PROJECT LOCATION: The City of Pico Rivera is in southeastern Los Angeles County, approximately ten miles southeast of downtown Los Angeles. The City is bordered by the City of Industry on the northeast, the City of Montebello on the northwest, the City of Downey on the southwest, the City of Santa Fe Springs on the southeast, the City of Whittier on the east, and the City of Commerce on the west.

PROJECT DESCRIPTION: The City of Pico Rivera is developing its Climate Action and Adaptation Plan (CAAP) to establish a comprehensive framework for addressing communitywide greenhouse gas (GHG) emissions and enhancing resilience to climate change. The CAAP aims to align with California Senate Bill 32, which sets a statewide GHG emissions reduction target of 40% below 1990 levels by 2030. This target is consistent with the California Environmental Quality Act (CEQA) and serves as a qualified GHG emissions reduction strategy under regional and state guidelines.

To achieve this goal, Pico Rivera's CAAP outlines targeted actions across six focus areas: buildings and energy, transportation and land use, materials and consumption, natural systems, water resources, and community resilience and well-being. These strategies are designed to be ambitious yet achievable through City-supported initiatives and community partnerships. By implementing the CAAP, the City is committed to fostering a sustainable and resilient future for all residents.

The project site includes individual parcels which are included on a list compiled pursuant to Section 65962.5 of the California Government Code.
