FROM: San Joaquin County
Department of Public Works
1810 East Hazelton Avenue
Stockton, California 95205

County Clerk
County of San Joaquin California
44 North San Joaquin Street, Suite 260
Stockton, California 95202

Project Title: North 99 Frontage Road West Resurfacing

Project Location: See attached vicinity map

Description of Nature, Purpose, and Beneficiaries: See attached project description

Public Agency Approving Project: San Joaquin County Public Works Department

Name of Agency Carrying Out Project: San Joaquin County Public Works Department

This is to advise that the San Joaquin County Public Works Department has approved the above described project on 10/25/2024 and has made the determination that the project is exempt due to the following:

Exempt Status (check one):

- Ministerial (Sec. 21080 (b) (1); 15268)
- Declared Emergency (Sec. 21080 (b) (3); 15269(a))
- Emergency Project (Sec. 21080 (B) (4); 15269(b) (c))
- Categorical Exemption: Existing Facilities (Sec. 15301 (c))
- Statutory Exemption (Sec. 15282(l))

Reason(s) why project is exempt: The project will repair an existing road and will not result in any major alterations to the configuration of the road. No additional vehicle travel lanes will be constructed.

NORTH 99 FRONTAGE ROAD WEST RESURFACING

Project Description

Project Location:

North 99 Frontage Road West: Eight Mile Road to Lodi City Limits. **See attached Vicinity Map.**

Project Justification:

The existing 32-foot-wide frontage road, consisting of two 12-foot traffic lanes and an 8-foot paved shoulder on the west side, was originally constructed in 1964-65 as part of the State Route 99 Freeway project. The road was built with a structural section comprising 0.17 feet (2 inches) of asphalt concrete (AC), 0.50 feet (6 inches) of aggregate base (AB), and 0.75 feet (9 inches) of aggregate subbase (ASB). From Eight Mile Road to Armstrong Road, the roadway was resurfaced in 1999 with an additional 0.25 feet (3 inches) of asphalt concrete. Since then, it has been maintained through periodic chip seals, with the most recent maintenance performed during 2017-2018.

The existing pavement consists of occasional alligator and block cracking as well as high transverse and longitudinal cracking throughout the project limits. In addition, there are areas of rutting in the wheel tracks and areas of structural failure.

Scope of Work:

The project will consist of:

1. Cold planing 0.25 feet (3 inches) of existing pavement across the entire 32-foot roadway width and replacing the removed pavement with 0.25 feet (3 inches) of Hot Mix Asphalt (HMA) (Type A).
2. Performing repairs on areas with pavement structural failures using 0.25 feet (3 inches) of HMA (Type A) after completing the cold planing process.
3. Replenishing a 6-foot-wide shoulder backing along the west side of the roadway edge where needed to ensure proper conformance.
4. Applying a penetration treatment at all intersection radii and extend 50 feet beyond the intersections or as required to achieve conformity.

