

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Coalinga Perimeter Trail Interconnect Gregory North Project

Lead Agency: City of Coalinga

Contact Name: Sean Brewer

Email: Sbrewer@coalinga.com Phone Number: (559) 935-1533 x143

Project Location: Coalinga, Fresno County

City

County

Project Description (Proposed actions, location, and/or consequences).

The proposed project would develop an approximately 1,917-foot-long pedestrian trail and associated improvements in the city of Coalinga, Fresno County, California. The proposed trail segment would include a 14-foot-wide shared-use bicycle and pedestrian trail. The proposed trail would consist of a 10-foot-wide paved asphalt concrete (AC) trail between 2 feet of unpaved shoulders on both sides.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Air Quality: The project has the potential to result in short-term air emissions, to expose sensitive receptors to short-term construction air emissions, and to disturb asbestos containing material (ACM) and/or lead based paint (LBP). Mitigation has been identified to reduce construction-related air emissions and risk associated with ACM and LBP.

Biological Resources: The project has the potential to disturb special-status animal species and Los Gatos Creek during construction activities. Mitigation has been identified to reduce potential impacts through preconstruction survey requirements and implementation of construction best management practices (BMPs).

Cultural/Tribal Cultural Resources: The project has the potential for inadvertent discovery of unknown cultural/tribal cultural resources. Mitigation has been identified to reduce impacts through cultural awareness training and implementation of proper protocol.

Hazards and Hazardous Materials: The project has the potential to disturb ACM and LBP as well as potential contaminants associated with the abandoned UPRR. Mitigation has been identified to reduce risk associated with potential contaminants.

Noise: The project has the potential to increase short-term ambient noise levels during construction. Mitigation has been identified to reduce construction-related noise through best management practices.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife
San Joaquin Valley Air Pollution Control District
