

COUNTY CLERK'S USE

**CITY OF LOS ANGELES**  
OFFICE OF THE CITY CLERK  
200 NORTH SPRING STREET, ROOM 395  
LOS ANGELES, CALIFORNIA 90012  
**CALIFORNIA ENVIRONMENTAL QUALITY ACT**  
**NOTICE OF EXEMPTION**  
(PRC Section 21152; CEQA Guidelines Section 15062)

Pursuant to Public Resources Code § 21152(b) and CEQA Guidelines § 15062, the notice should be posted with the County Clerk by mailing the form and posting fee payment to the following address: Los Angeles County Clerk/Recorder, Environmental Notices, P.O. Box 1208, Norwalk, CA 90650. Pursuant to Public Resources Code § 21167 (d), the posting of this notice starts a 35-day statute of limitations on court challenges to reliance on an exemption for the project. Failure to file this notice as provided above, results in the statute of limitations being extended to 180 days.

## JUSTIFICATION FOR PROJECT EXEMPTION CASE NO. ENV-2024-6424-CE

The Planning Department has determined that the California Environmental Quality Act (CEQA) of 1970 and the State CEQA Guidelines designate the subject project as Categorically Exempt under Article 19, Section 15301, Class 1 (*Existing facilities*) and Section 15303, Class 3 (*New construction or Conversion of small structures*). This project is located at 4176 East York Boulevard.

The project is for the remodel and total addition of 1,216 square feet to an existing one (1)-story, 788 square foot single-family dwelling. The addition includes a 749 square foot second story and 467 square feet to the lower level. The project also includes a 27 square foot addition to the existing front porch and the construction of a new one (1) car garage, the project qualifies for the Class 1 and Class 3 Categorical Exemptions.

The site is zoned R1-1-CDO and has a General Plan Land Use Designation of Low Residential. As shown in the case file, the project is consistent with the applicable Northeast Los Angeles Community Plan designation and policies and all applicable zoning designations and regulations. The subject site is wholly within the City of Los Angeles, on a site that is approximately 0.12 acres. Lots surrounding the subject site are developed with single-family dwellings. The site is previously disturbed and surrounded by development and therefore is not, and has no value as, a habitat for endangered, rare or threatened species. According to the Tree Disclosure Statement dated September 1, 2024, there are no Protected Trees/Shrubs on-site or within the adjacent public right-of-way. The project proposes the removal of one (1) non-Protected Tree on-site. Prior to any work on the right-of-way, the applicant will be required to obtain approved plans from the Department of Public Works. As there currently is no approved right-of-way improvement plan and for purposes of conservative analysis and the requirements of CEQA, Planning has analyzed the worst-case potential for removal of all street trees. Note, no street tree or Protected Tree may be removed without prior approval of the Board of Public Works/Urban Forestry (BPW) under LAMC Sections 62.161 – 62.171. At the time of preparation of this CE, no approvals have been given for any tree removals on-site or in the right-of-way by BPW.

The project will be subject to Regulatory Compliance Measures (RCMs), which require compliance with the City of Los Angeles Noise Ordinance, pollutant discharge, dewatering, stormwater mitigations; and Best Management Practices for stormwater runoff. These RCMs will ensure the project will not have significant impacts on noise and water. Furthermore, the project does not exceed the threshold criteria established by LADOT for preparing a transportation study. Therefore, the project will not have any significant impacts to traffic or

transportation. Interim thresholds were developed by DCP staff based on CalEEMod model runs relying on reasonable assumptions, consulting with AQMD staff, and surveying published air quality studies for which criteria air pollutants did not exceed the established SCAQMD construction and operational thresholds. The project site will be adequately served by all public utilities and services given that the construction of an addition to an existing single-family dwelling will be on a site which has been previously developed and is consistent with the General Plan.

There are six (6) Exceptions which the City is required to consider before finding a project exempt under Class 15303 and 15332: (a) Location; (b) Cumulative Impacts; (c) Significant Effect; (d) Scenic Highways; (e) Hazardous Waste Sites; and (f) Historical Resources.

The subject site is located within the Raymond Fault, specific Regulatory Compliance Measures (RCMs) in the City of Los Angeles regulate the grading and construction of projects in these particular types of "sensitive" locations and will reduce any potential impacts to less than significant. Regulatory Compliance Measures (RCMs) include compliance with the Building Code and the Noise Ordinance. These RCMs have been historically proven to work to the satisfaction of the City Engineer to reduce any impacts from the specific environment the project is located. Thus, the location of the project will not result in a significant impact based on its location. There is not a succession of known projects of the same type and in the same place as the subject project. As mentioned, the project proposes an addition to an existing single-family dwelling in an area zoned and designated for such development. All adjacent lots are developed with low residential uses, and the subject site is of a similar size and slope to nearby properties.

The project proposes a maximum floor area of 2,004 square feet (excluding the porch and garage) on a site that is permitted to have a maximum floor area of 2,340 square feet. A two (2)-story dwelling is not unusual for the vicinity of the subject site and is similar in scope to other existing single-family dwellings in the area. Thus, there are no unusual circumstances which may lead to a significant effect on the environment. Additionally, the only State Scenic Highway within the City of Los Angeles is the Topanga Canyon State Scenic Highway, State Route 27, which travels through a portion of Topanga State Park. The project site is located approximately 28 miles to the east of the Topanga Canyon State Scenic Highway. Therefore, the subject site will not create any impacts within a designated as a state scenic highway. Furthermore, according to Envirostor, the State of California's database of Hazardous Waste Sites, neither the subject site, nor any site in the vicinity, is identified as a hazardous waste site. The project site has not been identified as a historic resource by local or state agencies, and the project site has not been determined to be eligible for listing in the National Register of Historic Places, California Register of Historical Resources, the Los Angeles Historic-Cultural Monuments Register, and/or any local register; and was not found to be a potential historic resource based on the City's HistoricPlacesLA website or SurveyLA, the citywide survey of Los Angeles. Finally, the City does not choose to treat the site as a historic resource. Based on this, the project will not result in a substantial adverse change to the significance of a historic resource and this exception does not apply.
