

PUBLIC NOTICE

Quail Canyon Improvement District Replacement Well and Pipeline Project Notice of Availability of Initial Study Notice of Intent to Adopt a Mitigated Negative Declaration

WHAT IS BEING PLANNED?

Solano Irrigation District (District) to construct a new groundwater well and conveyance pipeline in unincorporated Solano County, California. The District owns and operates an existing public water system located in unincorporated Solano County north of the City of Vacaville, known as the Quail Canyon PWS (#CA4810012). The Quail Canyon PWS is one of the District's small rural public drinking water systems, and has a deteriorating well as its single source of water. A new well is necessary to reduce drought impacts of a failing well and increase fire resiliency within the service area. The District has prepared an Initial Study with Proposed Mitigated Negative Declaration which examines potential environmental impacts caused by the proposed project.

WHY THIS PUBLIC NOTICE?

The District has studied the effects this project may have on the environment. The studies within the Initial Study with Proposed Mitigated Negative Declaration show it would not significantly affect the quality of the environment. This notice is to advise you that the preparation of this report has been completed and is available for you to review.
