

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Sandmound Boulevard Water Systems Consolidation Project Initial Study/Mitigated Negative Declaration

Lead Agency: Diablo Water District

Contact Name: Sandra Leyba

Email: consolidations@diablowater.org Phone Number: 925-625-3798

Project Location: Oakley Contra Costa County
City *County*

Project Description (Proposed actions, location, and/or consequences).

Diablo Water District (DWD) has prepared this Initial Study/Mitigated Negative Declaration to evaluate the environmental effects of the Sandmound Boulevard Water Systems Consolidation Project. The proposed project is within unincorporated Contra Costa County, east of the City of Oakley, and a small part of the project is within the City limits. Four, small, independent drinking water systems would be consolidated, including M-27 Willow Park Marina (consisting of Willow Park Marina and Mariner Estates), Sandy Point Mobile Home Park, Delta Mutual Water Company, and Oakley Mutual Water Company. Three of the water systems received compliance orders from the Contra Costa County Environmental Health Program for exceeding state water quality standards for arsenic. The four water systems are within the sphere of influence for DWD. The proposed project is to install new pipelines, valves, and fire hydrants within existing paved roadways and to provide service connections to the customers of the four small water systems. The proposed project would construct and operate a new drinking water main distribution pipeline. The project would construct a new 12-inch polyvinyl chloride water distribution pipeline and connect to an existing DWD main pipeline.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The IS/MND does not identify any significant effects. Mitigation measures have been incorporated to reduce potentially significant impacts to a less than significant level. These mitigation measures are:

- Mitigation AQ-1 Enhanced BMPs for Construction Related Fugitive Dust Emissions
- Mitigation BIO-1 Measures to Minimize Impacts on Listed Raptors
- Mitigation BIO-2 Measure to Minimize Impacts to Nesting Birds
- Mitigation BIO-3 Environmental Awareness Training for Construction Personnel
- Mitigation BIO-4 Entrapment Prevention
- Mitigation CR-1 Construction Working Training
- Mitigation CR-2 Construction Monitoring
- Mitigation CR-3 Inadvertent Discovery Plan
- Mitigation CR-4 Discovery of Human Remains
- Mitigation GEO-1 Inadvertent Discovery
- Mitigation NOI-1 Scheduling and Planning
- Mitigation NOI-2 Noise Reduction Strategies

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no areas of controversy known to Diablo Water District.

Provide a list of the responsible or trustee agencies for the project.

State Water Resources Control Board, Bay Area Air Quality Management District, California Department of Fish and Wildlife, Central Valley Regional Water Quality Control Board, Contra Costa County, City of Oakley
