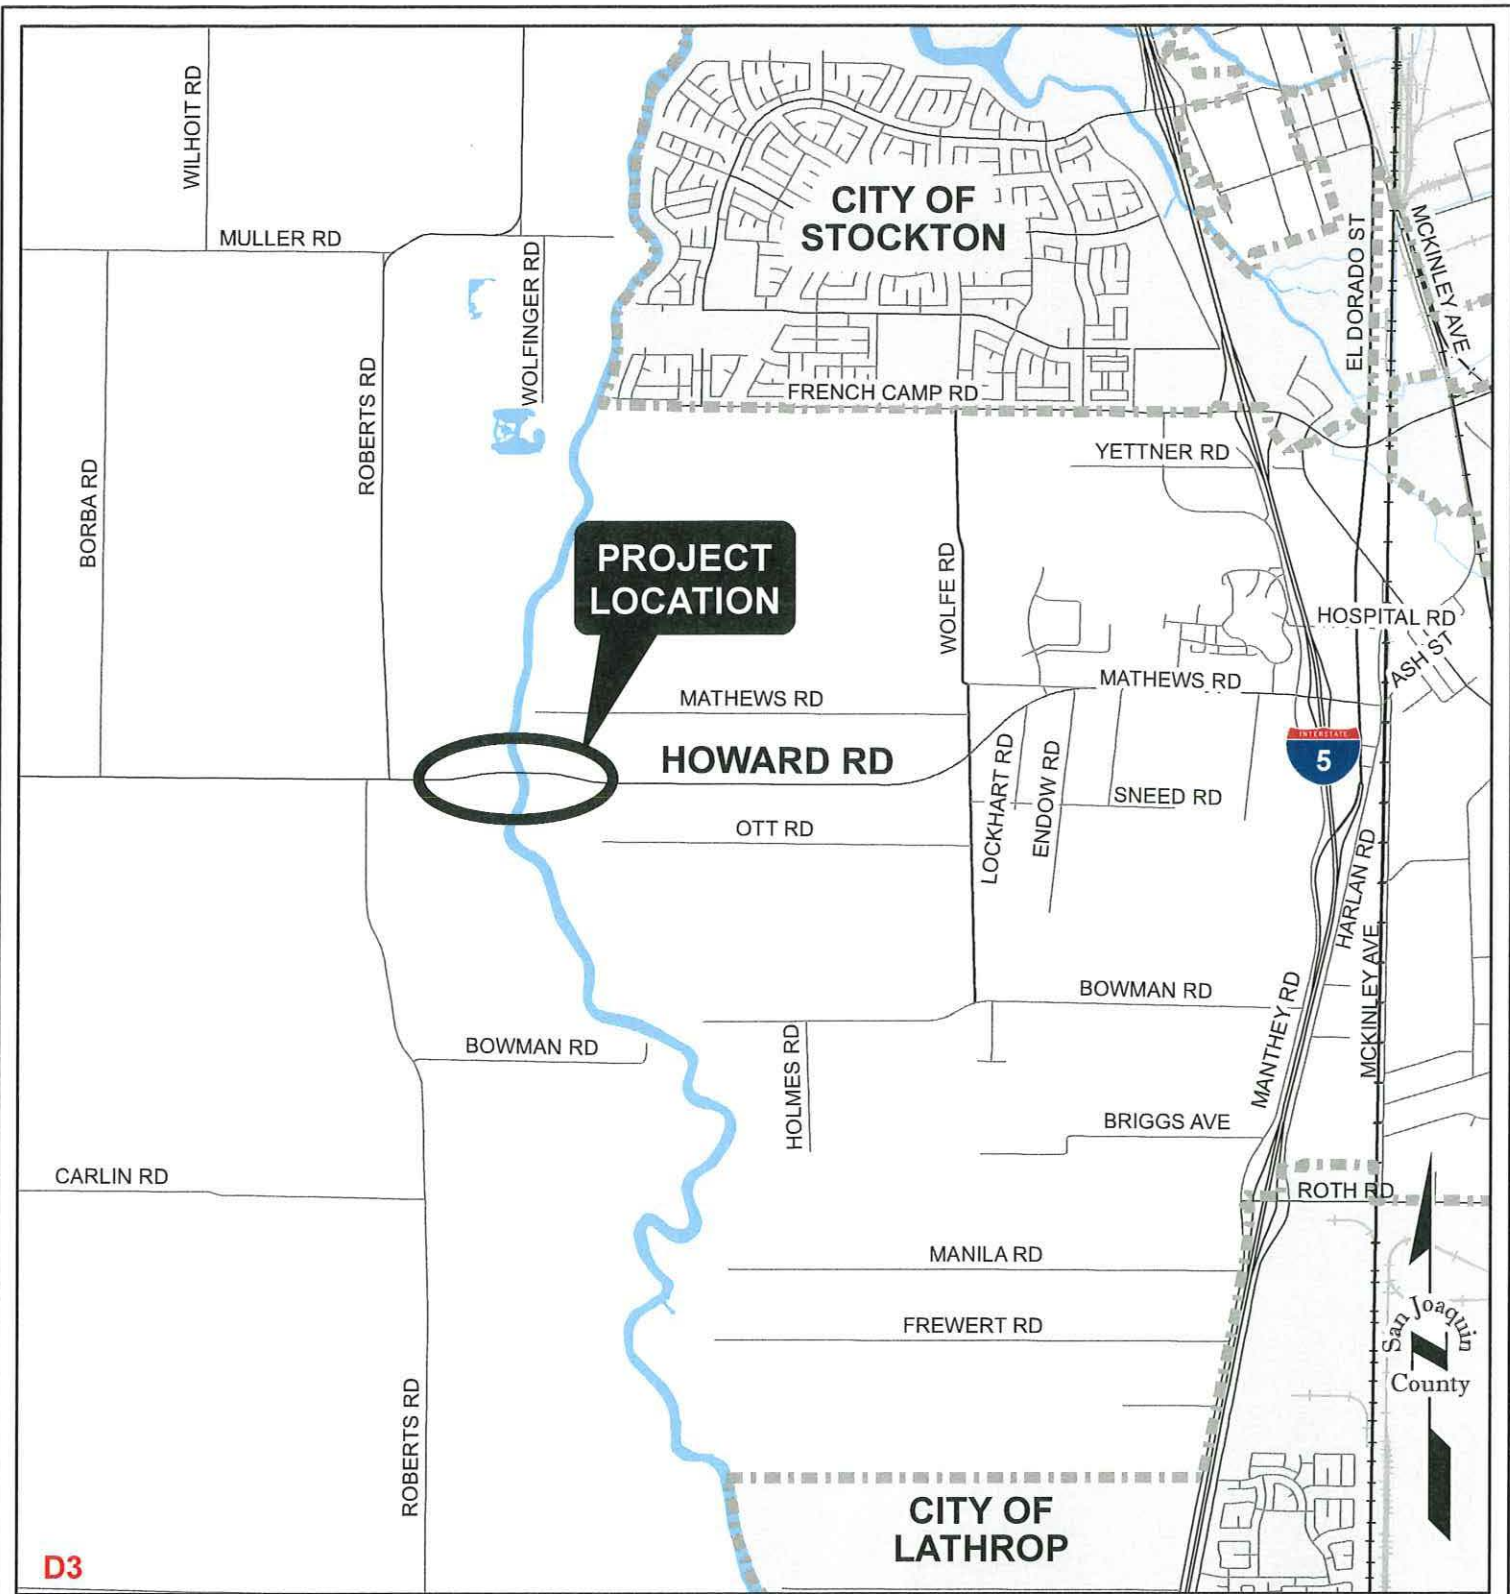

Environmental Setting:

In these portions of the San Joaquin County, land usage is primarily **rural with single family homes.**

There are many large trees adjacent to the project area. Nesting and migratory birds, protected by the Migratory Bird Treaty Act, may nest within these trees. Furthermore, the Swainson's Hawk, a raptor species of concern within the State of California and listed as threatened may nest adjacent to or within the project area. A pre-construction survey for nesting Swainson's Hawks and other migratory birds is recommended if construction is scheduled to occur from February 15th to September 1st.

Beneficiaries:

The public will see increased safety and fewer hazards as a result of the repairs.