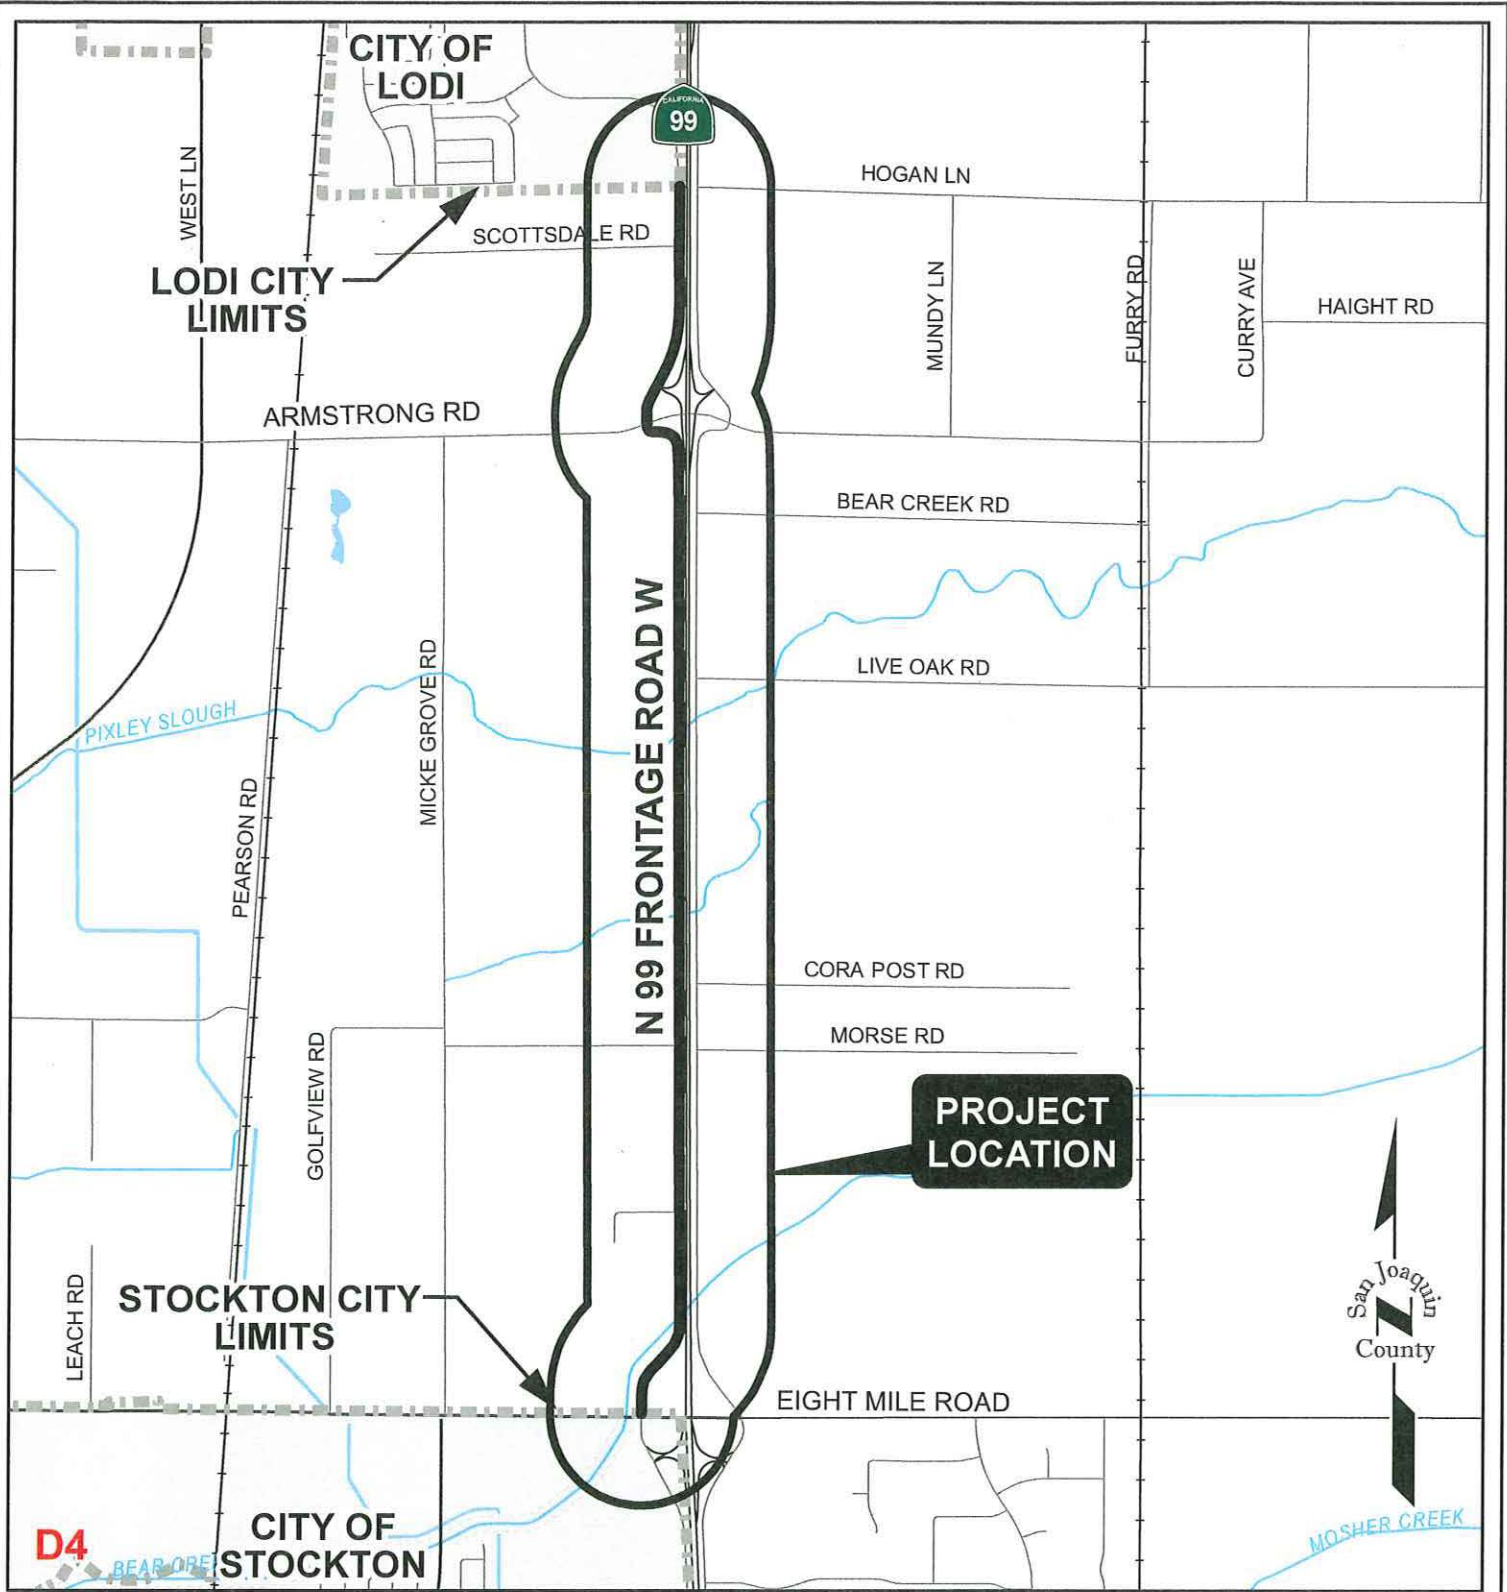

Environmental Setting:

In these portions of the San Joaquin County, land usage is primarily **rural with single family homes.**

There are many large trees adjacent to the project area. Nesting and migratory birds, protected by the Migratory Bird Treaty Act, may nest within these trees. Furthermore, the Swainson's Hawk, a raptor species of concern within the State of California and listed as threatened may nest adjacent to or within the project area. A pre-construction survey for nesting Swainson's Hawks and other migratory birds is recommended if construction is scheduled to occur from February 15th to September 1st.

Beneficiaries:

The public will see increased safety and fewer hazards with this well-maintained road. Overall, there will be reduced maintenance concerns and more reliability within the project area.
