Project Description (Proposed actions, location, and/or consequences).

Under the Orleans Mutual Water Company Water Treatment System Upgrade Project (proposed project), an existing water distribution system operated by the Orleans Mutual Water Company would be demolished or abandoned in place and replaced with new water alignment piping. A turnout would be installed at the bottom of Lower Camp Creek Road for future consolidation with the Orleans Community Services District and for water system redundancy. New non-potable fire hydrants would be installed at approximately 500-foot (ft) intervals along Camp Creek Road and Placer Drive. Additionally, a total of 38 new water services would be installed at each active and inactive property to replace the services of the existing water mains.
